(v) For each date and Area fished, the vessel master shall ensure the following information is recorded in the harvest log: (A) vessel masters name; (B) vessel masters signature; (C) Trip Identification Number; (D) date fished; (E) Area fished; (F) number of hours fished; (G) number of sets; (H) depth of the net fished, in meshes; (I) Subarea(s) fished; (J) number of fish caught and retained by species or category as indicated on the Daily Catch Record page of the harvest log; (K) number of fish caught and released by species or category as indicated on the Daily Catch Record page of the harvest log; and (L) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(vi) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (b) Offload Records: (i) Offload Reports for each landing shall be recorded on the Offload Catch Record page in the harvest log not later than 24 hours following the completion of the landing.

(ii) For each offload, the vessel master shall ensure the following information is recorded in the harvest log: (A) vessel masters name; (B) vessel masters signature; (C) Trip Identification Number; (D) First date fished; (E) Last date fished; (F) Last Management Area fished; (G) Number of days fished; (H) Date and time offloaded; (I) Business and port, or name and VRN of Packer offloaded to (or specify personal use); (J) Fish slip number or sales slip number; and (K) Number of fish landed by species or category as indicated on the Offload Catch Record page of the harvest log.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(c) Pause Fishing Records: (i) The vessel master shall ensure that the Pause Fishing Reports are recorded in the harvest log not later than: (A) not later than 24 hours following the completion of a fishery opening; (B) if a fishery is extended, not later than 24 hours following the completion of the extension; (C) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, not later than 24 hours following the completion of the second opening; and (D) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(ii) For each day of a fishing trip on which no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; (B) Trip Identification Number obtained when the Start Fishing Report was made; (C) date on which no fishing occurred; and (D) Area in which the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu

master had intended to fish on that date.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(d) Cancel Trip Records: (i) The vessel master shall ensure that the Cancel Fishing Record is recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(ii) For each fishing trip where no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; and (B) intended date, time and Area where fishing was to have begun.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) End Fishing Records: (i) the vessel master shall ensure that the End Fishing Record is recorded in the harvest log not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip.

(9) The harvest log shall be kept on board the licensed vessel when the vessel is participating in a fishery opening and when travelling to or from a fishery opening.

(10) The harvest log shall contain data pertaining to a single vessel only.

(11) The harvest log shall be produced for examination on demand of a fishery officer, a fishery guardian or an observer.

(12) All recording in the paper harvest log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialled by the vessel master.

(13) Erasure of an entry in the harvest log is not permitted.

(14)(a) If a harvest log in which harvest information has been recorded is lost or destroyed, and no complete records of that harvest information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the Catch Reporting Service Provider. (b) The carbon copies of all pages from the paper harvest log with harvest information would represent a complete record of harvest information. The harvest log shall be replaced prior to any subsequent fishing trips.

(15)(a) Subject to subsection 6(16), the licence holder shall ensure that all paper harvest logs issued, whether used to record fishing or not, are delivered to the issuing Catch Reporting Service Provider by January 31, 2018, and that all records recorded in those paper harvest logs are entered into the Salmon Catch Database by December 31, 2018. Returned harvest logs shall contain the original copies of all

Document Released Under the Access to Information Act / Document divulgué en vertu

pages issued.

(b) Carbon copies from the completed paper harvest log(s) shall be retained by the licence holder until December 31, 2018. In cases where the harvest log(s) is (are) lost during delivery to the Catch Reporting Service Provider, images of these carbon copies (either fax or photocopy images) shall be delivered forthwith to the Catch Reporting Service Provider as a backup.

(16) Where a licensed fishing vessel has been leased to a fisher who is different from the named licence holder, the lessee shall be responsible for the submission of the harvest log.

(17) Nil Reports: (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by April 30, 2018.

(b)Submitting a Nil report: (i)If a harvest log was issued, the licence holder shall complete the Nil Report form that was included in the harvest log, and return it with the harvest log to your logbook service provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder; or (ii) harvesters using an electronic log, or if no logbook service arrangements were made, the licence holder shall send a letter to the Department stating that the licence(s) were not fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder.

(c)Nil reports shall be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

7. Catch Monitoring:

(1) All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

Note: The phone number and office hours for the "At-Sea Observer Service Provider" will be posted via Fishery Notice.

Fishery Notices can be viewed on the DFO website at: http://notices.dfo-mpo.gc.ca.

8. Landing of catch:

(1) Subject to subsection 8(1)(b), for those fishing in Areas 3, 4, or 5 the locations at which the landing of fish from the vessel is permitted will be announced prior to each opening via Fishery Notice. (b) All fish caught under the authority of this licence shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia) except: (i) fish sold directly to the public under authority of a fisherman's vending licence issued under the Fisheries Act (Province of British Columbia).

Document Released Under the Access to Information Act / Document divulgué en vertu

(2) Landing Observing Program: (a) All vessels participating in the Area C gill net fishery in Areas 3, 4, and 5, who are selected by the Landing Observer Service Provider shall provide the Landing Observer at the time of landing a daily catch report confirmation number demonstrating that the harvester has reported their catch.

(b) Should the vessel master be requested by the Landing Observer Service Provider, a Landing Observer shall be present during the landing of all catch to record the number of each species of fish delivered.

(c) The vessel master shall provide a Landing Observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing.

Note: The phone number and office hours for the "Landing Observer Service Provider" will be posted via Fishery Notice.

Fishery Notices can be viewed on the DFO website at: http://notices.dfo-mpo.gc.ca.

9. Fish Slips

(1) The vessel master shall provide records, in the form commonly known as a fish slip or sales slip, of all fish caught and retained under authority of this licence including fish that are sold to the public and retained for personal use.

(2) A fish slip shall be completed for each landing. (3) The vessel master shall ensure that each fish slip contains the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales; (vi) date of landing; (vii) time of landing; (viii) number of days fished in each Area; (ix) landed weight of each species by grade and method of dressing reported separately in pounds; (x) number of pieces landed for each species by grade and method of dressing of fish; (xi) price paid per pound, by species; and (xii) total catch value of all species.

(4) The vessel master, or the person delivering the fish, shall print their name and sign the fish slip once completed.

(5) The vessel master shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

(6) Where the vessel is licensed for more than one Salmon Area, catch from each Salmon Area shall be reported on separate fish slips.

Document Released Under the Access to Information Act / Document divulgué en vertu

Note: Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website: http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

10. Species At Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

11. Seabirds

(1) Fishers shall take precautions to avoid fishing among seabirds.

Note: Fishers are requested to retain all dead birds which are entangled and to release live and unharmed birds by placing them in the water. Please check all birds for metal bird bands (rings) on the leg. If a bird is banded please contact Laurie Wilson with the band number and capture date and location at 1-866-431-2473 (BIRD) or by the email below. Handle birds with gloves, double bag dead birds and label each bird with date, time, and location and store them on ice. Please call your local charter patrol to organize pick-up or drop them off at a local DFO office. Alternatively, please send photographs of birds with a reference object such as a coin, and the date, time and location to laurie.wilson@canada.ca. Your names and vessel names do not need to be identified or included.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

Document Released Under the Access to Information Act / Document divulgué en vertu

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all

Document Released Under the Access to Information Act / Document divulgué en vertu

catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish

Document Released Under the Access to Information Act / Document divulgué en vertu

Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round

Document Released Under the Access to Information Act / Document divulgué en vertu

weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the

Document Released Under the Access to Information Act / Document divulgué en vertu

middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be

Document Released Under the Access to Information Act / Document divulgué en vertu

used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing

Document Released Under the Access to Information Act / Document divulgué en vertu

designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of

Document Released Under the Access to Information Act / Document divulgué en vertu

completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that

Document Released Under the Access to Information Act / Document divulgué en vertu

all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time

Document Released Under the Access to Information Act / Document divulgué en vertu

February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

Document Released Under the Access to Information Act / Document divulgué en vertu

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish

Document Released Under the Access to Information Act / Document divulgué en vertu

dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25

Document Released Under the Access to Information Act / Document divulgué en vertu

Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Document Released Under the Access to Information Act / Document divulgué en vertu

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions

Document Released Under the Access to Information Act / Document divulgué en vertu

are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by

Document Released Under the Access to Information Act / Document divulgué en vertu

species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu

name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

Document Released Under the Access to Information Act / Document divulgué en vertu

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and

Document Released Under the Access to Information Act / Document divulgué en vertu

there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other

Document Released Under the Access to Information Act / Document divulgué en vertu

container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

Document Released Under the Access to Information Act / Document divulgué en vertu

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast:

Document Released Under the Access to Information Act / Document divulgué en vertu

Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

Document Released Under the Access to Information Act / Document divulgué en vertu

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the

Document Released Under the Access to Information Act / Document divulgué en vertu

weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

Version Date: 14-Jun-2017

CONDITIONS OF 20177/2018 COMMUNAL SALMON AREA D LICENCE Licence Period: April 1, 2017 to March 31, 2018 (GILL NET - JOHNSTONE STRAIT / WCVI)
Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of salmon fisheries, obtain a copy of the current Northern BC Salmon - Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for salmon.

Definitions

"Alaska Twist" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 4 or more filaments of equal diameter in each twine of the web and each of these filaments shall be a minimum of 0.20 mm in diameter.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Cancel Trip Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Cancel Trip Report (see subsection 5(7)).

"Catch Reporting Service Provider" means a company, organization or individual authorized by the Department to distribute harvest logs, and to process certain in-season and post-season reports required by these conditions of licence. Detailed information regarding the Catch Reporting Service Provider will be released by Fishery Notice prior to the fishing season. For additional information on the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

authorized Catch Reporting Service Provider for 2017, contact your fishery manager.

"Daily Catch Record" means the detailed record of catch retained and released associated with daily fishing activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Daily Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Daily Catch Report (see subsection 5(5)).

"day" means a calendar day, beginning at 00:01 h and ending at 23:59 h.

"Department" means the Department of Fisheries and Oceans.

"Designated landing site" means a location or vessel where the landing of salmon is permitted under these conditions.

"Dockside Monitoring" means monitoring by an approved Landing Observer Service Provider, of all fish landed and any retained on board after landing, by species.

"Electronic Logbook" (E-Log) means a computer application approved by the Department that captures commercial catch and other fishery-related information in an electronic format. The computer application shall transmit this information into the Salmon Fishery Database using the data specifications set out by the Department.

"End Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an End Fishing Report (see subsection 5(10)).

"Fisher Identification Number (FIN)" means the unique identification number issued to fishers by the Department for licensing and other fisheries management purposes.

"fishery opening" means a period during which fish may be caught under authority of this licence pursuant to the Pacific Fishery Regulations, 1993.

"fishing trip" means the time between leaving a port to commence commercial salmon fishing and the return to a port or landing of catch that results in a discontinuation of fishing for one day or longer.

"gill net set time" means the period of time beginning with entry of the first portion of the web into the water and ending when the last portion of the web leaves the water.

"gill net soak time" means the period of time beginning when the gill net is fully extended for a fishing set and ending with the commencement of the retrieval of the gill net from the water.

"harvest log" means the record of fishing activities required to be kept under these

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Hours Fished" means the number of hours spent in an area open to commercial fishing where the licensed vessel is engaged in any fishing activities, including but not limited to, all activities related to setting, hauling, picking, cleaning, and transiting between sets.

"landing" means the removal of fish from the licensed vessel, whether to a shore-based facility or to a another vessel.

"Landing Observer" means an individual designated pursuant to section 39(1) of the Fishery (General) Regulations to monitor salmon landings and verify the weight and number of each species of salmon landed as required by these conditions of licence.

"Landing Observer Service Provider" means a company designated pursuant to section 39.1 of the Fishery (General) Regulations to provide Salmon Landing Observers as required by these conditions of licence. Detailed information regarding the Landing Observer Service Provider will be released by Fishery Notice prior to the fishing season. For additional information on the authorized Landing Observer Service Provider for 2017, contact your fishery manager.

"Multi-strand" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 30 or more filaments of equal diameter in each twine of the web.

"observer" means a person designated by the Regional Director-General to carry out duties set out in subsection 39(2) of the Fishery (General) Regulations.

"Pause Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Pause Fishing Report (see subsection 5(6)).

"Salmon Fishery Database" means a restricted access computer database maintained by the Department, which stores information required by these conditions to be reported to the Department.

"Trip Identification Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Start Fishing Report (see subsection 5(4)).

"Validation Form" means the unique form provided by the Landing Observer Service Provider after a catch validation event has occurred.

"Vessel Registration Number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

"wild Coho Salmon" means any Coho Salmon that does not possess a healed scar

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

in place of the adipose, pelvic or pectoral fin, or in place of a maxillary.

1. Communal Conditions (1) Fish caught under authority of this licence may be sold, traded or bartered.

(2) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

(3) Size of fish permitted to be taken: (a) No person shall catch and retain a Halibut that is less than (i) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (ii) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(b) No person shall catch and retain a Sablefish that is less than (i) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(c) No person shall catch and retain a lingcod that is less than (i) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (ii) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

(4) Identification of fishing vessel and gear: (a) The designated vessel shall be identified in accordance with section 26 of the Fishery (General) Regulations. (b) All fishing gear shall be identified in accordance with sections 27 and 29 of the Fishery (General) Regulations.

2. Species and quantities of fish permitted to be taken:

(1) Species of fish: (a) Chinook Salmon, Chum Salmon, Coho Salmon, Pink Salmon and Sockeye Salmon, subject to variation of the close times set out in the Pacific Fishery Regulations, 1993.

(b) Subject to subsection 2(1)(c), retention of wild Coho Salmon is not permitted.

(c) Subject to variation of the close times set out in the Pacific Fishery Regulations, 1993, retention of wild Coho Salmon is permitted in the following waters during the periods of time set out: (i) Subareas 23-1 to 23-7 during the period June 1, 2017 to September 30, 2017; and (ii) Area 25 during the period August 1, 2017 to October 30, 2017.

(2) Catch prohibited on board the licensed vessel while fishing: (a) No salmon caught on a previous fishing trip shall be on board the licensed vessel while fishing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(b) No salmon of any species that are not permitted to be retained under the authority of this licence at the time and in the area being fished shall be on board the licensed vessel.

(c) No salmon of any species that have been caught and retained under the authority of another licence shall be on board the vessel while fishing.

(d) Subsection 2(2)(b) do not apply to fish being held temporarily in revival tanks as required.

3. Waters in which and times when fishing is permitted:

Fishing is permitted in Areas 11 to 15 and 23 to 27 for a species of salmon by gill net gear, in those areas and during those times when persons fishing under authority of a Category D licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for that species of salmon with a type of vessel licensed for Salmon Area D, in that area and during that time.

4. The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon gill net. In addition to any specifications prescribed by the Fisheries Act and the regulations made thereunder, Alaska Twist, Multi-strand or a combination of the two may be used.

(2) In Area 25 during the period July 1, 2017 to September 15, 2017 the maximum gill net length is 183 m.

(3) Subject to subsections 4(4) and 4(5), the maximum gill net soak time is sixty (60) minutes.

(4) In Subareas 11-1, 11-2, 12-9, 12-10, 12-11 and 12-12, the maximum gill net soak time is forty-five (45) minutes during the period April 1, 2017 to March 31, 2018.

(5) In Area 14: (a) From April 1, 2017 to September 30, 2017, the maximum gill net soak time is forty-five (45) minutes. (b) From October 1, 2017 to November 10, 2017, the maximum gill net soak time is sixty (60) minutes. (c) From November 11, 2017 to March 31, 2018 there is no restriction on soak time in Area 14.

(6) The gill net shall be completely retrieved from the water upon completion of each set.

(7) While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

The revival tank shall: (a) be constructed of non-transparent material; (b) have a minimum of two separate compartments; (c) have minimum inside dimensions of 100 cm x 20 cm x 40 cm for each compartment; (d) have a tight fitting lid made of non-transparent material for each compartment; (e) have a separate water inlet and outlet for each compartment; (f) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled, subject to subsection 4(8); (g) be in operation from 10 minutes prior to retrieval of the net and continue in operation at all times during retrieval of the net and while fish are being held in the tank; (h) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute; and (i) be kept clean and in operable condition; and (j) shall not be used for any purpose other than that outlined above.

(8) Subsection 4(7)(f) (release mechanism) does not apply to vessels 9.14 m or less in overall length and to bowpicker style gillnetters. For these vessels, a hand-held dip net is permitted to be used to transfer fish from the revival tank to the water. The dip net shall be constructed of a shallow bag of soft, knotless web attached to a handle.

(9) In Area 23, the gill net shall have attached four (4) additional buoys (floats) that are white or yellow in colour and at least 60 cm in circumference. These buoys shall be spread equidistantly between the buoy(s) marking the end of the gill net or the end of the gill net that is attached to the vessel.

Note: For all Areas, as set out in section 13 of the Pacific Fishery Regulations, 1993, the buoy marking each end of the gill net shall be orange in colour and at least 125 cm in circumference.

5. Fishing Reports:

(1) The person identified as the vessel master in subsection 5(4)(c)(iv) shall be on board the fishing vessel and shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities, including fish slips, for the duration of the fishing trip.

(2) If a new vessel master assumes operation of the vessel during a fishing trip, a new start fishing report shall be made and a new Trip Identification number acquired, as set out in subsection 5(4)(c).

(3) Failure to provide all required information will be considered a failure to report and will be treated as a failure to comply with these conditions.

(4) Start Fishing Report: (a) Prior to beginning fishing on a fishing trip, and no earlier than one week prior to initiating fishing activity, the vessel master shall: (i) inactivate all previous Trip Identification Numbers applicable to this licence by completion of either End Trip Reports or Cancel Trip Reports; (ii) make a Start Fishing Report and obtain a new Trip Identification Number; and (iii) record the Trip Identification Number in the appropriate space or spaces in the paper harvest log.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(b) To make a Start Fishing Report and obtain a new Trip Identification Number, the vessel master shall ensure that all Pause Fishing, End Fishing, Cancel Fishing, Daily Catch Reports, and Offload Catch Reports for all previous fishing trips have been completed.

(c) To obtain a Trip Identification Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) the harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; and (v) intended fishing start date, time and Area fishing will begin.

(d) The vessel master using an electronic harvest log shall enter their name for each start trip report and check the "I agree" box to the following statement: "You acknowledge that you are the Vessel Master as defined in the conditions of licence and as selected in this start Trip report ("Captain Name"). As the Vessel Master, you are responsible for all the data entered for this trip. If your name can not be selected you will need to contact the 2017 e-log service provider to update the e-log software before filing the Start Trip report."

(5) Daily Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) make a Daily Catch Report and obtain a Daily Catch Report Confirmation Number for each Daily Catch Record; and (ii) record the Daily Catch Report Confirmation Number in the appropriate space of the Daily Catch Record in the paper harvest log.

(b) The Daily Catch Report Confirmation Number shall be recorded on the Daily Catch Record page in the harvest log for each day fished: (i) not later than 12 hours following the completion of a fishery opening; or (ii) if a fishery opening is extended, not later than 12 hours following the completion of the extension.

(c) To obtain a Daily Catch Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; and (v) for each date and Area fished: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species category as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species category as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Fishery Database in a properly encoded electronic mail message.

(6) Pause Fishing Report: (a) For each day of a continuing fishing trip on which no fishing occurred, the vessel master shall: (i) make a Pause Fishing Report and obtain a Pause Fishing Report Confirmation Number; and (ii) record the Pause Fishing Report Confirmation Number in the appropriate space in the paper harvest log.

(b) Pause Fishing Report Confirmation Numbers shall be recorded in the harvest log: (i) not later than 12 hours following the completion of a fishery opening and prior to commencing a subsequent fishing trip; or (ii) if a fishery is extended, not later than 12 hours following the completion of the extension and prior to commencing a subsequent fishing trip.

(c) To receive a Pause Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number obtained when the Start Fishing Report was made; (v) date on which no fishing occurred; and (vi) Area in which the vessel master had intended to fish on that date.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(7) Cancel Trip Report: (a) If no fishing occurs on a planned fishing trip for which a Trip Identification Number was obtained the vessel master shall: (i) make a Cancel Trip Report and obtain a Cancel Trip Report Confirmation Number; and (ii) record the Cancel Trip Report Confirmation Number in the appropriate space in the paper harvest log.

(b) The Cancel Trip Report Confirmation Number shall be recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(c) To obtain a Cancel Trip Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) harvest log page number; (iii) Salmon Licence Area; and (iv) intended start date, time and Area where fishing was to have begun.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(8) Interim Reports: (a) Upon demand of a fishery officer, fishery guardian or a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

representative of the Department, the vessel master shall immediately provide orally in person or by radio, or in writing, any or all of the following information that may be requested: (i) an accurate estimate of the amount of fish on board the vessel as well as fish caught and released; (ii) information concerning the location of catch, rate of catch and method of transporting of the catch; and (iii) the name and location of the person or company buying the catch.

(9) End Fishing Report: (a) Not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip, the vessel master shall: (i) make an End Fishing Report and obtain a unique End Fishing Report Confirmation Number for each Trip Identification Number; and (ii) record the End Fishing Report Confirmation Number in the appropriate space in the paper harvest log.

(b) The vessel master shall ensure that a unique End Fishing Report Confirmation Number for each Trip Identification Number is obtained if fishing occurred on the fishing trip and: (i)if fishing stopped for 24 hours or longer for landing to a plant or to another vessel; or (ii) if the fishery closed for 12 consecutive hours or longer; and (iii) prior to a subsequent trip.

(c) To obtain an End Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number for the fishing trip being ended; and (v) last date, time and Area fished.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(10) Nil Reports: (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by January 31, 2018.

(b) Submitting a Nil report: (i) If a harvest log was issued, the Nil Report form that was included in the harvest log shall be completed and returned with the harvest log to the Catch Reporting Service Provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder. (ii) If no catch reporting service arrangements were made and no harvest log issued, a letter shall be sent to the Department stating that the licence(s) were not fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder, and be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

6. Harvest Log

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Unless otherwise specified below, this section applies to both the paper harvest log and electronic harvest log.

(1) The vessel master shall maintain a harvest log of all harvest operations. The format of the harvest log shall meet the requirements set out by the Department. For further information, a sample of a paper harvest log page can be found in the current Southern BC Salmon Integrated Fisheries Management Plan.

(a) To obtain an approved paper harvest log, the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(b) To obtain an approved electronic harvest log (E-log), the vessel master shall contact the Catch Reporting Service Provider for electronic harvest logs, prior to the first fishing trip of the season.

(2) If the paper harvest log contains more than one page, the pages shall be bound in such a manner that the removal of a page cannot be performed without leaving evidence of said removal.

(3) Each page of the paper harvest log shall be numbered sequentially.

(4) A carbon copy shall be made for each page of the paper harvest log.

(5) The vessel master shall ensure that the information recorded in the harvest log is complete and accurate.

(6) The vessel master using a paper harvest log shall print and sign their name and FIN beside each Daily Catch Record made in the paper harvest log. Vessel masters using electronic harvest logs shall select their name from the Captain Name list for each Start Fishing Report.

(7) A separate daily catch record entry in the harvest log shall be made for each Area fished.

(8) Recording of harvest log data: (a) Daily Catch Records: (i) In all Areas, Daily catch information shall be recorded on the Daily Catch Record page in the harvest log before any fish are landed.

(ii) A separate line on the Daily Catch Record page shall be used to record any additional catch harvested in the same calendar day following a landing.

(iii) If there are two separate fishery openings on one calendar day, harvest information from the first opening shall be recorded in the harvest log prior to the vessel participating in the second opening.

(iv) Subject to subsection 6(8)(a)(v), daily catch information for each day and Area fished shall be recorded on the Daily Catch Record page in the harvest log book not later than 23:59 h for each day fished.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(v) For Areas 23 to 27 fishing in a night-time fishery opening that spans two calendar days but is less than 12 hours in duration, the Daily Catch information shall be recorded on the Daily Catch Record page in the harvest log not later than 6 hours following the completion of the fishery opening.

(vi) For each date and Area fished, the vessel master shall ensure the following information is recorded in the harvest log: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of the net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species category as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species category as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(vii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(b) Pause Fishing Records: (i) The vessel master shall ensure that the Pause Fishing Reports are recorded in the harvest log not later than 12 hours following the completion of a fishery and prior to commencing a subsequent fishing trip or if a fishery is extended, not later than 12 hours following the completion of the extension and prior to commencing a subsequent fishing trip.

(ii) For each day of a fishing trip on which no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; (B) Trip Identification Number obtained when the Start Fishing Report was made; (C) date on which no fishing occurred; and (D) Area in which the vessel master had intended to fish on that date.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(c) Cancel Trip Records: (i) The vessel master shall ensure that the Cancel Fishing Record is recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(ii) For each fishing trip where no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; and (B) intended date, time and Area where fishing was to have begun.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) End Fishing Records: (i) the vessel master shall ensure that the End Fishing Record is recorded in the harvest log not later than 24 hours following the end of a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

fishing trip and prior to commencing a subsequent fishing trip.

(ii) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(9) The harvest log shall be kept on board the licensed vessel when the vessel is participating in a fishery opening and when travelling to or from a fishery opening.

(10) The harvest log shall contain data pertaining to a single vessel only.

(11) The harvest log shall be produced for examination on demand of a fishery officer, a fishery guardian or an observer.

(12) All recording in the paper harvest log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialled by the vessel master.

(13) Erasure of an entry in the harvest log is not permitted.

(14)(a)If a harvest log in which harvest information has been recorded is lost or destroyed, and no complete records of that harvest information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the Catch Reporting Service Provider. (b) The carbon copies of all pages from the paper harvest log with harvest information would represent a complete record of harvest information. The harvest log shall be replaced prior to any subsequent fishing trips.

(15)(a) Subject to subsection 6(16), the licence holder shall ensure that all paper harvest logs issued, whether used to record fishing or not, are delivered to the issuing Catch Reporting Service Provider by January 31, 2018 and that all records recorded in those paper harvest logs are entered into the Salmon Catch Database by December 31, 2018. Returned harvest logs shall contain the original copies of all pages issued.

(b) Carbon copies from the completed paper harvest log(s) shall be retained by the licence holder until December 31, 2018. In cases where the paper harvest log(s) is (are) lost during delivery to the Catch Reporting Service Provider, images of these carbon copies (either fax or photocopy images) shall be delivered forthwith to the Catch Reporting Service Provider as a backup.

(16) Where a licensed fishing vessel has been leased to a fisher who is different from the named licence holder, the lessee shall be responsible for the submission of the harvest log.

7. Catch Monitoring:

(1) All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) When issued stickers (tabs) as part of the catch monitoring program, the licence holder shall ensure the stickers (tabs) are displayed on each side of the vessel so that they are clearly visible from the water.

8. Landing of catch:

(1) Locations at which landing of fish from the vessel is permitted: (a) All fish caught under the authority of this licence during Sockeye Salmon directed fisheries in Areas 11 to 15 shall be landed at specified designated landing sites.

Note: The list of designated landing sites and designated packer vessels will be released by Fishery Notice prior to the fishery opening.
http://notices.dfo-mpo.gc.ca/fns-sap/index-eng.cfm

(2) Landing Observing Program (a) Where the vessel has participated in directed Sockeye Salmon fisheries in Areas 11 to 15:

(i) At the time of landing, should the vessel master be requested by the Landing Observer Service Provider, a landing observer shall be present during landing of all catch to record the number of each species of fish delivered; and (ii) The vessel master shall provide a Landing Observer, a fishery officer or a fishery guardian attending the landing, safe access to the vessel, to the vessel's paper or electronic harvest log, to the vessel's fish holds, to the freezers and to other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing.

Note: The company and contact information of the Landing Observer Service Provider will be posted via Fishery Notice. (b) The licensed vessel that is chosen by the Landing Observer Service Provider for dockside monitoring shall present the completed paper harvest log page or access to the electronic harvest log relevant to the current landing. The following information will be recorded by the Landing Observer prior to any landing: (i) vessel name and VRN; (ii) vessel master name and FIN; (iii) trip ID; (iv) the number of all fish by species on board; (v) Subarea(s) fished; (vi) harvest log identification number; and (vii) paper harvest log page number.

(c) The licensed vessel shall land all catch on board the vessel at the same location.

(d) If the licensed vessel has been chosen for validation, the vessel master shall retain a copy of the validation record provided by the Landing Observer on board the vessel for proof of validation.

(e) If the licensed vessel has been chosen for validation, the Landing Observer will conduct an inspection of all fish holds.

Note: As per subsection 2(2)(a), any fish retained shall be removed from the licensed vessel prior to each opening.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

9. Fish Slips:

(1) The vessel master shall provide records, in the form commonly known as a fish slip or sales slip, of all fish caught and retained under authority of this licence, including fish that are sold to the public and retained for personal use.

(2) A fish slip shall be completed for each landing.

(3) The vessel master shall ensure that each fish slip contains the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales; (vi) date of landing; (vii) time of landing; (viii) number of days fished in each Area; (ix) landed weight of each species by grade and method of dressing reported separately in pounds; (x) number of pieces landed for each species by grade and method of dressing of fish; (xi) price paid per pound, by species; and (xii) total catch value of all species.

(4) The vessel master, or the person delivering the fish, shall print their name and sign the fish slip once completed.

(5) The vessel master shall submit slips no later than seven days after landing. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

(6) If the vessel is licensed for more than one Salmon Area, the catch from each Salmon Area shall be recorded on a separate fish slip.

Note: Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

10. Species at risk:

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

11. Seabird Avoidance:

(1) Fishers shall take precautions to avoid fishing among seabirds.

Note: Fishers are requested to retain all dead birds which are entangled and to release live and unharmed birds by placing them in the water. Please check all birds for metal bird bands (rings) on the leg. If a bird is banded please contact Laurie Wilson with the band number and capture date and location at 1-866-431-2473 (BIRD) or by the email below. Handle birds with gloves, double bag dead birds and label each bird with date, time, and location and store them on ice. Please call your local charter patrol to organize pick-up or drop them off at a local DFO office. Alternatively, please send photographs of birds with a reference object such as a coin, and the date, time and location to laurie.wilson@canada.ca. Your names and vessel names do not need to be identified or included.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

This report may contain data rated up to Protected A.
Do not release this data to external parties.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

SALMON GILL NET Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FAG 21 2017

SALMON GILL NET Licence 2017 Date Issued: 09 Jun 2017

Licensed for: Commercial Fishing Expiry Date: 31 Mar 2018

Licence Holder:
FIN: 100409
SECRETARIAT OF THE HAIDA NATION
504 NAANII ROAD
PO BOX 589
MASSET BC
V0T 1M0

Designated Vessel:
VRN 312215
DOT 836507
Vessel LORMAX
Vessel OAL 10.31 Meters
Gross Tonnage .00 Cubic Meters
Net Tonnage .00 Cubic Meters

Reported Vessel Owner:
FIN: [redacted]
STEWART LAWRENCE MCDONALD
[redacted]

s.19(1)

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Licence Area: SALMON AREA C
Waters in which fishing is permitted: Areas 1 to 10, Subarea 101-7
Species: SALMON
Gear: GILL NET

IT IS A CONDITION OF THIS LICENCE THAT NO SALMON MAY BE ON BOARD THIS VESSEL DURING THE PERIOD COMMENCING SIX HOURS PRIOR TO THIS VESSEL BEING USED TO FISH IN A COMMERCIAL SALMON FISHERY AND ENDING TWELVE HOURS AFTER THIS VESSEL HAS BEEN USED TO FISH FOR SALMON IN A COMMERCIAL SALMON FISHERY EXCEPT FOR
(A) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE PACIFIC FISHERY REGULATIONS, 1993,
(B) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS IN WHICH THE MINISTER HAS AUTHORIZED THE SALE OF SALMON, AND(C) SALMON CAUGHT UNDER THE AUTHORITY OF A TIDAL WATERS SPORT FISHING LICENCE

THIS LICENCE DOES NOT AUTHORIZE FISHING FOR SALMON UNTIL THE FULL SALMON CONDITIONS OF LICENCE ARE ATTACHED. SCHEDULE II OPTION CONDITIONS DO NOT AUTHORIZE FISHING FOR SALMON.

Document Released Under the Access to Information Act / Document divulgué en vertu

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Version Date: 19-May-2017

CONDITIONS OF 2017/2017 COMMUNAL SALMON AREA C LICENCE Licence Period: April 1, 2017 to March 31, 2018 (GILL NET - NORTH COAST)

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of salmon fisheries, obtain a copy of the current Northern BC Salmon - Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for salmon.

Definitions

"Alaska Twist" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 4 or more filaments of equal diameter in each twine of the web and each of these filaments shall be a minimum of 0.20 mm in diameter.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Catch Reporting Service Provider" means a company, organization or individual authorized by the Department to distribute harvest logs and to process certain in-season and post-season reports required by these conditions of licence.

"Cancel Trip Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Cancel Trip Report (see subsection 5(8)).

"Daily Catch Record" means the detailed record of catch retained and released associated with daily fishing activities required to be kept under these conditions of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Daily Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Daily Catch Report (see subsection 5(5)).

"day" means a calendar day, beginning at 00:01 h and ending at 23:59 h.

"Department" means the Department of Fisheries and Oceans.

"Designated landing site" means a location where the landing of salmon is permitted.

"Dockside Monitoring" means monitoring by an approved Landing Observer Service Provider, of all fish landed and any retained on board after landing, by species.

"Electronic Logbook" (E-Log) means a computer application approved by the Department that captures commercial catch and other fishery-related information in an electronic format. The computer application shall transmit this information into the Salmon Fishery Database using the data specifications set out by the Department.

"End Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an End Fishing Report (see subsection 5(10)).

"Fisher Identification Number (FIN)" means the unique identification number issued to fishers by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"fishery opening" means a period during which fish may be caught under authority of this licence pursuant to the Pacific Fishery Regulations, 1993.

"fishing trip" means the time between leaving a port to commence commercial salmon fishing and the return to a port or the landing of catch that results in a discontinuation of fishing for one day or longer.

"gill net set time" means the period of time beginning with entry of the first portion of the web into the water and ending when the last portion of the web leaves the water.

"gill net soak time" means the period of time beginning when the gill net is fully extended for a fishing set and ending with the commencement of the retrieval of the gill net from the water.

"harvest log" means the record of fishing activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Hours Fished" means the number of hours spent in an area open to commercial fishing where the licensed vessel is engaged in any fishing activities, including but

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

not limited to, all activities related to setting, hauling, picking, cleaning, and transiting between sets. "landing" means the removal of fish from the licensed vessel, whether to a shore-based facility or to another vessel.

"Landing Observer" means an individual designated pursuant to subsection 39(1) of the Fishery (General) Regulations to monitor landings and verify the weight and number of each species of salmon landed as required by these conditions of licence.

"Landing Observer Service Provider" means a company designated pursuant to section 39.1 of the Fishery (General) Regulations to provide Landing Observers as required by these conditions of licence. Detailed information regarding the Landing Observer Service Provider will be released by Fishery Notice prior to the fishing season. For contact information for the authorized Salmon Landing Observer Service Provider for 2016, contact your fishery manager.

"Multi-strand" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 30 or more filaments of equal diameter in each twine of the web.

"observer" means a person designated by the Regional Director-General to carry out duties set out in subsection 39(2) of the Fishery (General) Regulations.

"Offload Catch Record" means the detailed record of catch offloaded associated with all offload activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Offload Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an Offload Catch Report (see subsection 5(6)).

"Pause Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Pause Fishing Report. (see subsection 5(7)).

"Salmon Fishery Database" means a restricted access computer database maintained by the Department, which stores information required by these conditions.

"Trip Identification Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Start Fishing Report (see subsection 5(4)).

"Vessel Registration Number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Communal Conditions (1) Fish caught under authority of this licence may be sold, traded or bartered.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

(3) Size of fish permitted to be taken: (a) No person shall catch and retain a Halibut that is less than (i) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (ii) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(b) No person shall catch and retain a Sablefish that is less than (i) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(c) No person shall catch and retain a lingcod that is less than (i) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (ii) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

(4) Identification of fishing vessel and gear: (a) The designated vessel shall be identified in accordance with section 26 of the Fishery (General) Regulations. (b) All fishing gear shall be identified in accordance with sections 27 and 29 of the Fishery (General) Regulations.

2. Species and quantities of fish permitted to be taken:

(1) Species of fish: (a) Sockeye Salmon, Coho Salmon, Pink Salmon, Chum Salmon and Chinook Salmon, subject to variation of the close times set out in the Pacific Fishery Regulations, 1993.

(2) Catch prohibited on board the licensed vessel while fishing: (a) No salmon caught on a previous fishing trip shall be on board the licensed vessel while fishing. (b) No salmon of species that are not permitted to be retained under the authority of this licence at the time and area being fished shall be on board the licensed vessel. (c) No salmon of any species that have been caught and retained under the authority of another licence shall be on board the vessel while fishing. (d) Subsection 2(2)(b) does not apply to fish being held temporarily in revival tanks as required.

3. Waters in which and times when fishing is permitted:

Fishing is permitted in Areas 1 to 10 and Subarea 101-7 for a species of salmon by gill net gear, in those areas and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Fishery Regulations, 1993 are authorized to fish for that species of salmon with a type of vessel licensed for Salmon Area C, in that area and during that time.

4. The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon gill net. In addition to any specifications prescribed by the Fisheries Act and the Regulations made thereunder, gill nets shall meet the following specifications:

(a) all nets greater than 60 meshes in depth shall have at least every fifth cork a distinctive colour (not white); and

(b) Alaska twist or multi-strand or a combination of the two is permitted. If Alaska twist is used, then the hang ratio shall not exceed 2.5:1.

(2) In Subareas 4-4, 4-5, 4-8, 4-9, 4-12, 4-14, 4-15, 5-1 and 5-2 during the period August 1, 2016 to March 31, 2017 the following applies: (a) the maximum gill net set time is forty (40) minutes; (b) the maximum gill net soak time is twenty (20) minutes; and (c) the maximum gill net length is 187.5 m.

(3) The gill net shall be completely retrieved from the water upon completion of each set.

(4) While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall:

(a) be constructed of non-transparent material; (b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm; (c) have a separate tight fitting lid for each compartment, made of non-transparent material; (d) have a separate inlet and outlet for each compartment; (e) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled; (f) be in operation from 10 minutes prior to retrieval of the net and continue in operation at all times during retrieval of the net and while fish are being held in the tank; (g) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute; (h) be kept clean and in operable condition; and (i) shall not be used for any purpose other than that outlined above.

5. Fishing Reports:

(1) The person identified as the vessel master in subsection 5(4)(c)(iv) shall be on board the fishing vessel and shall be considered to be the vessel master responsible

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

for all fishing, vessel handling and reporting activities, including fish slips, for the duration of the fishing trip.

(2) If a new vessel master assumes operation of the vessel during a fishing trip, a new start fishing report shall be made and a new Trip Identification number acquired, as set out in subsection 5(4)(c).

(3) Failure to provide all required information will be considered a failure to report and will be treated as a failure to comply with these conditions. (4) Start Fishing Report: (a) Prior to beginning fishing on a fishing trip and no earlier than one week prior to initiating fishing activity, the vessel master shall: (i) inactivate all previous Trip Identification Numbers applicable to this licence by completion of either End Trip Reports or Cancel Trip Reports; (ii) make a Start Fishing Report and obtain a new Trip Identification Number; and (iii) record the Trip Identification Number in the appropriate space or spaces in the harvest log.

(b) To make a Start Fishing Report and obtain a new Trip Identification Number, the vessel master shall ensure that all Pause Fishing, End Fishing, Cancel Fishing, Daily Catch Reports and Offload Catch Reports for all previous fishing trips have been completed.

(c) To obtain a Trip Identification Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and page number; (ii) Salmon Licence Area; (iii) vessel master's name and vessel master's Fisher Identification Number; and (iv) intended date, time and Area fishing will begin.

(d) The vessel master with electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) The vessel master using an electronic harvest log shall enter their name for each start trip report and check the "I agree" box to the following statement: "You acknowledge that you are the Vessel Master as defined in the conditions of licence and as selected in this start Trip report ("Captain Name"). As the Vessel Master, you are responsible for all the data entered for this trip. If your name can not be selected you will need to contact the 2017 e-log service provider to update the e-log software before filing the Start Trip report."

(f) If the vessel master wishes to fish in a different Area than recorded in the Start Fishing Report, the vessel master shall submit: (i) a Cancel Trip Report if no fishing has occurred; or (ii) an End Fishing Trip Report if fishing has occurred; and (iii) a new Start Fishing Report for the new Area.

(5) Daily Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Daily Catch Report Confirmation Number for each Daily Catch Report; and (ii) record the Daily Catch Report Confirmation Number in the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

appropriate space of the Daily Catch Report in the paper harvest log.

(b) The Daily Catch Report Confirmation Number shall be recorded on the Daily Catch Record page in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; (ii) if a fishery opening is extended, not later than 24 hours following the completion of the extension; (iii) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, a Daily Catch Report is not required until 24 hours following the completion of the second opening; (iv) for fishery openings that last longer than seven (7) days, a Daily Catch Report shall be made within seven (7) days of fishing for each day of fishing. (For example, if the fishery commences on a Monday, a Daily Catch Report shall be made before the following Monday) and (v) for fishery openings in Areas 3, 4 and 5 where the vessel master lands to a shore-based designated landing site, the daily catch report shall be completed prior to landing.

(c) To obtain a Daily Catch Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; (v) for each date and Area fished: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species or category as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species or category as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(6) Offload Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) obtain an Offload Catch Report Confirmation Number for each Offload that has occurred; (ii) record the Offload Catch Report Confirmation Number in the appropriate space of the Offload Catch Record page in the harvest log; and

(b) The Offload Catch Report Confirmation Number shall be recorded in the harvest log for each offload not later than 24 hours after an offload occurred.

(c) To obtain an Offload Catch Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; and (v) for each offload: (A) First date fished; (B) Last date fished; (C) Last Management Area fished; (D) Number of days fished;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(E) Date and time offloaded; (F) Business and port, or name and VRN of Packer offloaded to (or specify personal use); (G) Fish slip number or sales slip number; and (H) Number of fish landed by species or category as indicated on the Offload Catch Record page of the harvest log.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(7) Pause Fishing Report: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Pause Fishing Report Confirmation Number for each day of a fishing trip on which no fishing occurred; and (ii) record the Pause Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) Pause Fishing Report Confirmation Numbers shall be recorded in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; (ii) if a fishery is extended, not later than 24 hours following the completion of the extension; (iii) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, not later than 24 hours following the completion of the second opening; and (iv) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(c) To obtain a Pause Fishing Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number obtained when the Start Fishing Report was made; (v) date on which no fishing occurred; and (vi) Management Area in which the vessel master had intended to fish on that date.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(8) Cancel Trip Report: (a) If no fishing occurs on a planned fishing trip for which a Trip Identification Number was obtained, the vessel master shall: (i) obtain a Cancel Trip Report Confirmation Number; and (ii) record the Cancel Trip Report Confirmation Number in the appropriate space in the harvest log.

(b) The Cancel Trip Report Confirmation Number shall be recorded in the harvest log no later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(c) To obtain a Cancel Trip Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(iii) Salmon Licence Area; and (iv) intended date, time and Area where fishing was to have begun.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (9) Interim Reports: (a) Upon demand by a fishery officer, fishery guardian or a representative of the Department, the vessel master shall immediately provide orally in person or by radio, or in writing, any or all of the following information that may be requested: (i) an accurate estimate of the amount of fish on board the vessel as well as fish caught and released; (ii) information concerning the location of catch, rate of catch and method of transporting of the catch; (iii) the name and location of the person or company buying the catch; and (iv) the trip identification number obtained from the Catch Reporting Service Provider.

(10) End Fishing Report: (a) Not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip, the vessel master shall: (i) make an End Fishing Report and obtain a unique End Fishing Report Confirmation Number for each Trip Identification Number; and (ii) record the End Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) The vessel master shall ensure that a unique End Fishing Report Confirmation Number for each Trip Identification Number is obtained if fishing occurred on the fishing trip and: (i)if fishing stopped for 24 hours or longer for landing to a plant or to another vessel; or (ii) if the fishery closed for 12 consecutive hours or longer; or (iii) if the vessel changes fishing areas; and (iv) prior to a subsequent trip.

(c) To obtain an End Fishing Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number from the most recent completed fishing trip; (v) last date, time and Area fished; and (vi) designated landing site where the fish were landed if landing occurred.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (11) Nil Reports (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by January 31, 2017.

(b) Submitting a Nil report: (i) If a harvest log was issued, the Nil Report form that was included in the harvest log shall be completed and returned with the harvest log to the Catch Reporting Service Provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder. (ii) If no catch reporting service arrangements were made, a letter shall be sent to the Department stating that the licence(s) were not

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder, and be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

6. Harvest Log:

Unless otherwise specified below, this section applies to both the paper harvest log and electronic harvest log. (1) The vessel master shall maintain a harvest log of all harvest operations. The format of the harvest log shall meet the requirements set out by the Department. For further information, a sample of the paper harvest log page can be found in the current Northern BC Salmon Integrated Fisheries Management Plan.

(a) To obtain an approved paper harvest log, the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(b) To obtain an approved electronic harvest log (E-log), the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(2) If the paper harvest log contains more than one page, the pages shall be bound in such a manner that the removal of a page cannot be performed without leaving evidence of said removal.

(3) Each page of the paper harvest log shall be numbered sequentially.

(4) A carbon copy shall be made for each page of the paper harvest log.

(5) The vessel master shall ensure that the information recorded in the harvest log is complete and accurate.

(6) The vessel master using a paper harvest log shall print and sign their name and FIN beside each Daily Catch Record made in the paper harvest log. Vessel masters using electronic harvest logs shall select their name from the Captain Name list for each Start Fishing Report. (7) A separate daily catch record entry in the harvest log shall be made for each Area fished.

(8) Recording of harvest log data: (a) Daily Catch Records: (i) In all Areas, Daily catch information shall be recorded on the Daily Catch Record page in the log before any fish are landed.

(ii) A separate line on the Daily Catch Record page shall be used to record any additional catch harvested in the same calendar day following a landing.

(iii) If there are two separate fishery openings on one calendar day, harvest information from the first opening shall be recorded in the harvest log prior to the vessel participating in the second opening.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(iv) Daily Catch information shall be recorded on the Daily Catch Record page in the harvest log not later than 23:59 h of each day fished. If a fishery spans two calendar days then the harvest information shall be recorded before 23:59 h of the second day.

(v) For each date and Area fished, the vessel master shall ensure the following information is recorded in the harvest log: (A) vessel masters name; (B) vessel masters signature; (C) Trip Identification Number; (D) date fished; (E) Area fished; (F) number of hours fished; (G) number of sets; (H) depth of the net fished, in meshes; (I) Subarea(s) fished; (J) number of fish caught and retained by species or category as indicated on the Daily Catch Record page of the harvest log; (K) number of fish caught and released by species or category as indicated on the Daily Catch Record page of the harvest log; and (L) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(vi) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (b) Offload Records: (i) Offload Reports for each landing shall be recorded on the Offload Catch Record page in the harvest log not later than 24 hours following the completion of the landing.

(ii) For each offload, the vessel master shall ensure the following information is recorded in the harvest log: (A) vessel masters name; (B) vessel masters signature; (C) Trip Identification Number; (D) First date fished; (E) Last date fished; (F) Last Management Area fished; (G) Number of days fished; (H) Date and time offloaded; (I) Business and port, or name and VRN of Packer offloaded to (or specify personal use); (J) Fish slip number or sales slip number; and (K) Number of fish landed by species or category as indicated on the Offload Catch Record page of the harvest log.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(c) Pause Fishing Records: (i) The vessel master shall ensure that the Pause Fishing Reports are recorded in the harvest log not later than: (A) not later than 24 hours following the completion of a fishery opening; (B) if a fishery is extended, not later than 24 hours following the completion of the extension; (C) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, not later than 24 hours following the completion of the second opening; and (D) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(ii) For each day of a fishing trip on which no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; (B) Trip Identification Number obtained when the Start Fishing Report was made; (C) date on which no fishing occurred; and (D) Area in which the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

master had intended to fish on that date.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(d) Cancel Trip Records: (i) The vessel master shall ensure that the Cancel Fishing Record is recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(ii) For each fishing trip where no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; and (B) intended date, time and Area where fishing was to have begun.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) End Fishing Records: (i) the vessel master shall ensure that the End Fishing Record is recorded in the harvest log not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip.

(9) The harvest log shall be kept on board the licensed vessel when the vessel is participating in a fishery opening and when travelling to or from a fishery opening.

(10) The harvest log shall contain data pertaining to a single vessel only.

(11) The harvest log shall be produced for examination on demand of a fishery officer, a fishery guardian or an observer.

(12) All recording in the paper harvest log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialled by the vessel master.

(13) Erasure of an entry in the harvest log is not permitted.

(14)(a) If a harvest log in which harvest information has been recorded is lost or destroyed, and no complete records of that harvest information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the Catch Reporting Service Provider. (b) The carbon copies of all pages from the paper harvest log with harvest information would represent a complete record of harvest information. The harvest log shall be replaced prior to any subsequent fishing trips.

(15)(a) Subject to subsection 6(16), the licence holder shall ensure that all paper harvest logs issued, whether used to record fishing or not, are delivered to the issuing Catch Reporting Service Provider by January 31, 2018, and that all records recorded in those paper harvest logs are entered into the Salmon Catch Database by December 31, 2018. Returned harvest logs shall contain the original copies of all

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

pages issued.

(b) Carbon copies from the completed paper harvest log(s) shall be retained by the licence holder until December 31, 2018. In cases where the harvest log(s) is (are) lost during delivery to the Catch Reporting Service Provider, images of these carbon copies (either fax or photocopy images) shall be delivered forthwith to the Catch Reporting Service Provider as a backup.

(16) Where a licensed fishing vessel has been leased to a fisher who is different from the named licence holder, the lessee shall be responsible for the submission of the harvest log.

(17) Nil Reports: (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by April 30, 2018.

(b)Submitting a Nil report: (i)If a harvest log was issued, the licence holder shall complete the Nil Report form that was included in the harvest log, and return it with the harvest log to your logbook service provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder; or (ii) harvesters using an electronic log, or if no logbook service arrangements were made, the licence holder shall send a letter to the Department stating that the licence(s) were not fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder.

(c)Nil reports shall be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

7. Catch Monitoring:

(1) All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

Note: The phone number and office hours for the "At-Sea Observer Service Provider" will be posted via Fishery Notice.

Fishery Notices can be viewed on the DFO website at: http://notices.dfo-mpo.gc.ca.

8. Landing of catch:

(1) Subject to subsection 8(1)(b), for those fishing in Areas 3, 4, or 5 the locations at which the landing of fish from the vessel is permitted will be announced prior to each opening via Fishery Notice. (b) All fish caught under the authority of this licence shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia) except: (i) fish sold directly to the public under authority of a fisherman's vending licence issued under the Fisheries Act (Province of British Columbia).

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Landing Observing Program: (a) All vessels participating in the Area C gill net fishery in Areas 3, 4, and 5, who are selected by the Landing Observer Service Provider shall provide the Landing Observer at the time of landing a daily catch report confirmation number demonstrating that the harvester has reported their catch.

(b) Should the vessel master be requested by the Landing Observer Service Provider, a Landing Observer shall be present during the landing of all catch to record the number of each species of fish delivered.

(c) The vessel master shall provide a Landing Observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing.

Note: The phone number and office hours for the "Landing Observer Service Provider" will be posted via Fishery Notice.

Fishery Notices can be viewed on the DFO website at: http://notices.dfo-mpo.gc.ca.

9. Fish Slips

(1) The vessel master shall provide records, in the form commonly known as a fish slip or sales slip, of all fish caught and retained under authority of this licence including fish that are sold to the public and retained for personal use.

(2) A fish slip shall be completed for each landing. (3) The vessel master shall ensure that each fish slip contains the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales; (vi) date of landing; (vii) time of landing; (viii) number of days fished in each Area; (ix) landed weight of each species by grade and method of dressing reported separately in pounds; (x) number of pieces landed for each species by grade and method of dressing of fish; (xi) price paid per pound, by species; and (xii) total catch value of all species.

(4) The vessel master, or the person delivering the fish, shall print their name and sign the fish slip once completed.

(5) The vessel master shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

(6) Where the vessel is licensed for more than one Salmon Area, catch from each Salmon Area shall be reported on separate fish slips.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Note: Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website: http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

10. Species At Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

11. Seabirds

(1) Fishers shall take precautions to avoid fishing among seabirds.

Note: Fishers are requested to retain all dead birds which are entangled and to release live and unharmed birds by placing them in the water. Please check all birds for metal bird bands (rings) on the leg. If a bird is banded please contact Laurie Wilson with the band number and capture date and location at 1-866-431-2473 (BIRD) or by the email below. Handle birds with gloves, double bag dead birds and label each bird with date, time, and location and store them on ice. Please call your local charter patrol to organize pick-up or drop them off at a local DFO office. Alternatively, please send photographs of birds with a reference object such as a coin, and the date, time and location to laurie.wilson@canada.ca. Your names and vessel names do not need to be identified or included.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A. Do not release this data to external parties.

Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Do not release this data to external parties.

weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

This report may contain data rated up to Protected A.
Do not release this data to external parties.

weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

SALMON GILL NET Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FAG 150 2017

SALMON GILL NET Licence 2017 Date Issued: 27 Sep 2017

Licensed for: Commercial Fishing Expiry Date: 31 Mar 2018

Licence Holder:

FIN: 124113

NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

s.19(1)

Designated Vessel:

VRN 25421
DOT 347139
Vessel KRAPANJ
Vessel OAL 10.46 Meters
Gross Tonnage 9.57 Cubic Meters
Net Tonnage 6.51 Cubic Meters

Reported Vessel Owner:

FIN: [redacted]
COREY LYLE JOHNSON
[redacted]

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Licence Area: SALMON AREA D

Waters in which fishing is permitted: Areas 11 to 15 and 23 to 27

Species: SALMON

Gear: GILL NET

IT IS A CONDITION OF THIS LICENCE THAT NO SALMON MAY BE ON BOARD THIS VESSEL DURING THE PERIOD COMMENCING SIX HOURS PRIOR TO THIS VESSEL BEING USED TO FISH IN A COMMERCIAL SALMON FISHERY AND ENDING TWELVE HOURS AFTER THIS VESSEL HAS BEEN USED TO FISH FOR SALMON IN A COMMERCIAL SALMON FISHERY EXCEPT FOR
(A) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE PACIFIC FISHERY REGULATIONS, 1993,
(B) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS IN WHICH THE MINISTER HAS AUTHORIZED THE SALE OF SALMON, AND(C) SALMON CAUGHT UNDER THE AUTHORITY OF A TIDAL WATERS SPORT FISHING LICENCE

THIS LICENCE DOES NOT AUTHORIZE FISHING FOR SALMON UNTIL THE FULL SALMON CONDITIONS OF LICENCE ARE ATTACHED. SCHEDULE II OPTION CONDITIONS DO NOT AUTHORIZE FISHING FOR SALMON.

Document Released Under the Access to Information Act / Document divulgué en vertu

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 27 Sep 2017

Licence Serial No.: 431045

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

Version Date: 14-Jun-2017

CONDITIONS OF 20177/2018 COMMUNAL SALMON AREA D LICENCE Licence Period: April 1, 2017 to March 31, 2018 (GILL NET - JOHNSTONE STRAIT / WCVI)
Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of salmon fisheries, obtain a copy of the current Northern BC Salmon - Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for salmon.

Definitions

"Alaska Twist" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 4 or more filaments of equal diameter in each twine of the web and each of these filaments shall be a minimum of 0.20 mm in diameter.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Cancel Trip Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Cancel Trip Report (see subsection 5(7)).

"Catch Reporting Service Provider" means a company, organization or individual authorized by the Department to distribute harvest logs, and to process certain in-season and post-season reports required by these conditions of licence. Detailed information regarding the Catch Reporting Service Provider will be released by Fishery Notice prior to the fishing season. For additional information on the

Document Released Under the Access to Information Act / Document divulgué en vertu

authorized Catch Reporting Service Provider for 2017, contact your fishery manager.

"Daily Catch Record" means the detailed record of catch retained and released associated with daily fishing activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Daily Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Daily Catch Report (see subsection 5(5)).

"day" means a calendar day, beginning at 00:01 h and ending at 23:59 h.

"Department" means the Department of Fisheries and Oceans.

"Designated landing site" means a location or vessel where the landing of salmon is permitted under these conditions.

"Dockside Monitoring" means monitoring by an approved Landing Observer Service Provider, of all fish landed and any retained on board after landing, by species.

"Electronic Logbook" (E-Log) means a computer application approved by the Department that captures commercial catch and other fishery-related information in an electronic format. The computer application shall transmit this information into the Salmon Fishery Database using the data specifications set out by the Department.

"End Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an End Fishing Report (see subsection 5(10)).

"Fisher Identification Number (FIN)" means the unique identification number issued to fishers by the Department for licensing and other fisheries management purposes.

"fishery opening" means a period during which fish may be caught under authority of this licence pursuant to the Pacific Fishery Regulations, 1993.

"fishing trip" means the time between leaving a port to commence commercial salmon fishing and the return to a port or landing of catch that results in a discontinuation of fishing for one day or longer.

"gill net set time" means the period of time beginning with entry of the first portion of the web into the water and ending when the last portion of the web leaves the water.

"gill net soak time" means the period of time beginning when the gill net is fully extended for a fishing set and ending with the commencement of the retrieval of the gill net from the water.

"harvest log" means the record of fishing activities required to be kept under these

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Hours Fished" means the number of hours spent in an area open to commercial fishing where the licensed vessel is engaged in any fishing activities, including but not limited to, all activities related to setting, hauling, picking, cleaning, and transiting between sets.

"landing" means the removal of fish from the licensed vessel, whether to a shore-based facility or to a another vessel.

"Landing Observer" means an individual designated pursuant to section 39(1) of the Fishery (General) Regulations to monitor salmon landings and verify the weight and number of each species of salmon landed as required by these conditions of licence.

"Landing Observer Service Provider" means a company designated pursuant to section 39.1 of the Fishery (General) Regulations to provide Salmon Landing Observers as required by these conditions of licence. Detailed information regarding the Landing Observer Service Provider will be released by Fishery Notice prior to the fishing season. For additional information on the authorized Landing Observer Service Provider for 2017, contact your fishery manager.

"Multi-strand" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 30 or more filaments of equal diameter in each twine of the web.

"observer" means a person designated by the Regional Director-General to carry out duties set out in subsection 39(2) of the Fishery (General) Regulations.

"Pause Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Pause Fishing Report (see subsection 5(6)).

"Salmon Fishery Database" means a restricted access computer database maintained by the Department, which stores information required by these conditions to be reported to the Department.

"Trip Identification Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Start Fishing Report (see subsection 5(4)).

"Validation Form" means the unique form provided by the Landing Observer Service Provider after a catch validation event has occurred.

"Vessel Registration Number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

"wild Coho Salmon" means any Coho Salmon that does not possess a healed scar

Document Released Under the Access to Information Act / Document divulgué en vertu

in place of the adipose, pelvic or pectoral fin, or in place of a maxillary.

1. Communal Conditions (1) Fish caught under authority of this licence may be sold, traded or bartered.

(2) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

(3) Size of fish permitted to be taken: (a) No person shall catch and retain a Halibut that is less than (i) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (ii) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(b) No person shall catch and retain a Sablefish that is less than (i) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(c) No person shall catch and retain a lingcod that is less than (i) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (ii) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

(4) Identification of fishing vessel and gear: (a) The designated vessel shall be identified in accordance with section 26 of the Fishery (General) Regulations. (b) All fishing gear shall be identified in accordance with sections 27 and 29 of the Fishery (General) Regulations.

2. Species and quantities of fish permitted to be taken:

(1) Species of fish: (a) Chinook Salmon, Chum Salmon, Coho Salmon, Pink Salmon and Sockeye Salmon, subject to variation of the close times set out in the Pacific Fishery Regulations, 1993.

(b) Subject to subsection 2(1)(c), retention of wild Coho Salmon is not permitted.

(c) Subject to variation of the close times set out in the Pacific Fishery Regulations, 1993, retention of wild Coho Salmon is permitted in the following waters during the periods of time set out: (i) Subareas 23-1 to 23-7 during the period June 1, 2017 to September 30, 2017; and (ii) Area 25 during the period August 1, 2017 to October 30, 2017.

(2) Catch prohibited on board the licensed vessel while fishing: (a) No salmon caught on a previous fishing trip shall be on board the licensed vessel while fishing.

Document Released Under the Access to Information Act / Document divulgué en vertu

(b) No salmon of any species that are not permitted to be retained under the authority of this licence at the time and in the area being fished shall be on board the licensed vessel.

(c) No salmon of any species that have been caught and retained under the authority of another licence shall be on board the vessel while fishing.

(d) Subsection 2(2)(b) do not apply to fish being held temporarily in revival tanks as required.

3. Waters in which and times when fishing is permitted:

Fishing is permitted in Areas 11 to 15 and 23 to 27 for a species of salmon by gill net gear, in those areas and during those times when persons fishing under authority of a Category D licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for that species of salmon with a type of vessel licensed for Salmon Area D, in that area and during that time.

4. The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon gill net. In addition to any specifications prescribed by the Fisheries Act and the regulations made thereunder, Alaska Twist, Multi-strand or a combination of the two may be used.

(2) In Area 25 during the period July 1, 2017 to September 15, 2017 the maximum gill net length is 183 m.

(3) Subject to subsections 4(4) and 4(5), the maximum gill net soak time is sixty (60) minutes.

(4) In Subareas 11-1, 11-2, 12-9, 12-10, 12-11 and 12-12, the maximum gill net soak time is forty-five (45) minutes during the period April 1, 2017 to March 31, 2018.

(5) In Area 14: (a) From April 1, 2017 to September 30, 2017, the maximum gill net soak time is forty-five (45) minutes. (b) From October 1, 2017 to November 10, 2017, the maximum gill net soak time is sixty (60) minutes. (c) From November 11, 2017 to March 31, 2018 there is no restriction on soak time in Area 14.

(6) The gill net shall be completely retrieved from the water upon completion of each set.

(7) While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

Document Released Under the Access to Information Act / Document divulgué en vertu

The revival tank shall: (a) be constructed of non-transparent material; (b) have a minimum of two separate compartments; (c) have minimum inside dimensions of 100 cm x 20 cm x 40 cm for each compartment; (d) have a tight fitting lid made of non-transparent material for each compartment; (e) have a separate water inlet and outlet for each compartment; (f) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled, subject to subsection 4(8); (g) be in operation from 10 minutes prior to retrieval of the net and continue in operation at all times during retrieval of the net and while fish are being held in the tank; (h) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute; and (i) be kept clean and in operable condition; and (j) shall not be used for any purpose other than that outlined above.

(8) Subsection 4(7)(f) (release mechanism) does not apply to vessels 9.14 m or less in overall length and to bowpicker style gillnetters. For these vessels, a hand-held dip net is permitted to be used to transfer fish from the revival tank to the water. The dip net shall be constructed of a shallow bag of soft, knotless web attached to a handle.

(9) In Area 23, the gill net shall have attached four (4) additional buoys (floats) that are white or yellow in colour and at least 60 cm in circumference. These buoys shall be spread equidistantly between the buoy(s) marking the end of the gill net or the end of the gill net that is attached to the vessel.

Note: For all Areas, as set out in section 13 of the Pacific Fishery Regulations, 1993, the buoy marking each end of the gill net shall be orange in colour and at least 125 cm in circumference.

5. Fishing Reports:

(1) The person identified as the vessel master in subsection 5(4)(c)(iv) shall be on board the fishing vessel and shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities, including fish slips, for the duration of the fishing trip.

(2) If a new vessel master assumes operation of the vessel during a fishing trip, a new start fishing report shall be made and a new Trip Identification number acquired, as set out in subsection 5(4)(c).

(3) Failure to provide all required information will be considered a failure to report and will be treated as a failure to comply with these conditions.

(4) Start Fishing Report: (a) Prior to beginning fishing on a fishing trip, and no earlier than one week prior to initiating fishing activity, the vessel master shall: (i) inactivate all previous Trip Identification Numbers applicable to this licence by completion of either End Trip Reports or Cancel Trip Reports; (ii) make a Start Fishing Report and obtain a new Trip Identification Number; and (iii) record the Trip Identification Number in the appropriate space or spaces in the paper harvest log.

Document Released Under the Access to Information Act / Document divulgué en vertu

(b) To make a Start Fishing Report and obtain a new Trip Identification Number, the vessel master shall ensure that all Pause Fishing, End Fishing, Cancel Fishing, Daily Catch Reports, and Offload Catch Reports for all previous fishing trips have been completed.

(c) To obtain a Trip Identification Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) the harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; and (v) intended fishing start date, time and Area fishing will begin.

(d) The vessel master using an electronic harvest log shall enter their name for each start trip report and check the "I agree" box to the following statement: "You acknowledge that you are the Vessel Master as defined in the conditions of licence and as selected in this start Trip report ("Captain Name"). As the Vessel Master, you are responsible for all the data entered for this trip. If your name can not be selected you will need to contact the 2017 e-log service provider to update the e-log software before filing the Start Trip report."

(5) Daily Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) make a Daily Catch Report and obtain a Daily Catch Report Confirmation Number for each Daily Catch Record; and (ii) record the Daily Catch Report Confirmation Number in the appropriate space of the Daily Catch Record in the paper harvest log.

(b) The Daily Catch Report Confirmation Number shall be recorded on the Daily Catch Record page in the harvest log for each day fished: (i) not later than 12 hours following the completion of a fishery opening; or (ii) if a fishery opening is extended, not later than 12 hours following the completion of the extension.

(c) To obtain a Daily Catch Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; and (v) for each date and Area fished: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species category as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species category as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Fishery Database in a properly encoded electronic mail message.

(6) Pause Fishing Report: (a) For each day of a continuing fishing trip on which no fishing occurred, the vessel master shall: (i) make a Pause Fishing Report and obtain a Pause Fishing Report Confirmation Number; and (ii) record the Pause Fishing Report Confirmation Number in the appropriate space in the paper harvest log.

(b) Pause Fishing Report Confirmation Numbers shall be recorded in the harvest log: (i) not later than 12 hours following the completion of a fishery opening and prior to commencing a subsequent fishing trip; or (ii) if a fishery is extended, not later than 12 hours following the completion of the extension and prior to commencing a subsequent fishing trip.

(c) To receive a Pause Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number obtained when the Start Fishing Report was made; (v) date on which no fishing occurred; and (vi) Area in which the vessel master had intended to fish on that date.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(7) Cancel Trip Report: (a) If no fishing occurs on a planned fishing trip for which a Trip Identification Number was obtained the vessel master shall: (i) make a Cancel Trip Report and obtain a Cancel Trip Report Confirmation Number; and (ii) record the Cancel Trip Report Confirmation Number in the appropriate space in the paper harvest log.

(b) The Cancel Trip Report Confirmation Number shall be recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(c) To obtain a Cancel Trip Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) harvest log page number; (iii) Salmon Licence Area; and (iv) intended start date, time and Area where fishing was to have begun.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(8) Interim Reports: (a) Upon demand of a fishery officer, fishery guardian or a

Document Released Under the Access to Information Act / Document divulgué en vertu

representative of the Department, the vessel master shall immediately provide orally in person or by radio, or in writing, any or all of the following information that may be requested: (i) an accurate estimate of the amount of fish on board the vessel as well as fish caught and released; (ii) information concerning the location of catch, rate of catch and method of transporting of the catch; and (iii) the name and location of the person or company buying the catch.

(9) End Fishing Report: (a) Not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip, the vessel master shall: (i) make an End Fishing Report and obtain a unique End Fishing Report Confirmation Number for each Trip Identification Number; and (ii) record the End Fishing Report Confirmation Number in the appropriate space in the paper harvest log.

(b) The vessel master shall ensure that a unique End Fishing Report Confirmation Number for each Trip Identification Number is obtained if fishing occurred on the fishing trip and: (i)if fishing stopped for 24 hours or longer for landing to a plant or to another vessel; or (ii) if the fishery closed for 12 consecutive hours or longer; and (iii) prior to a subsequent trip.

(c) To obtain an End Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number for the fishing trip being ended; and (v) last date, time and Area fished.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(10) Nil Reports: (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by January 31, 2018.

(b) Submitting a Nil report: (i) If a harvest log was issued, the Nil Report form that was included in the harvest log shall be completed and returned with the harvest log to the Catch Reporting Service Provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder. (ii) If no catch reporting service arrangements were made and no harvest log issued, a letter shall be sent to the Department stating that the licence(s) were not fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder, and be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

6. Harvest Log

Document Released Under the Access to Information Act / Document divulgué en vertu
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Unless otherwise specified below, this section applies to both the paper harvest log and electronic harvest log.

(1) The vessel master shall maintain a harvest log of all harvest operations. The format of the harvest log shall meet the requirements set out by the Department. For further information, a sample of a paper harvest log page can be found in the current Southern BC Salmon Integrated Fisheries Management Plan.

(a) To obtain an approved paper harvest log, the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(b) To obtain an approved electronic harvest log (E-log), the vessel master shall contact the Catch Reporting Service Provider for electronic harvest logs, prior to the first fishing trip of the season.

(2) If the paper harvest log contains more than one page, the pages shall be bound in such a manner that the removal of a page cannot be performed without leaving evidence of said removal.

(3) Each page of the paper harvest log shall be numbered sequentially.

(4) A carbon copy shall be made for each page of the paper harvest log.

(5) The vessel master shall ensure that the information recorded in the harvest log is complete and accurate.

(6) The vessel master using a paper harvest log shall print and sign their name and FIN beside each Daily Catch Record made in the paper harvest log. Vessel masters using electronic harvest logs shall select their name from the Captain Name list for each Start Fishing Report.

(7) A separate daily catch record entry in the harvest log shall be made for each Area fished.

(8) Recording of harvest log data: (a) Daily Catch Records: (i) In all Areas, Daily catch information shall be recorded on the Daily Catch Record page in the harvest log before any fish are landed.

(ii) A separate line on the Daily Catch Record page shall be used to record any additional catch harvested in the same calendar day following a landing.

(iii) If there are two separate fishery openings on one calendar day, harvest information from the first opening shall be recorded in the harvest log prior to the vessel participating in the second opening.

(iv) Subject to subsection 6(8)(a)(v), daily catch information for each day and Area fished shall be recorded on the Daily Catch Record page in the harvest log book not later than 23:59 h for each day fished.

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(v) For Areas 23 to 27 fishing in a night-time fishery opening that spans two calendar days but is less than 12 hours in duration, the Daily Catch information shall be recorded on the Daily Catch Record page in the harvest log not later than 6 hours following the completion of the fishery opening.

(vi) For each date and Area fished, the vessel master shall ensure the following information is recorded in the harvest log: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of the net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species category as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species category as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(vii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(b) Pause Fishing Records: (i) The vessel master shall ensure that the Pause Fishing Reports are recorded in the harvest log not later than 12 hours following the completion of a fishery and prior to commencing a subsequent fishing trip or if a fishery is extended, not later than 12 hours following the completion of the extension and prior to commencing a subsequent fishing trip.

(ii) For each day of a fishing trip on which no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; (B) Trip Identification Number obtained when the Start Fishing Report was made; (C) date on which no fishing occurred; and (D) Area in which the vessel master had intended to fish on that date.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(c) Cancel Trip Records: (i) The vessel master shall ensure that the Cancel Fishing Record is recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(ii) For each fishing trip where no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; and (B) intended date, time and Area where fishing was to have begun.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) End Fishing Records: (i) the vessel master shall ensure that the End Fishing Record is recorded in the harvest log not later than 24 hours following the end of a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

fishing trip and prior to commencing a subsequent fishing trip.

(ii) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(9) The harvest log shall be kept on board the licensed vessel when the vessel is participating in a fishery opening and when travelling to or from a fishery opening.

(10) The harvest log shall contain data pertaining to a single vessel only.

(11) The harvest log shall be produced for examination on demand of a fishery officer, a fishery guardian or an observer.

(12) All recording in the paper harvest log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialled by the vessel master.

(13) Erasure of an entry in the harvest log is not permitted.

(14)(a)If a harvest log in which harvest information has been recorded is lost or destroyed, and no complete records of that harvest information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the Catch Reporting Service Provider. (b) The carbon copies of all pages from the paper harvest log with harvest information would represent a complete record of harvest information. The harvest log shall be replaced prior to any subsequent fishing trips.

(15)(a) Subject to subsection 6(16), the licence holder shall ensure that all paper harvest logs issued, whether used to record fishing or not, are delivered to the issuing Catch Reporting Service Provider by January 31, 2018 and that all records recorded in those paper harvest logs are entered into the Salmon Catch Database by December 31, 2018. Returned harvest logs shall contain the original copies of all pages issued.

(b) Carbon copies from the completed paper harvest log(s) shall be retained by the licence holder until December 31, 2018. In cases where the paper harvest log(s) is (are) lost during delivery to the Catch Reporting Service Provider, images of these carbon copies (either fax or photocopy images) shall be delivered forthwith to the Catch Reporting Service Provider as a backup.

(16) Where a licensed fishing vessel has been leased to a fisher who is different from the named licence holder, the lessee shall be responsible for the submission of the harvest log.

7. Catch Monitoring:

(1) All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

Document Released Under the Access to Information Act / Document divulgué en vertu

(2) When issued stickers (tabs) as part of the catch monitoring program, the licence holder shall ensure the stickers (tabs) are displayed on each side of the vessel so that they are clearly visible from the water.

8. Landing of catch:

(1) Locations at which landing of fish from the vessel is permitted: (a) All fish caught under the authority of this licence during Sockeye Salmon directed fisheries in Areas 11 to 15 shall be landed at specified designated landing sites.

Note: The list of designated landing sites and designated packer vessels will be released by Fishery Notice prior to the fishery opening.
http://notices.dfo-mpo.gc.ca/fns-sap/index-eng.cfm

(2) Landing Observing Program (a) Where the vessel has participated in directed Sockeye Salmon fisheries in Areas 11 to 15:

(i) At the time of landing, should the vessel master be requested by the Landing Observer Service Provider, a landing observer shall be present during landing of all catch to record the number of each species of fish delivered; and (ii) The vessel master shall provide a Landing Observer, a fishery officer or a fishery guardian attending the landing, safe access to the vessel, to the vessel's paper or electronic harvest log, to the vessel's fish holds, to the freezers and to other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing.

Note: The company and contact information of the Landing Observer Service Provider will be posted via Fishery Notice. (b) The licensed vessel that is chosen by the Landing Observer Service Provider for dockside monitoring shall present the completed paper harvest log page or access to the electronic harvest log relevant to the current landing. The following information will be recorded by the Landing Observer prior to any landing: (i) vessel name and VRN; (ii) vessel master name and FIN; (iii) trip ID; (iv) the number of all fish by species on board; (v) Subarea(s) fished; (vi) harvest log identification number; and (vii) paper harvest log page number.

(c) The licensed vessel shall land all catch on board the vessel at the same location.

(d) If the licensed vessel has been chosen for validation, the vessel master shall retain a copy of the validation record provided by the Landing Observer on board the vessel for proof of validation.

(e) If the licensed vessel has been chosen for validation, the Landing Observer will conduct an inspection of all fish holds.

Note: As per subsection 2(2)(a), any fish retained shall be removed from the licensed vessel prior to each opening.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

9. Fish Slips:

(1) The vessel master shall provide records, in the form commonly known as a fish slip or sales slip, of all fish caught and retained under authority of this licence, including fish that are sold to the public and retained for personal use.

(2) A fish slip shall be completed for each landing.

(3) The vessel master shall ensure that each fish slip contains the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales; (vi) date of landing; (vii) time of landing; (viii) number of days fished in each Area; (ix) landed weight of each species by grade and method of dressing reported separately in pounds; (x) number of pieces landed for each species by grade and method of dressing of fish; (xi) price paid per pound, by species; and (xii) total catch value of all species.

(4) The vessel master, or the person delivering the fish, shall print their name and sign the fish slip once completed.

(5) The vessel master shall submit slips no later than seven days after landing. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

(6) If the vessel is licensed for more than one Salmon Area, the catch from each Salmon Area shall be recorded on a separate fish slip.

Note: Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

10. Species at risk:

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the

Document Released Under the Access to Information Act / Document divulgué en vertu

fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

11. Seabird Avoidance:

(1) Fishers shall take precautions to avoid fishing among seabirds.

Note: Fishers are requested to retain all dead birds which are entangled and to release live and unharmed birds by placing them in the water. Please check all birds for metal bird bands (rings) on the leg. If a bird is banded please contact Laurie Wilson with the band number and capture date and location at 1-866-431-2473 (BIRD) or by the email below. Handle birds with gloves, double bag dead birds and label each bird with date, time, and location and store them on ice. Please call your local charter patrol to organize pick-up or drop them off at a local DFO office. Alternatively, please send photographs of birds with a reference object such as a coin, and the date, time and location to laurie.wilson@canada.ca. Your names and vessel names do not need to be identified or included.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio

Document Released Under the Access to Information Act / Document divulgué en vertu

(round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg)

Document Released Under the Access to Information Act / Document divulgué en vertu
This report may contain data rated up to Protected A.
Do not release this data to external parties.

or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment,

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct

Document Released Under the Access to Information Act / Document divulgué en vertu
This report may contain data rated up to Protected A.
Do not release this data to external parties.

signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

Document Released Under the Access to Information Act / Document divulgué en vertu

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

Document Released Under the Access to Information Act / Document divulgué en vertu
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the

Document Released Under the Access to Information Act / Document divulgué en vertu

vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the

Document Released Under the Access to Information Act / Document divulgué en vertu
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

Document Released Under the Access to Information Act / Document divulgué en vertu
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

Document Released Under the Access to Information Act / Document divulgué en vertu

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

Document Released Under the Access to Information Act / Document divulgué en vertu

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the

Document Released Under the Access to Information Act / Document divulgué en vertu

offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

Document Released Under the Access to Information Act / Document divulgué en vertu
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

Document Released Under the Access to Information Act / Document divulgué en vertu

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

SALMON GILL NET Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FAG 259 2017

SALMON GILL NET Licence 2017 Date Issued: 06 Jun 2017

Licensed for: Commercial Fishing Expiry Date: 31 Mar 2018

Licence Holder:

FIN: 124113

NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:

VRN 312270
DOT 809709
Vessel BESS RICHELLE
Vessel OAL 12.52 Meters
Gross Tonnage 41.29 Cubic Meters
Net Tonnage 28.07 Cubic Meters

Reported Vessel Owner: s.19(1)

FIN: [redacted]
DICKIE MALCOLM LEESON
[redacted]

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Licence Area: SALMON AREA C

Waters in which fishing is permitted: Areas 1 to 10, Subarea 101-7

Species: SALMON

Gear: GILL NET

IT IS A CONDITION OF THIS LICENCE THAT NO SALMON MAY BE ON BOARD THIS VESSEL DURING THE PERIOD COMMENCING SIX HOURS PRIOR TO THIS VESSEL BEING USED TO FISH IN A COMMERCIAL SALMON FISHERY AND ENDING TWELVE HOURS AFTER THIS VESSEL HAS BEEN USED TO FISH FOR SALMON IN A COMMERCIAL SALMON FISHERY EXCEPT FOR
(A) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE PACIFIC FISHERY REGULATIONS, 1993,
(B) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS IN WHICH THE MINISTER HAS AUTHORIZED THE SALE OF SALMON, AND(C) SALMON CAUGHT UNDER THE AUTHORITY OF A TIDAL WATERS SPORT FISHING LICENCE

THIS LICENCE DOES NOT AUTHORIZE FISHING FOR SALMON UNTIL THE FULL SALMON CONDITIONS OF LICENCE ARE ATTACHED. SCHEDULE II OPTION CONDITIONS DO NOT AUTHORIZE FISHING FOR SALMON.

Document Released Under the Access to Information Act / Document divulgué en vertu

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Licence Area: SALMON AREA C

Waters in which fishing is permitted: Areas 1 to 10, Subarea 101-7

Species: SALMON

Gear: GILL NET

IT IS A CONDITION OF THIS LICENCE THAT NO SALMON MAY BE ON BOARD THIS VESSEL DURING THE PERIOD COMMENCING SIX HOURS PRIOR TO THIS VESSEL BEING USED TO FISH IN A COMMERCIAL SALMON FISHERY AND ENDING TWELVE HOURS AFTER THIS VESSEL HAS BEEN USED TO FISH FOR SALMON IN A COMMERCIAL SALMON FISHERY EXCEPT FOR
(A) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE PACIFIC FISHERY REGULATIONS, 1993,
(B) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS IN WHICH THE MINISTER HAS AUTHORIZED THE SALE OF SALMON, AND(C) SALMON CAUGHT UNDER THE AUTHORITY OF A TIDAL WATERS SPORT FISHING LICENCE

THIS LICENCE DOES NOT AUTHORIZE FISHING FOR SALMON UNTIL THE FULL SALMON CONDITIONS OF LICENCE ARE ATTACHED. SCHEDULE II OPTION CONDITIONS DO NOT AUTHORIZE FISHING FOR SALMON.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 15 Jun 2017

Licence Serial No.: 431048

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Version Date: 19-May-2017

CONDITIONS OF 2017/2017 COMMUNAL SALMON AREA C LICENCE Licence Period: April 1, 2017 to March 31, 2018 (GILL NET - NORTH COAST)
Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of salmon fisheries, obtain a copy of the current Northern BC Salmon - Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for salmon.

Definitions

"Alaska Twist" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 4 or more filaments of equal diameter in each twine of the web and each of these filaments shall be a minimum of 0.20 mm in diameter.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Catch Reporting Service Provider" means a company, organization or individual authorized by the Department to distribute harvest logs and to process certain in-season and post-season reports required by these conditions of licence.

"Cancel Trip Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Cancel Trip Report (see subsection 5(8)).

"Daily Catch Record" means the detailed record of catch retained and released associated with daily fishing activities required to be kept under these conditions of

Document Released Under the Access to Information Act / Document divulgué en vertu

licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Daily Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Daily Catch Report (see subsection 5(5)).

"day" means a calendar day, beginning at 00:01 h and ending at 23:59 h.

"Department" means the Department of Fisheries and Oceans.

"Designated landing site" means a location where the landing of salmon is permitted.

"Dockside Monitoring" means monitoring by an approved Landing Observer Service Provider, of all fish landed and any retained on board after landing, by species.

"Electronic Logbook" (E-Log) means a computer application approved by the Department that captures commercial catch and other fishery-related information in an electronic format. The computer application shall transmit this information into the Salmon Fishery Database using the data specifications set out by the Department.

"End Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an End Fishing Report (see subsection 5(10)).

"Fisher Identification Number (FIN)" means the unique identification number issued to fishers by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"fishery opening" means a period during which fish may be caught under authority of this licence pursuant to the Pacific Fishery Regulations, 1993.

"fishing trip" means the time between leaving a port to commence commercial salmon fishing and the return to a port or the landing of catch that results in a discontinuation of fishing for one day or longer.

"gill net set time" means the period of time beginning with entry of the first portion of the web into the water and ending when the last portion of the web leaves the water.

"gill net soak time" means the period of time beginning when the gill net is fully extended for a fishing set and ending with the commencement of the retrieval of the gill net from the water.

"harvest log" means the record of fishing activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Hours Fished" means the number of hours spent in an area open to commercial fishing where the licensed vessel is engaged in any fishing activities, including but

Document Released Under the Access to Information Act / Document divulgué en vertu

not limited to, all activities related to setting, hauling, picking, cleaning, and transiting between sets. "landing" means the removal of fish from the licensed vessel, whether to a shore-based facility or to another vessel.

"Landing Observer" means an individual designated pursuant to subsection 39(1) of the Fishery (General) Regulations to monitor landings and verify the weight and number of each species of salmon landed as required by these conditions of licence.

"Landing Observer Service Provider" means a company designated pursuant to section 39.1 of the Fishery (General) Regulations to provide Landing Observers as required by these conditions of licence. Detailed information regarding the Landing Observer Service Provider will be released by Fishery Notice prior to the fishing season. For contact information for the authorized Salmon Landing Observer Service Provider for 2016, contact your fishery manager.

"Multi-strand" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 30 or more filaments of equal diameter in each twine of the web.

"observer" means a person designated by the Regional Director-General to carry out duties set out in subsection 39(2) of the Fishery (General) Regulations.

"Offload Catch Record" means the detailed record of catch offloaded associated with all offload activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Offload Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an Offload Catch Report (see subsection 5(6)).

"Pause Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Pause Fishing Report. (see subsection 5(7)).

"Salmon Fishery Database" means a restricted access computer database maintained by the Department, which stores information required by these conditions.

"Trip Identification Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Start Fishing Report (see subsection 5(4)).

"Vessel Registration Number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Communal Conditions (1) Fish caught under authority of this licence may be sold, traded or bartered.

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

(3) Size of fish permitted to be taken: (a) No person shall catch and retain a Halibut that is less than (i) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (ii) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(b) No person shall catch and retain a Sablefish that is less than (i) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(c) No person shall catch and retain a lingcod that is less than (i) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (ii) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

(4) Identification of fishing vessel and gear: (a) The designated vessel shall be identified in accordance with section 26 of the Fishery (General) Regulations. (b) All fishing gear shall be identified in accordance with sections 27 and 29 of the Fishery (General) Regulations.

2. Species and quantities of fish permitted to be taken:

(1) Species of fish: (a) Sockeye Salmon, Coho Salmon, Pink Salmon, Chum Salmon and Chinook Salmon, subject to variation of the close times set out in the Pacific Fishery Regulations, 1993.

(2) Catch prohibited on board the licensed vessel while fishing: (a) No salmon caught on a previous fishing trip shall be on board the licensed vessel while fishing. (b) No salmon of species that are not permitted to be retained under the authority of this licence at the time and area being fished shall be on board the licensed vessel. (c) No salmon of any species that have been caught and retained under the authority of another licence shall be on board the vessel while fishing. (d) Subsection 2(2)(b) does not apply to fish being held temporarily in revival tanks as required.

3. Waters in which and times when fishing is permitted:

Fishing is permitted in Areas 1 to 10 and Subarea 101-7 for a species of salmon by gill net gear, in those areas and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific

Document Released Under the Access to Information Act / Document divulgué en vertu

Fishery Regulations, 1993 are authorized to fish for that species of salmon with a type of vessel licensed for Salmon Area C, in that area and during that time.

4. The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon gill net. In addition to any specifications prescribed by the Fisheries Act and the Regulations made thereunder, gill nets shall meet the following specifications:

(a) all nets greater than 60 meshes in depth shall have at least every fifth cork a distinctive colour (not white); and

(b) Alaska twist or multi-strand or a combination of the two is permitted. If Alaska twist is used, then the hang ratio shall not exceed 2.5:1.

(2) In Subareas 4-4, 4-5, 4-8, 4-9, 4-12, 4-14, 4-15, 5-1 and 5-2 during the period August 1, 2016 to March 31, 2017 the following applies: (a) the maximum gill net set time is forty (40) minutes; (b) the maximum gill net soak time is twenty (20) minutes; and (c) the maximum gill net length is 187.5 m.

(3) The gill net shall be completely retrieved from the water upon completion of each set.

(4) While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall:

(a) be constructed of non-transparent material; (b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm; (c) have a separate tight fitting lid for each compartment, made of non-transparent material; (d) have a separate inlet and outlet for each compartment; (e) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled; (f) be in operation from 10 minutes prior to retrieval of the net and continue in operation at all times during retrieval of the net and while fish are being held in the tank; (g) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute; (h) be kept clean and in operable condition; and (i) shall not be used for any purpose other than that outlined above.

5. Fishing Reports:

(1) The person identified as the vessel master in subsection 5(4)(c)(iv) shall be on board the fishing vessel and shall be considered to be the vessel master responsible

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

for all fishing, vessel handling and reporting activities, including fish slips, for the duration of the fishing trip.

(2) If a new vessel master assumes operation of the vessel during a fishing trip, a new start fishing report shall be made and a new Trip Identification number acquired, as set out in subsection 5(4)(c).

(3) Failure to provide all required information will be considered a failure to report and will be treated as a failure to comply with these conditions. (4) Start Fishing Report: (a) Prior to beginning fishing on a fishing trip and no earlier than one week prior to initiating fishing activity, the vessel master shall: (i) inactivate all previous Trip Identification Numbers applicable to this licence by completion of either End Trip Reports or Cancel Trip Reports; (ii) make a Start Fishing Report and obtain a new Trip Identification Number; and (iii) record the Trip Identification Number in the appropriate space or spaces in the harvest log.

(b) To make a Start Fishing Report and obtain a new Trip Identification Number, the vessel master shall ensure that all Pause Fishing, End Fishing, Cancel Fishing, Daily Catch Reports and Offload Catch Reports for all previous fishing trips have been completed.

(c) To obtain a Trip Identification Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and page number; (ii) Salmon Licence Area; (iii) vessel master's name and vessel master's Fisher Identification Number; and (iv) intended date, time and Area fishing will begin.

(d) The vessel master with electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) The vessel master using an electronic harvest log shall enter their name for each start trip report and check the "I agree" box to the following statement: "You acknowledge that you are the Vessel Master as defined in the conditions of licence and as selected in this start Trip report ("Captain Name"). As the Vessel Master, you are responsible for all the data entered for this trip. If your name can not be selected you will need to contact the 2017 e-log service provider to update the e-log software before filing the Start Trip report."

(f) If the vessel master wishes to fish in a different Area than recorded in the Start Fishing Report, the vessel master shall submit: (i) a Cancel Trip Report if no fishing has occurred; or (ii) an End Fishing Trip Report if fishing has occurred; and (iii) a new Start Fishing Report for the new Area.

(5) Daily Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Daily Catch Report Confirmation Number for each Daily Catch Report; and (ii) record the Daily Catch Report Confirmation Number in the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

appropriate space of the Daily Catch Report in the paper harvest log.

(b) The Daily Catch Report Confirmation Number shall be recorded on the Daily Catch Record page in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; (ii) if a fishery opening is extended, not later than 24 hours following the completion of the extension; (iii) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, a Daily Catch Report is not required until 24 hours following the completion of the second opening; (iv) for fishery openings that last longer than seven (7) days, a Daily Catch Report shall be made within seven (7) days of fishing for each day of fishing. (For example, if the fishery commences on a Monday, a Daily Catch Report shall be made before the following Monday) and (v) for fishery openings in Areas 3, 4 and 5 where the vessel master lands to a shore-based designated landing site, the daily catch report shall be completed prior to landing.

(c) To obtain a Daily Catch Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; (v) for each date and Area fished: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species or category as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species or category as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(6) Offload Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) obtain an Offload Catch Report Confirmation Number for each Offload that has occurred; (ii) record the Offload Catch Report Confirmation Number in the appropriate space of the Offload Catch Record page in the harvest log; and

(b) The Offload Catch Report Confirmation Number shall be recorded in the harvest log for each offload not later than 24 hours after an offload occurred.

(c) To obtain an Offload Catch Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; and (v) for each offload: (A) First date fished; (B) Last date fished; (C) Last Management Area fished; (D) Number of days fished;

Document Released Under the Access to Information Act / Document divulgué en vertu

(E) Date and time offloaded; (F) Business and port, or name and VRN of Packer offloaded to (or specify personal use); (G) Fish slip number or sales slip number; and (H) Number of fish landed by species or category as indicated on the Offload Catch Record page of the harvest log.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(7) Pause Fishing Report: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Pause Fishing Report Confirmation Number for each day of a fishing trip on which no fishing occurred; and (ii) record the Pause Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) Pause Fishing Report Confirmation Numbers shall be recorded in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; (ii) if a fishery is extended, not later than 24 hours following the completion of the extension; (iii) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, not later than 24 hours following the completion of the second opening; and (iv) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(c) To obtain a Pause Fishing Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number obtained when the Start Fishing Report was made; (v) date on which no fishing occurred; and (vi) Management Area in which the vessel master had intended to fish on that date.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(8) Cancel Trip Report: (a) If no fishing occurs on a planned fishing trip for which a Trip Identification Number was obtained, the vessel master shall: (i) obtain a Cancel Trip Report Confirmation Number; and (ii) record the Cancel Trip Report Confirmation Number in the appropriate space in the harvest log.

(b) The Cancel Trip Report Confirmation Number shall be recorded in the harvest log no later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(c) To obtain a Cancel Trip Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number;

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi sur l'accès à l'information.

(iii) Salmon Licence Area; and (iv) intended date, time and Area where fishing was to have begun.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (9) Interim Reports: (a) Upon demand by a fishery officer, fishery guardian or a representative of the Department, the vessel master shall immediately provide orally in person or by radio, or in writing, any or all of the following information that may be requested: (i) an accurate estimate of the amount of fish on board the vessel as well as fish caught and released; (ii) information concerning the location of catch, rate of catch and method of transporting of the catch; (iii) the name and location of the person or company buying the catch; and (iv) the trip identification number obtained from the Catch Reporting Service Provider.

(10) End Fishing Report: (a) Not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip, the vessel master shall: (i) make an End Fishing Report and obtain a unique End Fishing Report Confirmation Number for each Trip Identification Number; and (ii) record the End Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) The vessel master shall ensure that a unique End Fishing Report Confirmation Number for each Trip Identification Number is obtained if fishing occurred on the fishing trip and: (i)if fishing stopped for 24 hours or longer for landing to a plant or to another vessel; or (ii) if the fishery closed for 12 consecutive hours or longer; or (iii) if the vessel changes fishing areas; and (iv) prior to a subsequent trip.

(c) To obtain an End Fishing Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number from the most recent completed fishing trip; (v) last date, time and Area fished; and (vi) designated landing site where the fish were landed if landing occurred.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (11) Nil Reports (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by January 31, 2017.

(b) Submitting a Nil report: (i) If a harvest log was issued, the Nil Report form that was included in the harvest log shall be completed and returned with the harvest log to the Catch Reporting Service Provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder. (ii) If no catch reporting service arrangements were made, a letter shall be sent to the Department stating that the licence(s) were not

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder, and be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

6. Harvest Log:

Unless otherwise specified below, this section applies to both the paper harvest log and electronic harvest log. (1) The vessel master shall maintain a harvest log of all harvest operations. The format of the harvest log shall meet the requirements set out by the Department. For further information, a sample of the paper harvest log page can be found in the current Northern BC Salmon Integrated Fisheries Management Plan.

(a) To obtain an approved paper harvest log, the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(b) To obtain an approved electronic harvest log (E-log), the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(2) If the paper harvest log contains more than one page, the pages shall be bound in such a manner that the removal of a page cannot be performed without leaving evidence of said removal.

(3) Each page of the paper harvest log shall be numbered sequentially.

(4) A carbon copy shall be made for each page of the paper harvest log.

(5) The vessel master shall ensure that the information recorded in the harvest log is complete and accurate.

(6) The vessel master using a paper harvest log shall print and sign their name and FIN beside each Daily Catch Record made in the paper harvest log. Vessel masters using electronic harvest logs shall select their name from the Captain Name list for each Start Fishing Report. (7) A separate daily catch record entry in the harvest log shall be made for each Area fished.

(8) Recording of harvest log data: (a) Daily Catch Records: (i) In all Areas, Daily catch information shall be recorded on the Daily Catch Record page in the log before any fish are landed.

(ii) A separate line on the Daily Catch Record page shall be used to record any additional catch harvested in the same calendar day following a landing.

(iii) If there are two separate fishery openings on one calendar day, harvest information from the first opening shall be recorded in the harvest log prior to the vessel participating in the second opening.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(iv) Daily Catch information shall be recorded on the Daily Catch Record page in the harvest log not later than 23:59 h of each day fished. If a fishery spans two calendar days then the harvest information shall be recorded before 23:59 h of the second day.

(v) For each date and Area fished, the vessel master shall ensure the following information is recorded in the harvest log: (A) vessel masters name; (B) vessel masters signature; (C) Trip Identification Number; (D) date fished; (E) Area fished; (F) number of hours fished; (G) number of sets; (H) depth of the net fished, in meshes; (I) Subarea(s) fished; (J) number of fish caught and retained by species or category as indicated on the Daily Catch Record page of the harvest log; (K) number of fish caught and released by species or category as indicated on the Daily Catch Record page of the harvest log; and (L) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(vi) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (b) Offload Records: (i) Offload Reports for each landing shall be recorded on the Offload Catch Record page in the harvest log not later than 24 hours following the completion of the landing.

(ii) For each offload, the vessel master shall ensure the following information is recorded in the harvest log: (A) vessel masters name; (B) vessel masters signature; (C) Trip Identification Number; (D) First date fished; (E) Last date fished; (F) Last Management Area fished; (G) Number of days fished; (H) Date and time offloaded; (I) Business and port, or name and VRN of Packer offloaded to (or specify personal use); (J) Fish slip number or sales slip number; and (K) Number of fish landed by species or category as indicated on the Offload Catch Record page of the harvest log.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(c) Pause Fishing Records: (i) The vessel master shall ensure that the Pause Fishing Reports are recorded in the harvest log not later than: (A) not later than 24 hours following the completion of a fishery opening; (B) if a fishery is extended, not later than 24 hours following the completion of the extension; (C) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, not later than 24 hours following the completion of the second opening; and (D) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(ii) For each day of a fishing trip on which no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; (B) Trip Identification Number obtained when the Start Fishing Report was made; (C) date on which no fishing occurred; and (D) Area in which the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu

master had intended to fish on that date.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(d) Cancel Trip Records: (i) The vessel master shall ensure that the Cancel Fishing Record is recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(ii) For each fishing trip where no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; and (B) intended date, time and Area where fishing was to have begun.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) End Fishing Records: (i) the vessel master shall ensure that the End Fishing Record is recorded in the harvest log not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip.

(9) The harvest log shall be kept on board the licensed vessel when the vessel is participating in a fishery opening and when travelling to or from a fishery opening.

(10) The harvest log shall contain data pertaining to a single vessel only.

(11) The harvest log shall be produced for examination on demand of a fishery officer, a fishery guardian or an observer.

(12) All recording in the paper harvest log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialled by the vessel master.

(13) Erasure of an entry in the harvest log is not permitted.

(14)(a) If a harvest log in which harvest information has been recorded is lost or destroyed, and no complete records of that harvest information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the Catch Reporting Service Provider. (b) The carbon copies of all pages from the paper harvest log with harvest information would represent a complete record of harvest information. The harvest log shall be replaced prior to any subsequent fishing trips.

(15)(a) Subject to subsection 6(16), the licence holder shall ensure that all paper harvest logs issued, whether used to record fishing or not, are delivered to the issuing Catch Reporting Service Provider by January 31, 2018, and that all records recorded in those paper harvest logs are entered into the Salmon Catch Database by December 31, 2018. Returned harvest logs shall contain the original copies of all

Document Released Under the Access to Information Act / Document divulgué en vertu

pages issued.

(b) Carbon copies from the completed paper harvest log(s) shall be retained by the licence holder until December 31, 2018. In cases where the harvest log(s) is (are) lost during delivery to the Catch Reporting Service Provider, images of these carbon copies (either fax or photocopy images) shall be delivered forthwith to the Catch Reporting Service Provider as a backup.

(16) Where a licensed fishing vessel has been leased to a fisher who is different from the named licence holder, the lessee shall be responsible for the submission of the harvest log.

(17) Nil Reports: (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by April 30, 2018.

(b)Submitting a Nil report: (i)If a harvest log was issued, the licence holder shall complete the Nil Report form that was included in the harvest log, and return it with the harvest log to your logbook service provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder; or (ii) harvesters using an electronic log, or if no logbook service arrangements were made, the licence holder shall send a letter to the Department stating that the licence(s) were not fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder.

(c)Nil reports shall be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

7. Catch Monitoring:

(1) All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

Note: The phone number and office hours for the "At-Sea Observer Service Provider" will be posted via Fishery Notice.

Fishery Notices can be viewed on the DFO website at: http://notices.dfo-mpo.gc.ca.

8. Landing of catch:

(1) Subject to subsection 8(1)(b), for those fishing in Areas 3, 4, or 5 the locations at which the landing of fish from the vessel is permitted will be announced prior to each opening via Fishery Notice. (b) All fish caught under the authority of this licence shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia) except: (i) fish sold directly to the public under authority of a fisherman's vending licence issued under the Fisheries Act (Province of British Columbia).

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Landing Observing Program: (a) All vessels participating in the Area C gill net fishery in Areas 3, 4, and 5, who are selected by the Landing Observer Service Provider shall provide the Landing Observer at the time of landing a daily catch report confirmation number demonstrating that the harvester has reported their catch.

(b) Should the vessel master be requested by the Landing Observer Service Provider, a Landing Observer shall be present during the landing of all catch to record the number of each species of fish delivered.

(c) The vessel master shall provide a Landing Observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing.

Note: The phone number and office hours for the "Landing Observer Service Provider" will be posted via Fishery Notice.

Fishery Notices can be viewed on the DFO website at: http://notices.dfo-mpo.gc.ca.

9. Fish Slips

(1) The vessel master shall provide records, in the form commonly known as a fish slip or sales slip, of all fish caught and retained under authority of this licence including fish that are sold to the public and retained for personal use.

(2) A fish slip shall be completed for each landing. (3) The vessel master shall ensure that each fish slip contains the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales; (vi) date of landing; (vii) time of landing; (viii) number of days fished in each Area; (ix) landed weight of each species by grade and method of dressing reported separately in pounds; (x) number of pieces landed for each species by grade and method of dressing of fish; (xi) price paid per pound, by species; and (xii) total catch value of all species.

(4) The vessel master, or the person delivering the fish, shall print their name and sign the fish slip once completed.

(5) The vessel master shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

(6) Where the vessel is licensed for more than one Salmon Area, catch from each Salmon Area shall be reported on separate fish slips.

Document Released Under the Access to Information Act / Document divulgué en vertu

Note: Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website: http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

10. Species At Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

11. Seabirds

(1) Fishers shall take precautions to avoid fishing among seabirds.

Note: Fishers are requested to retain all dead birds which are entangled and to release live and unharmed birds by placing them in the water. Please check all birds for metal bird bands (rings) on the leg. If a bird is banded please contact Laurie Wilson with the band number and capture date and location at 1-866-431-2473 (BIRD) or by the email below. Handle birds with gloves, double bag dead birds and label each bird with date, time, and location and store them on ice. Please call your local charter patrol to organize pick-up or drop them off at a local DFO office. Alternatively, please send photographs of birds with a reference object such as a coin, and the date, time and location to laurie.wilson@canada.ca. Your names and vessel names do not need to be identified or included.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

Document Released Under the Access to Information Act / Document divulgué en vertu

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all

Document Released Under the Access to Information Act / Document divulgué en vertu

catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

Document Released Under the Access to Information Act / Document divulgué en vertu

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish

Document Released Under the Access to Information Act / Document divulgué en vertu

Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round

Document Released Under the Access to Information Act / Document divulgué en vertu

weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be

Document Released Under the Access to Information Act / Document divulgué en vertu

used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing

Document Released Under the Access to Information Act / Document divulgué en vertu

designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of

Document Released Under the Access to Information Act / Document divulgué en vertu

completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that

Document Released Under the Access to Information Act / Document divulgué en vertu

all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time

Document Released Under the Access to Information Act / Document divulgué en vertu

February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

Document Released Under the Access to Information Act / Document divulgué en vertu

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish

Document Released Under the Access to Information Act / Document divulgué en vertu

dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25

Document Released Under the Access to Information Act / Document divulgué en vertu

Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Document Released Under the Access to Information Act / Document divulgué en vertu

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by

Document Released Under the Access to Information Act / Document divulgué en vertu

species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

Document Released Under the Access to Information Act / Document divulgué en vertu

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and

Document Released Under the Access to Information Act / Document divulgué en vertu

there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

Document Released Under the Access to Information Act / Document divulgué en vertu

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

Document Released Under the Access to Information Act / Document divulgué en vertu

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the

Document Released Under the Access to Information Act / Document divulgué en vertu

weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Licence Area: SALMON AREA A
Waters in which fishing is permitted: Areas 1 to 10, Subarea 101-7
Species: SALMON
Gear: SEINE

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2016-17 FISHERIES AGREEMENT ON OR BEFORE JUNE 30, 2016, THIS LICENCE WILL EXPIRE ON MARCH 31, 2017. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2016-17 FISHERIES AGREEMENT ON OR BEFORE JUNE 30, 2016, THIS LICENCE WILL EXPIRE ON JUNE 30, 2016.

IT IS A CONDITION OF THIS LICENCE THAT NO SALMON MAY BE ON BOARD THIS VESSEL DURING THE PERIOD COMMENCING SIX HOURS PRIOR TO THIS VESSEL BEING USED TO FISH IN A COMMERCIAL SALMON FISHERY AND ENDING TWELVE HOURS AFTER THIS VESSEL HAS BEEN USED TO FISH FOR SALMON IN A COMMERCIAL SALMON FISHERY EXCEPT FOR
(A) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE PACIFIC FISHERY REGULATIONS, 1993,
(B) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS IN WHICH THE MINISTER HAS AUTHORIZED THE SALE OF SALMON, AND(C) SALMON CAUGHT UNDER THE AUTHORITY OF A TIDAL WATERS SPORT FISHING

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

LICENCE

THIS LICENCE DOES NOT AUTHORIZE FISHING FOR SALMON UNTIL THE FULL SALMON CONDITIONS OF LICENCE ARE ATTACHED. SCHEDULE II OPTION CONDITIONS DO NOT AUTHORIZE FISHING FOR SALMON.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 10 Aug 2017

Licence Serial No.: 431721

Document Released Under the Access to Information Act / Document divulgué en vertu de la

Version Date: 06-Jun-2017

CONDITIONS OF 2017/2018 COMMUNAL SALMON AREA A LICENCE Licence Period: April 1, 2017 to March 31, 2018 (Seine- North Coast)

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of salmon fisheries, obtain a copy of the current Northern BC Salmon - Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for salmon and to species of fish permitted as by-catch while fishing for salmon.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"Cancel Trip Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Cancel Trip Report (see subsection 4(7)).

"Catch Reporting Service Provider" means a company, organization or individual authorized by the Department to distribute harvest logs, and to process certain in-season and post-season reports required by these conditions of licence. Detailed information regarding the Catch Reporting Service Provider will be released by Fishery Notice prior to the fishing season. For additional information on the authorized Catch Reporting Service Provider for 2017, contact your fishery manager.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Daily Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Daily Catch Report (see subsection 4(5)).

"day" means a calendar day, beginning at 00:01 h and ending at 23:59 h.

"Department" means the Department of Fisheries and Oceans.

"Designated landing site" means a location where the landing of salmon is permitted under these conditions.

"Electronic Logbook" (E-Log) means a computer application approved by the Department that captures commercial catch and other fishery-related information in an electronic format. The computer application shall transmit this information into the Salmon Fishery Database using the data specifications set out by the Department.

"End Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an End Fishing Report (see subsection 4(9)).

"Fisher Identification Number (FIN)" means the unique identification number issued to fishers by the Department for licensing and other fisheries management purposes.

"fishery opening" means a period during which fish may be caught under authority of this licence pursuant to the Pacific Fishery Regulations, 1993.

"fishing trip" means the time between leaving a port to commence commercial salmon fishing and the return to a port or the landing of catch that results in a discontinuation of fishing for one day or longer.

"harvest log" means the record of fishing activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"hours fished" means the number of hours spent in an area open to commercial fishing where the licensed vessel is engaged in any fishing activities, including but not limited to, all activities related to setting, hauling, picking, cleaning, and transiting between sets.

"Landing" means the removal of fish from the licensed vessel, whether to a shore-based facility or to a packer. "Landing Catch Report Confirmation Number" means the unique number provided by an authorized Landing Observer Service Provider upon completion of a landing report for non- "quota fisheries" (see subsection 7(4)).

"Landing" means the removal of fish from the licensed vessel, whether to a shore-based facility or to a packer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"Landing Observer" means an individual authorized by the Department to monitor landings and verify the weight and number of each species of salmon landed as required by these conditions of licence.

"Landing Observer Service Provider" means a company authorized by the Department to provide Landing Observers as required by these conditions of licence. Detailed information regarding the Landing Observer Service Provider will be released by Fishery Notice prior to the fishing season. For additional information on the authorized Landing Observer Service Provider for 2017, contact your fishery manager.

"management week" means, in Management Area 4, beginning on Thursday at 00:01 h and ending on the following Wednesday at 23:59 h.

"observer" means a person designated by the Regional Director-General to carry out duties described in subsection 39(2) of the Fishery (General) Regulations.

"Pause Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Pause Fishing Report (see subsection 4(10)).

"quota fishery" means a fishery for which an individual quota has been assigned to the vessel named in this licence.

"quota species" means a species for which an individual quota amount in section 1(1)(e) has been assigned to the vessel named in this licence.

"Salmon Fishery Database" means a restricted access computer database maintained by the Department, which stores information required by these conditions to be reported to the Department.

"Trip Identification Number" means the unique number provided by an authorized Salmon Catch Reporting Service Provider upon completion of a Start Fishing Report (see subsection 4(4)).

"Vessel Registration Number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

"weekly seine TAC" means, in Management Area 4, the seine total allowable catch of the specified species during that management week as published by the Department.

1. Communal Conditions (1) Fish caught under authority of this licence may be sold, traded or bartered.

(2) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Document Released Under the Access to Information Act / Document divulgué en vertu de la

Designations are personal and non-transferable.

(3) Size of fish permitted to be taken: (a) No person shall catch and retain a Halibut that is less than (i) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (ii) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(b) No person shall catch and retain a Sablefish that is less than (i) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(c) No person shall catch and retain a lingcod that is less than (i) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (ii) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

(4) Identification of fishing vessel and gear: (a) The designated vessel shall be identified in accordance with section 26 of the Fishery (General) Regulations. (b) All fishing gear shall be identified in accordance with sections 27 and 29 of the Fishery (General) Regulations.

2. Species and quantities of fish permitted to be taken:

(1) Species of fish: (a) Subject to variation of the close times set out in the Pacific Fishery Regulations, 1993, this licence authorizes the licensed vessel to retain the following species to the maximum amounts set out: (i) Chinook Salmon.....no limit; (ii) Chum Salmon.....no limit; (iii) Coho Salmon.....no limit; (iv) Pink Salmon.....no limit; (v) Sockeye Salmon.....Management Area 4 only: 0.92593% of the weekly seine TAC in any given management week (see subsection 1(1)(b)); and (vi) Sockeye Salmon.....all other Areas: no limit.

(b) The Management Area 4 weekly seine TAC for Sockeye will be posted at:

http://notices.dfo-mpo.gc.ca/fns-sap/index-eng.cfm

and at any DFO office in the form of a fishery notice. The Management Area 4 weekly seine TAC may be modified in-season by subsequent fishery notices.

(c) Fishing in Management Area 4 shall cease when the vessel maximum set out in subsection 1(1)(a)(v) is reached. The vessel shall not continue to fish for other species as by-catch. In the event that an overage occurs, quota reallocations must be completed within 48 hours of the close of the fishery and prior to participating in any subsequent fisheries. Failure to reconcile quota overages within 48 hours will render all fish in excess caught in contravention of the regulations and conditions. The weekly seine TAC is not cumulative between weeks and thus there will be no

Document Released Under the Access to Information Act / Document divulgué en vertu de la

carry-over of quota past the end of any given management week.

(d) Subsection 1(1)(a)(v) may be amended in season to reflect transfer of share to or from another licence holder.

(2) Catch prohibited on board the licensed vessel while fishing:

(a) No salmon of species that are not permitted to be retained under the authority of this licence at the time and area being fished shall be on board the licensed vessel.

(b) No quota species caught while fishing in a non-quota fishery shall be on board the licensed vessel while fishing in a quota fishery. For clarity, all quota species on board the vessel while fishing in a quota fishery shall be counted against the licence's quota.

(c) Any fish that have been landed and validated.

(d) Subsection 1(2)(a) does not apply to fish being held temporarily in revival tanks as required.

3. Waters in which and times when fishing is permitted: Fishing is permitted in Areas 1 to 10 for a species of salmon by purse seine gear, in those areas and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for that species of salmon with a type of vessel licensed for Salmon Area A, in that area and during that time.

4. The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon seine net.

(2) All fish captured by the seine net shall be removed from the seine net, prior to the seine net being removed from the water, by using a brailer or a dip net, except during fishery openings in the following Subareas:

(a) fishery openings in Subareas 2-3 and 2-4; (b) fishery openings in Subarea 7-17; and (c) fishery openings in the Klemtu Pass portion of Subarea 7-5 during the period August 22, 2017, to December 31, 2017.

(3) Only one standard brailer as defined in subsection 3(4) or one sock brailer as defined in subsection 3(5) shall be used to transfer fish from the water enclosed by a seine net to the vessel. The brailer may be operated by a winch.

(4) All catch transferred from the water to the vessel from a brailer or dip net must be completely removed from the brailer and sorted; all catch not authorized to be retained under the authority of this licence shall be returned to the water immediately with the least possible harm or placed in an operating revival box before the brailer or dip net is returned to the water to retrieve another load of fish.

(5) Definition of standard brailer: The standard brailer shall be constructed in the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

following manner and with the following specifications:

(a) a bag of web shall be hung on a rigid hoop attached to a handle; (b) the bag shall be opened by releasing a line running through rings attached to the bottom of the bag; (c) the hoop: (i) if formed in a circle, shall have a maximum inside diameter of 122 cm; or (ii) if in a shape other than a circle, shall have a maximum inside circumference of 381 cm; (d) the web shall be of soft knotless construction and the mesh size shall not exceed 57 mm measured along two contiguous sides of a single mesh; and (e) the maximum distance from the top of the hoop to the bottom of the web when in an open condition shall not exceed 148 cm.

(6) Definition of sock brailer: A sock brailer is constructed of a sleeve of non-porous material fastened to a rigid hoop and handle at one end and the sorting box at the other. This forms a tube that lifts water as well as fish, keeping the fish wet and reducing pressure on them while they are transferred from the seine net to the sorting box. There may be a narrow band of soft, knotless web between the hoop and the top of the sleeve.

The sock brailer shall be constructed in the following manner and with the following specifications: (a) the hoop, formed in a circle, shall have a maximum inside diameter of 91 cm; (b) the hoop shall have a handle attached to it; (c) if soft knotless web is attached between the hoop and non-porous material, it shall not exceed 30 cm in width and the mesh size shall not exceed 57 mm (stretched measure); (d) the sleeve of non-porous material or non-porous material and knotless web shall have a maximum inside diameter of not more than 91 cm and not less than 51 cm; (e) the end of the sleeve opposite the hoop shall be attached to a sorting box in such a manner that fish are deposited smoothly into the sorting box. The sorting box shall be constructed of material that is smooth (e.g. aluminium) and be large enough to temporarily hold the fish and water from one sock brailer load; and (f) when fish and water are being moved from the seine net to the sorting box the loaded weight of the sleeve shall be supported by a ramp from the vessel railing to the sorting box.

(7) Hand-held dip nets are permitted to be used to transfer fish from the water enclosed by a seine net to the vessel. No mechanical or electrical power shall be used to operate a dip net.

(8) The dip net shall be constructed of a shallow bag of soft, knotless web attached to a handle.

(9) While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall:

Document Released Under the Access to Information Act / Document divulgué en vertu de la

(a) be constructed of non-transparent material; (b) be designed to hold a minimum of 250 litres of water; (c) have inside dimensions of which two shall be a minimum of 90 cm x 49 cm; (d) be equipped with a tight fitting lid made of non-transparent material; (e) be in operation at all times while the seine net is in the water, from the initial setting to the final retrieval back on board, and while fish are being held in the tank; (f) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a rate of 90-110 litres (20-24 Imp gal) per minute; (g) be kept clean and in operable condition; and (h) shall not be used for any purpose other than that outlined above.

(10) The use of a powered auxiliary vessel to assist in casting, closing or otherwise operating the seine is prohibited.

5. Fishing Reports:

(1) The person identified as the vessel master in subsection 4(4)(c)(iv) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities, including fish slips, for the duration of the fishing trip.

(2) If a new vessel master assumes operation of the vessel during a fishing trip, a new start fishing report shall be made and a new Trip Identification number acquired, as set out in subsection 4(4)(c).

(3) Failure to provide all required information will be considered a failure to report and will be treated as a failure to comply with these conditions. (4) Start Fishing Report: (a) Prior to beginning fishing on a fishing trip and no earlier than one week prior to initiating fishing activity, the vessel master shall: (i) inactivate all previous Trip Identification Numbers applicable to this licence by completion of either End Trip Reports or Cancel Trip Reports; (ii) make a Start Fishing Report and obtain a new Trip Identification Number; and (iii) record the Trip Identification Number in the appropriate space in the paper harvest log.

(b) To make a Start Fishing Report and obtain a new Trip Identification Number, the vessel master shall ensure that all Pause Fishing, End Fishing, Cancel Fishing and Daily Catch Reports for all previous fishing trips have been completed.

(c) To obtain a Trip Identification Number, the vessel master using paper harvest logs shall provide the following information to the service provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number (ii) a page number from the harvest log; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; and (v) intended fishing start date, time and Area fishing will begin.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) If the vessel master wishes to fish in a different Area than recorded in the Start

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Fishing Report, the vessel master shall submit either (i) a Cancel Trip Report if no fishing has occurred; or (ii) an End Fishing Trip if fishing has occurred and submit a new Start Fishing Report for the new Area.

(5) Daily Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) make a Daily Catch Report and obtain a Daily Catch Report Confirmation Number for each Daily Catch Record; and (ii) record the Daily Catch Report Confirmation Number in the appropriate space of the Daily Catch Record in the paper harvest log.

(b) The Daily Catch Report Confirmation Number shall be recorded in the harvest log: (i) for fishing in Management Area 4, for each day of fishing prior to 08:00 h of following day, and prior to fish being landed; or (ii) for fishing in Management Areas 3 or 6, for each day of fishing prior to fish being landed; and (A) not later than 24 hours after the completion of a fishery opening; (B) if a fishery opening is extended, not later than 24 hours after the completion of the extension; (C) if a new fishery is opened in an area within 12 hours of the closure of the previous fishery in the same area, a Daily Catch Report is not required until the completion of the second opening; and (D) for fishery openings that last longer than seven (7) days, a Daily Catch Report shall be made within seven (7) days for each day of fishing. (For example, if the fishery commences on a Monday, a Daily Catch Report shall be made before the following Monday); or (iii) for fishing in all other areas, except Management Area 3, 4 or 6: (A) not later than 24 hours after the completion of a fishery opening; (B) if a fishery opening is extended, not later than 24 hours after the completion of the extension; (C) if a new fishery is opened in an area within 12 hours of the closure of the previous fishery in the same area, a Daily Catch Report is not required until the completion of the second opening; and (D) for fishery openings that last longer than seven (7) days, a Daily Catch Report shall be made within seven (7) days for each day of fishing. (For example, if the fishery commences on a Monday, a Daily Catch Report shall be made before the following Monday).

(c) To obtain a Daily Catch Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) harvest log page number; (iii) Salmon Licence Area; (iv) vessel master name and vessel master Fisher Identification Number; (v) for each date and Area fished: (A) date fished; (B) Area fished; (C) Subarea(s) fished; (D) number of hours fished; (D) number of sets; (E) number of fish caught and retained by species or type as indicated in the harvest log; (F) number of fish caught and released by species or type as indicated in the harvest log; and (G) number of non-fish (i.e. turtles, birds and mammals) encountered by species or type.

(e) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number and page number, by digital transmission to

Document Released Under the Access to Information Act / Document divulgué en vertu de la

the Salmon Fishery Database in a properly encoded electronic mail message.

(6) Pause Fishing Report: (a) Under the circumstances set out below, the vessel master shall: (i) make a Pause Fishing Report and obtain a Pause Fishing Report Confirmation Number for each day of a fishing trip on which no fishing occurred; and (ii) record the Pause Fishing Report Confirmation Number in the appropriate space in the paper harvest log.

(b) Pause Fishing Report Confirmation Numbers shall be recorded in the harvest log: (i) for fishing in Management Area 4, for each day of fishing prior to 08:00 h of following day, and prior to fish being landed; or (ii) for fishing in Management Areas 3 or 6, for each day of fishing prior to fish being landed; and (A) not later than 24 hours after the completion of a fishery opening; (B) if a fishery opening is extended, not later than 24 hours after the completion of the extension; (C) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, a Pause Fishing Report is not required until the completion of the second opening; and (D) for fishery openings that last longer than seven (7) days, a Pause Fishing Report shall be made within seven (7) days for each day of fishing. (For example, if the fishery commences on a Monday, a Pause Fishing Report shall be made before the following Monday); or (iii) for fishing in all other Areas, except Management Areas 3, 4 or 6: (A) not later than 24 hours after the completion of a fishery opening; (B) if a fishery opening is extended, not later than 24 hours after the completion of the extension; (C) if a new fishery is opened in an area within 12 hours of the closure of the previous fishery in the same area, a Daily Catch Report is not required until the completion of the second opening; and (D) for fishery openings that last longer than seven (7) days, a Daily Catch Report shall be made within seven (7) days for each day of fishing. (For example, if the fishery commences on a Monday, a Daily Catch Report shall be made before the following Monday).

(c) To obtain a Pause Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the service provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) a page number from the harvest log; (iii) Salmon Licence Area; (iv) Trip Identification Number obtained when the Start Fishing Report was made; (v) date on which no fishing occurred; and (vi) Management Area in which the vessel master had intended to fish on that date.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(7) Cancel Trip Report: (a) If no fishing occurs on a planned fishing trip for which a Trip Identification Number was obtained the vessel master shall: (i) make a Cancel Trip Report and obtain a Cancel Trip Report Confirmation Number; and (ii) record the Cancel Trip Report Confirmation Number in the appropriate space in the paper

Document Released Under the Access to Information Act / Document divulgué en vertu de la

harvest log.

(b) The Cancel Trip Report Confirmation Number shall be recorded in the harvest log within 72 hours of the time given on the Start Fishing Report as the intended time to start fishing.

(c) To obtain a Cancel Trip Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the service provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) page number from the harvest log; (iii) Salmon Licence Area; and (iv) intended start date, time and Area where fishing was to have begun.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(8) Interim Reports: (a) Upon demand of a fishery officer, fishery guardian or a representative of the Department, the vessel master shall immediately provide orally in person or by radio, or in writing, any or all of the following information that may be requested: (i) an accurate estimate of the amount of fish on board the vessel as well as fish caught and released; (ii) information concerning the location of catch, rate of catch and method of transporting of the catch; (iii) the name and location of the person or company buying the catch; and (iv) the trip identification number obtained from the Catch Reporting Service Provider.

(9) End Fishing Report: (a) Not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip, the vessel master shall: (i) make an End Fishing Report and obtain a unique End Fishing Report Confirmation Number for each Trip Identification Number; and (ii) record the End Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) The vessel master shall ensure that a unique End Fishing Report Confirmation Number for each Trip Identification Number is obtained if fishing occurred on the fishing trip and: (i) if fishing stopped for 24 hours or longer for landing to a plant or to another vessel; or (ii) if the fishery closed for 12 consecutive hours or longer; and (iii) prior to a subsequent trip.

(c) To obtain an End Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the service provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) page number from the harvest log; (iii) Salmon Licence Area; (iv) Trip Identification Number for the fishing trip being ended; and (v) last date, time and Area fished. (vi) For Areas 3, 4 and 6, vessel masters shall also include the following information within their end fishing report: (A) Designated landing site where catch has been landed.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon

Document Released Under the Access to Information Act / Document divulgué en vertu de la

Fishery Database in a properly encoded electronic mail message.

(10) NIL Reports: (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by January 31, 2017.

Note: transferring quota from a licence does not constitute fishing; thus, if quota was transferred from a licence, but no fishing occurred under that licence, a Nil Report is required.

(b) Submitting a Nil Report: (i) If a paper harvest log was issued, the licence holder shall complete the Nil Report form that was included in the harvest log, and return it with the harvest log to the Catch Reporting Service Provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder.

(ii) If an electronic harvest log was used, the licence holder shall submit this information, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (iii) If no logbook service arrangements were made and no logbook issued, the licence holder shall send a letter to the Department stating that the licence(s) were not fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder, and be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

6. Harvest Log

Unless otherwise specified below, this section applies to both the paper harvest log and the electronic harvest log.

(1) The licence holder shall make logbook arrangements with their Catch Reporting Service Provider if this licence is exercised.

(2) The vessel master shall maintain a harvest log of all harvest operations. The format of the harvest log shall meet the requirements set out by the Department. For further information, a sample of a paper harvest log can be found in the current Northern BC Salmon Integrated Fisheries Management Plan. (3) If the paper harvest log contains more than one page, the pages shall be bound in such a manner that the removal of a page cannot be performed without leaving evidence of said removal.

(4) Each page shall be numbered sequentially.

(5) A carbon copy shall be made for each page of the paper harvest log.

(6) The vessel master shall ensure that the information recorded in the harvest log is complete and accurate.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(7) The vessel master shall print and sign their name and FIN beside each record made in the paper harvest log. (8) Recording of harvest log data: (a) Daily Catch Records: (i) The vessel master shall ensure that separate Daily Catch Records are recorded in the harvest log for each day and Area fished, by no later than 08:00 h of the following day, and before any fish is landed.

(ii) For each date and Area fished, the vessel master shall ensure the following information is recorded in the harvest log: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of the net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species or type as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species or type as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species or type.

(iii) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(b) Offload Catch Records: (i) The vessel master shall ensure that the Offload Catch Record for each landing is recorded in the harvest log not later than two hours after completing the landing.

(ii) For each offload, the vessel master shall ensure the following information is recorded in the harvest log: (A) First date fished; (B) Last date fished; (C) Last Management Area fished; (D) Number of days fished; (E) Date and time offloaded; (F) Business and port, or name and VRN of Packer offloaded to (or specify personal use); (G) Fish slip number or sales slip number; and (H) Number of fish landed by species or type as indicated on the Offload Catch Record page of the harvest log.

(iii) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(c) Pause Fishing Records: (i) The vessel master shall ensure that the Pause Fishing Records are recorded in the harvest log: (A) for fishing in Management Area 4, for each day of fishing prior to 08:00 h of following day, and prior to fish being landed; (B) for fishing in Management Areas 3 or 6, for each day of fishing prior to fish being landed; and not later than 24 hours after the completion of a fishery opening; if a fishery opening is extended, not later than 24 hours after the completion of the extension; or (iii) for fishing in all other Areas, except Management Areas 3, 4 or 6, not later than 24 hours after the completion of a fishery opening or if a fishery opening is extended, not later than 24 hours after the completion of the extension.

(d) Cancel Trip Records: (i) The vessel master shall ensure that the Cancel Fishing Record is recorded in the harvest log not later than 72 hours following the time given

Document Released Under the Access to Information Act / Document divulgué en vertu de la

on the Start Fishing Report as the intended time to start fishing.

(ii) For each fishing trip where no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; and (B) intended date, time and Area where fishing was to have begun.

(iii) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) End Fishing Records: (i) the vessel master shall ensure that the End Fishing Record is recorded in the harvest log not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip.

(9) The harvest log shall be kept on board the licensed vessel when: (a) the vessel is participating in a fishery opening; and (b) when travelling to or from a fishery opening.

(10) The harvest log shall contain data pertaining to a single vessel only.

(11) The harvest log shall be produced for examination upon request of a fishery officer or a fishery guardian.

(12) All recording in the paper harvest log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialled by the vessel master.

(13) Erasure of an entry in the harvest log is not permitted.

(14)(a) If a harvest log in which harvest information has been recorded is lost or destroyed, and no complete records of that harvest information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the service provider. (b) The carbon copies of all pages from the paper harvest log with harvest information would represent a complete record of harvest information. The harvest log shall be replaced prior to any subsequent fishing trips.

(15)(a) Subject to subsection 5(16), the licence holder shall ensure that all paper harvest logs issued, whether used to record fishing or not, are delivered to the issuing service provider by January 31, 2017 and that all records recorded in those paper harvest logs are entered into the Salmon Catch Database by December 31, 2017. Returned harvest logs shall contain the original copies of all pages issued.

(b) Carbon copies from the completed paper harvest log(s) shall be retained by the licence holder until December 31, 2017. In cases where the harvest log(s) is (are) lost during delivery to the service provider, images of these carbon copies (either fax or photocopy images) shall be delivered forthwith to the service provider as a backup.

(16) Where a licensed fishing vessel has been leased to a fisher who is different

Document Released Under the Access to Information Act / Document divulgué en vertu de la

from the named licence holder, the lessee shall be responsible for the submission of the harvest log.

7. Catch Monitoring

All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

7. Landing of catch

(1) Reporting of Management Area 4 salmon landings:

(a) When the licensed vessel has reached its quota or the vessel master decides to stop fishing in Management Area 4, the vessel master shall report to the designated Catch Reporting Service Provider between 08:00 h and 16:00 h and provide the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number of the vessel master; (iv) contact phone number; (v) date, time, port and location of landing of the fish; (vi) name of fish buying station where fish are to be landed; (vii) Subarea that was fished; (viii) number and species of salmon landed; and (ix) product type.

(b) The vessel master shall report the day prior to the intended landing date to ensure that a Landing Observer is present upon arrival at the fish buying station.

(2) Management Area 4 Verification by a Landing Observer of the number and species of salmon landed:

(a) An observer shall be present during any landing of salmon catch from Management Area 4 to record the number and species of all salmon landed.

(b) Salmon caught in Management Area 4 shall not be transhipped from the licensed vessel to any other vessel. For clarity, this includes packers.

(c) Leaving the quota fishery:

If the licensed vessel leaves the quota fishery to fish in another fishery, the catch shall be landed and verified by a Landing Observer prior to entering the other fishery.

(d) All Management Area 4 salmon landings shall occur at designated landing sites. Notification of designated landing sites for Area 4 shall be made by fishery notice prior to each opening.

(3) Landing of fish harvested in Areas 3 and 6 is not permitted other than at a designated landing site. Notification of designated landing sites for Areas 3 and 6 shall be made by fishery notice prior to each opening.

(4) Landing Observing Program: (a) All vessels participating in the Area A seine fishery in Areas 3 and 6, who are selected by the Landing Observer Service Provider shall provide the Landing Observer at time of landing a Daily Catch Report

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Confirmation Number demonstrating that the harvester has reported their catch.

(b) Should the vessel master be requested by the Landing Observer Service Provider, a Landing Observer shall be present during landing of all catch to record the number of each species of fish landed.

(c) The vessel master shall provide a Landing Observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing.

Note: The phone number and office hours for the "Landing Observer Service Provider" will be posted via fishery notice.

9. Fish Slips

(1) The vessel master shall provide records, in the form commonly known as a fish slip or sales slip, of all fish caught and retained under authority of this licence including fish that are sold to the public and retained for personal use.

(2) A fish slip shall be complete for each landing.

(3) The vessel master shall ensure that each fish slip contains the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales; (vi) date of landing; (vii) time of landing; (viii) number of days fished in each Area; (ix) landed weight of each species by grade and method of dressing reported separately in pounds; (x) number of pieces landed for each species by grade and method of dressing of fish; (xi) price paid per pound, by species; and (xii) total catch value of all species.

(4) The vessel master, or the person delivering the fish, shall print their name and sign the fish slip once completed. (5) The vessel master shall submit slips no later than seven days after landing. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

(6) If the vessel is licensed for more than one Salmon Area, the catch from each Salmon Area shall be recorded on separate fish slips.

Fish slips may be downloaded and printed at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Fish slip books may also be ordered from the printer at user cost at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Phone (604) 666-2716 for more information.

10. Species at Risk

Document Released Under the Access to Information Act / Document divulgué en vertu de la
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

11. Seabirds (1) Fishers shall take precautions to avoid fishing among seabirds.

Note: Fishers are requested to retain all dead birds which are entangled and to release live and unharmed birds by placing them in the water. Please check all birds for metal bird bands (rings) on the leg. If a bird is banded please contact Laurie Wilson with the band number and capture date and location at 1-866-431-2473 (BIRD) or by the email below. Handle birds with gloves, double bag dead birds and label each bird with date, time, and location and store them on ice. Please call your local charter patrol to organize pick-up or drop them off at a local DFO office. Alternatively, please send photographs of birds with a reference object such as a coin, and the date, time and location to laurie.wilson@canada.ca. Your names and vessel names do not need to be identified or included.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal

Document Released Under the Access to Information Act / Document divulgué en vertu de la
This report may contain data rated up to Protected A.
Do not release this data to external parties.

organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line

Document Released Under the Access to Information Act / Document divulgué en vertu de la

gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

Document Released Under the Access to Information Act / Document divulgué en vertu de la
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

Document Released Under the Access to Information Act / Document divulgué en vertu de la
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

Document Released Under the Access to Information Act / Document divulgué en vertu de la

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from

Document Released Under the Access to Information Act / Document divulgué en vertu de la
This report may contain data rated up to Protected A.
Do not release this data to external parties.

the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and

Document Released Under the Access to Information Act / Document divulgué en vertu de la

Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi
This report may contain data rated up to Protected A.
Do not release this data to external parties.

the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Licence Area: SALMON AREA F

Waters in which fishing is permitted: Areas 1 to 10, 101 to 110, 130 and 142

Species: SALMON

Gear: TROLL

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2016-17 FISHERIES AGREEMENT ON OR BEFORE JUNE 30, 2016, THIS LICENCE WILL EXPIRE ON MARCH 31, 2017. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2016-17 FISHERIES AGREEMENT ON OR BEFORE JUNE 30, 2016, THIS LICENCE WILL EXPIRE ON JUNE 30, 2016.

IT IS A CONDITION OF THIS LICENCE THAT NO SALMON MAY BE ON BOARD THIS VESSEL DURING THE PERIOD COMMENCING SIX HOURS PRIOR TO THIS VESSEL BEING USED TO FISH IN A COMMERCIAL SALMON FISHERY AND ENDING TWELVE HOURS AFTER THIS VESSEL HAS BEEN USED TO FISH FOR SALMON IN A COMMERCIAL SALMON FISHERY EXCEPT FOR
(A) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE PACIFIC FISHERY REGULATIONS, 1993,
(B) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS IN WHICH THE MINISTER HAS AUTHORIZED THE SALE OF SALMON, AND(C) SALMON CAUGHT UNDER THE AUTHORITY OF A TIDAL WATERS SPORT FISHING

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

LICENCE

THIS LICENCE DOES NOT AUTHORIZE FISHING FOR SALMON UNTIL THE FULL SALMON CONDITIONS OF LICENCE ARE ATTACHED. SCHEDULE II OPTION CONDITIONS DO NOT AUTHORIZE FISHING FOR SALMON.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Version Date: 06-Jun-2017

CONDITIONS OF 2017/2018 COMMUNAL SALMON AREA F LICENCE Licence Period: April 1, 2017 to March 31, 2018

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of salmon fisheries, obtain a copy of the current Northern BC Salmon - Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for salmon.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"barbless hook" includes a barbed hook, the barb of which has been compressed so that it is in complete contact with the shaft of the hook.

"Cancel Trip Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Cancel Trip Report (see subsection 4(7)).

"Catch Reporting Service Provider" means a company, organization or individual authorized by the Department to distribute salmon harvest logs and to process certain in-season and post-season reports required by these conditions of licence. Detailed information regarding the Catch Reporting Service Provider will be released by Fishery Notice prior to the fishing season. For additional information on the authorized Catch Reporting Service Provider for 2016, contact your fishery manager.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Chinook Quota Reallocation Confirmation Number" means the unique number provided by the authorized program Resource Manager certifying completion of a Chinook quota reallocation transaction (see subsection 1(1)(d)).

"Daily Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Daily Catch Report (see subsection 4(5)).

"day" means a calendar day, beginning at 00:01 h and ending at 23:59 h.

"Department" means the Department of Fisheries and Oceans.

"Electronic Logbook" (E-Log) means a computer application approved by the Department that captures commercial catch and other fishery-related information in an electronic format. The computer application shall transmit this information into the Salmon Fishery Database using the data specifications set out by the Department.

"End Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an End Fishing Report (see subsection 4(9)).

"Fisher Identification Number (FIN)" means the unique identification number issued to fishers by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"fishery opening" means a period during which fish may be caught under authority of this licence pursuant to the Pacific Fishery Regulations, 1993.

"fishing trip" means the time between leaving a port to commence commercial salmon fishing and the return to a port or the landing of catch.

"harvest log" means the record of fishing activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Hours Fished" means the number of hours spent in an area open to commercial fishing where the licensed vessel is engaged in any fishing activities, including but not limited to, all activities related to setting, hauling, picking, cleaning, and transiting between sets. "landing" means the removal of fish from the licensed vessel, whether to a shore-based facility or to a packer.

"observer" means a person designated by the Regional Director-General to carry out duties described in subsection 39(2) of the Fishery (General) Regulations.

"Pause Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Pause Fishing Report (see subsection 4(6)).

"Salmon Fishery Database" means a restricted-access computer database

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

maintained by the Department, which stores information required by these conditions to be reported to the Department.

"TAC" means Total Allowable Catch.

"Trip Identification Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Start Fishing Report (see subsection 4(4)).

"Vessel Registration Number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

"week" means a calendar week, beginning at 00:01 h Sunday and ending at 23:59 h the following Saturday.

1. Communal Conditions (1) Fish caught under authority of this licence may be sold, traded or bartered.

(2) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

(3) Size of fish permitted to be taken: (a) No person shall catch and retain a Halibut that is less than (i) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (ii) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(b) No person shall catch and retain a Sablefish that is less than (i) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(c) No person shall catch and retain a lingcod that is less than (i) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (ii) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

(4) Identification of fishing vessel and gear: (a) The designated vessel shall be identified in accordance with section 26 of the Fishery (General) Regulations. (b) All fishing gear shall be identified in accordance with sections 27 and 29 of the Fishery (General) Regulations.

2. Species and quantities of fish permitted to be taken:

(1) Species of fish: (a) Subject to variation of the close times set out in the Pacific

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Fishery Regulations, 1993, this licence authorizes the licensed vessel to retain the following species to the maximum amount set out: (i) Chinook Salmon.....0.4149 percent of the 2017 Area F Total Allowable Catch (TAC); (ii) Chum Salmon.....no limit; (iii) Coho Salmon.....no limit; (iv) Pink Salmon.....no limit; and (v) Sockeye Salmon.....no limit.

(b) The 2017 Area F TAC for Chinook Salmon will be posted at:

http://notices.dfo-mpo.gc.ca

and at any DFO office in the form of a fishery notice. The Area F TAC may be modified in-season by subsequent fishery notices.

(c) Fishing for Chinook shall cease when the maximum set out in subsection 1(1)(a)(i) is reached.

(d) Subsection 1(1)(a)(i) may be amended in season to reflect the transfer of share to or from another licence holder. This transfer of share shall be assigned a Chinook Quota Reallocation Confirmation Number certifying completion of a Chinook quota reallocation. At all times while at sea, the vessel master shall have onboard the licensed vessel a record of all Chinook Quota Reallocation Confirmation Numbers provided. The vessel master shall immediately provide these numbers upon demand to a fishery officer, fishery guardian or representative of the Department.

(e) The maximum total uncaught quota that can be held by this licence is equal to three Individual Transferable Quotas which equates to 1.245 percent of the 2017 Area F TAC. The amount of uncaught quota shall be determined by fisher-supplied catch reports, dockside validations or a combination of the two.

(f) All rockfish (Sebastes sp.), except Yelloweye, Quillback, China, Tiger and Copper, to a maximum of twenty fish per day (of which a maximum of 5 may be Bocaccio) may be retained as by-catch to salmon fishing authorized by this licence (i.e. during salmon troll open times and when salmon are retained on board the vessel).

(g) The quantity of Yelloweye, Quillback, China, Tiger and Copper rockfish permitted to be taken is zero.

(h) The retention of Pacific Mackerel or Jack Mackerel is permitted as by-catch during openings for a type of vessel licensed for Salmon Area F.

(2) Catch prohibited on board the licensed vessel while fishing: (a) Subject to subsection 1(2)(d), no salmon of species that are not permitted to be retained under the authority of this licence at the time and area being fished shall be on board the licensed vessel. (b) No salmon caught under the authority of another salmon licence shall be on board the licensed vessel. For clarity, all Chinook on board the vessel shall be counted against the vessel's Area F Chinook quota. (c) Any fish that have been landed and validated. (d) Subsection 1(2)(a), does not apply to fish being held

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

temporarily in revival tanks as required.

3. Waters in which and times when fishing is permitted:

Salmon Area F: waters of Areas 1 to 11, 101 to 111, 130 and 142, for a species of salmon by troll gear, in those areas and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for that species of salmon with a type of vessel licensed for Salmon Area F, in that area and during that time.

4. The fishing gear permitted to be used and the manner in which it may be used:

(1) Salmon troll gear with single barbless hooks only during all salmon troll fisheries.

(2) The vessel licensed for Salmon Area F shall not have more than six gurdies installed or more than six lines in the aggregate, that are used or installed.

(3) While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured or stressed fish which the vessel is prohibited from retaining. Those salmon and steelhead that are lethargic or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then shall be released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall: (a) be constructed of non-transparent material; (b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm; (c) have a separate tight fitting lid for each compartment, made of non-transparent material; (d) have a separate inlet and outlet for each compartment; (e) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled; (f) be in operation while hooks are in the water and at all times when fish are being held in the tank; (g) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute; (h) be kept clean and in operable condition; and (i) shall not be used for any purpose other than that outlined above.

5. Fishing Reports:

(1) The person identified as the vessel master in subsection 4(4)(c)(iii) shall be on board the fishing vessel and shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities, including fish slips, for the duration of the fishing trip.

(2) If a new vessel master assumes operation of the vessel during a fishing trip, a new start fishing report shall be made and a new Trip Identification number acquired, as set out in subsection 4(4)(c).

(3) Failure to provide all required information will be considered a failure to report

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

and will be treated as a failure to comply with these conditions.

(4) Start Fishing Report: (a) Prior to beginning fishing on a fishing trip and not earlier than one week prior to initiating fishing activity, the vessel master shall: (i) inactivate all previous Trip Identification Numbers applicable to this licence by completion of either End Trip Reports or Cancel Trip Reports; (ii) make a Start Fishing Report and obtain a new Trip Identification Number; and (iii) record the Trip Identification Number in the appropriate space in the harvest log.

(b) To make a Start Fishing Report and obtain a new Trip Identification Number, the vessel master shall ensure that all Pause Fishing, End Fishing, Cancel Fishing and Daily Catch Reports for all previous fishing trips have been completed.

(c) To obtain a Trip Identification Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and paper harvest log page number; (ii) Salmon Licence Area; (iii) vessel master's name and vessel master's Fisher Identification Number; and (iv) intended date, time and Area fishing will begin.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(5) Daily Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Daily Catch Report Confirmation Number for each Daily Catch Record; and (ii) record the Daily Catch Report Confirmation Number in the appropriate space of the Daily Catch Record in the paper harvest log.

(b) The vessel master shall record the Daily Catch Report Confirmation Numbers in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; and (ii) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(c) To obtain a Daily Catch Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and paper harvest log page number; (ii) Salmon Licence Area; (iii) the Trip Identification Number obtained when the Start-Fishing Report was made; and (v) for each date and Area fished: (A) date fished; (B) Area fished; (C) number of hours fished; (D) Subarea(s)fished; (E) whether retained catch is frozen or iced; (F) number of fish caught and retained by species category as indicated in the harvest log; (G) number of fish caught and released by species category as indicated in the harvest log; and (H) number of non-fish (i.e. turtles, birds and mammals) encountered by species category.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Fishery Database in a properly encoded electronic mail message.

(6) Pause Fishing Report: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Pause Fishing Report Confirmation Number for each day of a fishing trip on which no fishing occurred; and (ii) record the Pause Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) The vessel master shall record the Pause Fishing Report Confirmation Numbers in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; and (ii) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(c) To obtain a Pause Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number obtained when the Start Fishing Report was made; (v) date on which no fishing occurred; and (vi) Management Area in which the vessel master had intended to fish on that date.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. Note: Pause Fishing Reports shall not to be used in the place of an End Fishing Report when vessels return to port.

(7) Cancel Trip Report: (a) If no fishing occurs on a planned fishing trip for which a Trip Identification Number was obtained the vessel master shall: (i) obtain a Cancel Trip Report Confirmation Number; and (ii) record the Cancel Trip Report Confirmation number in the appropriate space in the harvest log.

(b) The Cancel Trip Report Confirmation Number shall be recorded in the harvest log within 72 hours of the time given on the Start Fishing Report as the intended time to start fishing.

(c) To obtain a Cancel Trip Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and paper harvest log page number; (ii) Salmon Licence Area; and (iii) intended date, time and Area where fishing was to have begun.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(8) Interim Reports: Upon demand of a fishery officer, fishery guardian or a representative of the Department, the vessel master shall immediately provide orally

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

in person or by radio, or in writing, any or all of the following information that may be requested: (a) an accurate estimate of the amount of fish on board the vessel as well as fish caught and released; (b) information concerning the location of catch, rate of catch and method of transporting of the catch; and (c) the name and location of the person or company buying the catch.

(9) End Fishing Report: (a) Not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip, the vessel master shall: (i) make and End Fishing Report and obtain a unique End-Fishing Report Confirmation Number for each Trip Identification Number; and (ii) record the End-Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) To obtain an End Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number from the most recent completed fishing trip; and (v) last date, time and Area fished.

(c) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(10) Nil Reports (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by April 30, 2018.

(b) Submitting a nil report: (i) If a harvest log was issued, complete the Nil Report form that was included in the harvest log, and return it with the harvest log to your logbook Catch Reporting Service Provider. The Nil Report form shall include the vessel name, vessel registration number and the licence number(s), and it shall be signed by the licence holder; or (ii) If no logbook service arrangements were made, a letter shall be sent to the Department stating that the licence(s) were not fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder.

(iii) Nil reports shall be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

Note: transferring quota from a licence does not constitute fishing; thus, if quota was transferred from a licence, but no fishing occurred under that licence, a Nil Report is required.

6. Harvest Log

Unless otherwise specified below, this section applies to both the paper harvest log and electronic harvest log. (1) The vessel master shall maintain a harvest log of all

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

harvest operations. The format of the harvest log shall meet the requirements set out by the Department. For further information, a sample of the paper harvest log page can be found in the current Northern BC Salmon Integrated Fisheries Management Plan.

(a) To obtain an approved paper harvest log, the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(b) To obtain an approved electronic harvest log (E-log), the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(2) If the paper harvest log contains more than one page, the pages shall be bound in such a manner that the removal of a page cannot be performed without leaving evidence of said removal.

(3) Each page shall be numbered sequentially.

(4) A carbon copy shall be made for each page of the paper harvest log.

(5) The vessel master shall ensure that the information recorded in the harvest log is complete and accurate.

(6) The vessel master shall print and sign their name and FIN beside each Daily Catch Record made in the paper harvest log.

(7) Recording of harvest log data: (a) Daily Catch Records: (i) Shall be recorded in the harvest log for each day and Management Area fished, by no later than 08:00 h of the following day, and before any fish are landed.

(ii) A separate line on the Daily Catch Record page shall be used to record any additional catch harvested in the same calendar day following a landing.

(iii) For each date and Area fished, the vessel master shall ensure the following information is recorded in the harvest log: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of the net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species or type as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species or type as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species or type.

(iv) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (b) Pause Fishing Records: (i) The vessel master shall ensure that the Pause Fishing Reports are recorded in the harvest log not later than: (A) not later than 24 hours following the completion of a fishery opening; and (B) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(ii) For each day of a fishing trip on which no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; (B) Trip Identification Number obtained when the Start Fishing Report was made; (C) date on which no fishing occurred; and (D) Area in which the vessel master had intended to fish on that date.

(iii) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(d) Cancel Trip Records: (i) The vessel master shall ensure that the Cancel Fishing Record is recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(ii) For each fishing trip where no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; and (B) intended date, time and Area where fishing was to have begun.

(iii) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) End Fishing Records: (i) the vessel master shall ensure that the End Fishing Record is recorded in the harvest log not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip.

(8) The harvest log shall be kept on board the licensed vessel when the vessel is participating in a fishery opening and when travelling to or from a fishery opening.

(9) The harvest log shall contain data pertaining to a single vessel only.

(10) The harvest log shall be produced for examination on demand of a fishery officer or a fishery guardian.

(11) All recording in the paper harvest log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialled by the vessel master.

(12) Erasure of an entry in the log is not permitted.

(13)(a) If a harvest log in which harvest information has been recorded is lost or destroyed and no complete records of that harvest information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the Catch Reporting Service Provider. (b) The carbon copies of all pages from the paper harvest log with harvest information would represent a complete record of harvest information. The harvest log shall be replaced prior to any subsequent fishing trips.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(14)(a) Subject to subsection 5(16), the licence holder shall ensure that all paper harvest logs issued, whether used to record fishing or not, are delivered to the issuing Catch Reporting Service Provider by April 30, 2017 and that all records recorded in those paper harvest logs are entered into the Salmon Catch Database by December 31, 2017. Returned harvest logs shall contain the original copies of all pages issued.

(b) Carbon copies from the completed paper harvest log(s) shall be retained by the licence holder until December 31, 2017. In cases where the harvest log(s) is (are) lost during delivery to the Catch Reporting Service Provider, images of these carbon copies (either fax or photocopy images) shall be delivered forthwith to the Catch Reporting Service Provider as a backup.

(15) Where a licensed fishing vessel has been leased to a fisher who is different from the named licence holder, the lessee shall be responsible for the submission of the harvest log.

7. Catch Monitoring

All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

Note: The phone number and office hours for the "At-Sea Observer Service Provider" will be posted via Fishery Notice.

Fishery Notices can be viewed on the DFO website at http://notices.dfo-mpo.gc.ca.

8. The transhipping of fish from vessel to vessel is not permitted.

9. Landing of catch

(1) Reporting of landings from vessels that have retained Chinook Salmon: On the day prior to landing of any species of fish from vessels that have retained Chinook Salmon, between 0700 and 1700 hours, the vessel master shall phone J.O. Thomas and Associates at 1-888-624-2646 (1-888-624-COHO) and provide the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number of the vessel master; (d) contact phone number; (e) date, time, port and location of landing of the fish; (f) name of fish buying station where fish are to be landed; (g) Management Area (s) and Subarea(s) that were fished; (h) species; (i) product type; and (j) number of pieces.

(2) Verification by an observer of the number of fish landed:

(a) An observer shall be present during any landing of any species of fish from vessels that have retained Chinook Salmon ato record the number of fish landed by species. (b) An observer shall verify the number of Chinook Salmon on board caught under this Area F licence within 5 days of a Chinook Salmon closure. (c) All landings from vessels that have retained Chinook Salmon shall occur at one of the following locations: (i) Prince Rupert/Port Edward; (ii) Masset; (iii) Queen Charlotte; (iv) Port

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Hardy; (v) Campbell River; (vi) Nanaimo; or (vii) Vancouver.

10. Fish Slips

(1) The vessel master shall provide records, in the form commonly known as a fish slip or sales slip, of all fish caught and retained under authority of this licence.

(2) A fish slip shall be completed for each landing.

(3) The vessel master shall ensure that each fish slip contains the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales; (vi) date of landing; (vii) time of landing; (viii) number of days fished in each Area; (ix) landed weight of each species by grade and method of dressing reported separately in pounds; (x) number of pieces landed for each species by grade and method of dressing of fish; (xi) price paid per pound, by species; and (xii) total catch value of all species.

(4) The vessel master, or the person delivering the fish, shall print their name and sign the fish slip once completed. (5) The vessel master shall submit slips not later than seven days after landing. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit

200-401 Burrard Street Vancouver BC V6C 3S4

(6) Where the vessel is licensed for more than one Salmon Area, catch from each Salmon Area shall be reported on separate fish slips.

Fish slips may be downloaded and printed at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Fish slip books may also be ordered from the printer at user cost at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Phone (604) 666-2716 for more information.

11. Seabird Avoidance

(1) Fishers shall take precautions to avoid fishing among seabirds.

Note: Fishers are requested to retain all dead birds which are entangled and to release live and unharmed birds by placing them in the water. Please check all birds for metal bird bands (rings) on the leg. If a bird is banded please contact Laurie Wilson with the band number and capture date and location at 1-866-431-2473 (BIRD) or by the email below. Handle birds with gloves, double bag dead birds and label each bird with date, time, and location and store them on ice. Please call your local charter patrol to organize pick-up or drop them off at a local DFO office. Alternatively, please send photographs of birds with a reference object such as a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

coin, and the date, time and location to laurie.wilson@canada.ca. Your names and vessel names do not need to be identified or included.

12. Species At Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

13. Fisheries specifics

(1) Retention and delivery of Chinook and Coho Salmon heads.

(a) Subject to subsection 11(1)(b), the vessel master shall ensure that: (i) all heads of Chinook and Coho Salmon that are removed prior to landing are retained. The retained portion of each head shall include the upper portion of the head extending from the tip of the snout to a cut travelling from the top of the head, passing 1 cm behind the eye, and ending at the back corner of the mouth; (ii) all retained Chinook and Coho heads shall be stored in yellow plastic bags provided for this purpose by the Department ("Chinook/Coho head bags"); (iii) each head bag shall contain only the heads from a single week (Sunday to Saturday) of fishing; (iv) each head bag containing heads shall be sealed and labelled with a label provided for this purpose by the Department; (v) all labels shall be accurately completed, including: (A) the Vessel Name; (B)Vessel Registration Number; (C)Trip ID number; (D) the dates between which the enclosed heads were caught; and (E) the Management Area(s) in which the enclosed heads were caught; (vi) all retained heads shall be frozen within 12 hours and kept frozen until delivery; and (vii) all retained heads shall be delivered as follows: A) If delivering Chinook and/or Coho catch at a fish landing station, all heads on board shall be delivered to the same fish landing station. J.O. Thomas and Associates shall be notified of the head delivery 24 hours prior to landing, by calling 1-800-663-3344, between 0800 and 1600 hours Monday to Friday, or on the first business day following a week-end landing, giving the name and location of the fish landing station at which the heads have been delivered, and the number of head bags that have been delivered; or (B) If Chinook or Coho Salmon are not delivered to a fish landing station, heads shall be delivered directly and in person to a J.O. Thomas representative. Arrangements for such deliveries shall be made by calling 1-800-663-3344, between 0800 and 1600 hours Monday to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Friday. Such deliveries can only be made in Masset, Queen Charlotte City, Prince Rupert or Port Edward.

(b) Subsection 11(1)(a) does not apply to fishing under this licence where DFO issues a Fishery Notice stating that this licence is exempt from subsection (1) for the 2016 salmon fishing season.

Note: Chinook/Coho Head bags and labels will be provided at no cost by the Department, and can be picked up at the following DFO offices between 0800 hours and 1600 hours:

Commissionaire, main entrance, 3190 Hammond Bay Rd., Nanaimo; Mail Room,, 2nd floor reception, 200 - 401 Burrard St, Vancouver; Front counter, main entrance,315 - 940 Alder St. Campbell River Front Counter, main entrance, 4706 Tebo Ave., Port Alberni; Front Counter, main entrance, 8585 Wollason Rd, Port Hardy; Front counter, 417 2nd Ave W, Prince Rupert; Front Counter, 137 Bay St, Queen Charlotte City; Front Counter, 12551 No. 1 Road, Richmond; and Front Counter, 4250 Commerce Circle, Victoria Alternatively, shipment can be arranged. Phone DFO toll-free at 1-866-483-9994 for more information.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A. Do not release this data to external parties.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

This report may contain data rated up to Protected A. Do not release this data to external parties.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

Version Date: 05-Apr-2017

CONDITIONS OF 2017/2018 COMMUNAL SALMON AREA G LICENCE Licence Period: April 1, 2017 to March 31, 2018 (TROLL - WEST COAST VANCOUVER ISLAND)

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under subsection 22(1) of the Fishery (General) Regulations for the proper

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the salmon fishery obtain a copy of the current Southern B.C. Salmon Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for salmon and to species of fish permitted to be retained while fishing for salmon.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"barbless hook" includes a barbed hook, the barb of which has been compressed so that it is in complete contact with the shaft of the hook.

"Catch Reporting service provider" means a company, organisation or individual authorized by the Department to enter information into the Salmon Fishery Database, for the purpose of assisting licence holders and vessel masters in meeting these conditions of licence with regards to reporting of information.

"Cancel Trip Report Confirmation Number" means the unique number provided by an authorized Catch Reporting service provider upon completion of a Cancel Trip Report (see subsection 4(4)).

"Daily Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting service provider upon completion of a Daily Catch Report (see subsection 4(2)).

"day" means a calendar day, beginning at 00:01 h and ending at 23:59 h.

"Department" means the Department of Fisheries and Oceans.

"Designated landing site" means a location where the landing of salmon is permitted, as identified in section 7 of these licence conditions.

"Dockside Monitoring" means a count, by an approved service provider, of all fish

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

landed and any retained on board after offloading, by species.

"Electronic Logbook" (E-Log) means a computer application approved by the Department that captures commercial catch and other fishery-related information in an electronic format. The computer application shall transmit this information into the Salmon Fishery Database using the data specifications set out by the Department.

"End Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting service provider upon completion of an End Fishing Report (see subsection 4(6)).

"Fisher Identification Number (FIN)" means the unique identification number issued to fishers by the Department for licensing and other fisheries management purposes.

"fishery opening" means a period during which fish may be caught under authority of this licence pursuant to the Pacific Fishery Regulations, 1993.

"fishing trip" means the time between leaving a port to commence commercial salmon fishing and the return to a port or the landing of catch.

"harvest log" means the record of fishing activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"observer" means a person designated by the Regional Director-General to carry out duties described in subsection 39(2) of the Fishery (General) Regulations.

"landing" means the removal of fish from the licensed vessel, whether to a shore-based facility or to another vessel.

"plug" means a cylindrical, hard bodied lure painted to resemble a bait fish.

"Salmon Fishery Database" means a restricted access computer database maintained by the Department, which stores information required by these conditions to be reported to the Department.

"Trip Identification Number" means the unique number provided by an authorized Catch Reporting service provider upon completion of a Start Fishing Report (see subsection 4(1)).

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

"week" means a calendar week, beginning at 00:01 h Sunday and ending at 23:59 h the following Saturday.

"wild Coho Salmon" means any Coho Salmon that does not possess a healed scar in place of the adipose, pelvic or pectoral fin, or in place of a maxillary.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

1. Communal Conditions (1) Disposition of fish: (a) Fish caught under authority of this licence may be sold, traded or bartered.

(2) Size of fish permitted to be taken - subject to variation of regulatory close times and these conditions:

(a) No person who is trolling for salmon shall catch and retain a Coho Salmon that is less than: (i) 30 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 26 cm in length, measured along the shortest length of the body to the fork of the tail.

(b) No person who is trolling for salmon shall: in Areas 23 to 27 and 123 to 127, catch and retain a Chinook Salmon that is less than: (i) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed 44 cm in length, measured along the shortest length of the body to the fork of the tail; or

(c) in Areas of 1 to 12 or 19 to 21, catch and retain a Chinook Salmon that is less than: (i) 67 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 56 cm in length, measured along the shortest length of the body to the fork of the tail; or

(d) in any of Areas 13 to 18, 28 or 29, catch and retain a Chinook Salmon that is less than: (i) 62 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 51 cm in length, measured along the shortest length of the body to the fork of the tail.

(3) Designated fishers:

(a) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian. (b) Designations are personal and non-transferable.

(4) Identification of fishing vessel and gear:

(a) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(b) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

2. Species and quantities of fish permitted to be taken:

(1) Species of fish: (a) Sockeye Salmon, Coho Salmon, Pink Salmon, Chum Salmon and Chinook Salmon, subject to variation of the close times set out in the Pacific Fishery Regulations, 1993.

(b) All rockfish (Sebastes sp.), except Yelloweye, Quillback, China, Tiger and Copper, to a maximum of twenty fish per day (of which a maximum of 5 may be

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Bocaccio) may be retained as by-catch to salmon fishing authorized by this licence (i.e. during salmon troll open times and when salmon are retained on board the vessel).

(c) The quantity of Yelloweye, Quillback, China, Tiger and Copper Rockfish permitted to be retained is zero.

(d) The retention of Pacific Mackerel or Jack Mackerel is permitted as bycatch during openings for a type of vessel licensed for Salmon Area G.

(2) Catch prohibited on board the licensed vessel while fishing: (a) Subject to subsection 2(2)(b), no salmon of species that are not permitted to be retained under the authority of this licence at the time and area being fished shall be on board the licensed vessel.

(b) Subsection 2(2)(a) does not apply to fish being held temporarily in revival tanks as required.

(3) Retention and delivery of Chinook and Coho Salmon heads: (a) All heads of Chinook and Coho Salmon that are removed prior to offloading shall be retained. The retained portion of each head shall include the upper portion of the head extending from the tip of the snout to a cut travelling from the top of the head, passing 1 cm behind the eye, and ending at the back corner of the mouth. (b) All retained heads shall be stored in yellow plastic bags provided for this purpose by the Department ("head bags"). (c) Each head bag shall contain only heads caught in the same week (Sunday to Saturday). (d) Each head bag containing heads shall be sealed and labelled with a label provided for this purpose by the Department. (e) All labels shall be completed accurately, including: (i) the vessel name; (ii)Vessel Registration Number; (iii) Trip ID number (see section 4(1)); (iv) the dates between which the enclosed heads were caught; and (v) the Management Area(s) in which the enclosed heads were caught.

(f) All retained heads shall be frozen within 12 hours and kept frozen until delivery.

(g) All retained heads shall be delivered as follows: (i) If delivering Chinook and/or Coho catch at a fish landing station, all heads on board shall be delivered to the same fish landing station. Further, if J.O. Thomas representatives are not present at the dock to receive the heads, the vessel master shall notify J.O. Thomas and Associates of the head delivery, within 24 hours of landing, by calling l-800-663-3344, between 0800 and 1600 hours Monday to Friday, or on the first business day following a week-end landing, giving the name and location of the fish landing station at which the heads have been delivered, and the number of head bags that have been delivered.

(ii) If Chinook or Coho Salmon are not delivered to a fish landing station, heads shall be delivered directly and in person to a J.O. Thomas representative. Arrangements for such deliveries shall be made by calling 1-800-663-3344, between 0800 and 1600 hours Monday to Friday. Such deliveries can only be made in Port Hardy,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Tofino, Ucluelet or Vancouver.

Note: Chinook/Coho Head bags and labels will be provided at no cost by the Department, and can be picked up at the following DFO offices between 0800 hours and 1600 hours:

Mail Room, Commissionaire, 2nd floor reception, 200 - 401 Burrard St, Vancouver; Front counter, main entrance, 315 - 940 Alder St. Campbell River Commissionaire, main entrance, 3190 Hammond Bay Rd., Nanaimo; Front Counter, main entrance, 4706 Tebo Ave., Port Alberni; Front Counter, main entrance, 8585 Wollason Rd, Port Hardy; Front counter, 417 2nd Ave W, Prince Rupert; Front Counter, 137 Bay St, Queen Charlotte City; Front Counter, 12551 No. 1 Road, Richmond; and Front Counter, 4250 Commerce Circle, Victoria.

Alternatively, shipment can be arranged. Phone DFO toll-free at 1-866-483-9994 for more information.

(h) Subsection 1(3)(a) does not apply to fishing under this licence where DFO issues a Fishery Notice stating that this licence is exempt from subsection 1(3)(a) for the 2017 salmon fishing season.

3. Waters in which and times when fishing is permitted:

Areas 11, 20 to 27, 111, 121, 123 to 127 and Subareas 12-5 to 12-16, for a species of salmon by troll gear, in those areas and during those times when persons fishing under authority of a Category F licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for that species of salmon with a type of vessel licensed for Salmon Area G, in that area and during that time.

4. The fishing gear permitted to be used and the manner in which it may be used: (1) Salmon troll gear permitted with the use of single barbless hooks only during all salmon troll fisheries.

(2) Effective July 1 to September 15 no person shall fish in a directed Chinook fishery by means of trolling with any gear other than plugs equipped with one single, barbless hook. The plug size shall be no smaller than 6 inches (15.2 cm) as measured from the tip of the nose to the tip of the tail of the plug (excluding the hook).

(3) The vessel licensed for Salmon Area G shall not have more than six gurdies installed or more than six lines in the aggregate that are used or installed.

(4) While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then shall be released back into the water from which they were caught in the manner that causes the least harm.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

The revival tank shall:

(a) be constructed of non-transparent material; (b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm; (c) have a separate tight fitting lid for each compartment, made of non-transparent material; (d) have a separate inlet and outlet for each compartment; (e) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled; (f) be in operation while hooks are in the water and at all times when fish are being held in the tank; (g) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute; (h) be kept clean and in operable condition; and (i) shall not be used for any purpose other than that outlined above.

5. Fishing Reports

(1) Start Fishing Report (a) Prior to beginning fishing on a fishing trip and no earlier than one week prior to initiating fishing activity, the vessel master shall: (i) inactivate all previous Trip Identification Numbers applicable to this licence by completion of either End Trip Reports or Cancel Trip Reports; (ii) obtain a new Trip Identification Number; and (iii) record the Trip Identification Number in the appropriate space in the harvest log.

(b) To obtain a new Trip Identification Number, the vessel master shall ensure that all Pause Fishing, End Fishing, Cancel Fishing and Daily Catch Reports for all previous fishing trips have been completed.

(c) To obtain a Trip Identification Number, the vessel master using a paper harvest log shall provide the following information to the Logbook service provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and a valid page number; (ii) Salmon Licence Area; (iii) vessel master's name and vessel master's Fisher Identification Number; and (iv) intended fishing start date, time and Area fishing will begin.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) The vessel master using an electronic harvest log shall enter their name for each start trip report and check the "I agree" box to the following statement: "You acknowledge that you are the Vessel Master as defined in the conditions of licence and as selected in this start Trip report ("Captain Name"). As the Vessel Master, you are responsible for all the data entered for this trip. If your name can not be selected you will need to contact the 2017 e-log service provider to update the e-log software before filing the Start Trip report."

(2) Daily Catch Reports: (a) Prior to 08:00 h of the day following a day in which

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

fishing occurred, and a minimum of two hours prior to fish being landed the vessel master shall: (i) obtain a Daily Catch Report Confirmation Number; and (ii) record the Daily Catch Report Confirmation Number in the appropriate space in the harvest log.

(b) To obtain a Daily Catch Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Monitoring service provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and page number; (ii) Salmon Licence Area; (iii) either the Trip Identification Number obtained when the Start Fishing Report was made or both the vessel master's name and the vessel registration number; and (iv) for each date and Area fished: (A) date fished; (B) Area fished; (C) number of hours fished; (D) Troll Zone number(s) for fishing in Areas 121 through 127 and Subarea(s) for fishing in all other Areas; (E) whether retained catch is frozen or iced; (F) number of fish caught and retained by species category as indicated in the harvest log; (G) number of fish caught and released by species category as indicated in the harvest log; and (H) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(c) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (3) Pause Fishing Report:

(a) For each day of a continuing fishing trip on which no fishing occurred, the vessel master shall, before 08:00 h the following day: (i) obtain a Pause Fishing Report Confirmation Number; and (ii) record the Pause Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) To obtain a Pause Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Monitoring service provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and a valid page number; (ii) Salmon Licence Area; (iii) Trip Identification Number obtained when the Start Fishing Report was made; (iv) date on which no fishing occurred; and (v) Management Area in which the vessel master had intended to fish on that date.

(c) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(4) Cancel Trip Report:

(a) If no fishing occurs on a planned fishing trip for which a Trip Identification Number was obtained the vessel master shall: (i) obtain a Cancel Trip Report Confirmation Number; and (ii) record the Cancel Trip Report Confirmation number in the appropriate space in the harvest log.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(b) The Cancel Trip Report Confirmation Number shall be recorded in the harvest log within 72 hours of the time given on the Start Fishing Report as the intended time to start fishing.

(c) To obtain a Cancel Trip Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Monitoring service provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and a valid page number; (ii) Salmon Licence Area; and (iii) intended start date, time and Area where fishing was to have begun.

(d) The vessel master with an electronic harvest log shall submit this information, other than harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(5) Interim Reports Upon demand by a fishery officer, fishery guardian or a representative of the Department, the vessel master shall immediately provide orally in person or by radio, or in writing, any or all of the following information that may be requested: (a) an accurate estimate of the amount of fish on board the vessel as well as fish caught and released; (b) information concerning the location of catch, rate of catch and method of transporting of the catch; and (c) the name and location of the person or company buying the catch.

(6) End Fishing Report:

(a) Not later than 24 hours following the end of a fishing trip, prior to commencing a subsequent trip, two hours prior to arriving at a designated landing site and prior to commencing the landing of fish, the vessel master shall: (i) obtain a unique End Fishing Report Confirmation Number for each Trip Identification Number; and (ii) record the End Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) The vessel master shall ensure that a unique End Fishing Report Confirmation Number for each Trip Identification Number is obtained if fishing occurred on the fishing trip and:

(c) To obtain an End Fishing Report Confirmation Number, the vessel master using a paper harvest log shall provide the following information to the Catch Monitoring service provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and a valid page number; (ii) Salmon Licence Area; (iii) Trip Identification number for the fishing trip being ended; (iv) last date fished; (v) time fishing stopped; (vi) last Area fished; (vii) designated landing site at which catch will be landed; and (vii) estimated arrival time at designated landing site.

(d) The vessel master using an electronic harvest log shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

6. Harvest Log

(1) The vessel master shall maintain a harvest log of all harvest operations. The harvest log shall meet the requirements set out in the current Southern BC Salmon Integrated Fisheries Management Plan.

(a) To obtain an approved paper harvest log, the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(b) To obtain an approved electronic harvest log (E-log), the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(2) If the paper harvest log contains more than one page, the pages shall be bound in such a manner that the removal of a page cannot be performed without leaving evidence of said removal.

(3) Each page of the paper harvest log shall be numbered sequentially.

(4) A carbon copy shall be made for each page of the paper harvest log.

(5) The vessel master shall ensure that the information recorded in the harvest log is complete and accurate.

(6) The vessel master using a paper harvest log shall print and sign their name and FIN beside each Daily Catch Record made in the paper harvest log.

(7) Separate Daily Catch Records will be recorded in the harvest log for each day and Management Area fished, by no later than 08:00 h of the following day, and before any fish are landed.

(8) Recording of harvest log data: (a) Daily Catch Records: (i) In all Areas, Daily catch information shall be recorded on the Daily Catch Record page in the log before any fish are landed.

(ii) A separate line on the Daily Catch Record page shall be used to record any additional catch harvested in the same calendar day following a landing.

(iii) For each date and Area fished the vessel master shall ensure the following information is recorded in the harvest log: (A) vessel masters name; (B) vessel masters signature; (C) Trip Identification Number; (D) date fished; (E) Area fished; (F) Troll Zone number(s) for fishing in Areas 121 through 127 and Subarea(s) for fishing in all other Areas Troll Zone; (G) number of hours fished; (H) whether retained catch is frozen or iced; (I) number of fish caught and retained by species category as indicated in the harvest log; (J) number of fish caught and released by species category as indicated in the harvest log; and (K) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(vi) The vessel master using an electronic harvest log shall submit this information

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (b) Pause Fishing Records: (i) The vessel master shall ensure that the Pause Fishing Report Confirmation Numbers are recorded in the harvest log not later than 08:00 hours the following day.

(ii) For each day of a fishing trip on which no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; (B) Trip Identification Number obtained when the Start Fishing Report was made; (C) date on which no fishing occurred; and (D) Area in which the vessel master had intended to fish on that date.

(iii) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(c) Cancel Trip Records: (i) The vessel master shall ensure that the Cancel Trip Report Confirmation Number is recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(ii) For each fishing trip where no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; and (B) intended date, time and Area where fishing was to have begun.

(iii) The vessel master using an electronic harvest log shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(d) End Fishing Records: (i) the vessel master shall ensure that the End Fishing Report Confirmation Number is recorded in the harvest log not later than 24 hours following the end of a fishing trip, prior to commencing a subsequent trip, two hours prior to arriving at a designated landing site and prior to commencing the landing of fish.

(9) The harvest log shall be kept on board the licensed vessel when the vessel is participating in a fishery opening and when travelling to or from a fishery opening.

(10) The harvest log shall contain data pertaining to a single vessel only.

(11) The harvest log shall be produced for examination on demand of a fishery officer or a fishery guardian.

(12) All recording in the paper harvest log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out.

(13) Erasure of an entry in the harvest log is not permitted.

(14) If a harvest log in which harvest information has been recorded is lost or destroyed, and no complete records of that harvest information survive, the licence

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the Catch Monitoring service provider. The carbon copies of all pages with harvest information would represent a complete record of harvest information. The harvest log must be replaced prior to any subsequent fishing trips.

(15)(a) Subject to subsection 6(16), the licence holder shall ensure that all paper harvest logs issued, whether used to record fishing or not, are delivered to the issuing Catch Reporting Service Provider by April 30, 2018 and that all records recorded in those paper harvest logs are entered into the Salmon Catch Database by December 31, 2018. Returned harvest logs shall contain the original copies of all pages issued.

(b) Carbon copies from the completed paper harvest log(s) shall be retained by the licence holder until December 31, 2018. In cases where the harvest log(s) is (are) lost during delivery to the Catch Reporting Service Provider, images of these carbon copies (either fax or photocopy images) shall be delivered forthwith to the Catch Reporting Service Provider as a backup.

(16) Where a licensed fishing vessel has been leased to a fisher who is different from the named licence holder, the lessee shall be responsible for the submission of the harvest log.

(17) Nil Reports: (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by April 30, 2018.

(b)Submitting a Nil report: (i)If a harvest log was issued, the licence holder shall complete the Nil Report form that was included in the harvest log, and return it with the harvest log to your logbook service provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder; or (ii) harvesters using an electronic log, or if no logbook service arrangements were made, the licence holder shall send a letter to the Department stating that the licence(s) were not fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder.

(c)Nil reports shall be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

7. Catch Monitoring

All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

8. Landing of catch

(1) Locations at which the landing of fish from the vessel is permitted: (a) Subject to subsection 7(1)(b), all fish caught under the authority of this licence from April 1 to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

September 30, shall be landed at one of the following locations: (i) Ucluelet: (A) Neptune Ice Ltd., 1341 Eber Street, Ucluelet; (B) B.C. Bornstein Seafoods Canada Lts., 1855 Port Albion Road, Ucluelet B.C.; or (C) Main Street Dock (Whisky Dock), Ucluelet, B.C.; or (ii) Coal Harbour: Quatsino Marina 307 Coal Harbour Road, Coal Harbour B.C.; or (iii) Port Hardy: (A) Keltic Seafoods, 8625 Glenview Road, Port Hardy, B.C.; or (B) Cove Fish Plant, 6275 Hardy Bay Road, Port Hardy, B.C.; or (iv) Zeballos: Mid Island Ice Ltd., 803 Maquinna Street, Zeballos, B.C.; or (v) Tofino: (A) Lions' Gate Fisheries Ltd, 612 Campbell Street, Tofino, B.C.; (B) 4th Street Dock, foot of 4th Street, Tofino, B.C.; or (C) 1st Street Dock, foot of 1st Street, Tofino, B.C.

(b) All fish caught under the authority of this licence shall be landed at a fish buying station licenced under the Fish and Seafood Act (Province of British Columbia) except: (i) fish sold directly to the public under authority of a fisherman's vending licence issued under the Fish and Seafood Act (Province of British Columbia).

(2) Dockside Monitoring Program: (a) The vessel master of all vessels participating in the Area G troll fishery between April 1 and September 30, who is chosen by the Dockside Monitoring service provider for dockside monitoring shall provide the following information to the Dockside Monitoring service provider at time of landing: (i) vessel name and VRN; (ii) vessel master name and FIN; (iii) Trip Identification Number; and (iv) dates and areas that fishing occurred.

(b) Should the vessel master be requested by the Dockside Monitoring service provider, an observer shall be present during the landing of all catch to record the number of each species of fish delivered.

(c) The vessel master shall provide to the Dockside Monitoring service provider, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing.

Note: The phone number and office hours for the Dockside Monitoring service provider will be posted via Fishery Notice.

9. Fish Slips:

(1) The vessel master shall provide records, in the form commonly known as a fish slip or sales slip, of all fish caught and retained under authority of this licence including fish that are sold to the public and retained for personal use.

(2) A fish slip shall be complete for each landing.

(3) The vessel master shall ensure that each fish slip contains the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales; (vi) date of landing; (vii) time of landing; (viii) number of days fished in each Area; (ix) landed weight of each species by grade and method of dressing reported separately

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

in pounds; (x) number of pieces landed for each species by grade and method of dressing of fish; (xi) price paid per pound, by species; and (xii) total catch value of all species.

(4) The vessel master, or the person delivering the fish, shall print their name and sign the fish slip once completed.

(5) The vessel master shall submit the slips not later than seven days after landing. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

(6) If the vessel is licensed for more than one Salmon Area, the catch from each Salmon Area shall be recorded on separate fish slips.

Note: Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

10. Seabird Avoidance

(1) Fishers shall take precautions to avoid fishing among seabirds.

Note: Fishers are requested to retain all dead birds which are entangled and to release live and unharmed birds by placing them in the water. Please check all birds for metal bird bands (rings) on the leg. If a bird is banded please contact Laurie Wilson with the band number and capture date and location at 1-866-431-2473 (BIRD) or by the email below. Handle birds with gloves, double bag dead birds and label each bird with date, time, and location and store them on ice. Please call your local charter patrol to organize pick-up or drop them off at a local DFO office. Alternatively, please send photographs of birds with a reference object such as a coin, and the date, time and location to laurie.wilson@canada.ca. Your names and vessel names do not need to be identified or included.

11. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

This report may contain data rated up to Protected A.
Do not release this data to external parties.

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port

Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers

under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

SALMON TROLL Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FAT 9 2017

SALMON TROLL Licence 2017 Date Issued: 15 Jun 2017

Licensed for: Commercial Fishing Expiry Date: 31 Mar 2018

Licence Holder:
FIN: 100409
SECRETARIAT OF THE HAIDA NATION
504 NAANII ROAD
PO BOX 589
MASSET BC
V0T 1M0

Designated Vessel:
VRN 23425
DOT 348753
Vessel AKKO CHAN
Vessel OAL 12.45 Meters
Gross Tonnage 39.82 Cubic Meters
Net Tonnage 27.08 Cubic Meters

Reported Vessel Owner:
FIN: 72186
TAAS JAAT FISHING COMPANY LTD.
PO BOX 1318
SKIDEGATE BC
V0T 1S0

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Licence Area: SALMON AREA F
Waters in which fishing is permitted: Areas 1 to 10, 101 to 110, 130 and 142
Species: SALMON
Gear: TROLL

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2016-17 FISHERIES AGREEMENT ON OR BEFORE JUNE 30, 2016, THIS LICENCE WILL EXPIRE ON MARCH 31, 2017. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2016-17 FISHERIES AGREEMENT ON OR BEFORE JUNE 30, 2016, THIS LICENCE WILL EXPIRE ON JUNE 30, 2016.

IT IS A CONDITION OF THIS LICENCE THAT NO SALMON MAY BE ON BOARD THIS VESSEL DURING THE PERIOD COMMENCING SIX HOURS PRIOR TO THIS VESSEL BEING USED TO FISH IN A COMMERCIAL SALMON FISHERY AND ENDING TWELVE HOURS AFTER THIS VESSEL HAS BEEN USED TO FISH FOR SALMON IN A COMMERCIAL SALMON FISHERY EXCEPT FOR
(A) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE PACIFIC FISHERY REGULATIONS, 1993,
(B) SALMON CAUGHT UNDER A LICENCE ISSUED UNDER THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS IN WHICH THE MINISTER HAS AUTHORIZED THE SALE OF SALMON,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information

AND(C) SALMON CAUGHT UNDER THE AUTHORITY OF A TIDAL WATERS SPORT FISHING LICENCE

THIS LICENCE DOES NOT AUTHORIZE FISHING FOR SALMON UNTIL THE FULL SALMON CONDITIONS OF LICENCE ARE ATTACHED. SCHEDULE II OPTION CONDITIONS DO NOT AUTHORIZE FISHING FOR SALMON.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Licence Number: XDEMO 21 2018
Valid From: 27-Jul-2018
Expiry Date: 27-Jul-2018

This licence is issued under the authority of FISHERIES ACT, and SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Sale purpose.

Licence/Permit Activity Description:

This licence does not define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is required to be at the fishing location at all times.

This licence is issued under the Commercial Salmon Allocation Framework.

This licence is issued to the North Coast Skeena First Nations Stewardship Society, subject to the Fisheries Act and regulations there under, confers the authority to fish under the following conditions:

Period of Activity:

The gill net demonstration fishery will open July 27, 2018 from 06:00 hours to 22:00 hours (16 hours).

Multi-strand max hang ratio 3:1, corkline to web distance min .76 m max 1.5 m.

The target species in this fishery is Skeena Sockeye. [redacted]

This gill net fishery is being conducted with non-retention and non-possession of Coho, Chum, Chinook and Steelhead. None of these species may be aboard a vessel that is engaged in fishing unless they are being revived in the revival tank immediately prior to release.

Operating revival boxes are mandatory and all prohibited species captured incidentally must be either revived in the revival tank and released, or released directly to the water with the least possible harm.

Terms and Conditions:

011415

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Definitions

"Alaska Twist" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 4 or more filaments of equal diameter in each twine of the web and each of these filaments shall be a minimum of 0.20 mm in diameter.

"CSAF" means Commercial Salmon Allocation Framework

"DFO" means the Department of Fisheries and Oceans also known as Fisheries and Oceans Canada (FOC) for the purpose of this licence.

"First Nation" means First Nation noted as a Licence Holder in this Licence.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Fishing" has the same meaning as defined in section 2 of the Fisheries Act and for greater certainty and for the purposes of this licence includes penning or detaining live fish in any way.

"Jack Sockeye" means a male sockeye salmon with a nose to fork measurement of four hundred millimeters (400mm) or less.

"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.

"Landing Site" means one of the following sites:

Aero Trading Site and/or a packer moored at Aero Trading

or other landing sites approved by DFO and the NCSFNSS, where fish harvested under the authority of this licence are inspected and counted.

"NCSFNSS" means the North Coast Skeena First Nations Stewardship Society.

"Multi-strand" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 30 or more filaments of equal diameter in each twine of the web.

"Participant" means an individual designated in accordance with this licence to fish.

"Technician" means a member of North Coast Skeena First Nations Stewardship Society hired to carry out monitoring activities in accordance with this CSAF fishery.

Use of Fish

Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:

The North Coast Skeena First Nations Stewardship Society will designate vessels and participants who may fish under the authority of this licence. The NCSFNSS shall provide to the DFO C&P Fishery Officers at the Prince Rupert Office by email at Wade.Norman@dfo-mpo.gc.ca and Clarence.Nelson@dfo-mpo.gc.ca and to the DFO Resource Manager,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Jennifer.Gordon@dfo-mpo.gc.ca at the Prince Rupert DFO office (Phone:250-627-3421, Fax: 250-627-3427) a list of designated vessels and participants fishing on their behalf 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are listed as a designated vessel and participant.

Designated vessels and participants fishing under this licence shall not fish for food, social, or ceremonial purposes 6 hours prior, during, and 12 hours after under authority of this licence.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish

All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by NCSFNSS and reported to DFO.

Designation of Landing Sites:

The NCSFNSS will operate no more that one landing site at any given time and shall notify Jen Gordon or a DFO Fishery Officer in Prince Rupert of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE and PINK salmon caught by Participants of the First Nation under the authority of this licence must be inspected at the landing site by a technician, Fishery Officer or Fishery Guardian. Landing slips will be issued per truckload and must specify the following information:

1) the Landing Site
2) the date and time of landing
3) location of the Fishery
4) the Participant's names
5) the number of salmon landed, and
6) the name and signature of the Fishery Officer or NCSFNSS technician inspecting the catch

(2) The NCSFNSS shall submit slips no later than 48 hours of the fishery ending and be mailed or hand delivered to:

Attn: Jen Gordon
Fisheries and Oceans Canada
417 2nd Ave West
Prince Rupert, BC

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

V8J 1G8

Proof of Landing:

All fish caught under authority of this licence shall be transported directly and forthwith to a designated Landing Site.

Once issued a Landing Slip by a NCSFNSS technician or Fishery Officer, the Participant shall carry the Landing Slip at all times while in possession of fish caught under authority of this licence.

A Participant shall not mix or intermingle any fish caught under authority of this licence with any fish caught under any other licence. Participants shall show Landing Slips to any Fishery Officer, or NCSFNSS technician upon demand.

Fish slips:

The NCSFNSS shall ensure that Fish Slips are used to record all fish caught under the authority of this licence and sold directly to the public. Fish slips shall specify:

1) the number of all salmon sold;

2) the Participant's name, signature and designation number;

3) the name of the plant, packer, collecter of individual purchasing the fish;

4) the gear used;

5) the number of fish caught by the Participant;

6) the date off-loaded;

7) the days fished;

8) the area of catch;

9) the Participant's Vessel designation card number (if applicable)

The NCSFNSS shall ensure that Fish Slips are used to record all fish caught and sold under the authority of this licence.

Catch Reporting

Catch monitoring will be conducted by an independent third party. A record must be kept of all SOCKEYE and PINK salmon harvested under the authority of this license. A record must also be kept of the number and species of fish returned alive and unharmed to the water.

The NCSFNSS shall deliver copies of each Landing Slip and Fish Slip to the DFO Prince Rupert officer within 48 hours of the fish being landed at the Landing Site. The NCSFNSS shall supply catch information to Jen Gordon, at the Prince Rupert DFO office (Phone:250-627-3421, Fax: 250-627-3427) weekly and upon request.

Copies of completed sales slips resulting from commercial transactions of SOCKEYE and PINK salmon will be provided to any technician or Fishery Officer on request.

Monitoring:

At-sea patrols will be conducted by an independent third party to confirm the number of fishing vessels participating, ensure compliance with fishing times and area boundaries.

All catch will be enumerated and potentially sampled at designated landing sites. 100% dockside enumeration will be done by an independent third party.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Use of Gill nets:

The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon gill net. In addition to any specifications prescribed by the Fisheries Act and the Regulations made thereunder, gill nets shall meet the following specifications:

(a) all nets greater than 60 meshes in depth shall have at least every fifth cork a distinctive colour (not white); and

(b) Alaska twist or multi-strand or a combination of the two is permitted. If Alaska twist is used, then the hang ratio shall not exceed 2.5:1.

The gill net shall be completely retrieved from the water upon completion of each set.

Gill net revival tank:

While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall:

(a) be constructed of non-transparent material;

(b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm;

(c) have a separate tight fitting [id for each compartment, made of non-transparent material;

(d) have a separate inlet and outlet for each compartment;

(e) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled;

(f) be in operation from 10 minutes prior to retrieval of the net and continue in operation at all times during retrieval of the net and while fish are being held in the tank;

(g) at all times while in operation, be full of water that is continualjy exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute;

(h) be kept clean and in operable condition; and

(i) shall not be used for any purpose other than that outlined above.

Additional Information:

Maximum mesh 137 mm. Maximum depth 60 meshes, Maximum hang ratio 3:1, Corkline to web distance minimum 0 cm maximum 45 cm; or, maximum depth 90 meshes, maximum hang ratio 3:1, corkline to web distance minimum .76 m max 1.5 m, Alaska Twist nets – 2.5:1. Multi-strand max hang ratio 3:1, corkline to web distance min .76 m max 1.5 m.

The target species in this fishery is Skeena Sockeye. [redacted] Pink salmon retention is permitted.

This gill net fishery is being conducted with non-retention and non-possession of Coho, Chum, Chinook and Steelhead. None of these species may be aboard a vessel that is engaged in fishing unless they are being revived in the revival tank immediately prior to release.

Operating revival boxes are mandatory and all prohibited species captured incidentally must be either revived in the revival tank and released, or released directly to the water with the least possible harm.

Terms and Conditions:

Definitions

"Alaska Twist" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 4 or more filaments of equal diameter in each twine of the web and each of these filaments shall be a minimum of 0.20 mm in diameter.

"CSAF" means Commercial Salmon Allocation Framework

"DFO" means the Department of Fisheries and Oceans also known as Fisheries and Oceans Canada (FOC) for the purpose of this licence.

"First Nation" means First Nation noted as a Licence Holder in this Licence.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Fishing" has the same meaning as defined in section 2 of the Fisheries Act and for greater certainty and for the purposes of this licence includes penning or detaining live fish in any way.

"Jack Sockeye" means a male sockeye salmon with a nose to fork measurement of four hundred millimeters (400mm) or less.

"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"Landing Site" means one of the following sites:

Aero Trading Site and/or a packer moored at Aero Trading

or other landing sites approved by DFO and the NCSFNSS, where fish harvested under the authority of this licence are inspected and counted.

"NCSFNSS" means the North Coast Skeena First Nations Stewardship Society.

"Multi-strand" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 30 or more filaments of equal diameter in each twine of the web.

"Participant" means an individual designated in accordance with this licence to fish.

"Technician" means a member of North Coast Skeena First Nations Stewardship Society hired to carry out monitoring activities in accordance with this CSAF fishery.

Use of Fish
Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:
The North Coast Skeena First Nations Stewardship Society will designate vessels and participants who may fish under the authority of this licence. The NCSFNSS shall provide to the DFO C&P Fishery Officers at the Prince Rupert Office by email at Wade.Norman@dfo-mpo.gc.ca and Clarence.Nelson@dfo-mpo.gc.ca and to the DFO Resource Manager, Jennifer.Gordon@dfo-mpo.gc.ca at the Prince Rupert DFO office (Phone:250-627-3421, Fax: 250-627-3427) a list of designated vessels and participants fishing on their behalf 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are listed as a designated vessel and participant.

Designated vessels and participants fishing under this licence shall not fish for food, social, or ceremonial purposes 6 hours prior, during, and 12 hours after under authority of this licence.

Compliance with the Fisheries Act
Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish
All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by NCSFNSS and reported to DFO.

Designation of Landing Sites:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

The NCSFNSS will operate no more that one landing site at any given time and shall notify Jen Gordon or a DFO Fishery Officer in Prince Rupert of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE and PINK salmon caught by Participants of the First Nation under the authority of this licence must be inspected at the landing site by a technician, Fishery Officer or Fishery Guardian. Landing slips will be issued per truckload and must specify the following information:

1) the Landing Site
2) the date and time of landing
3) location of the Fishery
4) the Participant's names
5) the number of salmon landed, and
6) the name and signature of the Fishery Officer or NCSFNSS technician inspecting the catch

(2) The NCSFNSS shall submit slips no later than 48 hours of the fishery ending and be mailed or hand delivered to:

Attn: Jen Gordon
Fisheries and Oceans Canada
417 2nd Ave West
Prince Rupert, BC
V8J 1G8

Proof of Landing:

All fish caught under authority of this licence shall be transported directly and forthwith to a designated Landing Site.

Once issued a Landing Slip by a NCSFNSS technician or Fishery Officer, the Participant shall carry the Landing Slip at all times while in possession of fish caught under authority of this licence.

A Participant shall not mix or intermingle any fish caught under authority of this licence with any fish caught under any other licence. Participants shall show Landing Slips to any Fishery Officer, or NCSFNSS technician upon demand.

Fish slips:

The NCSFNSS shall ensure that Fish Slips are used to record all fish caught under the authority of this licence and sold directly to the public. Fish slips shall specify:

1) the number of all salmon sold;

2) the Participant's name, signature and designation number;

3) the name of the plant, packer, collecter of individual purchasing the fish;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

4) the gear used;

5) the number of fish caught by the Participant;

6) the date off-loaded;

7) the days fished;

8) the area of catch;

9) the Participant's Vessel designation card number (if applicable)

The NCSFNSS shall ensure that Fish Slips are used to record all fish caught and sold under the authority of this licence.

Catch Reporting

Catch monitoring will be conducted by an independent third party. A record must be kept of all SOCKEYE and PINK salmon harvested under the authority of this license. A record must also be kept of the number and species of fish returned alive and unharmed to the water.

The NCSFNSS shall deliver copies of each Landing Slip and Fish Slip to the DFO Prince Rupert officer within 48 hours of the fish being landed at the Landing Site. The NCSFNSS shall supply catch information to Jen Gordon, at the Prince Rupert DFO office (Phone:250-627-3421, Fax: 250-627-3427) weekly and upon request.

Copies of completed sales slips resulting from commercial transactions of SOCKEYE and PINK salmon will be provided to any technician or Fishery Officer on request.

Monitoring:

At-sea patrols will be conducted by an independent third party to confirm the number of fishing vessels participating, ensure compliance with fishing times and area boundaries.

All catch will be enumerated and potentially sampled at designated landing sites. 100% dockside enumeration will be done by an independent third party.

Use of Gill nets:

The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon gill net. In addition to any specifications prescribed by the Fisheries Act and the Regulations made thereunder, gill nets shall meet the following specifications:

(a) all nets greater than 60 meshes in depth shall have at least every fifth cork a distinctive colour (not white); and

(b) Alaska twist or multi-strand or a combination of the two is permitted. If Alaska twist is used, then the hang ratio shall not exceed 2.5:1.

The gill net shall be completely retrieved from the water upon completion of each set.

Gill net revival tank:

While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall:

(a) be constructed of non-transparent material;

(b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm;

(c) have a separate tight fitting [id for each compartment, made of non-transparent material;

(d) have a separate inlet and outlet for each compartment;

(e) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled;

(f) be in operation from 10 minutes prior to retrieval of the net and continue in operation at all times during retrieval of the net and while fish are being held in the tank;

(g) at all times while in operation, be full of water that is continualjy exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute;

(h) be kept clean and in operable condition; and

(i) shall not be used for any purpose other than that outlined above.

Additional Descriptions:

Terms and Conditions:

Definitions

"DFO" means the Department of Fisheries and Oceans also known as Fisheries and Oceans Canada (FOC) for the purpose of this licence.

"First Nation" means First Nation noted as a Licence Holder in this Licence.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Fishing" has the same meaning as defined in section 2 of the Fisheries Act and for greater certainty and for the purposes of this licence includes penning or detaining live fish in any way.

"GWA" means the Gitksan Watershed Authorities.

"GWA Ranger" means a member of a House hired by the GWA as an Aboriginal Fisheries Officer and designated as a Fishery Guardian by the Minister pursuant to section 5(1) of the Fisheries Act.

"GWA Monitor" means a member of a House hired by the GWA to carry out monitoring activities in accordance with Fisheries Agreement Amendment, ACFA 2012-SYR-1216-0, Schedule B-2.

"Houses" means those Clans and Houses listed and described in Schedule "A."

"Jack Sockeye" means a male sockeye salmon with a nose to fork measurement of four hundred millimeters (400mm) or less.

"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.

"Landing Site" means one of the following sites:

Located at Kitwanga, at the Highway Junction of Highways 16 and 37.

or other landing sites approved by DFO and the GWA, where fish harvested under the authority of this licence are inspected and counted.

"Participant" means an individual designated in accordance with this licence to fish.

Use of Fish

Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

The GWA and the Chiefs of the Houses will designate Participants who may fish under the authority of this licence.

The GWA shall provide to the DFO Smithers Office Fax # 250 847 4723 and Jen Gordon, at the Prince Rupert DFO office (Phone: 627-3421, Fax: 627-3427) a list of designated Participants 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are designated as a Participant. The GWA shall issue individual numbered designations referred to as "Designation Cards" which contain the name, address and date of birth of the designated individual.

Persons designated to fish under this licence shall not fish for food, social or ceremonial purposes, 12 hours prior or during fishing under authority of this licence.

Designations are personal and non-transferable. Designation cards must be carried at all times while participating in the Fishery, while transporting fish caught in the fishery or while selling such fish. Proof of designation must be presented to any Fishery Officer, GWA Ranger or GWA Monitor upon demand.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish

All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by GWA and reported to DFO.

Designation of Landing Sites:

The GWA will operate one landing site at a time and shall notify DFO of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE salmon caught by a Participant of the First Nation under the authority of this licence must be inspected at the landing site by a GWA Monitor, Fishery Officer or GWA Ranger who will issue the Participant a landing slip which shall specify the following information:

1) the Landing Site

2) the date and time of landing

3) location of the Fishery

4) the Participant's name, and designation number

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

5) the number of sockeye salmon landed, and

6) the name and signature of the Fishery Officer, GWA Ranger or GWA Monitor inspecting the catch

(2) The GWA shall submit slips no later than 7 days of fishery ending and be mailed to:

Att: Jen Gordon

Fisheries and Oceans Canada

417 2nd Ave West

Prince Rupert, BC

V8J 1G8

Proof of Landing:

All fish caught under authority of this licence shall be transported directly and forthwith to a designated Landing Site.

Once issued a Landing Slip by a GWA Monitor, GWA Ranger or Fishery Officer, the Participant shall carry the Landing Slip at all times while in possession of fish caught under authority of this licence.

A Participant shall not mix or intermingle any fish caught under authority of this licence with any fish caught under any other licence. Participants shall show Landing Slips to any Fishery Officer, GWA Ranger or GWA Monitor upon demand.

Fish slips:

The GWA shall ensure that in regards to public sales a receipt is issued to the purchaser containing the following information:

1) Seller

2) Date of purchase

3) Species of fish

4) Number of pieces and weight

The GWA shall ensure that Fish Slips are used to record all fish caught and sold under the authority of this licence.

Public Sales

Public sales are only permitted at the Kitwanga landing site.

Catch Reporting

Catch monitoring will be conducted by the GWA. A record must be kept of all SOCKEYE salmon harvested under the authority of this license. A record must also be kept of the number and species of fish returned alive and unharmed to the water.

The GWA shall deliver copies of each Landing Slip and Fish Slip to the DFO Prince Rupert officer within five (5) days of the fish being landed at the Landing Site. The GWA shall supply catch information to Jen Gordon, at the Prince Rupert DFO office (Phone: 627-3421, Fax: 627-3427) weekly and upon request.

Copies of completed sales slips resulting from commercial transactions of SOCKEYE salmon will be provided to any Monitor or Fishery Officer on request.

Terms and Conditions:

Definitions

"DFO" means the Department of Fisheries and Oceans also known as Fisheries and Oceans Canada (FOC) for the purpose of this licence.

"First Nation" means First Nation noted as a Licence Holder in this Licence.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Fishing" has the same meaning as defined in section 2 of the Fisheries Act and for greater certainty and for the purposes of this licence includes penning or detaining live fish in any way.

"GWA" means the Gitksan Watershed Authorities.

"GWA Ranger" means a member of a House hired by the GWA as an Aboriginal Fisheries Officer and designated as a Fishery Guardian by the Minister pursuant to section 5(1) of the Fisheries Act.

"GWA Monitor" means a member of a House hired by the GWA to carry out monitoring activities in accordance with Fisheries Agreement Amendment, ACFA 2012-SYR-1216-0, Schedule B-2.

"Houses" means those Clans and Houses listed and described in Schedule "A."

"Jack Sockeye" means a male sockeye salmon with a nose to fork measurement of four hundred millimeters (400mm) or less.

"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.

"Landing Site" means one of the following sites:

Located at Kitwanga, at the Highway Junction of Highways 16 and 37.

or other landing sites approved by DFO and the GWA, where fish harvested under the authority of this licence are inspected and counted.

"Participant" means an individual designated in accordance with this licence to fish.

Use of Fish

Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

The GWA and the Chiefs of the Houses will designate Participants who may fish under the authority of this licence.

The GWA shall provide to the DFO Smithers Office Fax # 250 847 4723 and Jen Gordon, at the Prince Rupert DFO office (Phone: 627-3421, Fax: 627-3427) a list of designated Participants 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are designated as a Participant. The GWA shall issue individual numbered designations referred to as "Designation Cards" which contain the name, address and date of birth of the designated individual.

Persons designated to fish under this licence shall not fish for food, social or ceremonial purposes, 12 hours prior or during fishing under authority of this licence.

Designations are personal and non-transferable. Designation cards must be carried at all times while participating in the Fishery, while transporting fish caught in the fishery or while selling such fish. Proof of designation must be presented to any Fishery Officer, GWA Ranger or GWA Monitor upon demand.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish

All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by GWA and reported to DFO.

Designation of Landing Sites:

The GWA will operate one landing site at a time and shall notify DFO of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE salmon caught by a Participant of the First Nation under the authority of this licence must be inspected at the landing site by a GWA Monitor, Fishery Officer or GWA Ranger who will issue the Participant a landing slip which shall specify the following information:

1) the Landing Site

2) the date and time of landing

3) location of the Fishery

4) the Participant's name, and designation number

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

5) the number of sockeye salmon landed, and

6) the name and signature of the Fishery Officer, GWA Ranger or GWA Monitor inspecting the catch

(2) The GWA shall submit slips no later than 7 days of fishery ending and be mailed to:

Att: Jen Gordon

Fisheries and Oceans Canada

417 2nd Ave West

Prince Rupert, BC

V8J 1G8

Proof of Landing:

All fish caught under authority of this licence shall be transported directly and forthwith to a designated Landing Site.

Once issued a Landing Slip by a GWA Monitor, GWA Ranger or Fishery Officer, the Participant shall carry the Landing Slip at all times while in possession of fish caught under authority of this licence.

A Participant shall not mix or intermingle any fish caught under authority of this licence with any fish caught under any other licence. Participants shall show Landing Slips to any Fishery Officer, GWA Ranger or GWA Monitor upon demand.

Fish slips:

The GWA shall ensure that in regards to public sales a receipt is issued to the purchaser containing the following information:

1) Seller

2) Date of purchase

3) Species of fish

4) Number of pieces and weight

The GWA shall ensure that Fish Slips are used to record all fish caught and sold under the authority of this licence.

Public Sales

Public sales are only permitted at the Kitwanga landing site.

Catch Reporting

Catch monitoring will be conducted by the GWA. A record must be kept of all SOCKEYE salmon harvested under the authority of this license. A record must also be kept of the number and species of fish returned alive and unharmed to the water.

The GWA shall deliver copies of each Landing Slip and Fish Slip to the DFO Prince Rupert officer within five (5) days of the fish being landed at the Landing Site. The GWA shall supply catch information to Jen Gordon, at the Prince Rupert DFO office (Phone: 627-3421, Fax: 627-3427) weekly and upon request.

Copies of completed sales slips resulting from commercial transactions of SOCKEYE salmon will be provided to any Monitor or Fishery Officer on request.

Babine Fence Site; or other landing sites approved by DFO and the LBN, where fish are harvested under the authority of this licence are inspected and counted.

"Participant" means an individual designated in accordance with this licence to fish.

"Technician" means a member of Lake Babine Nation hired to carry out monitoring activities in accordance with Fisheries Agreement AFS2015-MLT-1520-1.

Use of Fish

Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:

The Lake Babine Nation will hire employees who may fish under the authority of this licence. The LBN shall provide to the DFO Smithers Office Fax # 250 847 4723 and to Jen Gordon, at the Prince Rupert DFO office (Phone:627-3020, Fax: 627-3427) a list of employees fishing on their behalf 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are listed as an employee.

Employees hired to fish under this licence shall not fish for food, social or ceremonial purposes 6 hours prior to or during fishing under authority of this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Licence Number: XDEMO 34 2018
Valid From: 10-Aug-2018
Expiry Date: 16-Aug-2018

Compliance with the Fisheries Act
Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish
All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by LBN and reported to DFO.

Designation of Landing Sites:

The LBN will operate no more than one landing site at any given time and shall notify Jen Gordon or a DFO Fishery Officer in Smithers of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE salmon caught by a Participant of the First Nation under the authority of this licence must be inspected at the landing site by a technician, Fishery Officer or Fishery Guardian. Landing slips will be issued per truckload and must specify the following information:

1) the Landing Site

2) the date and time of landing

3) location of the Fishery

4) the Participant's names

5) the number of sockeye salmon landed, and

6) the name and signature of the Fishery Officeror LBN technician inspecting the catch

(2) The LBN shall submit slips no later than 7 days of fishery ending and be mailed to:

Att: Jen Gordon

Fisheries and Oceans Canada

Multi-strand max hang ratio 3:1, corkline to web distance min .76 m max 1.5 m.

The target species in this fishery is Skeena Sockeye. Pink salmon retention is permitted.

This gill net fishery is being conducted with non-retention and non-possession of Coho, Chum, Chinook and Steelhead. None of these species may be aboard a vessel that is engaged in fishing unless they are being revived in the revival tank immediately prior to release.

Operating revival boxes are mandatory and all prohibited species captured incidentally must be either revived in the revival tank and released, or released directly to the water with the least possible harm.

Terms and Conditions:

Definitions

"Alaska Twist" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 4 or more filaments of equal diameter in each twine of the web and each of these filaments shall be a minimum of 0.20 mm in diameter.

"CSAF" means Commercial Salmon Allocation Framework

"DFO" means the Department of Fisheries and Oceans also known as Fisheries and Oceans Canada (FOC) for the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

purpose of this licence.

"First Nation" means First Nation noted as a Licence Holder in this Licence.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Fishing" has the same meaning as defined in section 2 of the Fisheries Act and for greater certainty and for the purposes of this licence includes penning or detaining live fish in any way.

"Jack Sockeye" means a male sockeye salmon with a nose to fork measurement of four hundred millimeters (400mm) or less.

"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.

"Landing Site" means one of the following sites:

Aero Trading Site and/or a packer moored at Aero Trading

or other landing sites approved by DFO and the NCSFNSS, where fish harvested under the authority of this licence are inspected and counted.

"NCSFNSS" means the North Coast Skeena First Nations Stewardship Society.

"Multi-strand" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 30 or more filaments of equal diameter in each twine of the web.

"Participant" means an individual designated in accordance with this licence to fish.

"Technician" means a member of North Coast Skeena First Nations Stewardship Society hired to carry out monitoring activities in accordance with this CSAF fishery.

Use of Fish

Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:

The North Coast Skeena First Nations Stewardship Society will designate vessels and participants who may fish under the authority of this licence. The NCSFNSS shall provide to the DFO C&P Fishery Officers at the Prince Rupert Office by email at Wade.Norman@dfo-mpo.gc.ca and Clarence.Nelson@dfo-mpo.gc.ca and to the DFO Resource Manager, Jennifer.Gordon@dfo-mpo.gc.ca at the Prince Rupert DFO office (Phone:250-627-3421, Fax: 250-627-3427) a list of designated vessels and participants fishing on their behalf 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are listed as a designated vessel and participant.

Designated vessels and participants fishing under this licence shall not fish for food, social, or ceremonial purposes 6 hours prior, during, and 12 hours after under authority of this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Compliance with the Fisheries Act
Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish
All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by NCSFNSS and reported to DFO.

Designation of Landing Sites:

The NCSFNSS will operate no more that one landing site at any given time and shall notify Jen Gordon or a DFO Fishery Officer in Prince Rupert of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE and PINK salmon caught by Participants of the First Nation under the authority of this licence must be inspected at the landing site by a technician, Fishery Officer or Fishery Guardian. Landing slips will be issued per truckload and must specify the following information:

1) the Landing Site
2) the date and time of landing
3) location of the Fishery
4) the Participant's names
5) the number of salmon landed, and
6) the name and signature of the Fishery Officer or NCSFNSS technician inspecting the catch

(2) The NCSFNSS shall submit slips no later than 48 hours of the fishery ending and be mailed or hand delivered to:

Attn: Jen Gordon
Fisheries and Oceans Canada
417 2nd Ave West
Prince Rupert, BC
V8J 1G8

Proof of Landing:

All fish caught under authority of this licence shall be transported directly and forthwith to a designated Landing Site.

Once issued a Landing Slip by a NCSFNSS technician or Fishery Officer, the Participant shall carry the Landing Slip at

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi sur l'accès à l'information

all times while in possession of fish caught under authority of this licence.

A Participant shall not mix or intermingle any fish caught under authority of this licence with any fish caught under any other licence. Participants shall show Landing Slips to any Fishery Officer, or NCSFNSS technician upon demand.

Fish slips:

The NCSFNSS shall ensure that Fish Slips are used to record all fish caught under the authority of this licence and sold directly to the public. Fish slips shall specify:

1) the number of all salmon sold;

2) the Participant's name, signature and designation number;

3) the name of the plant, packer, collecter of individual purchasing the fish;

4) the gear used;

5) the number of fish caught by the Participant;

6) the date off-loaded;

7) the days fished;

8) the area of catch;

9) the Participant's Vessel designation card number (if applicable)

The NCSFNSS shall ensure that Fish Slips are used to record all fish caught and sold under the authority of this licence.

Catch Reporting

Catch monitoring will be conducted by an independent third party. A record must be kept of all SOCKEYE and PINK salmon harvested under the authority of this license. A record must also be kept of the number and species of fish returned alive and unharmed to the water.

The NCSFNSS shall deliver copies of each Landing Slip and Fish Slip to the DFO Prince Rupert officer within 48 hours of the fish being landed at the Landing Site. The NCSFNSS shall supply catch information to Jen Gordon, at the Prince Rupert DFO office (Phone:250-627-3421, Fax: 250-627-3427) weekly and upon request.

Copies of completed sales slips resulting from commercial transactions of SOCKEYE and PINK salmon will be provided to any technician or Fishery Officer on request.

Monitoring:

At-sea patrols will be conducted by an independent third party to confirm the number of fishing vessels participating, ensure compliance with fishing times and area boundaries.

All catch will be enumerated and potentially sampled at designated landing sites. 100% dockside enumeration will be done by an independent third party.

Use of Gill nets:

The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon gill net. In addition to any specifications prescribed by the Fisheries Act and the Regulations made

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

thereunder, gill nets shall meet the following specifications:

(a) all nets greater than 60 meshes in depth shall have at least every fifth cork a distinctive colour (not white); and

(b) Alaska twist or multi-strand or a combination of the two is permitted. If Alaska twist is used, then the hang ratio shall not exceed 2.5:1.

The gill net shall be completely retrieved from the water upon completion of each set.

Gill net revival tank:

While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall:

(a) be constructed of non-transparent material;

(b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm;

(c) have a separate tight fitting [id for each compartment, made of non-transparent material;

(d) have a separate inlet and outlet for each compartment;

(e) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled;

(f) be in operation from 10 minutes prior to retrieval of the net and continue in operation at all times during retrieval of the net and while fish are being held in the tank;

(g) at all times while in operation, be full of water that is continualjy exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute;

(h) be kept clean and in operable condition; and

(i) shall not be used for any purpose other than that outlined above.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Sale purpose.

Licence/Permit Activity Description:

This licence does not define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is required to be at the fishing location at all times.

This licence is issued under the Commercial Salmon Allocation Framework.

This licence is issued to the Gitksan Houses. The Houses have appointed the Gitskan Watershed Authorities as their agent for the purposes of carrying out the obligations of the Houses pursuant to this licence. Subject to the Fisheries Act and regulations there under, confers the authority to fish under the following conditions:

Period of Activity:

The demonstration fishery will open August 17th, 2018 to August 23rd, 2018 (7 days).

Terms and Conditions:

Definitions

"DFO" means the Department of Fisheries and Oceans also known as Fisheries and Oceans Canada (FOC) for the purpose of this licence.

"First Nation" means First Nation noted as a Licence Holder in this Licence.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Fishing" has the same meaning as defined in section 2 of the Fisheries Act and for greater certainty and for the purposes of this licence includes penning or detaining live fish in any way.

"GWA" means the Gitksan Watershed Authorities.

"GWA Ranger" means a member of a House hired by the GWA as an Aboriginal Fisheries Officer and designated as a Fishery Guardian by the Minister pursuant to section 5(1) of the Fisheries Act.

"GWA Monitor" means a member of a House hired by the GWA to carry out monitoring activities in accordance with Fisheries Agreement Amendment, ACFA 2012-SYR-1216-0, Schedule B-2.

"Houses" means those Clans and Houses listed and described in Schedule "A."

"Jack Sockeye" means a male sockeye salmon with a nose to fork measurement of four hundred millimeters (400mm) or less.

"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.

"Landing Site" means one of the following sites:

Located at Kitwanga, at the Highway Junction of Highways 16 and 37.

or other landing sites approved by DFO and the GWA, where fish harvested under the authority of this licence are inspected and counted.

"Participant" means an individual designated in accordance with this licence to fish.

Use of Fish

Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

The GWA and the Chiefs of the Houses will designate Participants who may fish under the authority of this licence.

The GWA shall provide to the DFO Smithers Office Fax # 250 847 4723 and Jen Gordon, at the Prince Rupert DFO office (Phone: 627-3421, Fax: 627-3427) a list of designated Participants 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are designated as a Participant. The GWA shall issue individual numbered designations referred to as "Designation Cards" which contain the name, address and date of birth of the designated individual.

Persons designated to fish under this licence shall not fish for food, social or ceremonial purposes, 12 hours prior or during fishing under authority of this licence.

Designations are personal and non-transferable. Designation cards must be carried at all times while participating in the Fishery, while transporting fish caught in the fishery or while selling such fish. Proof of designation must be presented to any Fishery Officer, GWA Ranger or GWA Monitor upon demand.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish

All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by GWA and reported to DFO.

Designation of Landing Sites:

The GWA will operate one landing site at a time and shall notify DFO of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE salmon caught by a Participant of the First Nation under the authority of this licence must be inspected at the landing site by a GWA Monitor, Fishery Officer or GWA Ranger who will issue the Participant a landing slip which shall specify the following information:

1) the Landing Site

2) the date and time of landing

3) location of the Fishery

4) the Participant's name, and designation number

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

5) the number of sockeye salmon landed, and

6) the name and signature of the Fishery Officer, GWA Ranger or GWA Monitor inspecting the catch

(2) The GWA shall submit slips no later than 7 days of fishery ending and be mailed to:

Att: Jen Gordon

Fisheries and Oceans Canada

417 2nd Ave West

Prince Rupert, BC

V8J 1G8

Proof of Landing:

All fish caught under authority of this licence shall be transported directly and forthwith to a designated Landing Site.

Once issued a Landing Slip by a GWA Monitor, GWA Ranger or Fishery Officer, the Participant shall carry the Landing Slip at all times while in possession of fish caught under authority of this licence.

A Participant shall not mix or intermingle any fish caught under authority of this licence with any fish caught under any other licence. Participants shall show Landing Slips to any Fishery Officer, GWA Ranger or GWA Monitor upon demand.

Fish slips:

The GWA shall ensure that in regards to public sales a receipt is issued to the purchaser containing the following information:

1) Seller

2) Date of purchase

3) Species of fish

4) Number of pieces and weight

The GWA shall ensure that Fish Slips are used to record all fish caught and sold under the authority of this licence.

Public Sales

Public sales are only permitted at the Kitwanga landing site.

Catch Reporting

Catch monitoring will be conducted by the GWA. A record must be kept of all SOCKEYE salmon harvested under the authority of this license. A record must also be kept of the number and species of fish returned alive and unharmed to the water.

The GWA shall deliver copies of each Landing Slip and Fish Slip to the DFO Prince Rupert officer within five (5) days of the fish being landed at the Landing Site. The GWA shall supply catch information to Jen Gordon, at the Prince Rupert DFO office (Phone: 627-3421, Fax: 627-3427) weekly and upon request.

Copies of completed sales slips resulting from commercial transactions of SOCKEYE salmon will be provided to any Monitor or Fishery Officer on request.

"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.

"Landing Site" means one of the following sites:

Babine Fence Site; or other landing sites approved by DFO and the LBN, where fish are harvested under the authority of this licence are inspected and counted.

"Participant" means an individual designated in accordance with this licence to fish.

"Technician" means a member of Lake Babine Nation hired to carry out monitoring activities in accordance with Fisheries Agreement AFS2015-MLT-1520-1.

Use of Fish

Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:

The Lake Babine Nation will hire employees who may fish under the authority of this licence. The LBN shall provide to the DFO Smithers Office Fax # 250 847 4723 and to Jen Gordon, at the Prince Rupert DFO office (Phone:627-3020, Fax: 627-3427) a list of employees fishing on their behalf 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are listed as an employee.

Employees hired to fish under this licence shall not fish for food, social or ceremonial purposes 6 hours prior to or during fishing under authority of this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Compliance with the Fisheries Act
Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish
All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by LBN and reported to DFO.

Designation of Landing Sites:

The LBN will operate no more than one landing site at any given time and shall notify Jen Gordon or a DFO Fishery Officer in Smithers of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE salmon caught by a Participant of the First Nation under the authority of this licence must be inspected at the landing site by a technician, Fishery Officer or Fishery Guardian. Landing slips will be issued per truckload and must specify the following information:

1) the Landing Site

2) the date and time of landing

3) location of the Fishery

4) the Participant's names

5) the number of sockeye salmon landed, and

6) the name and signature of the Fishery Officeror LBN technician inspecting the catch

(2) The LBN shall submit slips no later than 7 days of fishery ending and be mailed to:

Att: Jen Gordon

Fisheries and Oceans Canada

417 2nd Ave West

Prince Rupert, BC

V8J 1G8

Proof of Landing:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

All fish caught under authority of this licence shall be transported directly and forthwith to a designated Landing Site.

Once issued a Landing Slip by a LBN technician or Fishery Officer, the Participant shall carry the Landing Slip at all times while in possession of fish caught under authority of this licence.

A Participant shall not mix or intermingle any fish caught under authority of this licence with any fish caught under any other licence. Participants shall show Landing Slips to any Fishery Officer or LBN technician upon demand.

Fish slips:

The LBN shall ensure that DFO Aboriginal Fisheries Fish Slips are used to record all fish caught under the authority of this licence and sold directly to the public. Fish slips shall specify:

1) the number of all salmon sold;

2) the Participant's name, signature and designation number;

3) the name of the plant, packer, collector of individual purchasing the fish;

4) the gear used;

5) the number of fish caught by the Participant

6) the date off-loaded;

7) the days fished;

8) the area of catch;

9) the Participant's Vessel designation card number (if applicable)

The LBN shall ensure that Fish Slips are used to record all fish caught and sold under the authority of this licence.

Catch Reporting

Catch monitoring will be conducted by the LBN. A record must be kept of all SOCKEYE salmon harvested under the authority of this license. A record must also be kept of the number and species of fish returned alive and unharmed to the water.

The LBN shall deliver copies of each Landing Slip and Fish Slip to the DFO Prince Rupert officer within five (5) days of the fish being landed at the Landing Site. The LBN shall supply catch information to Jen Gordon, at the Prince Rupert DFO office (Phone: 627-3421, Fax: 627-3427) weekly and upon request.

Copies of completed sales slips resulting from commercial transactions of SOCKEYE salmon will be provided to any technician or Fishery Officer on request.

Multi-strand max hang ratio 3:1, corkline to web distance min .76 m max 1.5 m.

Half-length nets:

Maximum net length will be 100 fathoms, or 187.5 meters. It will not be acceptable to have a regular length net on your drum and only set half. It will also not be acceptable to have both halves of the net on your drum. Only one(half-length) net will be allowed on your drum or in the water.

20 minute soak times:

The maximum amount of time the net is allowed to be in the water from the time it is completely set to the time it begins to be retrieved is 20 minutes. Note that this "soak time" is designed to equal a 40 minute time from when the first portion of the net enters the water to when the last portion of the net leaves the water. Times will be monitored on the grounds.

The target species in this fishery is Skeena Sockeye. The Total Allowable Catch of Skeena Sockeye is based on a share of the total Area C catch in the Skeena River Gillnet Area. Pink salmon retention is permitted.

This gill net fishery is being conducted with non-retention and non-possession of Coho, Chum, Chinook and Steelhead. None of these species may be aboard a vessel that is engaged in fishing unless they are being revived in the revival tank immediately prior to release.

Operating revival boxes are mandatory and all prohibited species captured incidentally must be either revived in the revival tank and released, or released directly to the water with the least possible harm.

Terms and Conditions:

Definitions

"Alaska Twist" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 4 or more filaments of equal diameter in each twine of the web and each of these filaments shall be a minimum of 0.20 mm in diameter.

"CSAF" means Commercial Salmon Allocation Framework

"DFO" means the Department of Fisheries and Oceans also known as Fisheries and Oceans Canada (FOC) for the purpose of this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

"First Nation" means First Nation noted as a Licence Holder in this Licence.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Fishing" has the same meaning as defined in section 2 of the Fisheries Act and for greater certainty and for the purposes of this licence includes penning or detaining live fish in any way.

"Jack Sockeye" means a male sockeye salmon with a nose to fork measurement of four hundred millimeters (400mm) or less.

"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.

"Landing Site" means one of the following sites:

Aero Trading Site and/or a packer moored at Aero Trading

or other landing sites approved by DFO and the NCSFNSS, where fish harvested under the authority of this licence are inspected and counted.

"NCSFNSS" means the North Coast Skeena First Nations Stewardship Society.

"Multi-strand" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 30 or more filaments of equal diameter in each twine of the web.

"Participant" means an individual designated in accordance with this licence to fish.

"Technician" means a member of North Coast Skeena First Nations Stewardship Society hired to carry out monitoring activities in accordance with this CSAF fishery.

Use of Fish
Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:
The North Coast Skeena First Nations Stewardship Society will designate vessels and participants who may fish under the authority of this licence. The NCSFNSS shall provide to the DFO C&P Fishery Officers at the Prince Rupert Office by email at Wade.Norman@dfo-mpo.gc.ca and Clarence.Nelson@dfo-mpo.gc.ca and to the DFO Resource Manager, Jennifer.Gordon@dfo-mpo.gc.ca at the Prince Rupert DFO office (Phone:250-627-3421, Fax: 250-627-3427) a list of designated vessels and participants fishing on their behalf 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are listed as a designated vessel and participant.

Designated vessels and participants fishing under this licence shall not fish for food, social, or ceremonial purposes 6 hours prior, during, and 12 hours after under authority of this licence.

Compliance with the Fisheries Act

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish

All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by NCSFNSS and reported to DFO.

Designation of Landing Sites:

The NCSFNSS will operate no more that one landing site at any given time and shall notify Jen Gordon or a DFO Fishery Officer in Prince Rupert of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE and PINK salmon caught by Participants of the First Nation under the authority of this licence must be inspected at the landing site by a technician, Fishery Officer or Fishery Guardian. Landing slips will be issued per truckload and must specify the following information:

1) the Landing Site
2) the date and time of landing
3) location of the Fishery
4) the Participant's names
5) the number of salmon landed, and
6) the name and signature of the Fishery Officer or NCSFNSS technician inspecting the catch

(2) The NCSFNSS shall submit slips no later than 48 hours of the fishery ending and be mailed or hand delivered to:

Attn: Jen Gordon
Fisheries and Oceans Canada
417 2nd Ave West
Prince Rupert, BC
V8J 1G8

Proof of Landing:

All fish caught under authority of this licence shall be transported directly and forthwith to a designated Landing Site.

Once issued a Landing Slip by a NCSFNSS technician or Fishery Officer, the Participant shall carry the Landing Slip at all times while in possession of fish caught under authority of this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

A Participant shall not mix or intermingle any fish caught under authority of this licence with any fish caught under any other licence. Participants shall show Landing Slips to any Fishery Officer, or NCSFNSS technician upon demand.

Fish slips:

The NCSFNSS shall ensure that Fish Slips are used to record all fish caught under the authority of this licence and sold directly to the public. Fish slips shall specify:

1) the number of all salmon sold;

2) the Participant's name, signature and designation number;

3) the name of the plant, packer, collecter of individual purchasing the fish;

4) the gear used;

5) the number of fish caught by the Participant;

6) the date off-loaded;

7) the days fished;

8) the area of catch;

9) the Participant's Vessel designation card number (if applicable)

The NCSFNSS shall ensure that Fish Slips are used to record all fish caught and sold under the authority of this licence.

Catch Reporting

Catch monitoring will be conducted by an independent third party. A record must be kept of all SOCKEYE and PINK salmon harvested under the authority of this license. A record must also be kept of the number and species of fish returned alive and unharmed to the water.

The NCSFNSS shall deliver copies of each Landing Slip and Fish Slip to the DFO Prince Rupert officer within 48 hours of the fish being landed at the Landing Site. The NCSFNSS shall supply catch information to Jen Gordon, at the Prince Rupert DFO office (Phone:250-627-3421, Fax: 250-627-3427) weekly and upon request.

Copies of completed sales slips resulting from commercial transactions of SOCKEYE and PINK salmon will be provided to any technician or Fishery Officer on request.

Monitoring:

At-sea patrols will be conducted by an independent third party to confirm the number of fishing vessels participating, ensure compliance with fishing times and area boundaries.

All catch will be enumerated and potentially sampled at designated landing sites. 100% dockside enumeration will be done by an independent third party.

Use of Gill nets:

The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon gill net. In addition to any specifications prescribed by the Fisheries Act and the Regulations made thereunder, gill nets shall meet the following specifications:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(a) all nets greater than 60 meshes in depth shall have at least every fifth cork a distinctive colour (not white); and

(b) Alaska twist or multi-strand or a combination of the two is permitted. If Alaska twist is used, then the hang ratio shall not exceed 2.5:1.

The gill net shall be completely retrieved from the water upon completion of each set.

Gill net revival tank:

While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall:

(a) be constructed of non-transparent material;

(b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm;

(c) have a separate tight fitting lid for each compartment, made of non-transparent material;

(d) have a separate inlet and outlet for each compartment;

(e) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled;

(f) be in operation from 10 minutes prior to retrieval of the net and continue in operation at all times during retrieval of the net and while fish are being held in the tank;

(g) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute;

(h) be kept clean and in operable condition; and

(i) shall not be used for any purpose other than that outlined above.

Valid From: 24-Aug-2018
Expiry Date: 30-Aug-2018

This licence is issued under the authority of FISHERIES ACT, and SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Sale purpose.

Licence/Permit Activity Description:

This licence does not define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is required to be at the fishing location at all times.

This licence is issued under the Commercial Salmon Allocation Framework.

This licence is issued to the Lake Babine Indian Band also known as the Lake Babine Nation and, subject to the Fisheries Act and regulations there under, confers the authority to fish under the following conditions:

Period of Activity:

The demonstration fishery will open August 24th, 2018 to August 30th, 2018 (7 days).

Definitions

"Bands" means the following communities which are represented by Lake Babine Nation:

Fort Babine

Old Fort

Tachet

Donald's Landing

Woyenne

"DFO" means the Department of Fisheries and Oceans also known as Fisheries and Oceans Canada (FOC) for the purpose of this licence.

"First Nation" means First Nation noted as a Licence Holder in this Licence.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Fishing" has the same meaning as defined in section 2 of the Fisheries Act and for greater certainty and for the purposes of this licence includes penning or detaining live fish in any way.

"Jack Sockeye" means a male sockeye salmon with a nose to fork measurement of four hundred millimeters (400mm) or less.

"LBN" means the Lake Babine Nation.

"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.

"Landing Site" means one of the following sites:

Babine Fence Site; or other landing sites approved by DFO and the LBN, where fish are harvested under the authority of this licence are inspected and counted.

"Participant" means an individual designated in accordance with this licence to fish.

"Technician" means a member of Lake Babine Nation hired to carry out monitoring activities in accordance with Fisheries Agreement AFS2015-MLT-1520-1.

Use of Fish

Sale of fish caught under the authority of this licence is permitted.

Designation of Participants:

The Lake Babine Nation will hire employees who may fish under the authority of this licence. The LBN shall provide to the DFO Smithers Office Fax # 250 847 4723 and to Jen Gordon, at the Prince Rupert DFO office (Phone:627-3020, Fax: 627-3427) a list of employees fishing on their behalf 12 hours prior to their participation in the Fishery. No person shall fish under the authority of this licence unless they are listed as an employee.

Employees hired to fish under this licence shall not fish for food, social or ceremonial purposes 6 hours prior to or during fishing under authority of this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Release of Non-target fish

All other species incidentally caught must be returned to the water with the least possible harm. Records of released fish must be maintained by LBN and reported to DFO.

Designation of Landing Sites:

The LBN will operate no more than one landing site at any given time and shall notify Jen Gordon or a DFO Fishery Officer in Smithers of the specific location of the landing site to be operated and will advise DFO of the time periods when the landing site will be in operation. Such notification shall be made at least twenty four (24) hours prior to operation of the landing site.

Landing Sites:

Participants shall not transport any fish from a Landing Site unless all fish have been counted and each Participant delivering fish to the landing site has been issued a Landing Slip for the fish.

Landing Slips:

All SOCKEYE salmon caught by a Participant of the First Nation under the authority of this licence must be inspected at the landing site by a technician, Fishery Officer or Fishery Guardian. Landing slips will be issued per truckload and must specify the following information:

1) the Landing Site

2) the date and time of landing

3) location of the Fishery

4) the Participant's names

5) the number of sockeye salmon landed, and

6) the name and signature of the Fishery Officeror LBN technician inspecting the catch

(2) The LBN shall submit slips no later than 7 days of fishery ending and be mailed to:

Att: Jen Gordon

Fisheries and Oceans Canada

417 2nd Ave West

Prince Rupert, BC

V8J 1G8

Proof of Landing:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

All fish caught under authority of this licence shall be transported directly and forthwith to a designated Landing Site.

Once issued a Landing Slip by a LBN technician or Fishery Officer, the Participant shall carry the Landing Slip at all times while in possession of fish caught under authority of this licence.

A Participant shall not mix or intermingle any fish caught under authority of this licence with any fish caught under any other licence. Participants shall show Landing Slips to any Fishery Officer or LBN technician upon demand.

Fish slips:

The LBN shall ensure that DFO Aboriginal Fisheries Fish Slips are used to record all fish caught under the authority of this licence and sold directly to the public. Fish slips shall specify:

1) the number of all salmon sold;

2) the Participant's name, signature and designation number;

3) the name of the plant, packer, collector of individual purchasing the fish;

4) the gear used;

5) the number of fish caught by the Participant

6) the date off-loaded;

7) the days fished;

8) the area of catch;

9) the Participant's Vessel designation card number (if applicable)

The LBN shall ensure that Fish Slips are used to record all fish caught and sold under the authority of this licence.

Catch Reporting

Catch monitoring will be conducted by the LBN. A record must be kept of all SOCKEYE salmon harvested under the authority of this license. A record must also be kept of the number and species of fish returned alive and unharmed to the water.

The LBN shall deliver copies of each Landing Slip and Fish Slip to the DFO Prince Rupert officer within five (5) days of the fish being landed at the Landing Site. The LBN shall supply catch information to Jen Gordon, at the Prince Rupert DFO office (Phone: 627-3421, Fax: 627-3427) weekly and upon request.

Copies of completed sales slips resulting from commercial transactions of SOCKEYE salmon will be provided to any technician or Fishery Officer on request.

Definitions

"Band" means the First Nation.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and which is used to fish for a species of fish which is authorized by a commercial fishing licence (including commercial licences under the Aboriginal Communal Fishing Licences Regulations). This does not include non-licenced vessels fishing for food, social and ceremonial purposes.

"DFO" means Department of Fisheries and Oceans.

"First Nation" means First Nation noted as a licence holder in this licence.

"Fishery" means fishing under the authority of this licence.

"Indian Status Card" means a photo identity card issued by the Aboriginal Affairs and Northern Development Canada and entitled 'Certificate of Indian Status'.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"Non Commercial Fishing Vessel" means a vessel that is not commercially licenced.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Designation of Vessels

If the harvester is intending to use a commercial or non commercial fishing vessel to participate in the fishery the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (fax: 250-627-3188, or email DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) at least 24 hours prior to using the vessel in the fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Individuals

The First Nation has designated all members of the First Nation who have a Band Indian Status Card for the licence holder noted in this licence to fish under this licence. Band Indian Status Cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation permit.

Prior to the fishery, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (fax: 250-627-3188, or email DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) with a list of the additional persons designated.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Licence Number: XFSC 1 2018
Valid From: 01-Mar-2018
Expiry Date: 30-Jun-2018

Designations are personal and non-transferable. Designation permits must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Band Indian Status Card for the licence holder in this licence or a designation card must be carried at all times by designated persons while participating in the fishery or while transporting fish harvested in the fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Band Council will issue each person so designated with a transport permit that will contain:

1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product,
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) licence number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (fax: 250-627-3188, or email DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the First Nation. The First Nation will keep a record of all harvests under this licence. Where, during a week, harvesting of herring spawn on seaplants or boughs is carried out under this licence, the First Nation will provide to the DFO AFS Resource Manager (phone: 250-847-5108 phone or email: Melanie.Anthony@dfo-mpo.gc.ca or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) or upon request by the C&P Prince Rupert Detachment Supervisor, a copy of the up to date harvest log, on Wednesday of each week.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Vessels

If the harvester is intending to use a commercial or non commercial fishing vessel to participate in the fishery the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (fax: 250-627-3188, or email DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) at least 24 hours prior to using the vessel in the fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Band Council will issue each person so designated with a transport permit that will contain:

1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product,
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) licence number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (fax: 250-627-3188, or email DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the First Nation. The First Nation will keep a record of all harvests under this licence. Where, during a week, harvesting of herring spawn on seaplants or boughs is carried out under this licence, the First Nation will provide to the DFO AFS Resource Manager at DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) or upon request by the C&P Prince Rupert Detachment, a copy of the up to date harvest log, on Wednesday of each week.

Compliance with the Fisheries Act

Fisheries and Oceans Canada | Pêches et Océans Canada

Licence Number: XFSC 20 2018
Valid From: 01-Mar-2018
Expiry Date: 30-Jun-2018

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Species, Quantity of Fish, Area(s) and Gear and Terms and Conditions portion of this licence document.

Period of Activity:
Licence Holder may harvest during the periods further described in the Terms and Conditions and Species Gear and Areas portion of this licence document.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Definitions

"Band" means the First Nation.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and which is used to fish for a species of fish which is authorized by a commercial fishing licence (including commercial licences under the Aboriginal Communal Fishing Licences Regulations). This does not include non-licenced vessels fishing for food, social and ceremonial purposes.

"DFO" means Department of Fisheries and Oceans.

"First Nation" means First Nation noted as a licence holder in this licence.

"Fishery" means fishing under the authority of this licence.

"Indian Status Card" means a photo identity card issued by the Aboriginal Affairs and Northern Development Canada and entitled 'Certificate of Indian Status'.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"Non Commercial Fishing Vessel" means a vessel that is not commercially licenced.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

Designation of Vessels

If the harvester is intending to use a commercial or non commercial fishing vessel to participate in the fishery the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (fax: 250-627-3188, or email DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) at least 24 hours prior to using the vessel in the fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Individuals

The First Nation has designated all members of the First Nation who have a Band Indian Status Card for the licence holder noted in this licence to fish under this licence. Band Indian Status Cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation permit.

Prior to the fishery, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (fax: 250-627-3188, or email DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) with a list of the additional persons designated.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Designations are personal and non-transferable. Designation permits must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Band Indian Status Card for the licence holder in this licence or a designation card must be carried at all times by designated persons while participating in the fishery or while transporting fish harvested in the fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Band Council will issue each person so designated with a transport permit that will contain:

1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product,
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) licence number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (fax: 250-627-3188, or email DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the First Nation. The First Nation will keep a record of all harvests under this licence. Where, during a week, harvesting of herring spawn on seaplants or boughs is carried out under this licence, the First Nation will provide to the DFO AFS Resource Manager at DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) or upon request by the C&P Prince Rupert Detachment, a copy of the up to date harvest log, on Wednesday of each week.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Gear:	Hand Picking Dip Net Trap, Hoop or Ring Net Trap or Pot Hook and Line

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Licence Area: [redacted]

Additional Descriptions: No person shall catch and retain, or have in his possession, any:
(a) Dungeness Crab that measures less than 165mm in a straight line through the greatest breadth of the carapace; or
(b) Red Rock Crab that measures less than 115 mm in a straight line through the greatest breadth of the carapace.

s.20(1)(c)

Ring net on condition that:
(i) nets are marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(ii) nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.

Traps, on condition that:
(i) all individual traps are marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(ii) Where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(iii) Rigid frame traps with hinged lids: No designated fisherman shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater than #120 untreated cotton twine, such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No designated fisherman shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than #120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35 cm square.

No chemicals are allowed to be used in marine and intertidal areas.

Species: BUTTER CLAM (Saxidomus gigantea)

Gear: Hand Picking
Fork
Rake

Licence Area: [redacted]

Additional Descriptions: See Additional Information for specific harvest areas.

In keeping with the traditions of the Tsimshian people, the black-tipped siphons will be removed from all butter clams (Saxidomus gigantea) prior to consumption. This method of preparing butter clams has been practiced by the Tsimshian people for thousands of years, and the technique has been passed down orally from generation to generation.

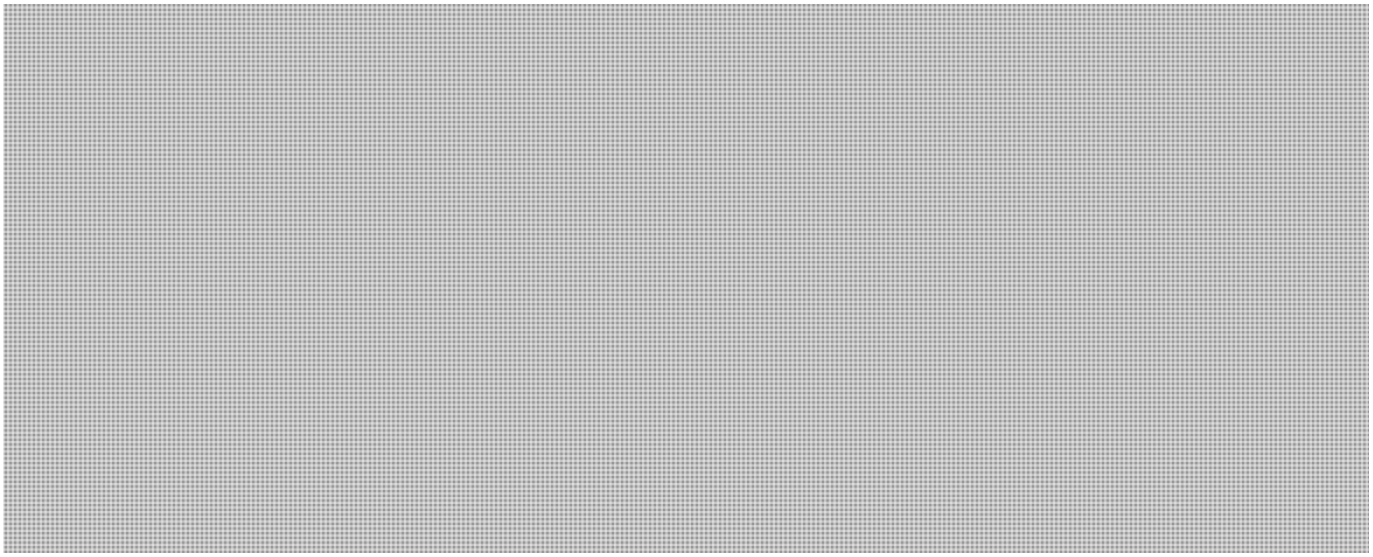
The list of bivalves in this licence is permitted in the following areas:

011502

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information



PUBLIC NOTICE of BIOTOXIN and SANITATION results will be posted for food, social and ceremonial (FSC) harvesters.

For greater certainty, this licence does not authorize the harvest of abalone.

Terms and Conditions:

Definitions

"Band" means the First Nation, which is represented by the Metlakatla Band Council.

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Metlakatla Band Council will issue each person so designated with a transport permit that will contain:
1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product (complete address),
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) Licence number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Field Supervisor, email clarence.nelson@dfo-mpo.gc.ca (phone: 250-627-3419 and fax: 250-627-3188) or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Dual Fishing (Fishing for Groundfish for Commercial Purposes, and for Food, Social and Ceremonial Purposes)

1. The First Nation may engage in dual fishing only if the following conditions are met:
a) The First Nation designates the vessel master and the commercial vessel (including VRN), in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of this licence.
b) The First Nation issues a dual fishing designation certificate to the vessel prior to the vessel participating in a commercial groundfish fishing trip. The dual fishing designation certificate must include:
i. the name of the vessel master, commercial fishing vessel (including VRN);

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the vessel may land under the authority of this licence during the fishing trip;
iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the unique identification number of the dual fishing designation certificate.

2. While dual fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Groundfish Licence must be landed at the same time and must be validated by the dockside service provider;
b) The First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Groundfish Licence if a fishery guardian, a fisheries representative designated by the First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the First Nation, as the case may be, must record landed catch information by weight, species and piece count, the halibut tag numbers, the name of the vessel (including VRN), the vessel master and the dual fishing designation certificate unique identification number to the First Nation and to the DFO Groundfish Management Unit at 604-666-8525 (fax) within seven days of validation;
d) Dual Fishing under the authority of this licence must occur only in the area where this licence authorizes fishing and must not occur in areas closed to fishing by the Commercial Licence.
e) Fish retained under the authority of this licence must be recorded in the Integrated Groundfish Fishing Logbook by set in the comments sections.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Metlakatla Band Council. The Metlakatla Band Council will keep a record of all harvests under this licence and will provide such information to the DFO AFS Resource Manager, Prince Rupert Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca

Salmon: Where, during a week, harvesting of salmon is carried out under this licence, the Metlakatla will provide DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca, or Fax: 250-627-3427) a copy of the up-to-date harvest log, on Wednesday of each week.

If a fishing vessel is used for fishing under this licence, the Metlakatla Band Council will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Resource Management Manager on completion of the fishing operations of that vessel.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, a species of fish set out in this licence may be harvested under this licence,
(a) in the specified quantities
(b) during the specified dates and times
(c) with the specified gear, identified or marked in accordance with the specified method
(d) at the specified locations, and
(e) in accordance with the other conditions.

Subject to closures and other conditions of this licence, the authority to fish each species set out in this licence will expire on the date specified or earlier if DFO, after consultation with the Metlakatla Band Council, has determined that the maximum quantity for the species has been reached.

This licence is for a specified quantity for the term of this licence for management purposes only, and is without prejudice to maximum quantities in future years.

Designation of Individuals

The Metlakatla Band Council has designated all members of the Metlakatla First Nation who have a valid Metlakatla First Nation Band card to fish under this licence. Metlakatla First Nation Band cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation card/letter.

Prior to the fishery, the First Nation will provide the C&P Prince Rupert Field Supervisor, email clarence.nelson@dfo-mpo.gc.ca (phone: 250-627-3419 and fax: 250-627-3188) or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca with a list of the additional persons designated.

Designations are personal and non-transferable. Designation cards must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Metlakatla Band Council band card or a designation card must be carried at all times by designated persons while participating in the Fishery or while transporting fish harvested in the Fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

For management purposes, bivalve harvests will be limited to Metlakatla band members and other designated individuals only. Harvesters must be in possession of a valid food fish permit or Metlakatla status card while harvesting. The Metlakatla Fisheries Program, in consultation with DFO Conservation and Protection staff has developed a monitoring and enforcement program for the clam fishery. Metlakatla will have on-ground monitoring during an opening to monitor band member activities; MFP will also carry out occasional joint patrols with C&P personnel to monitor non-band members' activities.

Harvesting sites in Venn Pass are located in Metlakatla's IR 2 this harvesting area is exclusive to band membership. A clam fishery for non-band members and non-Tsimshian will be considered after assessing the impacts of the initial harvest. A fishery for non-band members will take place at the discretion of the Metlakatla Band Council and Metlakatla Fisheries Program.

Designation of Vessels for Salmon Only – When Commercial Fisheries are occurring concurrently

If a designated person intends to use a vessel equipped with Commercial Fishing Gear to harvest FSC salmon, the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

First Nation's Fisheries Program Manager, or designate, must designate the fishing vessel in writing. The First Nation's Fisheries Program Manager, or designate, will provide a list of designated vessels to the DFO (DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca & clarence.nelson@dfo-mpo.gc.ca, at least twelve (12) hours prior to using the fishing vessel to harvest FSC fishery. Where the First Nation's Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. This applies only when commercial openings occur simultaneously to the proposed FSC fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Failure to obtain a designation permit prior to FSC fishing will prohibit the vessel and or persons on board the vessel from being authorized to FSC fish for salmon under the authority of this licence six (6) hours prior to, during and twelve (12) hours after a commercial salmon opening.

When a vessel or person is designated by permit to FSC fish under this licence during a commercial opening, that vessel or person is not authorized to participate in the concurrent commercial salmon fishery opening. If the vessel or person designated to FSC fish chooses to participate in the commercial salmon fishery, the authorization for fishing under this licence is revoked and any fishing under this licence is a violation of the six (6) hours prior to, during or twelve (12) hours after condition as described in the Designation of Vessels for Salmon Only. This prohibition for simultaneous fishing applies regardless of the order of the fishing activity.

The vessel and individual designation as described under Designation of Individual and Designation of Vessels, must be carried on the vessel at all times while the vessel is being used to FSC harvest or while transporting FSC fish harvested 6 hours prior, during and 12 hours after the commercial salmon fishery. Proof of vessel or individual designation must be presented to any Fishery Officer or Fishery Guardian on request. Harvesters and catch are subject to inspection upon request of a Fishery Officer of Fishery Guardian.

All vessels must offload 100% of their catch. Fishers/vessels that choose to participate in the FSC fishery may not participate in the commercial net opening until the following calendar day. All landed catch of the designated vessels or persons must be validated by the First Nation Fisheries Program and subject to 100% dockside validation by the First Nation Fisheries Program. Catch numbers are to be provided to the DFO AFS Resource Manager on Wednesday following the week's fishing activities. Failure to provide aggregated catch information to DFO will result in future opportunities for FSC harvest during concurrent commercial salmon openings being rescinded until such information is provided.

When the commercial salmon fishery is not open and subject to the terms and conditions listed above, fishing will be authorized as otherwise stated in the conditions of this licence.

Failure to comply with the above conditions will result in:

"A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening".

Designation of Vessels

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Field Supervisor, email clarence.nelson@dfo-mpo.gc.ca (phone: 250-627-3419 and fax: 250-627-3188) or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca or at least twenty-four (24) hours prior to using the commercial fishing vessel in the fishery. Where the Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Vessel designations must set out the fishing times, areas, and gear

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below, fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening.

Bivalves

Metlakatla will maintain a Community Harvest Plan to manage the community bivalve harvest. The Metlakatla Fisheries Program will monitor the fishery and provide Fisheries and Oceans Canada with a copy of the Community Harvest Plan prior to the start of the fishery.

Catch monitoring information will be collected to better quantify the intertidal bivalve needs of the Metlakatla community for future FSC bivalve harvests. Participants will also be required to provide MFP with a bivalve harvest report upon completion of harvesting. Metlakatla Fisheries staff, in conjunction with DFO (C&P), will patrol the harvest openings and MFP staff will collect catch information at the harvest site and upon return of the permit or interview. Catch monitoring will include harvesters name, date of harvest, amount harvested (lbs.), catch report will be forwarded at the end of each month with catch reports to Resource Management Shellfish Unit Biologist at the Department of Fisheries and Oceans.

On-site monitoring coverage will be done at all harvest locations every harvest tide by MFP staff.

The following gear is permitted to be used for Shellfish harvesting:

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information

single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted. Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

Fishing is not permitted in an area described in this licence unless the Canadian Food Inspection Agency recommends to the Regional Director General, Pacific Region, (RDG) that the prohibition order respecting harvesting in that area be lifted and the RDG announces by PUBLIC NOTICE as described below that harvesting in that area is permitted.

The Parties agree to work together to identify the times, locations and methods whereby bivalves can be safely harvested. This may include the implementation of PSP assessment and monitoring procedures for specific harvesting times and locations.

Licence Issued: 29 March 2018

Licence Printed: 29 March 2018
Licence Issued By: WENDY EVANS, Fisheries and Oceans Canada

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Licence Number: XFSC 54 2018
File Number: NCD-10-CL013-GWWA
Valid From: 01-Apr-2018
Expiry Date: 31-Mar-2019

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Terms and Conditions and Species Gear and Areas portion of this licence document.

Period of Activity:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

General Salmon Conditions:

No one is permitted to fish more than one gillnet or set-net.

Terms and Conditions:

General Provisions:

This licence is issued jointly to the Gitksan Watershed Authorities and the Wet'suwet'en Treaty Office Society listed in Schedule "A" for and on behalf of their members. The Houses have appointed the Gitksan Watershed Authorities and the Wet'suwet'en Treaty Office Society their agent for the purpose of carrying out the obligations of the Houses pursuant to this licence. Subject to the Fisheries Act and regulations thereunder, this licence confers the authority to fish under the following conditions:

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Definitions

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).
"First Nation" means the licence holder as identified under licence holder.
"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.
"Fishery" means fishing under the authority of this licence.
"GWA" means the Gitksan Watershed Authorities.
"GWA Monitor" means a person hired by the GWA to carry out monitoring activities pursuant to this licence.
"GWA Ranger" means an individual selected by the GWA and appointed as a fishery guardian by the Minister of Fisheries and Oceans pursuant to section 5 of the Fisheries Act.
"Indian Status Card" means a photo identity card issued by the Department of Indians Affairs and Northern Development and entitled 'Certificate of Indian Status'
"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.
"Participant" means an individual carrying on any fishing or fishing related activity, including transporting and landing fish, under the authority of this licence.
"Transport Permit" means the Skeena Fisheries Commission Aboriginal Fishery Transport Permit issued by the GWA or the Wet'suwet'en Treaty Office Society.
"Wet'suwet'en" means the Wet'suwet'en Treaty Office Society.
"Wet'suwet'en Monitor" means a person hired by the Wet'suwet'en Treaty Office Society to carry out monitoring activities pursuant to this licence.
"Wet'suwet'en Ranger" means an individual selected by the Wet'suwet'en Treaty Office Society and appointed as a fishery guardian by the Minister of Fisheries and Oceans pursuant to section 5 of the Fisheries Act.

Dates and Times:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Fishing is authorized by this licence 7 days each week from April 1 to March 31. Fishing dates and times are subject to amendment to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e) in accordance with the other conditions,
set out in this licence.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

The following gear is permitted to be used for Salmon harvesting:

(a) Fish wheel;
(b) Gill nets;
(c) Set-nets;
(d) Dip net;
(e) Gaff with single point;
(f) Beach seine;
(g) Trap or weir;
(h) Rod and reel angling gear with single point hook

All fishing gear must be clearly marked with the participant's name and Band number or Designation Card number, as the case may be.

No one is permitted to fish more than one gillnet or set-net.

Designation of Individuals

Designated persons must carry the documentation described herein at all times while participating in the Fishery or while transporting fish harvested in the Fishery. Designated persons who are members of a Gitksan House must carry a form of identification that documents their membership in a Gitksan House. Designated persons who are members of a Wet'suwet'en House must carry an Indian Status Card.

Designated persons who are not members of a Gitksan House or a Wet'suwet'en House must carry a designation card. A designated person must present, to any DFO fishery officer, DFO fishery guardian, GWA Ranger, GWA Monitor, Wet'suwet'en Ranger, or Wet'suwet'en Monitor on request, a form of identification that documents their membership in a Gitksan or a Wet'suwet'en House, their Indian Status Card, or their designation card.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

Designations are personal and non-transferable.

Transporting Harvest

A participant shall not transport fish caught pursuant to this license without a transport permit unless:
(a) the participant is bringing the fish from the original landing site to the participant's residence, or
(b) the participant is bringing the fish to a gathering place established by the GWA or the Wet'suwet'en Treaty Office Society.

While transporting fish caught pursuant to this licence, a participant must:
(a) Carry a copy of his or her Transport Permit;
(b) Carry identification sufficient to establish his or her name and place of residence; and
(c) Produce the Transport Permit and personal identification on the request of any GWA or Wet'suwet'en Ranger, DFO Fishery Officer, Fishery Guardian, or other peace officer.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery.

Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits arepersonal and non-transferable.

Catch Monitoring and Harvest Reporting

DFO, the GWA and the Wet'suwet'en Treaty Office Society will cooperate in the monitoring of the catch made further to this licence. Where, during a week, fishing is carried out under this licence, the GWA and Wet'suwet'en Treaty Office Society will provide DFO Fisheries Management in Smithers (Melanie.Anthony@dfo-mpo.gc.ca and dfo.ncap-pacn.mpo@dfo-mpo.gc.ca, phone 250-847-5108) with net counts and catch information by Wednesday of the following week.

This information will include:
a) The total number of nets fished,
b) total hours fished,
c) total catch by species,
d) total catch by area, and
e) catch monitoring and catch data of chinook salmon at the Bulkley River Falls to be reported separately.

Tag Recovery

The Gitksan Watershed Authorities and Wet'suwet'en Treaty Office Society will submit all tags and radio tags and/or recovery information to the nearest DFO office.

Fisheries and Oceans Canada | Pêches et Océans Canada

Licence Number: XFSC 55 2018
Valid From: 01-Apr-2018
Expiry Date: 31-Mar-2019

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Species, Quantity of Fish, Area(s) and Gear and Terms and Conditions portion of this licence document.

Licence Holder:

Licence Area:	[redacted]
Maximum Harvest Amount:	1000 Individual Pieces

s.20(1)(c)

Additional Descriptions: **Additional Descriptions for Salmon:**

Hook and line, on condition that proof of Band membership is carried when fishing.

Gillnets, on condition that all gill nets and set nets are marked at both ends with a floating buoy clearly marked with the fisherman's name.

All stationary fishing apparatus must be marked with a floating buoy clearly marked with the designated fisherman's name.

No salmon gear is to be left unattended in tidal waters.

This licence does not authorize fishing for salmon with a gillnet or seine net 6 hours prior to, during and 12 hours following a commercial salmon net opening, unless DFO and the Lax Kw Alaams Band enter into alternative agreements which provides for simultaneous FSC fishing opportunities for salmon with gillnet or seine net under this licence while commercial salmon net fisheries are occurring. For greater certainty, DFO is committed to working with Lax Kw Alaams to provide fishing opportunities during commercial salmon net fisheries.

Species:	SABLEFISH (Anoplopoma fimbria)
Life Stage:	Adult
Gear:	Trap or Pot Hook and Line
Licence Area:	[redacted]
Maximum Harvest Amount:	1500 Pounds

Species: PACIFIC HALIBUT (Hippoglossus stenolepis)
Life Stage: Adult
Gear: Trap or Pot
Hook and Line
Licence Area: [redacted]
Maximum Harvest Amount: 25000 Pounds

Species: All GROUNDFISH excluding SABLEFISH (Anoplopoma fimbria), PACIFIC HALIBUT (Hippoglossus stenolepis);
Life Stage: Adult
Gear: Trap or Pot
Hook and Line
Licence Area: [redacted]
Maximum Harvest Amount: 1500 Pounds *(Total for all Species in this group)*
Additional Descriptions: Traps on condition that:
(i) All individual traps must be marked with a floating buoy clearly marked with the designated fisherman's name.
(ii) Where a number of traps are set on a line, and where longline gear is used, the line must be marked at both ends with a floating bouy clearly marked with the designated fisherman's name.

Species: STELLER SEA LION (Eumetopias jubatus)
Gear: Shotgun
Rifle
Spear
Licence Area: [redacted]
Maximum Harvest Amount: 6 Individual Pieces

Species: HARBOUR SEAL (Phoca vitulina)
Gear: Rifle
Shotgun
Spear
Licence Area: [redacted]
Maximum Harvest Amount: 12 Individual Pieces

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Species: All SHELLFISH excluding ABALONES (Haliotidae);
Gear: Hand Picking
Trap or Pot
Hook and Line
Dip Net
Trap, Hoop or Ring Net
s.20(1)(c)
Licence Area: [redacted]
Additional Descriptions: No person shall catch and retain, or have in his possession, any:
(a) Dungeness Crab that measures less than 165mm in a straight line through the greatest breadth of the carapace; or
(b) Red Rock Crab that measures less than 115 mm in a straight line through the greatest breadth of the carapace.

For greater certainty, the Communal Licence does not authorize the harvest of abalone.

Species: NATIVE LITTLENECK CLAM (Leukoma staminea)
Gear: Rake
Hand Picking
Fork
Licence Area: [redacted]
Additional Descriptions: See Additional Information for specific harvest areas and restrictions.

Species: BUTTER CLAM (Saxidomus gigantea)
Gear: Rake
Hand Picking
Fork
Licence Area: [redacted]
Additional Descriptions: See Additional Information for specific fishing areas and restrictions.

Species: NUTTALL COCKLE (aka HEART COCKLE) (Clinocardium nuttallii)
Gear: Fork
Rake
Hand Picking
Licence Area: [redacted]
Additional Descriptions: See Additional Information for specific harvest areas and restrictions.

Additional Information:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

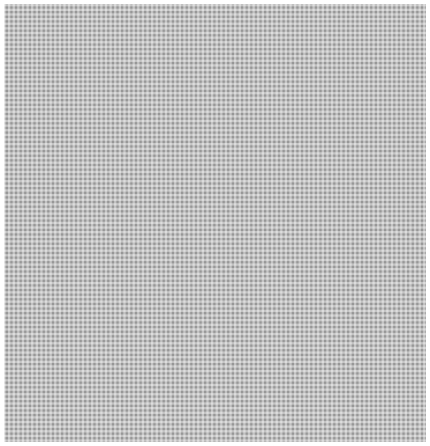
Harvest Areas and Restrictions:

Fishing is not permitted in an area described in this licence unless the Canadian Food Inspection Agency recommends to the Regional Director General, Pacific Region, ("RDG") that the prohibition order respecting harvesting in that area be lifted and the RDG announces by "PUBLIC NOTICE" as described below that harvesting in that area is permitted.

The Parties agree to work together to identify the times, locations and methods whereby bivalves can be safely harvested. This may include the implementation of PSP assessment and monitoring procedures for specific harvesting times and locations. Always check for both PSP and Sanitary Contamination Closures if you plan on consuming any shellfish. Information on sanitary contamination (human and animal waste) closures, and in-season closures due to Paralytic Shellfish Poisoning (red tide) is available at the Prince Rupert DFO office by phone: (250) 627-3499, or call 1-866-431-3474 toll free, or on the Internet at: http//www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

Fishing is permitted in the following areas:

s.20(1)(c)



Beaches being opened for the harvest of butter clams will be advertised with a description of the method for siphon removal within all public notices. PUBLIC NOTICE of BIOTOXIN and SANITATION results will be posted for food, social and ceremonial ("FSC") harvesters.

For greater certainty, this licence does not authorize the harvest of abalone.

Terms and Conditions:

Definitions

"Band" means the Lax Kw'alaams First Nation, which is represented by the Lax Kw'alaams Band Council.

"Indian Status Card" means a photo identity card issued by the Department of Indian Affairs and Northern Development and entitled 'Certificate of Indian Status'.

Definitions

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Document Released Under the Access to Information Act / Document divulgué en vertu de la [illegible]

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, a species of fish set out in this licence may be harvested under this licence,
(a) in the maximum specified quantities
(b) during the specified dates and times
(c) with the specified gear, identified or marked in accordance with the specified method
(d) at the specified locations, and
(e) in accordance with the other conditions set out in this licence.

Subject to closures and other conditions of this licence, the authority to fish each species set out in this licence will expire on the date specified or earlier if DFO, after consultation with the Lax Kw'alaams First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, the First Nation will notify DFO and make a request on the fish species they require.

Dual Fishing (Fishing for Groundfish for Commercial Purposes, and for Food, Social and Ceremonial Purposes)

1. The First Nation may engage in dual fishing only if the following conditions are met:
a) The First Nation designates the vessel master and the commercial vessel (including VRN), in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of this licence.
b) The First Nation issues a dual fishing designation certificate to the vessel master prior to the commercial fishing vessel participating in a commercial groundfish fishing trip. The dual fishing designation certificate must include:
i. the name of the vessel master, commercial fishing vessel (including VRN);
ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the vessel may land under the authority of this licence during the fishing trip;
iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the unique identification number of the dual fishing designation certificate.

2. While dual fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Groundfish Licence must be landed at the same time and must be validated by the dockside service provider;
b) The First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Groundfish Licence if a fishery guardian, a fisheries representative designated by the First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the First Nation, as the case may be, must record landed catch information by weight, species and piece count, the halibut tag numbers, the name of the vessel (including VRN), the vessel master and the dual fishing designation certificate unique identification number to the First Nation and to the Groundfish Management Unit at 604-666-8525 (fax) within seven days of validation;
d) Dual Fishing under the authority of this licence must occur only in the area where this licence authorizes fishing and must not occur in areas closed to fishing by the Commercial Licence.
e) Fish retained under the authority of this licence must be recorded in the Integrated Groundfish Fishing Logbook by set in the comments sections.

The following gear is permitted to be used for Shellfish harvesting:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted. Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

Bivalves:

Lax Kw'alaams will maintain a Community Harvest Plan to manage the community bivalve harvest. The Lax Kw'alaams Fisheries Program will monitor the fishery and provide Fisheries and Oceans Canada with a copy of the Community Harvest Plan prior to the start of the fishery.

Catch monitoring will include harvesters name, date of harvest, amount harvested (lbs.), catch report will be forwarded at the end of month with catch reports to the Resource Management Shellfish Unit at the Department of Fisheries and Oceans.

On-site monitoring coverage will be done at all harvest locations every harvest tide by Lax Kw'alaams Fisheries Program.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Licence Number: XFSC 55 2018
Valid From: 01-Apr-2018
Expiry Date: 31-Mar-2019

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Lax Kw'alaams Band Council. The Lax Kw'alaams First Nation will keep a record of all harvests under this licence and will provide such information to the following DFO Fisheries Management Coordinators, on request:

Marine Mammals: Marine Mammals Coordinator, Vancouver (Phone: 604-666-9965, or Fax: 604-666-7712)

Groundfish: DFO Regional Manager, Groundfish Management Unit, Vancouver (Phone: 604-666-9033, or Fax: 604-666-8525)

Shellfish: Resource Management Shellfish Unit , Prince Rupert (Phone: 250-627-3455, or Fax: 250-627-3427)

Salmon: Where, during a week, harvesting of salmon is carried out under this licence, the Lax Kw'alaams Band will provide AFS Resource Manager (Phone: 250-847-5108, Fax: 250-627-3427, or emai: dfo.ncap-pacn.mpo@dfo-mpo.gc.ca) a copy of the up-to-date harvest log, on Wednesday of each week.

If a fishing vessel is used for fishing under this licence, the Lax Kw'alaams First Nation will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Resource Management Manager on completion of the fishing operations of that vessel.

Transporting Harvest

The First Nation may designate persons to transport fish outside of Lax Kw'alaams traditional area harvested under the authority of this licence. The Lax Kw'alaams Band Council will issue each person so designated with a transport permit that will contain:
1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product,
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) Licence number or MOT number,

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and fax 250-627-3188) or Field Supervisor (phone: 250-627-3401 and fax: 250-627-3188) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Designation of Individuals

The Lax Kw'alaams Band Council has designated all valid members of the Lax Kw'alaams First Nation who have an Indian Status Card to fish under this licence. Indian Status Cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation permit.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Licence Number: XFSC 55 2018
Valid From: 01-Apr-2018
Expiry Date: 31-Mar-2019

Designations are personal and non-transferable. Designation permits must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Lax Kw'alaams First Nation Indian Status Card or a designation permit must be carried at all times by designated persons while participating in the Fishery or while transporting fish harvested in the Fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Vessels

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (cell: 250-877-2707 and email: Carey.Ma@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email: Wade.Norman@dfo-mpo.gc.ca) at least twenty-four (24) hours prior to using the commercial fishing vessel in the fishery. Where the Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below, fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A commercial fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon net opening (unless directed by DFO).

011532

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

General Provisions

This licence does not define an aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is issued to the Lake Babine Indian Band for and on behalf of Fort Babine, Old Fort, Tachet, Donald's Landing, Woyenne and their members, all of whom it represents. Subject to the Fisheries Act and regulations thereunder, this licence confers the authority to fish under the following conditions:

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Definitions

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).
"First Nation" means the licence holder as identified under licence holder.
"First Nation Fisheries Technician" means an employee of the First Nation hired to assist in the monitoring and regulation of the Fishery.
"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.
"Fishery" means fishing under the authority of this licence.
"Indian Status Card" means a photo identity card issued by the Department of Indian Affairs and Northern Development and entitled "Certificate of Indian Status".
"LBN" means Lake Babine Nation.
"Participant" means an individual carrying on any fishing or fishing related activity, including transporting and landing fish, under the authority of this licence.
"Transport Permit" means the Lake Babine Nation Transport Permit issued by the First Nation.

Dates and Times

Fishing is authorized by this licence 7 days each week from June 1 to November 30. Fishing dates and times are subject to amendment to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e)in accordance with the other conditions,
set out in this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

The following gear is permitted to be used for Salmon harvesting in the prescribed fishing area.

(a) Fish wheel;
(b) Gill nets;
(c) Set-nets;
(d) Dip net;
(e) Beach seine;
(f) Trap or weir;
(g) Rod and reel angling gear with single point hook

All fishing gear must be clearly marked with the participant's name and Band number or Designation Card number, as the case may be.

Designation of Individuals

Designated persons must carry the documentation described herein at all times while participating in the Fishery or while transporting fish harvested in the Fishery. Designated persons who are members of the First Nation must carry a form of identification that documents their membership of the First Nation. Designated persons who are members of the First Nation must carry an Indian Status Card. Designated persons who are not members of the First Nation must carry a designation card issued to them by the Lake Babine First Nation.

A designated person must present, to any DFO fishery officer, DFO fishery guardian, or the First Nation Monitor, on request, a form of identification that documents their membership of the First Nation, their Indian Status Card, or their designation card.

Designations are personal and non-transferable.

Transporting Harvest

A participant shall not transport fish caught pursuant to this license without a transport permit unless:
(a) the participant is bringing the fish from the original landing site to the participant's residence, or
(b) the participant is bringing the fish to a gathering place established by the LBN.

Responsibilities of the Transporter

While transporting fish caught pursuant to this licence, a participant must:
(a) Carry a copy of his/her Transport Permit and comply with its terms;
(b) Carry identification sufficient to establish his or her name and place of residence; and
(c) Produce the Transport Permit and personal identification on the request of any fishery officer, fishery guardian, or other peace officer.

s.20(1)(c)

Species:	All GROUNDFISH excluding SABLEFISH (Anoplopoma fimbria), PACIFIC HALIBUT (Hippoglossus stenolepis);
Gear:	Trap or Pot Weir, Carcass Weir, Juvenile Weir, Temporary Hook and Line
Licence Area:	[redacted]
Maximum Harvest Amount:	5000 Pounds *(Total for all Species in this group)*
Additional Descriptions:	Traps, on condition that: (i) All individual traps must be marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used. (ii) Where a number of traps are set on a line, and where longline gear is used, the line must be marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.

Species:	STELLER SEA LION (Eumetopias jubatus)
Gear:	Rifle Shotgun Spear
Licence Area:	[redacted]
Maximum Harvest Amount:	15 Individual Pieces

Species:	HARBOUR SEAL (Phoca vitulina)
Gear:	Rifle Shotgun Spear
Licence Area:	[redacted]
Maximum Harvest Amount:	36 Individual Pieces

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Species: All SHELLFISH excluding ABALONES (Haliotidae); s.20(1)(c)

Gear: Hand Picking
Dip Net
Trap, Hoop or Ring Net
Trap or Pot
Hook and Line

Licence Area:

Additional Descriptions: No person shall catch and retain, or have in his possession, any:
(a) Dungeness Crab that measures less than 165mm in a straight line through the greatest breadth of the carapace; or
(b) Red Rock Crab that measures less than 115 mm in a straight line through the greatest breadth of the carapace.

Ring net on condition that:
(i) nets are marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(ii) nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.

Traps, on condition that:
(i) all individual traps are marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(ii) Where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(iii) Rigid frame traps with hinged lids: No designated fisherman shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater than #120 untreated cotton twine, such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No designated fisherman shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than #120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35 cm square.

No chemicals are allowed to be used in marine and intertidal areas.

For greater certainty, this licence does not authorize the harvest of bivalve shellfish due to the lack of biotoxin monitoring in Management Areas 1-10.

For greater certainty, the Communal Licence does not authorize the harvest of abalone.

Terms and Conditions:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Definitions

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Gitxaala First Nation Council will issue each person so designated with a transport permit that will contain:

1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product (complete address),
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Field Supervisor, email clarence.nelson@dfo-mpo.gc.ca (phone: 250-627-3419 and fax: 250-627-3188) or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Dual Fishing (Fishing for Groundfish for Commercial Purposes, and for Food, Social and Ceremonial Purposes)

1. The First Nation may engage in dual fishing only if the following conditions are met:
a) The First Nation designates the vessel master and the commercial vessel (including VRN), in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of this licence.
b) The First Nation issues a dual fishing designation certificate to the vessel master prior to the vessel participating in a commercial groundfish fishing trip. The dual fishing designation certificate must include:
i. the name of the vessel master, commercial fishing vessel (including VRN);
ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the vessel may land under the authority of this licence during the fishing trip;
iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the unique identification number of the dual fishing designation certificate.

2. While dual fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Groundfish Licence must be landed at the same time and must be validated by the dockside service provider;
b) The First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Groundfish Licence if a fishery guardian, a fisheries representative designated by the First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the First Nation, as the case may be, must record landed catch information by weight, species and piece count, the halibut tag numbers, the name of the vessel (including VRN), the vessel master and the dual fishing designation certificate unique identification number to the First Nation and to the DFO Groundfish Management Unit at 604-666-8525 (fax) within seven days of validation;
d) Dual Fishing under the authority of this licence must occur only in the area where this licence authorizes fishing and must not occur in areas closed to fishing by the Commercial Licence.
e) Fish retained under the authority of this licence must be recorded in the Integrated Groundfish Fishing Logbook by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information

set in the comments sections.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Gitxaala First Nation. The Gitxaala First Nation will keep a record of all harvests under this licence and will provide such information to the DFO AFS Resource Manager, Prince Rupert Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca

Salmon: Where, during a week, harvesting of salmon is carried out under this licence, the Gitxaala First Nation will provide DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca, or Fax: 250-627-3427) a copy of the up-to-date harvest log, on Wednesday of each week.

If a commercial fishing vessel is used for fishing under this licence, the Gitxaala First Nation will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Resource Management Manager on completion of the fishing operations of that vessel.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e) in accordance with the other conditions set out in this licence.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, the First Nation will notify DFO and make a request on the fish species they require.

Document Released Under the Access to Information Act / Document divulgué en vertu de la [illegible]

Licence Number: XFSC 62 2018
Valid From: 01-Apr-2018
Expiry Date: 31-Mar-2019

Designation of Individuals

The Gitxaala First Nation Council has designated members of the Gitxaala First Nation who have a valid Gitxaala First Nation Permit to fish pursuant to this licence. Gitxaala First Nation Band permits are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation card/letter.

Prior to the fishery, the First Nation will provide the C&P Prince Rupert Field Supervisor, email clarence.nelson@dfo-mpo.gc.ca (phone: 250-627-3419 and fax: 250-627-3188) or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca with a list of the additional persons designated. Designations are personal and non-transferable. Designation cards must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Gitxaala First Nation Band permit or designation/letter card must be carried at all times by designated persons while participating in the Fishery or while transporting fish harvested in the Fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Vessels for Salmon Only – When Commercial Fisheries are occurring concurrently

If a designated person intends to use a vessel equipped with Commercial Fishing Gear to harvest FSC salmon, the Gitxaala First Nation's Fisheries Program Manager, or designate, must designate the fishing vessel in writing. The Gitxaala First Nation's Fisheries Program Manager, or designate, will provide a list of designated vessels to the DFO (DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca & clarence.nelson@dfo-mpo.gc.ca) at least twelve (12) hours prior to using the fishing vessel to harvest FSC fishery. Where the Gitxaala First Nation's Fisheries Program Manager, or designate, designates a vessel after this time, the Gitxaala Fisheries Program will advise DFO via email as soon as possible. This applies only when commercial openings occur simultaneously to the proposed FSC fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Failure to obtain a designation permit prior to FSC fishing will prohibit the vessel and or persons on board the vessel from being authorized to FSC fish for salmon under the authority of this licence six (6) hours prior to, during and twelve (12) hours after a commercial salmon opening.

When a vessel or person is designated by permit to FSC fish under this licence during a commercial opening, that vessel or person is not authorized to participate in the concurrent commercial salmon fishery opening. If the vessel or person designated to FSC fish chooses to participate in the commercial salmon fishery, the authorization for fishing under this licence is revoked and any fishing under this licence is a violation of the six (6) hours prior to, during or twelve (12) hours after condition as described in the Designation of Vessels for Salmon Only. This prohibition for simultaneous fishing applies regardless of the order of the fishing activity.

The vessel and individual designation as described under Designation of Individual and Designation of Vessels, must be carried on the vessel at all times while the vessel is being used to FSC harvest or while transporting FSC fish harvested 6 hours prior, during and 12 hours after the commercial salmon fishery. Proof of vessel or individual designation must be presented to any Fishery Officer or Fishery Guardian on request. Harvesters and catch are subject to inspection upon request of a Fishery Officer of Fishery Guardian.

All vessels must offload 100% of their catch. Fishers/vessels that choose to participate in the FSC fishery may not participate in the commercial net opening until the following calendar day. All landed catch of the designated vessels or persons must be validated by the Gitxaala Fisheries Program and subject to 100% dockside validation by Gitxaala Fisheries Program. Catch numbers are to be provided to the DFO AFS Resource Manager on Wednesday following the week's fishing activities. Failure to provide aggregated catch information to DFO will result in future opportunities

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

for FSC harvest during concurrent commercial salmon openings being rescinded until such information is provided.

When the commercial salmon fishery is not open and subject to the terms and conditions listed above, fishing will be authorized as otherwise stated in the conditions of this licence.

Failure to comply with the above conditions will result in:

"A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening".

Designation of Vessels

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the Gitxaala Band Council must designate the commercial fishing vessel in writing and notify the C&P Prince Rupert Field Supervisor, email clarence.nelson@dfo-mpo.gc.ca (phone: 250-627-3419 and fax: 250-627-3188) or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca at least 24 hours prior to using the commercial fishing vessel in the fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the commercial fishing vessel at all times while the commercial fishing vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening.

The following gear is permitted to be used for Shellfish harvesting:

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted. Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

Licence Issued: 29 March 2018

Licence Printed: 29 March 2018
Licence Issued By: WENDY EVANS, Fisheries and Oceans Canada

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Fisheries and Oceans Canada | Pêches et Océans Canada

Licence Number: XFSC 63 2018
Valid From: 01-Apr-2018
Expiry Date: 31-Mar-2019

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Species, Quantity of Fish, Area(s) and Gear and Terms and Conditions portion of this licence document.

(a) Dungeness Crab that measures less than 165mmin a straight line through the greatest breadth of the carapace; or
(b) Red Rock Crab that measures less than 115 mm in a straight line through the greatest breadth of the carapace.

Ring net, on condition that:
(i) All individual nets are marked with a floating buoy clearly marked with the name of the participant and First Nation.
(ii) Where a number of nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Traps, on condition that:
(i) all individual traps are marked with a floating buoy clearly marked with the name of the participant and First Nation.
(ii) Where a number traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) Rigid frame traps with hinged lids: No designated fisherman shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater than #120 untreated cotton twine, such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No designated fisherman shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than #120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35 cm square.

No chemicals are allowed to be used in marine and intertidal areas.

For greater certainty, this licence does not authorize the harvest of bivalve shellfish due to the lack of biotoxin monitoring in Management Areas 1 to 10.

For greater certainty, this licence does not authorize the harvest of abalone.

Terms and Conditions:

Definitions

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Transporting Harvest

The First Nation may designate persons to transport Fish harvested under the authority of this licence. The First Nation will issue each person so designated with a transport permit that will contain:
(a) The name of the person(s) transporting the Fish,
(b) The quantity and species to be transported,
(c) The date of transport (departure and arrival),
(d) The destination of the product,
(e) The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) Licence number or Ministry of Transportation number, and
(f) The names of the individuals receiving the product, and the amounts thereof.

Before transporting under this licence commences, the Kitsumkalum Band Council will provide the C&P Field Supervisor in Terrace (phone: 250-615-5357 and fax 250-615-5364) or C&P Detachment Supervisor in Prince Rupert, (phone: 250-627-3430 and fax: 250-627-3188) or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca , with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Dual Fishing (Fishing for Groundfish for Commercial Purposes, and for Food, Social and Ceremonial Purposes)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

1. The Kitsumkalum First Nation may engage in Dual Fishing only if the following conditions are met:
a) The Kitsumkalum First Nation designates the Vessel Master, commercial fishing vessel (including VRN), in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of this licence.
b) The Kitsumkalum First Nation issues a Dual Fishing Designation Certificate to the Vessel Master prior to the commercial fishing vessel participating in a commercial groundfish fishing trip. The Dual Fishing Designation Certificate must include:
i. the name of the vessel master, commercial fishing vessel (including VRN);
ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the vessel may land under the authority of this licence during the fishing trip;
iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the Unique Identification Number of the Dual Fishing Designation Certificate.

2. While Dual Fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Licence must be landed at the same time and must be validated by the dockside service provider;
b) The Kitsumkalum First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Licence if a fishery guardian, a fisheries representative designated by the Kitsumkalum First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the Kitsumkalum First Nation, as the case may be, must record landed catch information by weight, species and piece count, the halibut tag numbers, the name of the vessel (including the VRN), the Vessel Master and the Dual Fishing Designation Certificate Unique Identification Number to the Kitsumkalum First Nation and to the DFO Groundfish Management Unit at 604-666-8525 (fax) within seven days of validation;
d) Dual Fishing under the authority of this licence must occur only in the area where this licence authorizes fishing and must not occur in areas closed to fishing by the Commercial Licence.
e) Fish retained under the authority of this licence must be recorded in the Integrated Groundfish Fishing Logbook by set in the comments sections.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Kitsumkalum First Nation. The Kitsumkalum First Nation will keep a record of all harvests under this licence and will provide such information to the DFO AFS Resource Manager, email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca

Salmon: Where, during a week, harvesting of salmon is carried out under this licence, the Kitsumkalum Band Council will provide DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca, or Fax: 250-627-3427) a copy of the up-to-date harvest log, on Wednesday of each week.

If a fishing vessel is used for fishing under this licence, the Kitsumkalum First Nation will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Resource Management Manager on completion of the fishing operations of that vessel.

Salmon:

All salmon harvested and retained under this licence must be landed at a landing site designated by the Kitsumkalum First Nation within 72 hours of days fished.

Monitors will be present at designated landing sites when possible during fishing activity.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

All Participants/Monitors must report to the Kitsumkalum Fisheries employee:
- the number and species of fish caught and released in the Fishery;
- the number and species of fish retained.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, a species of fish set out in this licence may be harvested under this licence,
(a) in the maximum specified quantities
(b) during the specified dates and times
(c) with the specified gear, identified or marked in accordance with the specified method
(d) at the specified locations, and
(e) in accordance with the other conditions.

Subject to closures and other conditions of this licence, the authority to fish each species set out in this licence will expire on the date specified or earlier if DFO, after consultation with the Kitsumkalum First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

Designation of Individuals

The Kitsumkalum Band Council will designate members of the Kitsumkalum First Nation to harvest fish under this licence by issuing them a Kitsumkalum Food, Social & Ceremonial Fishing Permit (the "Permit"). Indian Band Status cards are not acceptable proof of designation. The Kitsumkalum Band Council may designate other persons to fish under this licence by issuing them a Permit. All persons fishing under the authority of this licence must hold a valid Permit.

Prior to the Fishery, the Kitsumkalum First Nation will provide the C&P Field Supervisor in Terrace (phone: 250-615-5357 and fax 250-615-5364) or C&P Detachment Supervisor in Prince Rupert, (phone: 250-627-3430 and fax: 250-627-3188) or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca with a list of the additional persons designated.

Permits are personal and non-transferable. Permits must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

Permits must be carried at all times by designated persons while participating in the Fishery or while transporting fish harvested in the Fishery. Permits must be presented to any Fishery Officer or Fishery Guardian on request.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Designation of Vessels for Salmon Only – When Commercial Fisheries are occurring concurrently

If a designated person intends to use a vessel equipped with Commercial Fishing Gear to harvest FSC salmon, the First Nation's Fisheries Program Manager, or designate, must designate the fishing vessel in writing. The First Nation's Fisheries Program Manager, or designate, will provide a list of designated vessels to the DFO (DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) at least twelve (12) hours prior to using the fishing vessel to harvest FSC fishery. Where the First Nation's Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. This applies only when commercial openings occur simultaneously to the proposed FSC fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Failure to obtain a designation permit prior to FSC fishing will prohibit the vessel and or persons on board the vessel from being authorized to FSC fish for salmon under the authority of this licence six (6) hours prior to, during and twelve (12) hours after a commercial salmon opening.

When a vessel or person is designated by permit to FSC fish under this licence during a commercial opening, that vessel or person is not authorized to participate in the concurrent commercial salmon fishery opening. If the vessel or person designated to FSC fish chooses to participate in the commercial salmon fishery, the authorization for fishing under this licence is revoked and any fishing under this licence is a violation of the six (6) hours prior to, during or twelve (12) hours after condition as described in the Designation of Vessels for Salmon Only. This prohibition for simultaneous fishing applies regardless of the order of the fishing activity.

The vessel and individual designation as described under Designation of Individual and Designation of Vessels, must be carried on the vessel at all times while the vessel is being used to FSC harvest or while transporting FSC fish harvested 6 hours prior, during and 12 hours after the commercial salmon fishery. Proof of vessel or individual designation must be presented to any Fishery Officer or Fishery Guardian on request. Harvesters and catch are subject to inspection upon request of a Fishery Officer of Fishery Guardian.

All vessels must offload 100% of their catch. Fishers/vessels that choose to participate in the FSC fishery may not participate in the commercial net opening until the following calendar day. All landed catch of the designated vessels or persons must be validated by the First Nation Fisheries Program and subject to 100% dockside validation by the First Nation Fisheries Program. Catch numbers are to be provided to the DFO AFS Resource Manager on Wednesday following the week's fishing activities. Failure to provide aggregated catch information to DFO will result in future opportunities for FSC harvest during concurrent commercial salmon openings being rescinded until such information is provided.

When the commercial salmon fishery is not open and subject to the terms and conditions listed above, fishing will be authorized as otherwise stated in the conditions of this licence.

Failure to comply with the above conditions will result in:

"A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening".

Designation of Vessels

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430), Field Supervisor (phone: 250-627-3401 and email: Wade.Norman@dfo-mpo.gc.ca) or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca at least twenty-four (24) hours prior to using the commercial fishing vessel in the fishery. Where the Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below, fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening.

The following gear is permitted to be used for Shellfish harvesting:

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted. Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

File Number: NCD-CL10-017-KITSELAS
Valid From: 01-Apr-2018
Expiry Date: 31-Mar-2019

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Terms and Conditions and Species Gear and Areas portion of this licence document.

Period of Activity:

Spear
Licence Area:
Maximum Harvest Amount: 10 Individual Pieces
Additional Descriptions:

Gear is subject to applicable federal and provincial laws.

Fishing is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Species: All SHELLFISH excluding ABALONES (Haliotidae);
Gear: Hand Picking
Trap or Pot
Dip Net
Trap, Hoop or Ring Net
Licence Area:
Additional Descriptions: The fishery is limited to those species listed in part II of Schedule I of the Pacific Fishery Regulations, 1993, during the term of this licence, with the exception of abalone which is closed for conservation. **For greater certainty, this licence does not authorize the harvest of abalone.**

No person shall catch and retain, or have in his possession, any:
(a) Dungeness Crab that measures less than 165mm in a straight line through the greatest breadth of the carapace, or
(b) Red Rock Crab that measures less than 115mm in a straight line through the greatest breadth of the carapace.

For greater certainty, this licence does not authorize the harvest of bivalve shellfish in areas that are closed due to PSP or concerns of danger to public health.

Additional shellfish harvesting information and restrictions are provided in the Term and Conditions section of this licence document and must be adhered to when participating in fishing or transporting activities.

Fishing is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Terms and Conditions:

Definitions

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Transporting Harvest

The First Nation may designate persons to transport Fish harvested under the authority of this licence. The First Nation will issue each person so designated with a transport permit that will contain:
(a) The name of the person(s) transporting the Fish,
(b) The quantity and species to be transported,
(c) The date of transport (departure and arrival),
(d) The destination of the product,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(e) The vehicle and vehicle licence plate number or the vessel name and the Canadian Fishing Vessel (CFV) Licence number or Ministry of Transportation number, and
(f) The names of the individuals receiving the product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Field Supervisor, DFO Conservation & Protection, in Terrace (phone: 250-615-5357, fax: 250-615-5364, email: Wade.Larson@dfo-mpo.gc.ca) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Groundfish Dual Fishing Provisions:

The following definitions apply to this section:
"dual fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.
"dual fishing designation certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.
"unique identification number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.
"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.
"vessel master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

1. The First Nation may engage in dual fishing only if the following conditions are met:
a) The First Nation designates the vessel master and the commercial fishing vessel, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of this licence.
b) The First Nation issues a dual fishing designation certificate to the vessel master prior to the commercial fishing vessel participating in a commercial groundfish fishing trip. The dual fishing designation certificate must include:
i. the name of the vessel master and commercial fishing vessel (including the Vessel Registration Number) ;
ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the commercial fishing vessel may land under the authority of this licence during the fishing trip;
iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the unique identification number of the dual fishing designation certificate.

2. While dual fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Groundfish Licence must be landed at the same time and must be validated by the designated groundfish dockside service provider;
b) The First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Groundfish Licence if a fishery guardian, a fisheries representative designated by the First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the First Nation, as the case may be, must record landed catch information by weight, species and piece count, the name of the commercial fishing vessel (including the Vessel Registration Number), the vessel master and the dual fishing designation certificate unique identification number to the First Nation and to the DFO Groundfish Management Unit at 604-666-8525 (fax) within seven days of the validation;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

d) Fishing under the authority of this licence must occur in the area where this licence authorizes fishing.
e) The vessel master is responsible for recording fish retained under the authority of this licence in the Integrated Groundfish Fishing Logbook by set in the comments section.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Kitselas First Nation. The Kitselas First Nation will keep a record of all harvests under this licence and will provide such information to the DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca, or Fax: 250-627-3427) on request.

Salmon: Where, during a week, harvesting of salmon is carried out under this licence, the Kitselas First Nation will provide DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca, or Fax: 250-627-3427) a copy of the up-to-date harvest log, on Wednesday of each week.

If a fishing vessel is used for fishing under this licence, the Kitselas First Nation will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Fish Management Coordinator on completion of the fishing operations of that vessel.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e) in accordance with the other conditions,
set out in this licence.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

Designation of Individuals

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

The Kitselas Band Council has designated members of the Kitselas First Nation who have a valid Kitselas Band designation card to fish pursuant to this licence. Kitselas Band designation cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation card.

Prior to the fishery, the First Nation will provide the C&P Field Supervisor Wade Larson, DFO Conservation and Protection, in Terrace (phone: 250-615-5357 and fax 250-615-5364) with a list of the additional persons designated.

Designations are personal and non-transferable. Designation cards must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Kitselas Band designation card must be carried at all times by designated persons while participating in the Fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Vessels for Salmon Only – When Commercial Fisheries are occurring concurrently

If a designated person intends to use a vessel equipped with Commercial Fishing Gear to harvest FSC salmon, the First Nation's Fisheries Program Manager, or designate, must designate the fishing vessel in writing. The First Nation's Fisheries Program Manager, or designate, will provide a list of designated vessels to the DFO (DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) at least twelve (12) hours prior to using the fishing vessel to harvest FSC fishery. Where the First Nation's Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. This applies only when commercial openings occur simultaneously to the proposed FSC fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Failure to obtain a designation permit prior to FSC fishing will prohibit the vessel and or persons on board the vessel from being authorized to FSC fish for salmon under the authority of this licence six (6) hours prior to, during and twelve (12) hours after a commercial salmon opening.

When a vessel or person is designated by permit to FSC fish under this licence during a commercial opening, that vessel or person is not authorized to participate in the concurrent commercial salmon fishery opening. If the vessel or person designated to FSC fish chooses to participate in the commercial salmon fishery, the authorization for fishing under this licence is revoked and any fishing under this licence is a violation of the six (6) hours prior to, during or twelve (12) hours after condition as described in the Designation of Vessels for Salmon Only. This prohibition for simultaneous fishing applies regardless of the order of the fishing activity.

The vessel and individual designation as described under Designation of Individual and Designation of Vessels, must be carried on the vessel at all times while the vessel is being used to FSC harvest or while transporting FSC fish harvested 6 hours prior, during and 12 hours after the commercial salmon fishery. Proof of vessel or individual designation must be presented to any Fishery Officer or Fishery Guardian on request. Harvesters and catch are subject to inspection upon request of a Fishery Officer of Fishery Guardian.

All vessels must offload 100% of their catch. Fishers/vessels that choose to participate in the FSC fishery may not participate in the commercial net opening until the following calendar day. All landed catch of the designated vessels or persons must be validated by the First Nation Fisheries Program and subject to 100% dockside validation by the First Nation Fisheries Program. Catch numbers are to be provided to the DFO AFS Resource Manager on Wednesday following the week's fishing activities. Failure to provide aggregated catch information to DFO will result in future opportunities for FSC harvest during concurrent commercial salmon openings being rescinded until such information is provided.

When the commercial salmon fishery is not open and subject to the terms and conditions listed above, fishing will be authorized as otherwise stated in the conditions of this licence.

Failure to comply with the above conditions will result in:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

"A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening".

Designation of Vessels

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the First Nation must designate the vessel in writing and notify the C&P Field Supervisor Wade Larson, DFO Conservation and Protection, in Terrace (phone: 250-615-5357, fax: 250-615-5364, email: Wade.Larson@df-mpo.gc.ca) at least twenty-four (24) hours prior to using the commercial fishing vessel in the fishery. Where the Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below, fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening.

The following gear is permitted to be used for Shellfish harvesting:

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted. Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

The following gear is permitted to be used for Salmon harvesting:

(a) Fish wheel;
(b) Gillnets, on condition that all gill nets and set nets are marked at both ends with a floating buoy clearly marked with the fisherman's name and designation number;
(b) Dip net;
(c) Hook and line, on condition that;
(i) (Proof) a designation card is carried when fishing in non-tidal waters.
(ii) Only single-point hooks are used in non-tidal waters for purposes of selective fishing.
(d) Seine gear;
(e) Trap or weir

All stationary fishing apparatus must be marked with a floating buoy clearly marked with the designated fisherman's name and designation number.

No salmon gear is to be left unattended in tidal waters.

A commercial fishing vessel with commercial seine gear may not be used to fish for food, social and ceremonial purposes six (6) hours before, during and twelve (12) hours after a commercial seine net opening in these areas.

A commercial fishing vessel with commercial gill net gear may not be used to fish for food, social and ceremonial purposes six(6) hours before, during and twelve (12) hours after a commercial gill net opening in these areas.

The following gear may be used maybe used for Groundfish harvesting:

a) Hook and line, and where long line gear is used, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(b) Traps, on condition that:
(i) all individual traps are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.

The following gear may be used for Eulachon harvesting:

(a) Dip net
(b) Weir
(c) Trap net,
(d) Hook and line
(e) Beach seine
(f) Trawl

Subject to closures and other conditions of this licence.

Any gear left unattended must be clearly marked with the name of the participant and First Nation.

The following gear may be used for Marine Mammal harvesting:

Subject to applicable Federal and Provincial laws, the following gear may be used:

(a) Rifle
(b) Shotgun
(c) Spear

CONDITIONS OF COMMUNAL CRAB AREA A LICENCE Licence Period: April 1, 2018 to March 31, 2019

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

Information on management of the crab fishery is contained in the current Crab by Trap Integrated Fisheries Management Plan (IFMP), available upon request to the Regional Crab Manager, Tel: 250-627-3477. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for crab and octopus.

Definitions

"Approved Service Provider" means Ecotrust Canada, (250-624-4191). This service provider has been approved to provide Biological Sampling, Electronic Monitoring, Harvest Logbook, Hail, and Summary Reporting Services to Crab Area "A" licensed commercial harvesters.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Briarosaccus callosus" is a parasite identified by a reddish-brown, 1 to 2 cm diameter capsule(s), which is the egg sac of the parasite, located under the abdomen (i.e. where the crab eggs would normally be carried).

"Department (DFO)" means the Department of Fisheries and Oceans.

"Electronic Monitoring (EM) system" means an electronic-based monitoring system which may be used as an alternative to at-sea observers. An approved Crab Area "A" electronic monitoring system must include a camera(s) and accurately monitor vessel activity (location, date, time, and speed), trap hauling activity, and individual

Document Released Under the Access to Information Act / Document divulgué en vertu

traps hauled on board, in accordance with standards set out in Appendix 9 of the Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3477. "harvest log" means the record of fishing activities required to be kept under these conditions of licence.

"landing" means the transfer of fish from the licensed vessel in water to land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"soft-shell crab" means a crab whose shell is not fully hardened and yields to finger pressure. A crab with a durometer measurement of 70 units or less is defined as a soft-shell crab. Crabs shall be measured for soft-shell in front of the suture line on the underside of the carapace between the insertion of the leg bearing the claw and the widest point of the shell.

"soft-shell management area" means those areas defined and enumerated in the current Crab by Trap Integrated Fisheries Management Plan.

"trap" includes ring nets.

"vessel master" means the person present on the vessel and identified as master in the hail out (see s.13(3)(a)) who has overall and ongoing responsibility for the operation of the vessel and fishing activities.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Subject to the conditions of this licence:

(1) The following species of fish may be taken: (a) Dungeness Crab (Cancer magister); (b) Red Rock Crab (Cancer productus); (c) Red King Crab (Paralithodes camtschatica); (d) Golden King Crab (Lithodes aequispinus); and (e) Octopus (Enteroctopus spp.).

(2)(a) No person shall catch and retain or possess any female crab unless the crab is infected by the parasite Briarosaccus callosus and is being brought ashore to avoid the further spread of that parasite.

(b) Dungeness Crab found with this parasite shall be frozen and shipped to Gary Meyer at the Pacific Biological Station. Call 1-250-756-7034 for instructions.

(3) No person shall catch and retain or possess any soft-shell crab.

(4) No person shall catch and retain octopus caught in octopus closure areas. All octopus shall be immediately released in a manner that will cause the least harm.

2. Size of fish permitted to be taken:

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi sur l'accès à l'information.

(1) No person shall catch and retain: (a) a Dungeness Crab that is less than 165 mm in width; or (b) a Red Rock Crab that is less than 115 mm in width.

(2) Each fisher shall ensure that their measuring gauge is accurate.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fish harvesters:

(1) Individuals fishing under authority of this licence shall be designated by the licence holder and shall carry proof of designation and shall provide proof of designation on request by any Fishery Officer or fishery guardian.

(2) Designations are personal and non-transferable.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Waters in which fishing is permitted:

(1) Subject to subsection 6(2), fishing is permitted in Areas 1, 2, 101 to 110, 130, and 142.

(2) Fishing for crab is permitted in an area and with a gear type authorized in Part 1 during those times when persons fishing under authority of a Category R licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for crab, with that gear, in that area and during that time.

7. The type, size and quantity of fishing gear permitted to be used:

(1) Trap gear, which includes ring net gear, is permitted to be used. Traps shall include the following:

(a) Biodegradable Escapement Mechanisms: Each trap shall be equipped with a biodegradable escape mechanism in the form of either a rot cord, rot panel or rot panel alternative as described below. These mechanisms are designed to minimize the effects of ghost fishing by traps. This requirement does not apply to ring nets.

(b) Rot cord: Rot cords may only be used on traps with a rigid frame, a freely opening hinged lid, and a volume less than 400 litres. (400 litres is approximately equal to a circular trap 117 cm in diameter and 36 cm in height.) The trap lid shall be secured by a loop of no greater than No. 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord shall be attached to the rubber strap by a cow hitch and attached to the hook by a cow hitch (see the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3477, for an illustration of how to attach the rot cord.) If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap. The rubber strap shall be under tension. No other fastenings may impede the hinged lid of the trap from opening. The opening created by the hinged lid shall exceed the rot panel requirement for the area or exceed the size of the largest trap entrance.

(c) Rot Panel: All 400-litre traps or traps without hinged lids secured by a rot cord shall have a rot panel. The rot panel consists of a section in a trap side wall that has been laced, sewn or otherwise secured by a single strand of no greater than No. 120 untreated cotton twine such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted opening in the wall or panel. The opening shall exceed a square 11 cm by 11 cm.

(d) Rot Panel Alternative: Traps requiring a rot panel may use the following alternative for soft web traps only. A trap side wall shall contain a cut in the web greater than 20 cm in length. The cut shall be made in a "V" pattern with each leg of the "V" greater than 11 cm in length. A single strand of no greater than No. 120 untreated cotton twine shall be used to lace the cut in the web such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted triangular opening no less than 11 cm on each side.

(e) Escape Hole: all traps shall be fitted with at least two escape holes which are located not more than 100 mm below the top of the frame. Both escape holes shall not be less than 105 mm in diameter.

(2) Subject to subsection 7(3), the maximum number of traps permitted to be fished is set out in the licence.

(3) The maximum number of traps permitted to be fished in McIntyre Bay between 00:01 h April 1, 2018 and November 1, 2018 and 00:01 h January 1, 2019 and March 31, 2019 is one-half the total trap allocation indicated on the vessel licence. McIntyre Bay is defined as those portions of Subareas 1-5 and 101-4 to 101-10 that lie east of the meridian passing through 132ø04' west longitude, and west of the meridian passing through 131ø30' west longitude, except for that portion of Subarea 101-10 that lies southeasterly of a line that begins at 54ø09'N and 131ø40'W [Rose Spit] then to 54ø12'N and 131ø38'W then to 54ø14.9'N and 131ø30.7'W.

(4) The maximum size of traps that may be used to fish for Dungeness Crab is 400 litres.

8. Manner in which gear is permitted to be used:

(1) No person shall set a trap or submerge a holding cage and leave the trap or holding cage in the water for more than 18 consecutive days without lifting the trap or holding cage from the water and removing all of the crab from it.

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi sur l'accès à l'information.

(2) All crab traps, holding cages, lines and buoys used by this vessel shall be transported by the licensed vessel to and from land.

(3) Ring Net gear only may be fished in Subarea 1-4 (Naden Harbour).

(4) All radio frequency identification (RFID) chips shall be scanned by the on-board tag reader immediately upon removal from the water.

9. Buoys, lines, trap lines and groundlines:

(1) Buoys shall be greater than 12 cm in diameter and have a volume greater than 2.5 litres. This is approximately equivalent to a cylinder 12 cm in diameter and 22 cm in length or a sphere 17 cm in diameter.

(2) A unique buoy colour combination shall be registered with the Department at the time of licence renewal. A colour photograph is required. Only the colour combination registered with the Department in conjunction with this licence is permitted to be used under this licence.

(3) All buoy lines shall be non-floating so that the lines remain below the surface of the water in order to minimize navigational hazards.

(4) A single buoy and buoy line shall be attached to each trap. Traps shall not be connected to each other with lines.

10. Marking of traps and buoys with tags:

(1) Subject to subsection 10(2), all crab traps fished under the authority of this licence shall be marked with a tag that meets the requirements of the Department.

(2) If the licensed vessel is using an EM system:

(a) all buoys attached to crab traps fished shall be marked with a radio frequency identification (RFID) chip.

(3) If the vessel is not using an EM System:

(a) only traps marked with crab trap tags that have been reported and registered to be fished are permitted to be on board the licensed vessel during the period when crab fishing is open;

(b) only those crab trap tags that have been reported and registered to be fished may be attached to traps, with the exception of trap tags noted below; and (c) if a new set of crab trap tags is issued, they should be affixed to the trap as soon as possible and shall be affixed to the trap within 18 days of issuance. Old crab trap tags shall be removed and destroyed.

(4) All crab traps fished shall be marked with the vessel registration number of the licensed vessel. To mark a trap with the vessel registration number either:

(a) engrave the number on the escape hole strut or on the tunnel; or (b) attach a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

brightly coloured plastic tag with the vessel registration number on it to the trap.

11. Radio Frequency Identification (RFID) Chips:

(1) All crab buoys fished shall be marked with a Radio Frequency Identification (RFID) chip registered in the vessel's RFID chip inventory for this licence period (see 11(6)(b)), which shall consist of a set of Main RFID chips equal to their trap limit, plus a secondary set of spare chips equal to 10 percent of their trap limit to allow for replacements.

(2) Only those RFID chips that have been reported and registered to be fished shall be placed on buoys.

(3) The vessel master shall scan every RFID chip as the buoy is hauled on board. If an RFID chip fails to be read, that buoy shall be removed immediately from the water until the chip is either repaired or replaced.

(4) If buoys lost by this vessel have been replaced and these same buoys are later found, the vessel master is responsible for removing the lost buoys with the RFID chips from the water.

(5) When a buoy is taken out of the water and replaced, the vessel master is responsible for switching the RFID chips so that all buoys in the water are fitted with RFID chips in that vessel's inventory for the current year.

(6) For the licensed vessel using an EM system, the vessel master shall arrange the following with the approved service provider:

(a) RFID chip procurement, distribution, administration, and data entry services; and

(b) Update the vessel's entire RFID chip inventory at the beginning of the fishing season, including a number of "Main" chips equal to or less than the trap limit and a number of "Spare" chips equal to or less than 10 percent of the trap limit. These RFID chip numbers shall be entered into a database and submitted to the Department within the first 30 days of fishing for the this licence period. When the vessel master scans RFID chips not previously registered in the vessel's inventory for the current fishing season, the vessel's inventory shall be updated and submitted to the Department within 30 days of scanning the new RFID chips. If the vessel master scans a number of RFID chips greater than the 10 percent allowance for "spare" chips, these RFID chips shall be classified in the vessel's inventory as "over-limit" chips.

12. Records - Harvest Log and Fishing Location Information: (see explanatory note after section 19)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department in accordance with the timing set out in subsection 12(7). The content and format of the log (paper and electronic) shall meet the requirements as defined by Fisheries

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

and Oceans Canada Marine Ecosystem and Aquaculture Division's Shellfish Data Unit.

(2) The harvest and fishing location information recorded in the harvest log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the harvest log not later than midnight of that day.

(4) The vessel master shall enter latitude/longitude co-ordinates in the location field of the harvest log for a representative point for each Subarea where the soak time and depth range fished are the same. Latitude/longitude coordinate pairs shall be recorded using degree decimal-minute format (xxøyy.zzz'), with information provided to the third decimal point.

(5) The vessel master shall enter their Fishing Identification Number, (Vessel Master FIN) from their Fisher Registration Card (FRC), printed name, and signature on every line of each harvest log entry.

(6) The harvest log shall be kept on board the licensed vessel.

(7) The harvest log shall be produced for examination on demand of a fishery officer or an observer.

(8) The licence holder shall ensure the completed log pages (original copy) and electronic copy of the log are forwarded not later than 28 days following the end of each month in which fishing occurred to:

Fisheries and Oceans Canada Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo BC V9T 6N7 Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that fishing does not occur under authority of this licence, the licence holder shall submit a nil report. The nil report shall include one page from the harvest logbook identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log; the licence holder shall sign the nil report.

13. Fishing Activity Location Reports (Hails):

(1) The vessel master shall arrange with the approved service provider to have fishing activity location reports (Hails) entered into the DFO Hail Database.

(2) The vessel master shall provide the following information:

(a) vessel name and registration number, vessel master's name and fisher identification number; (b) the date and time the report was made; (c) the caller's name and fisher identification number; (d) the hail operator's name; (e) the date for which the fishing activity location report is effective; (f) Areas and Subareas to be fished; (g) time and date fishing will begin and end or any change in fishing location; and (h) the fishing activity location report verification number.

Document Released Under the Access to Information Act / Document divulgué en vertu

(3) The vessel master shall arrange to have this fishing location activity information available to DFO not more than 24 hours after completion for:

(a) prior to leaving port when intending to fish for crab; (b) prior to moving to a new location; and (c) once fishing activities have been completed for each fishing trip and not less than 2 hours prior to landing.

14. Biological Sampling:

(1) The vessel master shall arrange with the approved service provider for a designated Observer to collect and provide data according to the Biological Sampling standards in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3477.

(2) The vessel master shall permit the biological sampling service provider access to catch for the purpose of data collection.

15. Fishery Monitoring:

Each licensed vessel shall have either an Electronic Monitoring (EM) System or an at-sea observer designated by the Regional Director-General to monitor fishing activity.

(1) Where an EM system is in use on a vessel:

(a) The vessel master shall ensure that the Electronic Monitoring system meets the equipment and data collection requirements set out in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3477. The vessel master shall ensure that the Electronic Monitoring system: (i) accurately monitors the vessel 24 hours per day, seven days per week while it is engaged in fishing, where fishing is defined as the entire period of time that traps are in the water; (ii) accurately monitors vessel activity and includes the use of a camera (location, date, time, and speed); (iii) accurately identifies trap-hauling activity; (iv) accurately identifies individual traps using Radio Frequency Identification (RFID)chips; (v) accurately records and stores data; (vi) provides a feedback mechanism so vessel masters can ensure the system is operational; (vii) includes an independent and reliable power supply; and (viii) is tamper-proof.

(b) The vessel master shall ensure, by checking components on a daily basis, that all components of the Electronic Monitoring System are fully operational and in use while the vessel has traps in the water fishing on the fishing grounds.

(c) The vessel master shall immediately cease both deploying and retrieving traps should any or all of the EM system equipment become inoperative or malfunction in any way. The vessel master shall not resume deploying and retrieving traps while the EM system is inoperative or malfunctioning in any way.

(d) The licence holder shall arrange with the approved service provider for the data produced from this EM system to be collected, analyzed, and reported to the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

Department, in the format and time frame set out in Appendix 9 of the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3477.

(2) Where a designated at-sea observer is in use on a vessel as an alternative to an operational EM system:

(a) the vessel master shall arrange with the approved service provider to have an at-sea observer designated by the Regional Director-General to collect information at sea present during all active fishing operations in accordance with At-Sea Observer specifications described in Appendix 9 of the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3477.

16. Marking of holding cages:

(1) All crab enclosed in a holding cage shall be from one licensed vessel only.

(2) All holding cages shall be marked with a buoy of the specification set out in ss.9(1) and 9(2) that displays the vessel registration number of the vessel which harvested the impounded crab, attached with a non-floating line.

17. Landing of catch:

All crab taken by the licensed vessel shall be transported by that vessel either directly to land or to a holding cage. Only the licensed vessel may transport the crab from the holding cage to land.

18. Reporting catch on fish slips:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish are used for bait, personal consumption or disposed of otherwise.

(3) The vessel master shall submit slips not later than seven days after landing. Slips shall be mailed to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at(604)666-2716.

19. Avoidance of entanglement in fishing gear:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that:

(a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure:

(a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

Explanatory Note - Harvest Log and Fishing Location Information: The paper copy of the harvest log shall have the same format and content as the example shown in the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3477. Logbooks meeting these requirements are available from service providers who, for a fee, will provide the logbook, coding and keypunch services.

Fish harvesters who do not use the logbook, coding and keypunch services provided by a service provider shall contact the Shellfish Data Unit at (250) 756-7306 or (250) 756-7022 in order to obtain the information necessary to fulfil these requirements.

COMMUNAL PART 2 [February 19, 2018]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal

Document Released Under the Access to Information Act / Document divulgué en vertu

organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per

Document Released Under the Access to Information Act / Document divulgué en vertu

groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.

gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi sur l'accès à l'information.

the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi sur l'accès à l'information.

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor

Document Released Under the Access to Information Act / Document divulgué en vertu

data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2019.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2018. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2018.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2018. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2018.

Document Released Under the Access to Information Act / Document divulgué en vertu

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a facility or place operating under authority a Fish Receiver Licence or a Seafood Processor Licence issued under the Fish and Seafood Licensing Regulations (Province of British Columbia), except: (a) fish sold directly to the public under authority of a Fisher Vendor Licence issued under the Fish and Seafood Licensing Regulations (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by

Document Released Under the Access to Information Act / Document divulgué en vertu

individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The vessel master shall report all marine mammal interactions during fishing trips in the Integrated Groundfish Fishing Log. For the purpose of defining lethal and non-lethal marine mammal interactions, interactions include bycatch, collision, and all sightings of marine mammals entangled in fishing gear. (c) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (d) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (e) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (f) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(g) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(h) Where a paper Integrated Groundfish Fishing Log is used, the licence holder

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years. (i) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing. (j) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi sur l'accès à l'information.

longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi sur l'accès à l'information.

Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

PART 3 [February 14, 2018]

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a

Document Released Under the Access to Information Act / Document divulgué en vertu

fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; and (l) number of pieces landed for each species by grade and method of dressing of fish.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2018 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Transfer activity shall be entered into the Transfer Log not later than midnight (2400 h) of the day on which it occurs.

(6) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

Document Released Under the Access to Information Act / Document divulgué en vertu

(7) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(8) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude in degrees-minutes- seconds or degrees-decimal minutes; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(9) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(10) The transfer log shall contain data pertaining to a single vessel only.

(11) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(12) All information entered in the transfer log shall be complete and accurate.

(13) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(14) Erasure of an entry in the transfer log is not permitted.

(15) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager.

(16) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

Document Released Under the Access to Information Act / Document divulgué en vertu

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which

Document Released Under the Access to Information Act / Document divulgué en vertu

are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney Morseby Camp (Haida Gwaii)

(B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

Document Released Under the Access to Information Act / Document divulgué en vertu

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

Document Released Under the Access to Information Act / Document divulgué en vertu

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

Document Released Under the Access to Information Act / Document divulgué en vertu

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

COMMUNAL PART 2 [February 19, 2018]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly

Document Released Under the Access to Information Act / Document divulgué en vertu

authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51

Document Released Under the Access to Information Act / Document divulgué en vertu

degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0

Document Released Under the Access to Information Act / Document divulgué en vertu

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area

Document Released Under the Access to Information Act / Document divulgué en vertu

Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

Document Released Under the Access to Information Act / Document divulgué en vertu

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

Document Released Under the Access to Information Act / Document divulgué en vertu

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Document Released Under the Access to Information Act / Document divulgué en vertu

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

Document Released Under the Access to Information Act / Document divulgué en vertu

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event,

Document Released Under the Access to Information Act / Document divulgué en vertu

including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the

Document Released Under the Access to Information Act / Document divulgué en vertu

designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2019.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2018. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2018.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2018. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2018.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a facility or place operating under authority a Fish

Document Released Under the Access to Information Act / Document divulgué en vertu

Receiver Licence or a Seafood Processor Licence issued under the Fish and Seafood Licensing Regulations (Province of British Columbia), except: (a) fish sold directly to the public under authority of a Fisher Vendor Licence issued under the Fish and Seafood Licensing Regulations (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

Document Released Under the Access to Information Act / Document divulgué en vertu

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Document Released Under the Access to Information Act / Document divulgué en vertu

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The vessel master shall report all marine mammal interactions during fishing trips in the Integrated Groundfish Fishing Log. For the purpose of defining lethal and non-lethal marine mammal interactions, interactions include bycatch, collision, and all sightings

Document Released Under the Access to Information Act / Document divulgué en vertu

of marine mammals entangled in fishing gear. (c) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (d) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (e) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (f) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(g) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(h) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years. (i) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing. (j) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the

Document Released Under the Access to Information Act / Document divulgué en vertu

streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the

Document Released Under the Access to Information Act / Document divulgué en vertu

unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial

Document Released Under the Access to Information Act / Document divulgué en vertu

groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences

Document Released Under the Access to Information Act / Document divulgué en vertu

issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

PART 3 [February 14, 2018]

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

Document Released Under the Access to Information Act / Document divulgué en vertu

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

Document Released Under the Access to Information Act / Document divulgué en vertu

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; and (l) number of pieces landed for each species by grade and method of dressing of fish.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

Document Released Under the Access to Information Act / Document divulgué en vertu

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2018 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Transfer activity shall be entered into the Transfer Log not later than midnight (2400 h) of the day on which it occurs.

(6) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(7) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(8) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude in degrees-minutes- seconds or degrees-decimal minutes; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(9) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(10) The transfer log shall contain data pertaining to a single vessel only.

(11) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(12) All information entered in the transfer log shall be complete and accurate.

Document Released Under the Access to Information Act / Document divulgué en vertu

(13) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(14) Erasure of an entry in the transfer log is not permitted.

(15) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager.

(16) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing;

Document Released Under the Access to Information Act / Document divulgué en vertu

(e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney Morseby Camp (Haida

Document Released Under the Access to Information Act / Document divulgué en vertu

Gwaii)

(B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

Document Released Under the Access to Information Act / Document divulgué en vertu

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

Document Released Under the Access to Information Act / Document divulgué en vertu

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

1

CRAB Licence 2018

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FR 30 2018

CRAB Licence 2018 Date Issued: 28 Mar 2018

Licensed for: Commercial Fishing Expiry Date: 31 Mar 2019

Licence Holder:

FIN: 124113

NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:

VRN 29305
DOT C06370BC
Vessel SEMI-R
Vessel OAL 10.90 Meters
Gross Tonnage 22.64 Cubic Meters
Net Tonnage 16.98 Cubic Meters

Reported Vessel Owner: s.19(1)

FIN: [redacted]
LUONG TRONG CAO
[redacted]

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Quota: 316 Traps

Licence Area: CRAB AREA B

Waters in which fishing is permitted: Areas 3 to 10

Species: CRAB

Gear: TRAP

SPECIES: DUNGENESS, RED ROCK, GOLDEN KING & RED KING

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 28 Mar 2018

Licence Serial No.: 454591

Printed from the PacFish Search System by User "GEBREHIWOTAK" on October 26, 2018, 2:52 PM

Version Date: 27-Mar-2018

CONDITIONS OF COMMUNAL CRAB AREA B LICENCE Licence Period: April 1, 2018 to March 31, 2019

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

Information on management of the crab fishery is contained in the current Crab by Trap Integrated Fisheries Management Plan (IFMP), available upon request to the Regional Crab Manager, Tel: 250-627-3477. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for crab and octopus.

Definitions

"Approved Service Provider" means Pacific Coast Fisheries Services, (250-931-7686). This service provider has been approved to provide Biological Sampling, Electronic Monitoring, Harvest Logbook, Plastic Trap Tag, and Summary Reporting Services to Crab Area B licensed commercial harvesters.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Briarosaccus callosus" is a parasite identified by a reddish-brown, 1 to 2 cm diameter capsule(s), which is the egg sac of the parasite, located under the abdomen (i.e. where the crab eggs would normally be carried).

"Department (DFO)" means the Department of Fisheries and Oceans.

"Electronic Monitoring (EM) system" means an electronic-based monitoring system which may be used as an alternative to at-sea observers. An approved electronic monitoring system must accurately monitor vessel activity (location, date, time, and speed), trap hauling activity, and individual traps hauled on board, in accordance

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

with the standards set out in Appendix 9 of the Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3477.

"harvest log" means the record of fishing activities required to be kept under these conditions of licence.

"landing" means the transfer of fish from the licensed vessel in water to land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"soft-shell crab" means a crab whose shell is not fully hardened and yields to finger pressure. A crab with a durometer measurement of 70 units or less is defined as a soft-shell crab. Crabs shall be measured for soft-shell in front of the suture line on the underside of the carapace between the insertion of the leg bearing the claw and the widest point of the shell.

"trap" includes ring nets.

"vessel master" means the person present on the vessel who has overall and ongoing responsibility for the operation of the vessel and fishing activities.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Subject to the conditions of this licence:

(1) The following species of fish may be taken: (a) Dungeness Crab (Cancer magister); (b) Red Rock Crab (Cancer productus); (c) Red King Crab (Paralithodes camtschatica); (d) Golden King Crab (Lithodes aequispinus); and (e) Octopus (Enteroctopus spp.).

(2)(a) No person shall catch and retain or possess any female crab unless the crab is infected by the parasite Briarosaccus callosus and is being brought ashore to avoid the further spread of that parasite.

(b) Dungeness Crab found with this parasite shall be frozen and shipped to Gary Meyer at the Pacific Biological Station. Call 1-250-756-7034 for instructions.

(3) No person shall catch and retain or possess any soft-shell crab.

(4) No person shall catch and retain octopus caught in octopus closure areas. All such octopus shall be immediately released in a manner that will cause the least harm.

2. Size of fish permitted to be taken:

(1) No person shall catch and retain: (a) a Dungeness Crab that is less than 165 mm in width; or (b) a Red Rock Crab that is less than 115 mm in width.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(2) Each fisher shall ensure that their measuring gauge is accurate.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fish harvesters:

(1) Individuals fishing under authority of this licence shall be designated by the licence holder and shall carry proof of designation and shall provide proof of designation on request by any Fishery Officer or fishery guardian.

(2) Designations are personal and non-transferable.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Waters in which fishing is permitted:

(1) Subject to subsection 6(2), fishing is permitted in Areas 3 to 10.

(2) Fishing for crab is permitted by a gear type authorized in Part 1 during those times when persons fishing under authority of a Category R licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for crab, with that gear, in that area and during that time.

7. The type, size and quantity of fishing gear permitted to be used:

(1) Trap gear, which includes ring net gear, is permitted to be used. Traps shall include the following:

(a) Biodegradable Escapement Mechanisms: Each trap shall be equipped with a biodegradable escape mechanism in the form of either a rot cord, rot panel or rot panel alternative as described below. These mechanisms are designed to minimize the effects of ghost fishing by traps. This requirement does not apply to ring nets.

(b) Rot cord: Rot cords may only be used on traps with a rigid frame, a freely opening hinged lid, and a volume less than 400 litres. (400 litres is approximately equal to a circular trap 117 cm in diameter and 36 cm in height.) The trap lid shall be secured by a loop of no greater than No. 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord shall be attached to the rubber strap by a cow hitch and attached to the hook by a cow hitch (see the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3477, for an illustration of how to attach the rot cord.) If the hook is attached permanently to the trap, the trap lid

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

shall close using a single loop of the rot cord from the rubber strap. The rubber strap shall be under tension. No other fastenings may impede the hinged lid of the trap from opening. The opening created by the hinged lid shall exceed the rot panel requirement for the area or exceed the size of the largest trap entrance.

(c) Rot Panel: All 400-litre traps without hinged lids secured by a rot cord shall have a rot panel. The rot panel consists of a section in a trap side wall that has been laced, sewn or otherwise secured by a single strand of no greater than No. 120 untreated cotton twine such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted opening in the wall or panel. The opening shall exceed a square 11 cm by 11 cm.

(d) Rot Panel Alternative: Traps requiring a rot panel may use the following alternative for soft web traps only. A trap side wall shall contain a cut in the web greater than 20 cm in length. The cut shall be made in a "V" pattern with each leg of the "V" greater than 11 cm in length. A single strand of no greater than No. 120 untreated cotton twine shall be used to lace the cut in the web such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted triangular opening no less than 11 cm on each side.

(e) Escape Hole: all traps shall be fitted with at least two escape holes which are located not more than 100 mm below the top of the frame. Both escape holes shall not be less than 105 mm in diameter. (2) Subject to subsection 7(3), the maximum number of traps permitted to be fished from 0800 hours April 1, 2018 to 2359 hours November 30, 2018 and from 0800 hours March 1, 2019 to 2359 hours March 31, 2019 is 316.

(3) The maximum number of traps permitted to be fished in the Nass Estuary from 1200 hours October 1, 2018 to 2359 hours November 15, 2018 is 158, (one half the total trap allocation indicated in section 7(2)). The Nass Estuary is described as those portions of Subareas 3-12, 3-18 and the Nass River estuary inside a line that begins at 54ø58.995'N and 130ø06.270'W [Ramsden Point Light] then to a point on shore at 54ø56.5'N and 130ø04.2'W, located three nautical miles southwest of Arrandale on Mylor Peninsula, then following the shoreline to 54ø58.933'N and 129ø50.385'W [Leading Point] then to 54ø59.620'N and 129ø53.467'W [east of Mill Bay] then following the shoreline to 55ø00.626'N and 130ø00.329'W [Nass Point] then due west to 55ø00.626'N and 130ø03.350'W, (on the opposite mainland shore) then following the shoreline to the beginning point.

(4) The maximum size of traps used to fish for Dungeness Crab is 400 litres.

8. Manner in which gear is permitted to be used:

(1) No person shall set a trap and leave the trap in the water for more than 18 consecutive days without lifting the trap from the water and removing all of the crab from it.

(2) All crab traps, lines and buoys used by this vessel shall be transported by the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

licensed vessel to and from land.

(3) All bait shall be contained within hard plastic bait containers having a screw top lid. Bait containers may have holes no larger than 8 mm in width.

(4) Bait containers that do not meet the requirements described in 8(3) above are not permitted in any traps fished.

9. Buoys, lines, trap lines and groundlines:

(1) Buoys shall be greater than 12 cm in diameter and have a volume greater than 2.5 litres. This is approximately equivalent to a cylinder 12 cm in diameter and 22 cm in length or a sphere 17 cm in diameter.

(2) All buoy lines, trap lines and groundlines shall be non-floating so that the lines remain below the surface of the water in order to minimize navigational hazards.

10. Marking of traps with plastic tags:

(1) All crab traps fished under the authority of this licence shall have approved plastic tags attached to each trap. All tags shall indicate the licence year and have an identification number unique to each individual vessel. Each trap tag shall be attached to the trap so that it is visible without opening the trap.

(2) Only those plastic crab trap tags that have been reported and registered for that fishing year shall be attached to traps.

(3) Each vessel will be issued a total number of tags equal to their trap limit plus 10 percent to allow for replacements.

(4) If the vessel master requires more replacement tags than the 10 percent allotted, a complete new set of replacement tags shall be issued. New replacement tags shall be marked with the letters "RP" and be a different colour than the original set issued. New replacement tags shall also indicate the licence year and be unique to each individual vessel.

Note: To receive replacement plastic tags, the harvester must contact their area crab manager. The area crab manager will contact the service provider regarding issuing a complete new set of replacement tags.

(5) If the harvester is issued replacement plastic tags pursuant to s.10(4), all other plastic tags must be removed and returned to DFO not later than the 21st of the month following the issue date. Tags that have been replaced are invalid after that date.

(6) The vessel master shall arrange with the approved service provider to have crab trap tag numbers for tags that meet the requirements of the Department, entered into a database and submitted to the Department within 24 hours of being issued.

11. In addition to crab trap tags required under section 10, if the licensed vessel is

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

using an EM system:

(1) All crab traps fished shall be marked with a Radio Frequency Identification (RFID) chip registered in the vessel's RFID chip inventory for this licence period (see 11(7)(b)), which shall consist of a set of Main RFID chips equal to their trap limit, plus a secondary set of spare chips equal to 10 percent of their trap limit to allow for replacements. (2) Notwithstanding subsection 11(1), where single traps are marked by individual buoys, the RFID chip may be attached to the buoy rather than to the trap.

(3) RFID chips shall be placed on traps or buoys, as required, in such a manner that they can be scanned by an on-board chip scanner. Only those RFID chips that have been reported and registered to be fished shall be placed on traps or buoys as required.

(4) The vessel master shall scan every RFID chip as the trap is hauled on board. If an RFID chip fails to be read, that trap shall be removed immediately from the water until the chip is either repaired or replaced.

(5) If traps lost by this vessel have been replaced and these same traps are later found, the vessel master is responsible for removing the found traps with the RFID chips from the water.

(6) When a trap is taken out of the water and replaced, the vessel master is responsible for switching the RFID chips so that all traps in the water are fitted with RFID chips in that vessel's inventory for the current year.

(7) For the licensed vessel using an EM system, the vessel master shall arrange the following with the approved service provider:

(a) RFID chip procurement, distribution, administration, and data entry services; and

(b) update the vessel's entire RFID chip inventory at the beginning of the fishing season, including a number of "Main" chips equal to or less than the trap limit and a number of "Spare" chips equal to or less than 10 percent of the trap limit. These RFID chip numbers shall be entered into a database and submitted to the Department within the first 30 days of fishing in this licence period. When the vessel master scans RFID chips not previously registered in the vessel's inventory for the current fishing season, the vessel's inventory shall be updated and submitted to the Department within 30 days of scanning the new RFID chips. If the vessel master scans a number of RFID chips greater than the 10 percent allowance for "spare" chips, these RFID chips shall be classified in the vessel's inventory as "over-limit" chips.

12. Records - Harvest Log and Fishing Location Information: (see explanatory note after section 18)

(1) The vessel master shall maintain a log of all harvest operations and provide this

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

information in both hard (paper) copy and electronic copy to the Department in accordance with the timing set out in subsection 12(7). The content and format of the log (paper and electronic) shall meet the requirements as defined by Fisheries and Oceans Canada Marine Ecosystem and Aquaculture Division's Shellfish Data Unit.

(2) The harvest and fishing location information recorded in the harvest log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the harvest log not later than midnight of that day.

(4) The vessel master shall enter latitude/longitude co-ordinates in the location field of the harvest log for a representative point for each Subarea where the soak time and depth range fished are the same. Latitude/longitude coordinate pairs shall be recorded using degree decimal-minute format (xxøyy.zzz'), with information provided to the third decimal point.

(5) The vessel master shall enter their Fishing Identification Number, (Vessel Master FIN) from their Fisher Registration Card (FRC), printed name, and signature on every line of each harvest log entry.

(6) The harvest log shall be kept on board the licensed vessel.

(7) The harvest log shall be produced for examination on demand of a fishery officer or an observer.

(8) The licence holder shall ensure the completed log pages (original copy) and electronic copy of the log are forwarded not later than 28 days following the end of each month in which fishing occurred to:

Fisheries and Oceans Canada Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo BC V9T 6N7 Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that fishing does not occur under authority of this licence, the licence holder shall submit a nil report. The nil report shall include one page from the harvest logbook identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log; the licence holder shall sign the nil report.

13. Biological Sampling:

(1) The vessel master shall arrange with the approved service provider for a designated Observer to collect and provide data according to the Biological Sampling standards in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3477.

(2) The vessel master shall permit the biological sampling service provider access to catch for the purpose of data collection.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

14. Fishery Monitoring:

Each licensed vessel shall have either an Electronic Monitoring (EM) System or an at-sea observer designated by the Regional Director-General to monitor fishing activity.

(1) Where an EM system is in use on a vessel:

(a) The vessel master shall ensure that the Electronic Monitoring system meets the equipment and data collection requirements set out in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3477. The vessel master shall ensure that the Electronic Monitoring system: (i) accurately monitors the vessel 24 hours per day, seven days per week while it is engaged in fishing, where fishing is defined as the entire period of time that traps are in the water; (ii) accurately monitors vessel activity (location, date, time, and speed); (iii) accurately identifies trap-hauling activity; (iv) accurately identifies individual traps using Radio Frequency Identification (RFID)chips; (v) accurately records and store data; (vi) automatically transmits the collected data to the approved service provider on a daily basis where possible, with a maximum of 14 days between successful transmissions; (vii) provides a feedback mechanism so vessel masters can ensure the system is operational; (viii) includes an independent and reliable power supply; and (ix) is tamper-proof.

(b) The vessel master shall ensure, by checking components on a daily basis, that all components of the Electronic Monitoring System are fully operational and in use while the vessel has traps in the water fishing on the fishing grounds.

(c) The vessel master shall immediately cease both deploying and retrieving traps should any or all of the EM system equipment become inoperative or malfunction in any way. The vessel master shall not resume deploying and retrieving traps while the EM system is inoperative or malfunctioning in any way.

(d) The licence holder shall arrange with the approved service provider for the data produced from this EM system to be collected, analyzed, and reported to the Department, in the format and time frame set out in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3477.

(2) Where a designated at-sea observer is in use on a vessel as an alternative to an operational EM system:

(a) the vessel master shall arrange with the approved service provider to have an at-sea observer designated by the Regional Director-General to collect information at sea present during all active fishing operations in accordance with At-Sea Observer specifications described in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3477.

15. Marking of holding cages:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) All crab enclosed in a holding cage shall be from one licensed vessel only.

(2) All holding cages shall be marked with a buoy of the specification set out in s.9(1) that displays the vessel registration number of the vessel which harvested the impounded crab, attached with a non-floating line.

16. Landing of catch:

All crab taken by the licensed vessel shall be transported by that vessel either directly to land or to a holding cage. Only the licensed vessel may transport the crab from the holding cage to land.

17. Reporting catch on fish slips:

(1) An accurate written report shall be furnished on a fish slip of all fish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish are used for bait, personal consumption or disposed of otherwise.

(3) The vessel master shall submit slips not later than seven days after landing. Slips shall be mailed to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

18. Avoidance of entanglement in fishing gear:

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that:

(a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure:

(a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

released in a manner that causes them the least harm.

Explanatory Note - Harvest Log and Fishing Location Information: The paper copy of the harvest log shall have the same format and content as the example shown in the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3477. Logbooks meeting these requirements are available from service providers who, for a fee, will provide the logbook, coding and keypunch services.

Fish harvesters who do not use the logbook, coding and keypunch services provided by a service company shall contact the Shellfish Data Unit at (250) 756-7306 or (250) 756-7022 in order to obtain the information necessary to fulfil these requirements.

COMMUNAL PART 2 [February 19, 2018]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2019.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2018. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2018.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2018. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2018.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a facility or place operating under authority a Fish Receiver Licence or a Seafood Processor Licence issued under the Fish and Seafood Licensing Regulations (Province of British Columbia), except: (a) fish sold directly to the public under authority of a Fisher Vendor Licence issued under the Fish and Seafood Licensing Regulations (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The vessel master shall report all marine mammal interactions during fishing trips in the Integrated Groundfish Fishing Log. For the purpose of defining lethal and non-lethal marine mammal interactions, interactions include bycatch, collision, and all sightings of marine mammals entangled in fishing gear. (c) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (d) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (e) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (f) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(g) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(h) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years. (i) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing. (j) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

PART 3 [February 14, 2018]

Application

These conditions apply to the transportation of fish other than fish caught by the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

reported separately in pounds; and (l) number of pieces landed for each species by grade and method of dressing of fish.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2018 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Transfer activity shall be entered into the Transfer Log not later than midnight (2400 h) of the day on which it occurs.

(6) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(7) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(8) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude in degrees-minutes- seconds or degrees-decimal minutes; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(9) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(10) The transfer log shall contain data pertaining to a single vessel only.

(11) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(12) All information entered in the transfer log shall be complete and accurate.

(13) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(14) Erasure of an entry in the transfer log is not permitted.

(15) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager.

(16) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

Document Released Under the Access to Information Act / Document divulgué en vertu de la
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney Morseby Camp (Haida Gwaii)

(B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la

master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

GEODUCK AND HORSE CLAM Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FG 7 2017

GEODUCK AND HORSE CLAM Licence 2017 Date Issued: 17 Jan 2018

Licensed for: Commercial Fishing Expiry Date: 28 Feb 2018

Licence Holder:
FIN: 100409
SECRETARIAT OF THE HAIDA NATION
504 NAANII ROAD
PO BOX 589
MASSET BC
V0T 1M0

Designated Vessel:
VRN 24407
DOT 171776
Vessel VENTURE H
Vessel OAL 12.05 Meters
Gross Tonnage 39.62 Cubic Meters
Net Tonnage 28.30 Cubic Meters

Reported Vessel Owner:
FIN: [redacted] s.19(1)
JULIAN BRONSON RORICK
[redacted]

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: GEODUCK AND HORSE CLAM

Gear: DIVE

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

TRANSPORTING FISH PERMITTED. SEE PART 2 OF LICENCE CONDITIONS.

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: GEODUCK AND HORSE CLAM

Gear: DIVE

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

TRANSPORTING FISH PERMITTED. SEE PART 2 OF LICENCE CONDITIONS.

Date Printed: 31 Aug 2018

Licence Serial No.: 453762

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Version Date: 21-Feb-2018

CONDITIONS OF 2018/2019 COMMUNAL GEODUCK AND HORSE CLAM LICENCE

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the halibut fishery obtain a copy of the current Groundfish Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the Fisheries Act, the regulations or conditions, the Act, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for Geoduck and Horse Clam.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"container" means a mesh harvest bag, mesh transport bag, plastic tote, cage or other container used for the gathering, handling or transportation of Geoduck or Horse Clam.

"Department (DFO)" means the Department of Fisheries and Oceans.

"discarding" means not placing harvested Geoduck or Horse Clam in a container or removing a Geoduck or Horse Clam from a container and not validating that Geoduck or Horse Clam.

"harvesting" means removing or dislodging, by any means, Geoduck or Horse Clam of any size from the substrate of the ocean floor.

"landed" or "landing" means the transfer of Geoduck or Horse Clam from a vessel in the water to land.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"log" means the Geoduck and Horse Clam Validation & Harvest Log (see section 8 and explanatory note after section 12) or an alternative log approved by the Department of Fisheries and Oceans.

"observer" means a person who has been designated as an observer by the Regional Director General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations and in the employ of a service provider company that has been certified by the Canadian General Standards Board (CGSB) for Dockside Monitoring.

"On-Grounds Monitor" means an individual, who may or may not be designated as an observer, whose role is to take biosamples, co-ordinate sampling for the Marine Biotoxin Monitoring Program, communicate with dockside observers, write Incident Reports, advise operators of open and close times and fishing locations, monitor effort, manage fishing activity to avoid excessive harvesting in specific Geoduck and Horse Clam beds, observe product transfers to packer vessels, check dive harvest information, and record other observations about the prosecution of the Geoduck and Horse Clam fishery, and about sea otter impacts.

"tranship" means the transfer of Geoduck or Horse Clam from a vessel to another vessel.

"validated" means Geoduck or Horse Clam that have been weighed by an observer and the weight entered into the Geoduck and Horse Clam Validation & Harvest Log (see section 8 and explanatory note after section 12) or an alternative log approved by the Department of Fisheries and Oceans.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

"wasting" means discarding, failing to gather harvested Geoduck or Horse Clam, or failing to validate harvested Geoduck or Horse Clam suitable for human consumption.

1. Species of fish permitted to be taken:

Geoduck (Panopea generosa) and Horse Clam (Tresus spp.)

2. Quantities permitted to be taken:

The licensed vessel is permitted to catch and retain a maximum of 0 lb (0 kg) of Geoduck.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fish harvesters:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(a) Individuals fishing under authority of this licence shall be designated by the licence holder and shall carry proof of designation and shall provide proof of designation on request by any Fishery Officer or fishery guardian; and (b) designations are personal and non-transferable.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Waters in which fishing is permitted:

(1) Subject to subsections 6(2) and 6(3), fishing for Geoduck and Horse Clam is permitted by a gear type authorized in Part 1 during those times when persons fishing under authority of a Category G licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for Geoduck and Horse Clam, with that gear, in that area and during that time.

(2) All harvesting of Geoduck and Horse Clam shall be conducted from the seabed in waters at least 10 feet (3 m) below chart datum (i.e. deeper than 10 feet (3 m) at the lowest low tide).

(3) Harvesting of Geoduck and Horse Clam is not permitted in eel grass beds.

4. Fishing gear permitted to be used:

(1) All harvesting of Geoduck and Horse Clam shall be conducted using hand-held, manually operated water nozzles guided and controlled underwater by a diver.

(2) Each water nozzle shall have a maximum inside diameter of 5/8 inch (1.59 cm).

(3) All Geoduck and Horse Clam or portions of Geoduck and Horse Clam which have been removed or dislodged from the substrate of the ocean floor are considered to have been harvested and shall be landed and validated. (See section 8) The following steps shall be taken when harvesting Geoduck and Horse Clam:

(a) all Geoduck and Horse Clam and portions of Geoduck and Horse Clam which have been harvested shall be immediately placed in a container; (b) Geoduck and Horse Clam shall remain in the container while taken to the surface and loaded onto the catcher boat; (c) on the catcher boat, Geoduck and Horse Clam may be removed from the first container and immediately placed in another container; (d) Geoduck and Horse Clam shall remain in the second container until landed and validated; and (e) no harvested Geoduck or Horse Clam may be discarded or wasted.

5. The type and size of containers to hold or transport Geoduck or Horse Clam and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

the marking of such containers:

(1) All Geoduck or Horse Clam shall be packed in containers with a maximum weight (while empty) of 5 lb (2.3 kg) each. The containers shall be clean and fabricated from approved material.

(2) All Geoduck or Horse Clam delivered to designated landing ports or transhipped to another vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink:

(a) vessel name and Vessel Registration Number (VRN); (b) Geoduck licence number (G Tab); (c) harvest date; (d) Geoduck Management Area (GMA), e.g. 24D01c; (e) Area and Subarea, e.g. 24-4; (f) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (g) common name of the product, i.e. Geoduck Clam or Horse Clam

Note: An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

6. Transhipment:

Geoduck or Horse Clam may be transhipped from the licensed vessel to another vessel licensed for the transportation of fish provided the vessel master complies with the following conditions:

(1) all Geoduck or Horse Clam are in containers and the containers are tagged as per section 5;

(2) the number of containers is recorded in the log;

(3) the "packer weight" (determined by subtracting the weight of the containers from the weight of the product) is recorded in the log;

(4) a copy of the log accompanies the product to the designated port; and

(5) the product is landed at a designated port and validated by an observer.

7. Sale

All Geoduck harvested for the purpose of sale shall be processed through a federally registered plant.

8. Locations permitted for the landing of Geoduck and Horse Clam:

Geoduck and Horse Clam shall be landed at one of the following ports:

(1) For fisheries off the east coast of Vancouver Island: (a) Port Hardy, Port McNeill, Campbell River, Heriot Bay, Lund, Westview, Comox, Deep Bay, French Creek, Nanaimo, Ladysmith, Chemainus, Cowichan Bay and Sidney.

(b) Madeira Park may be used as a landing port if prior arrangements have been

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

made with the service provider to ensure that an observer and scale are available.

(2) For fisheries off the west coast of Vancouver Island: Sooke, Port Alberni, Ucluelet, Tofino, Gold River, Zeballos, Fair Harbour, Winter Harbour, Coal Harbour.

(3) For fisheries in waters north of Cape Caution: Bella Bella, Massett, Port Hardy, Prince Rupert, Port Edward and Queen Charlotte City.

This condition applies to both the licensed vessel and, if the vessel master chooses to tranship his catch to another vessel, to the vessel receiving the catch.

9. Validation: (see explanatory note after section 13)

(1) Subject to subsection 8(4), all Geoduck and Horse Clam harvested or removed from the seabed floor under the authority of this licence shall be validated at the point and time of landing.

(2) Prior to validation of Geoduck and Horse Clam no person shall: (a) smash the shells or slit the membranes of Geoduck or Horse Clam to drain the waters; or (b) dump, throw overboard, or otherwise discard Geoduck or Horse Clam which have been harvested and retained in accordance with the Fisheries Act and the regulations made thereunder.

(3) All weights shall be determined using a scale approved by Industry Canada.

(4) If the requirement to weigh Geoduck and Horse Clam at the point of landing cannot be met because weigh scales are not available, the vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall have an observer enter the total number of containers in the log.

(5) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel the vessel master of that vessel, shall provide the observer with a hard copy of the log prior to each validation.

(6) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel the vessel master of that vessel, shall provide to the observer at the point of landing, access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

10. Oral reports:

(1) The vessel master shall, under the circumstances set out in subsection 9(2), report the information set out therein by notifying in person an observer or by telephoning (800) 663-7152. Where feasible, at least 24 hour notice will be given.

(2) Before a fishing trip, upon cancellation of a fishing trip, after fishing, and prior to delivering Geoducks and Horse Clams:

(a) vessel name, vessel master's name and vessel registration number; (b) Area, Subarea(s) and Geoduck Management Area(s); (c) date and time of arrival on, or

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

departure from, the fishing location; and (d) date and time of landing, landing port and location at the port.

11. Harvest logs and chart records: (See explanatory note after section 12)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department. The content and format of this log (paper and electronic) shall meet the requirements as defined by the Shellfish Data Unit for the current licence year.

(2) The harvest and fishing location information recorded in the log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the log no later than midnight of that day.

(4) The log shall be kept on board the licensed vessel.

(5) The log shall be produced for examination on demand of a fishery officer, a fishery guardian or an observer.

(6) The vessel master shall enter latitude and longitude co-ordinates for each dive in the log.

(7) For Geoduck and Horse Clam harvested from Areas 12 to 19 and 29, the vessel master shall provide a chart record of the locations fished to the Department.

(a) The chart shall be marked with: (i) the vessel registration number; (ii) the licence tab number; and (iii) the validation I.D. numbers.

The validation I.D. number is the unique page number assigned to each validation page of the Geoduck and Horse Clam Validation & Harvest Log. If an alternative log is used, the validation I.D. number is the unique page number provided by the Shellfish Data Unit when the licence holder contacts the Unit to obtain the information necessary to fulfil the log requirements. (see explanatory note after section 12).

(b) Each harvest site shall be clearly marked on the chart with a dive site reference or dive number, validation I.D. number and the dates that fishing activity occurred at each site. The dive numbers on the chart record shall correspond to the dive numbers in the log.

(c) The information for each day's harvest operations shall be recorded on the chart record no later than midnight of that day.

(8) The completed log pages (original copy), electronic copy of the log and, for Geoduck and Horse Clam harvested in Areas 12 to 19 and 29, the chart record of locations fished, shall be forwarded within 28 days following the end of each month in which fishing occurred to:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Department of Fisheries and Oceans Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, BC V9T 6N7 Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that a licence holder does not fish during the current fishing season, the licence holder shall submit a nil report. The nil report shall include one page from the harvest logbook identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log; the licence holder shall sign the nil report.

12. Fish slips:

(1) An accurate written report shall be provided on a fish slip of all fish and shellfish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish or shellfish landed are used for bait, personal consumption or disposed of otherwise.

(3) The report shall be mailed not later than seven days after the offloading and sent to:

Department of Fisheries and Oceans Regional Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

(4) This report shall be made within seven days of the offloading regardless of whether or not the catch has been sold within that period.

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

13. WorkSafeBC (Workers' Compensation Board) Requirements:

All Geoduck and Horse Clam divers shall be in possession of a WorkSafeBC (previously Workers' Compensation Board of BC) Seafood Harvesting Diving Certificate.

Explanatory note - harvest log, fishing location information and validation: the Geoduck and Horse Clam Validation & Harvest Log issued by the Underwater Harvesters' Association is approved for both form and content by the Shellfish Data Unit. A service provider contracted by the Underwater Harvesters' Association will provide, for a fee, the logbook and coding, keypunch, bonded chart coding, mapping and validation services.

PART 2 [February 20, 2018]

Application

These conditions apply to the transportation of fish other than fish caught by the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

reported separately in pounds; and (l) number of pieces landed for each species by grade and method of dressing of fish.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2018 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Transfer activity shall be entered into the Transfer Log not later than midnight (2400 h) of the day on which it occurs.

(6) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(7) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(8) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude in degrees-minutes- seconds or degrees-decimal minutes; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(9) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(10) The transfer log shall contain data pertaining to a single vessel only.

(11) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(12) All information entered in the transfer log shall be complete and accurate.

(13) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(14) Erasure of an entry in the transfer log is not permitted.

(15) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager.

(16) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney Morseby Camp (Haida Gwaii)

(B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

GEODUCK AND HORSE CLAM Licence 2018

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FG 1 2018

GEODUCK AND HORSE CLAM Licence 2018 Date Issued: 01 May 2018

Licensed for: Commercial Fishing Expiry Date: 28 Feb 2019

Licence Holder:

FIN: 131025

CENTRAL COAST COMMERCIAL FISHERIES 2012 ASSOCIATION
2790 VARGO ROAD
CAMPBELL RIVER BC
V9W 4X1

Designated Vessel:

VRN 312730
DOT BC4239997
Vessel NOBBY
Vessel OAL 17.63 Meters
Gross Tonnage .00 Cubic Meters
Net Tonnage .00 Cubic Meters

Reported Vessel Owner:

FIN: 129846
KITASOO DEVELOPMENT CORPORATION
GENERAL DELIVERY
KLEMTU BC
V0T 1L0

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: GEODUCK AND HORSE CLAM

Gear: DIVE

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

TRANSPORTING FISH PERMITTED. SEE PART 2 OF LICENCE CONDITIONS.

Date Printed: 01 May 2018

Licence Serial No.: 453764

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Version Date: 21-Feb-2018

CONDITIONS OF 2018/2019 COMMUNAL GEODUCK AND HORSE CLAM LICENCE

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the halibut fishery obtain a copy of the current Groundfish Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the Fisheries Act, the regulations or conditions, the Act, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for Geoduck and Horse Clam.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"container" means a mesh harvest bag, mesh transport bag, plastic tote, cage or other container used for the gathering, handling or transportation of Geoduck or Horse Clam.

"Department (DFO)" means the Department of Fisheries and Oceans.

"discarding" means not placing harvested Geoduck or Horse Clam in a container or removing a Geoduck or Horse Clam from a container and not validating that Geoduck or Horse Clam.

"harvesting" means removing or dislodging, by any means, Geoduck or Horse Clam of any size from the substrate of the ocean floor.

"landed" or "landing" means the transfer of Geoduck or Horse Clam from a vessel in the water to land.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"log" means the Geoduck and Horse Clam Validation & Harvest Log (see section 8 and explanatory note after section 12) or an alternative log approved by the Department of Fisheries and Oceans.

"observer" means a person who has been designated as an observer by the Regional Director General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations and in the employ of a service provider company that has been certified by the Canadian General Standards Board (CGSB) for Dockside Monitoring.

"On-Grounds Monitor" means an individual, who may or may not be designated as an observer, whose role is to take biosamples, co-ordinate sampling for the Marine Biotoxin Monitoring Program, communicate with dockside observers, write Incident Reports, advise operators of open and close times and fishing locations, monitor effort, manage fishing activity to avoid excessive harvesting in specific Geoduck and Horse Clam beds, observe product transfers to packer vessels, check dive harvest information, and record other observations about the prosecution of the Geoduck and Horse Clam fishery, and about sea otter impacts.

"tranship" means the transfer of Geoduck or Horse Clam from a vessel to another vessel.

"validated" means Geoduck or Horse Clam that have been weighed by an observer and the weight entered into the Geoduck and Horse Clam Validation & Harvest Log (see section 8 and explanatory note after section 12) or an alternative log approved by the Department of Fisheries and Oceans.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

"wasting" means discarding, failing to gather harvested Geoduck or Horse Clam, or failing to validate harvested Geoduck or Horse Clam suitable for human consumption.

1. Species of fish permitted to be taken:

Geoduck (Panopea generosa) and Horse Clam (Tresus spp.)

2. Quantities permitted to be taken:

The licensed vessel is permitted to catch and retain a maximum of 0 lb (0 kg) of Geoduck.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fish harvesters:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) Individuals fishing under authority of this licence shall be designated by the licence holder and shall carry proof of designation and shall provide proof of designation on request by any Fishery Officer or fishery guardian; and (b) designations are personal and non-transferable.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Waters in which fishing is permitted:

(1) Subject to subsections 6(2) and 6(3), fishing for Geoduck and Horse Clam is permitted by a gear type authorized in Part 1 during those times when persons fishing under authority of a Category G licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for Geoduck and Horse Clam, with that gear, in that area and during that time.

(2) All harvesting of Geoduck and Horse Clam shall be conducted from the seabed in waters at least 10 feet (3 m) below chart datum (i.e. deeper than 10 feet (3 m) at the lowest low tide).

(3) Harvesting of Geoduck and Horse Clam is not permitted in eel grass beds.

4. Fishing gear permitted to be used:

(1) All harvesting of Geoduck and Horse Clam shall be conducted using hand-held, manually operated water nozzles guided and controlled underwater by a diver.

(2) Each water nozzle shall have a maximum inside diameter of 5/8 inch (1.59 cm).

(3) All Geoduck and Horse Clam or portions of Geoduck and Horse Clam which have been removed or dislodged from the substrate of the ocean floor are considered to have been harvested and shall be landed and validated. (See section 8) The following steps shall be taken when harvesting Geoduck and Horse Clam:

(a) all Geoduck and Horse Clam and portions of Geoduck and Horse Clam which have been harvested shall be immediately placed in a container; (b) Geoduck and Horse Clam shall remain in the container while taken to the surface and loaded onto the catcher boat; (c) on the catcher boat, Geoduck and Horse Clam may be removed from the first container and immediately placed in another container; (d) Geoduck and Horse Clam shall remain in the second container until landed and validated; and (e) no harvested Geoduck or Horse Clam may be discarded or wasted.

5. The type and size of containers to hold or transport Geoduck or Horse Clam and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

the marking of such containers:

(1) All Geoduck or Horse Clam shall be packed in containers with a maximum weight (while empty) of 5 lb (2.3 kg) each. The containers shall be clean and fabricated from approved material.

(2) All Geoduck or Horse Clam delivered to designated landing ports or transhipped to another vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink:

(a) vessel name and Vessel Registration Number (VRN); (b) Geoduck licence number (G Tab); (c) harvest date; (d) Geoduck Management Area (GMA), e.g. 24D01c; (e) Area and Subarea, e.g. 24-4; (f) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (g) common name of the product, i.e. Geoduck Clam or Horse Clam

Note: An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

6. Transhipment:

Geoduck or Horse Clam may be transhipped from the licensed vessel to another vessel licensed for the transportation of fish provided the vessel master complies with the following conditions:

(1) all Geoduck or Horse Clam are in containers and the containers are tagged as per section 5;

(2) the number of containers is recorded in the log;

(3) the "packer weight" (determined by subtracting the weight of the containers from the weight of the product) is recorded in the log;

(4) a copy of the log accompanies the product to the designated port; and

(5) the product is landed at a designated port and validated by an observer.

7. Sale

All Geoduck harvested for the purpose of sale shall be processed through a federally registered plant.

8. Locations permitted for the landing of Geoduck and Horse Clam:

Geoduck and Horse Clam shall be landed at one of the following ports:

(1) For fisheries off the east coast of Vancouver Island: (a) Port Hardy, Port McNeill, Campbell River, Heriot Bay, Lund, Westview, Comox, Deep Bay, French Creek, Nanaimo, Ladysmith, Chemainus, Cowichan Bay and Sidney.

(b) Madeira Park may be used as a landing port if prior arrangements have been

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

made with the service provider to ensure that an observer and scale are available.

(2) For fisheries off the west coast of Vancouver Island: Sooke, Port Alberni, Ucluelet, Tofino, Gold River, Zeballos, Fair Harbour, Winter Harbour, Coal Harbour.

(3) For fisheries in waters north of Cape Caution: Bella Bella, Massett, Port Hardy, Prince Rupert, Port Edward and Queen Charlotte City.

This condition applies to both the licensed vessel and, if the vessel master chooses to tranship his catch to another vessel, to the vessel receiving the catch.

9. Validation: (see explanatory note after section 13)

(1) Subject to subsection 8(4), all Geoduck and Horse Clam harvested or removed from the seabed floor under the authority of this licence shall be validated at the point and time of landing.

(2) Prior to validation of Geoduck and Horse Clam no person shall: (a) smash the shells or slit the membranes of Geoduck or Horse Clam to drain the waters; or (b) dump, throw overboard, or otherwise discard Geoduck or Horse Clam which have been harvested and retained in accordance with the Fisheries Act and the regulations made thereunder.

(3) All weights shall be determined using a scale approved by Industry Canada.

(4) If the requirement to weigh Geoduck and Horse Clam at the point of landing cannot be met because weigh scales are not available, the vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall have an observer enter the total number of containers in the log.

(5) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel the vessel master of that vessel, shall provide the observer with a hard copy of the log prior to each validation.

(6) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel the vessel master of that vessel, shall provide to the observer at the point of landing, access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

10. Oral reports:

(1) The vessel master shall, under the circumstances set out in subsection 9(2), report the information set out therein by notifying in person an observer or by telephoning (800) 663-7152. Where feasible, at least 24 hour notice will be given.

(2) Before a fishing trip, upon cancellation of a fishing trip, after fishing, and prior to delivering Geoducks and Horse Clams:

(a) vessel name, vessel master's name and vessel registration number; (b) Area, Subarea(s) and Geoduck Management Area(s); (c) date and time of arrival on, or

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

departure from, the fishing location; and (d) date and time of landing, landing port and location at the port.

11. Harvest logs and chart records: (See explanatory note after section 12)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department. The content and format of this log (paper and electronic) shall meet the requirements as defined by the Shellfish Data Unit for the current licence year.

(2) The harvest and fishing location information recorded in the log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the log no later than midnight of that day.

(4) The log shall be kept on board the licensed vessel.

(5) The log shall be produced for examination on demand of a fishery officer, a fishery guardian or an observer.

(6) The vessel master shall enter latitude and longitude co-ordinates for each dive in the log.

(7) For Geoduck and Horse Clam harvested from Areas 12 to 19 and 29, the vessel master shall provide a chart record of the locations fished to the Department.

(a) The chart shall be marked with: (i) the vessel registration number; (ii) the licence tab number; and (iii) the validation I.D. numbers.

The validation I.D. number is the unique page number assigned to each validation page of the Geoduck and Horse Clam Validation & Harvest Log. If an alternative log is used, the validation I.D. number is the unique page number provided by the Shellfish Data Unit when the licence holder contacts the Unit to obtain the information necessary to fulfil the log requirements. (see explanatory note after section 12).

(b) Each harvest site shall be clearly marked on the chart with a dive site reference or dive number, validation I.D. number and the dates that fishing activity occurred at each site. The dive numbers on the chart record shall correspond to the dive numbers in the log.

(c) The information for each day's harvest operations shall be recorded on the chart record no later than midnight of that day.

(8) The completed log pages (original copy), electronic copy of the log and, for Geoduck and Horse Clam harvested in Areas 12 to 19 and 29, the chart record of locations fished, shall be forwarded within 28 days following the end of each month in which fishing occurred to:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Department of Fisheries and Oceans Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, BC V9T 6N7 Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that a licence holder does not fish during the current fishing season, the licence holder shall submit a nil report. The nil report shall include one page from the harvest logbook identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log; the licence holder shall sign the nil report.

12. Fish slips:

(1) An accurate written report shall be provided on a fish slip of all fish and shellfish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish or shellfish landed are used for bait, personal consumption or disposed of otherwise.

(3) The report shall be mailed not later than seven days after the offloading and sent to:

Department of Fisheries and Oceans Regional Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

(4) This report shall be made within seven days of the offloading regardless of whether or not the catch has been sold within that period.

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

13. WorkSafeBC (Workers' Compensation Board) Requirements:

All Geoduck and Horse Clam divers shall be in possession of a WorkSafeBC (previously Workers' Compensation Board of BC) Seafood Harvesting Diving Certificate.

Explanatory note - harvest log, fishing location information and validation: the Geoduck and Horse Clam Validation & Harvest Log issued by the Underwater Harvesters' Association is approved for both form and content by the Shellfish Data Unit. A service provider contracted by the Underwater Harvesters' Association will provide, for a fee, the logbook and coding, keypunch, bonded chart coding, mapping and validation services.

PART 2 [February 20, 2018]

Application

These conditions apply to the transportation of fish other than fish caught by the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

reported separately in pounds; and (l) number of pieces landed for each species by grade and method of dressing of fish.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2018 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Transfer activity shall be entered into the Transfer Log not later than midnight (2400 h) of the day on which it occurs.

(6) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(7) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(8) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude in degrees-minutes- seconds or degrees-decimal minutes; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(9) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(10) The transfer log shall contain data pertaining to a single vessel only.

(11) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(12) All information entered in the transfer log shall be complete and accurate.

(13) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(14) Erasure of an entry in the transfer log is not permitted.

(15) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager.

(16) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney Morseby Camp (Haida Gwaii)

(B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

GROUNDFISH TRAWL Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FT 3 2017

GROUNDFISH TRAWL Licence 2017 Date Issued: 09 Jan 2018

Licensed for: Commercial Fishing Expiry Date: 20 Feb 2018

Licence Holder:
FIN: 124113
NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:
VRN 30679
DOT 820972
Vessel ZOMBY WOOF
Vessel OAL 10.60 Meters
Gross Tonnage 25.47 Cubic Meters
Net Tonnage 19.81 Cubic Meters

Reported Vessel Owner:
FIN: 104978
MCNEILL FISHING LTD
515 5TH AVENUE WEST
PRINCE RUPERT BC
V8J 1T8

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: GROUNDFISH

Gear: TRAWL

Option: GROUNDFISH OPTION B

EACH GROUNDFISH TRAWL VESSEL OWNER/MASTER MUST ENSURE THAT A COPY OF THE PERSONALIZED REQUIREMENT TO CARRY AN AT-SEA OBSERVER LETTER IS KEPT ON BOARD THE VESSEL AT ALL TIMES.

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON FEBRUARY 20, 2018. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON JUNE 30, 2017.

TRANSPORTING FISH PERMITTED. SEE PART 2 OF LICENCE CONDITIONS.

Date Printed: 09 Jan 2018

Licence Serial No.: 429011

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Version Date: 16-Feb-2017

CONDITIONS OF 2017/2018 COMMUNAL GROUNDFISH TRAWL LICENCE
Licence Period: February 21, 2017 to February 20, 2018 Option B
Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the groundfish trawl fishery obtain a copy of the current Integrated Groundfish Fisheries Management Plan from the Department of Fisheries and Oceans. The management plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the Fisheries Act, the regulations or conditions, the Act, regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for groundfish by means of a bottom trawl net.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"container" means a bag, box, tray, tote, frozen block or anything that contains fish.

"date of landing" means the date of commencement of landing.

"Department (DFO)" means the Department of Fisheries and Oceans.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"designated service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Integrated Quota Management Inc. of Vancouver, B.C.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 8 of these conditions.

"electronic hail software" means an electronic-based hail program that meets the minimum specifications set out in subsection 6(1)of these conditions.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department for licensing and other fisheries management purposes.

"Fishery Operations System (FOS)" means the Department's database into which all fishing activity information shall be entered.

"functionality test certificate number(FTCN)" means the unique number assigned by an EM system technician certifying that an EM system has been installed and is fully functional.

"Hail-out Report" means the report made to the designated groundfish hail service provider prior to commencement of a fishing trip. (See section 6).

"Hail-in Report" means the report made to the designated groundfish hail service provider prior to landing fish. (See section 9).

"landed" means having offloaded catch onto land.

"landing" means the offloading of catch onto land.

"mesh size" means the total length of twine measured along two contiguous sides of a single mesh, including the distance across the knot joining those sides but not including any other knots.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species and quantities of fish that are permitted to be taken:

(1) Subject to the quantities of fish set out in subsections 1(2) and 1(3), this licence authorizes the licensed vessel to make a maximum of fifteen landings each calendar month during the period February 21, 2017 to February 20, 2018.

(2) This licence authorizes the licensed vessel to land a maximum of: (a) 0 pounds

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(approximately 0 tonnes) round weight of all groundfish species set out in Appendix I, combined, with the exception of sablefish, Petrale Sole, Pacific Cod, lingcod and Spiny Dogfish. (b) 0 pounds (approximately 0 tonnes) round weight of sablefish; (c) 0 pounds (approximately 0 tonnes) round weight of Petrale Sole; (d) 0 pounds (approximately 0 tonnes) round weight of Pacific Cod; (e) 0 pounds (approximately 0 tonnes) round weight of lingcod; and (f) an unlimited amount of Spiny Dogfish.

(3) An additional 10 percent of the permitted quantity of groundfish set out in paragraph 1(2)(a) may be landed provided that none of the additional quantity are sablefish, Petrale Sole, Pacific Cod or lingcod.

3. Prohibited Species:

When fishing under the authority of Part 1 of this licence the following species shall not be retained and shall be returned to the water immediately upon capture, in the manner that causes the least harm.

Eulachon Thaleichthys pacificus Pacific Halibut Hippoglossus stenolepis Salmon species Onchorhynchus spp. Pacific Herring Clupea harengus pallasi Green Sturgeon Acipenser medirostris White Sturgeon Acipenser transmontanus Wolf-eels Anarrhichthys ocellatus Basking Shark Cetorhinus maximus Tope (Soupfin) Shark Galeorhinus galeus Bluntnose Sixgill Shark Hexanchus griseus All Rockfish Sebastes spp. All thornyheads Sebastolobus spp.

4. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

5. Designated fishers:

Individuals fishing under authority of this licence shall be designated pursuant to the Aboriginal Communal Fishing Licences Regulations, shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

6. Waters in which fishing is permitted:

Fishing by bottom trawl is permitted only within those waters of Areas 12 to 20 and 29 in which the closed areas and times fixed by regulations have been varied to allow fishing by bottom trawl gear.

7. The type and size of fishing gear permitted to be used:

(1) Only bottom trawl nets are permitted to be used; midwater trawl nets are not permitted.

(2) Subject to subsection 7(3), the mesh size in any part of a bottom trawl net, including the cod-end, shall not be less than 76 mm.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(3) In Areas 12 to 20 and 29, the mesh size in a bottom trawl net shall not be less than 108 mm in the final 50 meshes, including the cod-end. In all other parts of a bottom trawl net, the mesh size shall not be less than 76 mm.

(4) Where a minimum mesh size is prescribed, no person shall use any device by means of which openings that are smaller in size than the original mesh are created.

8. Transport and transhipment requirements:

(1) All groundfish taken under authority of this licence shall be transported by this licensed vessel to land.

(2) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

9. Information reports required prior to the commencement of a trip:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider by either means described in subsection 9(1)or subsection 9(2) set out below.

The person identified as the vessel master in section 6 shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) If the Hail-out Report is submitted electronically to the designated groundfish hail service provider:

The vessel master shall, not less than twenty-four (24) hours prior to the commencement of a fishing trip, provide the following information (hereinafter referred to as a Hail-out Report) and obtain a hail-out number by contacting the designated groundfish hail service provider using the electronic hail software supplied by the service provider. The Hail-out Report must include the following information: (a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

The vessel master must use the approved electronic hail software from the designated groundfish hail service provider that has been installed on an onboard computer that uses an Android operating system 4.0.3 or higher that has the ability to send and receive e-mail;

(2) If the Hail-out Report is submitted by telephone to the designated groundfish hail service provider:

The vessel master shall, not less than twenty-four (24) hours prior to the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

commencement of a fishing trip provide the following information (hereinafter referred to as a Hail-out Report) and obtain a hail-out number from the designated groundfish hail service provider by calling 1-866-658-0890: The Hail-out Report must include the following information (a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

(2) Hail-out Number: (a) Upon completing a Hail-out Report, the vessel master shall receive a unique hail-out number from the designated groundfish hail service provider. (b) The vessel master shall record the hail-out number in the vessel's Groundfish Trawl Log Book or in the vessel's electronic logbook.

(3) Cancellation of fishing trip:

Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall notify DFO through the designated groundfish hail service provider either electronically or by calling 1-866-658-0890 and make a Hail-in Report to indicate the trip has been cancelled and that no fishing occurred. A Cancellation Hail-in Report shall be made no later than three days after making the Hail-out Report.

10. At-sea monitoring:

The vessel master shall ensure that at-sea monitoring is conducted for all vessel activities conducted under the authority of this licence by means of either: (1) a designated groundfish at-sea observer carried on board the vessel; or (2) the use of a functioning electronic monitoring (EM) system as described in section 11 on board the vessel.

11. Electronic Monitoring (EM) System:

(1) The vessel master, when using an EM system to meet the at-sea monitoring requirement set out in section 7, shall ensure that the EM system on board the vessel meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter insert time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor (where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure that all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the electronic monitoring (EM) system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing and hail-in in as soon as possible.

(5) The vessel master shall provide to the designated EM system service provider all sensor and video data from the EM system for each monthly fishing period in which fishing occurred within seven (7) days of the end of that month.

(6) The licence holder or vessel master shall arrange to have the EM service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System (FOS).

(7) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM system sensor and imagery data to the Department.

12. Requirement for the vessel master to report information from sea:

(1) The vessel master shall report the following information (hereinafter referred to as a Hail-in Report) to the designated groundfish hail service provider as soon as fishing ceases either electronically by using the electronic hail software supplied by the service provider or by calling 1-866-658-0890:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) date, time and location of landing of the

This report may contain data rated up to Protected A.
Do not release this data to external parties
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

fish; (e) name of the fish buying station where fish are to be landed or the location of public sales or the name of the processor in the United States where fish are to be landed; and (f) estimated total round weight of fish on board.

(2) Upon completing the Hail-in Report, the vessel master shall record the unique Hail-in number supplied by the designated groundfish hail service provider in the Groundfish Trawl Log Book or in the vessel's electronic logbook.

(3) Requirement to enter hail-in information into DFO's FOS system

The vessel master shall arrange to have the hail-in information submitted to the designated groundfish hail service provider entered into DFO's Fishery Operations System (FOS).

13. Records that the vessel master shall keep:

(1) Groundfish Trawl Log Book

(a) The vessel master shall keep a record of all fishing activity carried out under the authority of this licence in either a DFO approved paper Groundfish Trawl Log Book or a DFO approved electronic Groundfish Trawl Log Book.

(b) The Groundfish Trawl Log Book shall be kept in the manner set out in the example in the paper Groundfish Trawl Log Book set out in Appendix 8 (Groundfish Trawl Commercial Harvest Plan) of the current Groundfish Integrated Fisheries Management Plan or a DFO approved electronic Groundfish Trawl Log Book.

(c) The information shall be recorded in either the paper Groundfish Trawl Log Book or a DFO approved electronic Groundfish Trawl Log Book, for each tow, immediately after completion of the tow.

(d) The paper Groundfish Trawl Log Book or a DFO approved electronic Groundfish Trawl Log Book shall be made available for inspection upon the request of an observer, a fishery officer or a fishery guardian.

(e) The completed original paper Groundfish Trawl Log Book pages and yellow copies shall be provided to the observer attending the landing of the fish.

(f) The vessel master shall ensure that the Groundfish Trawl Log Book is available for use prior to fishing, and that sufficient pages and or digital memory in the DFO approved electronic logbook is available to cover any fishing trip.

(g) All recording in the paper Groundfish Trawl Log Book shall be in ink. If an error is made while completing an entry, the entry shall be crossed out. Erasure of an entry in the Groundfish Trawl Log Book is not permitted.

(h) The vessel master shall arrange for all fishing information recorded in either the paper Groundfish Trawl Log Book or in the DFO approved electronic Groundfish Trawl logbook to be entered into the Departmental Fishery Operations System

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(FOS) within forty eight (48) hours of completion of the fishing trip.

(2) Groundfish Trawl Validation Record Book

(a) A Groundfish Trawl Validation Record Book shall be kept on board the vessel at all times and shall be made available for inspection and use upon the request of an observer, a fishery officer or a fishery guardian. A Groundfish Trawl Validation Record Book will be supplied by the designated service provider.

(b) At any time, including at the completion of a landing, an observer shall enter information regarding the weight and species of fish caught, the weight and species of fish released at sea and the weight and species of fish landed, in the Groundfish Trawl Validation Record Book. The vessel master shall sign and date each original Groundfish Trawl Validation Record Book page as directed by an observer. All signed original Record Book pages shall be removed and retained by the observer.

(c) The licence holder or vessel master shall arrange for all landing information to be entered into the Departmental Fishery Operations System (FOS) within two (2) days of completion of the fishing trip.

(3) Fish Slips

(a) The vessel master shall keep records, in the form commonly known as a fish slip, of all fish landed under the authority of this licence. Each record shall contain the following information:

(i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales or the name of the processor in the United States accepting delivery; (vi) date of landing; (vii) number of days fished in each Area; (viii) landed weight of each groundfish species reported separately in pounds; (viii) method of dressing catch, by species; and (ix) price paid per pound, by species.

(b) The vessel master shall ensure that the fish slip is sent not later than seven (7) days after landing:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, B.C. V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604) 596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the Fisheries Management Data Unit message line at (604) 666-2716.

14. Location and times at which landing of fish from the vessel is permitted:

(1) All groundfish caught and retained under the authority of this licence shall be

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

landed prior to February 21, 2018.

(2) Subject to subsection 11(3), all fish caught under the authority of this licence, shall be landed at one of the following locations:

Beaver Cove Campbell River Chemainus Coal Harbour Comox Courtenay Cowichan Bay Deep Bay French Creek Ladysmith Nanaimo Port Hardy Sooke Metro Vancouver Victoria Sidney

In the United States (Washington State):

Anacortes Bellingham Blaine

(3) All fish caught under the authority of this licence shall be landed at a fish buying station licenced under the Fisheries Act (Province of British Columbia) except: (a) fish sold directly to the public under authority of a fisherman's vending licence issued under the Fisheries Act (Province of British Columbia); or (b) fish landed in the United States at one of the locations listed in subsection 14(2).

15. Method permitted for landing of fish from the vessel and verification by an observer of the weight and species of any fish caught and retained:

(1) No fish shall be landed unless an observer is present and authorizes the commencement of weight verification.

(2) The weight and species of all fish landed from the vessel shall be verified by an observer.

(3) When any fresh fish, including live fish, taken under authority of this licence are landed, all fresh fish, including live fish on board the vessel, shall be landed at the same time.

(4) When any frozen fish taken under authority of this licence are landed, all frozen fish on board the vessel shall be landed at the same time.

(5) No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

(6) The vessel master shall provide to the observer verifying the landing access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

(7) The licence holder or vessel master shall arrange for all catch and landing information to be entered into the Departmental Fishery Operations System (FOS) within two (2) days of completion of the fishing trip.

16. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing the fish and in the presence of an observer:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) Where fish are not placed in containers prior to landing and are not frozen at sea: (i) all fish shall be sorted and weighed by individual species; (ii) all fish segregated by species shall be weighed prior to intermixing of those species; (iii) if fish are placed into totes or other containers, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use; (iv) totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by an observer; and (v) if fish are transported directly from the vessel across an in-line scale (e.g., automated hopper) then the weight recorded shall be the net weight.

(b) Where fish are placed in containers prior to landing and are not frozen at sea: (i) each container shall contain only one species; (ii) each container shall be clearly marked as to the species contained therein; (iii) all containers shall be accurately weighed; and (iv) a sample of no less than 15 percent of each type of container shall be taken, as directed by an observer. The containers shall be emptied and the contents sorted where necessary and weighed by individual species.

(c) Where fish are placed in containers prior to landing and are frozen at sea: (i) in the case of all groundfish, each container shall contain only one species; (ii) each container shall be clearly marked as to the species contained therein; (iii) all containers shall be accurately weighed; and (iv) a sample of no less than 15 percent of each type of container shall be taken, as directed by an observer. The containers shall be emptied and the contents sorted where necessary and weighed by individual species.

(2) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by the Legal Metrology Branch, Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(3) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and the ice/slime or glaze allowance.

(4) There shall be a 2 percent allowance for ice/slime in the case of fresh fish and a 4% allowance for glaze in the case of frozen fish.

(5) In the case of dressed fish, the following conversion factors shall be used to calculate net round weights:

Sablefish

Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.37 Fresh: Western cut, 1.40 Frozen: Head-on, 1.09 Fresh: Head-on, 1.11

Lingcod

Frozen: Japanese Cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western Cut, 1.33 Fresh: Western cut, 1.36 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Pacific Cod

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.26 Fresh: Western cut, 1.28 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Arrowtooth Flounder Frozen: Head-on, 1.16 Fresh: Head-on, 1.14 Frozen: Head-off, 1.43 Fresh: Head-off, 1.39 Frozen: Head-off-tailed 1.54 Fresh: Head-off-tailed 1.49

Other flounders and soles Frozen: Head-on, 1.20 Fresh: Head-on, 1.22 Frozen: Head-off, 1.60 Fresh: Head-off, 1.64

Skates

Fresh: Flap/Wing, 2.45

All of the above conversion factors include a 2% ice/slime allowance for fresh product and a 4 percent glaze allowance for frozen product.

17. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), the vessel master is authorized to engage in fishing activities, subject to subsection 13(2) below that may incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

COMMUNAL Part 2 [February 15, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; and (l) number of pieces landed for each species by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

grade and method of dressing of fish.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

Version Date: 19-Feb-2018

CONDITIONS OF 2018/2019 COMMUNAL GROUNDFISH TRAWL LICENCE
Licence Period: February 21, 2018 to February 20, 2019 Option A
Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the groundfish trawl fishery obtain a copy of the current Integrated Groundfish Fisheries Management Plan from the Department of Fisheries and Oceans. The management plan is intended for general information purposes only. Where there is a discrepancy between the plan and the regulations or these conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for groundfish by means of a bottom trawl net or midwater trawl net.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"coastwide" means all Canadian fisheries waters of the Pacific Ocean.

"container" means a bag, box, tray, tote, frozen block or anything that contains fish.

"date of landing" means the date of commencement of landing.

"Department (DFO)" means the Department of Fisheries and Oceans.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish dockside observer" means an individual designated pursuant

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"designated service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Integrated Quota Management Inc. of Vancouver, B.C.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 7 of these conditions.

"electronic hail software" means an electronic-based hail program that meets the minimum specifications set out in subsection 6(1)of these conditions.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Fishery Operations System (FOS)" means the Department's database into which all fishing activity information shall be entered.

"functionality test certificate number(FTCN)" means the unique number assigned by an EM system technician certifying that an EM system has been installed and is fully functional.

"groundfish management area(s)" means the waters listed below, each comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Gulf Hake Area" means Areas 13 to 19 and 29 when used in connection with fishing for Pacific Hake.

"Gulf Pollock Area" means Areas 13 to 19 and 29 when used in connection with fishing for Walleye Pollock.

"Hail-out Report" means the report made to the designated groundfish hail service

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

provider prior to commencement of a fishing trip. (See section 9).

"Hail-in Report" means the report made to the designated groundfish hail service provider prior to landing fish. (See section 12).

"landed" means having offloaded catch onto land.

"landing" means the offloading of catch onto land.

"mesh size" means the total length of twine measured along two contiguous sides of a single mesh, including the distance across the knot joining those sides but not including any other knots.

"Offshore Hake Area" means those waters comprising Areas 1 to 12, 20 to 21, 23 to 27, 101 to 111, 121, 123 to 127, 130 and 142, combined.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"rockfish" means the species listed under the heading "Rockfish/Thornyheads" in Appendix I.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Waters in which fishing is permitted:

(1) Fishing by bottom trawl is permitted only within those waters of Areas 1 to 11, 21, 23 to 27, 101 to 111, 121, 123 to 127, 130 and 142 during those times when persons fishing under authority of a Category T licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish in those areas.

(2) Fishing by midwater trawl gear is permitted in those areas and during those times when persons fishing under authority of a Category T licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish in those areas.

2. Species and quantities of fish that are permitted to be taken and the groundfish management area(s) from which these fish are permitted to be caught:

(1) The licensed vessel is permitted to catch and retain those species listed in column I of an item of the Table to this subsection, from the groundfish management area(s) set out in Column II of that item up to the maximum quantity set out in Column III of that item.

Table Species, Area and Quantity

(2) A maximum of 15,000 pounds round weight (6804 kg) of rockfish listed in Appendix I and not referred to in subsection 2(1) may be landed per landing.

(3) An unlimited amount of groundfish, not including rockfish, listed in Appendix I and not referred to in subsection 2(1) may be landed.

(4) Subject to subsection 2(1), the round weight of mackerel landed shall not exceed 6 percent of the combined weight of Pacific Hake, listed in the table to subsection 2(1) as items 55 and 56.

(5) The vessel may retain all incidentally caught squid and octopus.

(6) When midwater trawling for Pacific Hake and when using an electronic monitoring system the vessel master shall retain all authorized species caught.

3. Prohibited Species:

When fishing under the authority of Part 1 of this licence the following species shall not be retained and shall be returned to the water immediately upon capture, in the manner that causes the least harm.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Eulachon Thaleichthys pacificus Pacific Halibut Hippoglossus stenolepis Salmon species Onchorhynchus spp. Pacific Herring Clupea harengus pallasi Green Sturgeon Acipenser medirostris White Sturgeon Acipenser transmontanus Wolf-eels Anarrhichthys ocellatus Basking Shark Cetorhinus maximus Tope (Soupfin) Shark Galeorhinus galeus Bluntnose Sixgill Shark Hexanchus griseus

4. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

5. Designated fishers:

Individuals fishing under authority of this licence shall be designated pursuant to the Aboriginal Communal Fishing Licences Regulations, shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

6. Size of fish permitted to be taken:

(1) No person shall catch and retain a sablefish that is less than

(a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(2) No person shall catch and retain a lingcod that is less than

(a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

7. The type and size of fishing gear permitted to be used:

(1) Bottom trawl nets and midwater trawl nets are permitted subject to subsection 7(2).

(2) Bottom trawl nets are not permitted in Areas 12 to 20, 28 and 29.

(3) Subject to subsections 7(4), 7(5) and 7(6), the mesh size in any part of a bottom trawl net or midwater trawl net, including the cod-end, shall not be less than 76 mm.

(4) In that area bounded on the south by the parallel passing through 52 degrees 51 minutes north latitude in Hecate Strait, bounded on the north by the Canada/U.S. International boundary, bounded on the west by the meridian passing through 132 degrees 00 minutes west longitude in Dixon Entrance and, bounded on the east by the mainland of British Columbia, the mesh size in a bottom trawl net shall not be less than 152.6 mm in the last 50 meshes of the net, including the cod-end. In all other parts of a bottom trawl net, the mesh size shall not be less than 76 mm.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(5) In Queen Charlotte Sound: the mesh size in a bottom trawl shall not be less than 140 mm mesh size in the last 50 meshes of the net, including the cod-end. For all other parts of a bottom trawl net, the mesh size shall not be less than 76 mm. This mesh size restriction applies to vessels fishing in waters shallower than 60 fathoms in the area bounded by the southern boundary of Pacific Fishery Management Areas 130-1 and 111 and 11-1 and 11-2 and the parallel passing through 52 degrees 51 minutes north latitude (Hecate Strait) in the north.

(6) All bottom trawl nets and midwater trawl nets, when used in fishing for Pacific Hake destined for delivery to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations, an escape panel fitted to permit the release of unwanted fish. This escape panel shall be located in the intermediate portion (lengthening piece) of the trawl net commencing at a point six feet from where the intermediate is attached to the cod-end. The escape panel shall be composed of not less than one row of meshes running parallel to the long axis of the intermediate for a distance of not less than six feet. The row(s) of mesh shall be cut and sewn with a length of twine or similar material having a breaking strength not exceeding 70 pounds.

(7) Where a minimum mesh size is prescribed, no person shall use any device by means of which openings that are smaller in size than the original mesh are created.

8. Transport and transhipment requirements:

(1) Subject to subsection 8(2), all groundfish taken under authority of this licence shall be transported by this licenced vessel to land.

(2) Pacific Hake and associated bycatch may be transhipped to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations.

9. Information reports required prior to the commencement of a trip:

Prior to the commencement of a trip, the vessel master shall report (hereinafter referred to as a Hail-out Report) to the designated groundfish hail service provider by either means described in subsection 9(1) or subsection 9(2).

The person identified as the vessel master in subsection 9(1)(b) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) If the Hail-out Report is submitted electronically to the designated groundfish hail service provider:

Subject to subsections 9(4) and 9(5), the vessel master shall, not less than twenty-four (24) hours prior to the commencement of a fishing trip, provide the following information (hereinafter referred to as a Hail-out Report) to and obtain a hail-out number by contacting the designated groundfish hail service provider using the electronic hail software supplied by the service provider. The Hail-out Report

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

must include the following information:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

The vessel master must use the approved electronic hail software from the designated groundfish hail service provider that has been installed on an onboard computer that uses an Android operating system 4.0.3 or higher that has the ability to send and receive e-mail;

(2) If the Hail-out Report is submitted by telephone to the designated groundfish hail service provider:

Subject to subsections 9(3) and 9(4), the vessel master shall, not less than twenty-four (24) hours prior to the commencement of a fishing trip provide the following information (hereinafter referred to as a Hail-out Report) to and obtain a hail-out number from the designated groundfish hail service provider by calling 1-866-658-0890: The Hail-out Report must include the following information:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

(3) Hail-out Report prior to fishing for Pacific Hake:

The vessel master shall report the information set out in subsections 9(1) and 9(2) to the designated groundfish hail service provider either electronically or by calling 1-866-658-0890 not less than eight (8) hours prior to the commencement of a fishing trip for Pacific Hake.

(4) Hail-out Report prior to fishing for Pacific Hake (Joint Venture):

The vessel master shall report the following information to the designated groundfish hail service provider either electronically or by calling 1-866-658-0890 not less than eight (8) hours prior to the commencement of the first fishing trip for Pacific Hake intended to be transhipped to a foreign vessel licensed under the Coastal Fisheries Protection Regulations:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) notification that they will be fishing a Joint Venture trip; (e) date of commencement of first Joint Venture fishing trip; and (f) anticipated date of completion of last Joint Venture fishing trip.

(5) The vessel master shall hail out for one trawl fishery type only.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(6) Hail-out number:

(a) Upon completing a Hail-out Report, the vessel master shall receive a unique hail-out number from the designated groundfish hail service provider. (b) The vessel master shall record the hail-out number in the vessel's Groundfish Trawl Log Book or in the vessel's electronic logbook.

(7) Cancellation of fishing trip

Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall notify DFO through the designated groundfish hail service provider and make a Hail-in Report to indicate the trip has been cancelled and that no fishing occurred either electronically or by calling 1-866-658-0890. A Cancellation Hail-in Report shall be made not later than three days after making the Hail-out report.

(8) Requirement to enter hail-out information into DFO's FOS system

The licence holder or vessel master shall arrange to have the hail-out data submitted to the designated hail service provider entered into the DFO's Fishery Operations System (FOS) not less than twenty-four (24) hours prior to the commencement of a fishing trip.

10. At-sea monitoring:

(1) Subject to subsections 10(2) and 10(3), the vessel master shall ensure that at-sea monitoring is conducted for all vessel activities conducted under the authority of this licence by means of a designated groundfish at-sea observer carried on board the vessel.

(2) When mid-water fishing for Pacific Hake and delivering all fish caught in a fresh non-frozen form, the vessel master shall ensure that at-sea monitoring is conducted for all vessel activities conducted under the authority of this licence by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system as described in section 11 on board the vessel.

(3) All vessels mid-water and bottom fishing for Pacific Hake destined for delivery to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations, shall have an electronic catch monitoring system as described in section 11.

11. Electronic Monitoring (EM) System (when midwater trawling for Pacific Hake):

(1) The vessel master, when using an electronic monitoring (EM) system to meet the at-sea monitoring requirement set out in Section 10, shall ensure that the EM system onboard the vessel meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and connected to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor device (where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100% of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure that all components of the electronic monitoring (EM) system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The electronic monitoring (EM) system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing and hail in as soon as possible.

(5) The vessel master shall provide to the designated EM system service provider all sensor and video data from the EM system every 30 calendar days from the time of the last data retrieval/install event (provided the vessel has fished during this time).

(6) The vessel master shall make arrangements for EM service/data retrievals at the time of hail-in.

(7) The vessel master shall perform a Functionality Test prior to the commencement of each trip to ensure that there is a minimum of 15 percent hard disk storage space remaining on the installed system.

(8) The licence holder or vessel master shall arrange to have the EM service

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

provider conduct a comparison of the EM sensor and video data with the Groundfish Trawl Fishing Log and the Groundfish Trawl Validation Record and then enter the data into the Fishery Operations System (FOS).

(9) At the request of the Department the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM system sensor and imagery data to the Department.

12. Requirement for the vessel master to report information from sea:

Prior to completing or cancelling a trip, the vessel master shall report to the designated groundfish hail service provider the following information.

(1) Subject to subsection 12(4), the vessel master shall report the following information (hereinafter referred to as a Hail-in Report) to the designated hail service provider not less than sixteen (16) hours prior to landing fish either electronically by using the electronic hail software supplied by the service provider or by calling 1-866-658-0890:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) date, time and location of landing of the fish; (e) name of the fish buying station where fish are to be landed or the location of public sales or the name of the processor in the United States where fish are to be landed; and (f) estimated total round weight of fish on board.

(2) Upon completing a Hail-in Report, the designated groundfish hail service provider will provide the vessel master with a unique hail-in number.

(3) The vessel master shall record the hail-in number in the vessel's Groundfish Trawl Log Book or within the vessel's electronic logbook.

(4) Disembarking of the at-sea observer after completion of fishing activity:

The vessel master may after discontinuing fishing, and if transiting directly to an offloading port, subject to subsections 12(4)(a) through (e), disembark the observer in Port Hardy, Victoria, Ucluelet or Prince Rupert.

(a) A Hail-in Report, as described in subsection 12(1), must be provided to the designated service provider (Archipelago Marine Research Ltd.) prior to disembarkation of the observer.

(b) The use of Port Hardy for observer disembarkation shall be considered only when the vessel will be transiting southbound between Vancouver Island and the mainland of British Columbia.

(c) The use of Victoria for observer disembarkation shall be considered only when the vessel will be transiting eastbound to a Canadian landing port or transiting southbound to Blaine, Bellingham or Anacortes in Washington State.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(d) The use of Ucluelet for observer disembarkation shall be considered only when the vessel is transiting directly to Port Alberni, southbound to a Canadian landing port or to Blaine, Bellingham or Anacortes in Washington State.

(e) The use of Prince Rupert for observer disembarkation shall be considered only when the vessel is transiting southbound between Vancouver Island and the mainland of British Columbia to a Canadian landing port or the ports of Blaine, Bellingham or Anacortes in Washington State

(5) The vessel master transhipping fish to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations shall report the following information to the designated hail service provider immediately upon completion of participation in Joint Venture fishing activity either electronically or by calling 1-866-658-0890:

(a) vessel name; (b) name and Fishery Identification Number (FIN) of the vessel master; (c) vessel registration number; and (d) date and time of completion of all transhipping activities for that fishing trip.

(6) The vessel master shall record the unique Hail-in number supplied by the designated groundfish hail service provider in the Groundfish Trawl Log Book or in the vessel's electronic logbook.

(7) Requirement to enter hail-in information into DFO's FOS system

The licence holder or vessel master shall arrange to have the hail-in information submitted to the designated groundfish hail service provider entered into the Fishery Operations System (FOS) not less than sixteen (16) hours prior to landing fish.

13. Records that the vessel master shall keep:

(1) Groundfish Trawl Log Book

(a) The vessel master shall keep a record of all fishing activity carried out under authority of this licence in either a DFO approved paper Groundfish Trawl Log Book or a DFO approved electronic Groundfish Trawl Log Book.

(b) The vessel master shall report all marine mammal interactions during fishing trips in the Integrated Groundfish Fishing Log. For the purpose of defining lethal and non-lethal marine mammal interactions, interactions include bycatch, collision, and all sightings of marine mammals entangled in fishing gear.

(c) The Groundfish Trawl Log Book shall be kept in the manner set out in the example in the Groundfish Trawl Log Book set out in Appendix 8 (Groundfish Trawl Commercial Harvest Plan) of the current Integrated Groundfish Fisheries Management Plan or in the DFO approved electronic Groundfish Trawl Log Book and shall be complete.

(d) The vessel master shall record the information in the paper Groundfish Trawl Log Book or in the DFO approved electronic Groundfish Trawl Log Book for each

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

tow, immediately after completion of the tow.

(e) The paper Groundfish Trawl Log Book or in the DFO approved electronic Groundfish Trawl Log Book shall be made available for inspection upon the request of an observer, a fishery officer or a fishery guardian.

(f) The completed original paper Groundfish Trawl Log Book pages and yellow copies shall be provided to the observer attending the landing of the fish.

(g) The vessel master shall ensure that the Groundfish Trawl Log Book is available for use prior to fishing, and that sufficient pages or that sufficient digital memory in the DFO approved electronic or in the DFO approved electronic Groundfish Trawl Log Book is available to cover any fishing trip.

(h) All recording in the paper Groundfish Trawl Log Book shall be in ink. If an error is made while completing an entry, the entry shall be crossed out. Erasure of an entry in the Groundfish Trawl Log Book is not permitted.

(i) The vessel master shall arrange to have all fishing activity information recorded in either the paper Trawl Log Book or in the DFO approved electronic Groundfish Trawl logbook entered into the DFO's Fishery Operations System (FOS) not less than forty-eight(48) hours after the completion of the landing of the fishing trip.

(2) Quota Status Report

(a) The vessel master shall keep a record, in the form commonly known as a Quota Status Report, of all groundfish landed by the vessel named in this licence. The Quota Status Report form will be supplied by the designated service provider.

(b) The vessel master shall keep the Quota Status Report on board the vessel and shall make it available for inspection and use upon the request of an observer, a fishery officer or a fishery guardian.

(3) Fish Slips

(a) The vessel master shall keep records, in the form commonly known as a fish slip, of all fish landed under the authority of this licence. Each fish slip shall contain the following information:

(i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales or the name of the processor in the United States accepting delivery; (vi) date of landing; (vii) number of days fished in each Area; (viii) landed weight of each groundfish species reported separately in pounds; (ix) method of dressing catch, by species; and (x) price paid per pound, by species.

(b) The vessel master shall ensure that the fish slip is sent not later than thirty (30) days after landing to:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, B.C. V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604) 596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the Fisheries Management Data Unit message line at (604) 666-2716.

14. Location and times at which landing of fish from the vessel is permitted:

(1) All groundfish caught and retained under the authority of this licence shall be landed not later than 23:59 h local time February 27, 2019.

(2) Subject to subsections 14(3) and 14(4), all fish caught under the authority of this licence, shall be landed at one of the following locations:

In Canada:

Beaver Cove Ladysmith Sooke Campbell River Masset Tofino Chemainus Nanaimo Ucluelet Coal Harbour Port Alberni Metro Vancouver Comox Port Edward Victoria Courtenay Port Hardy Winter Harbour Cowichan Bay Prince Rupert Zeballos Deep Bay Queen Charlotte City Port Simpson French Creek Sidney

In the United States (Washington State):

Anacortes, Bellingham, Blaine, Westport.

(3) Subject to subsection 14(4), all fish caught under the authority of this licence shall be landed at a fish buying station licenced under the Fisheries Act (Province of British Columbia) except:

(a) fish sold directly to the public under authority of a fisherman's vending licence issued under the Fisheries Act (Province of British Columbia); or

(b) fish landed in the United States at one of the locations listed in subsection 14(2).

(4) All Pacific Hake caught outside of the Gulf Hake Area shall be landed: (a) at a fish buying station licenced under the Fisheries Act (Province of British Columbia) at the following locations: (i) Ucluelet; (ii) Port Alberni; (iii) Port Hardy; (iv) Coal Harbour; (v) Victoria; (vi) Metro Vancouver; (vii) Port Simpson; or

(b) in the United States (Washington State): Westport; or

(c) transhipped to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations.

15. Method permitted for landing of fish from the vessel and verification by an observer of the weight and species of any fish caught and retained:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) No fish shall be landed unless an observer is present and authorizes the commencement of weight verification.

(2) The weight and species of all fish landed from the vessel shall be verified by an observer.

(3) Subject to subsection 15(4), when any fish taken under authority of this licence are landed, all fish on board the vessel shall be landed at the same time.

(4) The vessel master may land a portion the fish on board the vessel provided that the vessel master ensures that the groundfish at-sea observer who was present on board the vessel during the fishing trip remains on board for the next fishing trip.

(5) All fish caught during one fishing trip and not landed at the conclusion of that trip shall be landed at the conclusion of the next fishing trip.

(6) No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

(7) The vessel master shall provide to the observer verifying the landing access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

(8) The licence holder or vessel master shall arrange for all catch and landing information to be entered into the Departmental Fishery Operations System (FOS) within two (2) days of completion of the fishing trip.

16. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing the fish and in the presence of an observer:

(a) Where fish are not placed in containers prior to landing and are not frozen at sea: (i) all fish shall be sorted and weighed by individual species; (ii) all fish segregated by species shall be weighed prior to intermixing of those species; (iii) if fish are placed into totes or other containers, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use; (iv) totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by an observer; and (v) if fish are transported directly from the vessel across an in-line scale (e.g., automated hopper) then the weight recorded shall be the net weight.

(b) Where fish are placed in containers prior to landing and are not frozen at sea: (i) each container shall be clearly marked as to the species contained therein; (ii) all containers shall be accurately weighed; and (iii) the containers shall be emptied and the contents sorted and weighed by individual species.

(c) Where fish are placed in containers prior to landing and are frozen at sea: (i) in the case of all groundfish, each container shall contain only one species; (ii) each

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

container shall be clearly marked as to the species contained therein; (iii) all containers shall be accurately weighed; and (iv) a sample of no less than 15 percent of each type of container shall be taken, as directed by an observer. The containers shall be emptied and the contents sorted where necessary and weighed by individual species.

(2) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by the Legal Metrology Branch, Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(3) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and the ice/slime or glaze allowance.

(4) There shall be a 2 percent allowance for ice/slime in the case of fresh fish and a 4 percent allowance for glaze in the case of frozen fish.

(5) In the case of dressed fish, the following conversion factors shall be used to calculate net round weights:

Rockfish/Thornyheads Frozen: Japanese Cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: Western Cut, 1.48 Fresh: Western cut, 1.51 Frozen: Head-on, 1.13 Fresh: Head-on, 1.16

Sablefish Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.37 Fresh: Western cut, 1.40 Frozen: Head-on, 1.09 Fresh: Head-on, 1.11

LingCod Frozen: Japanese Cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western Cut, 1.33 Fresh: Western cut, 1.36 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Pacific Cod Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.26 Fresh: Western cut, 1.28 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Arrowtooth Flounder Frozen: Head-on, 1.16 Fresh: Head-on, 1.14 Frozen: Head-off, 1.43 Fresh: Head-off, 1.39 Frozen: Head-off-tailed 1.54 Fresh: Head-off-tailed 1.49

Other flounders and soles Frozen: Head-on, 1.20 Fresh: Head-on, 1.22 Frozen: Head-off, 1.60 Fresh: Head-off, 1.64

Skates Fresh: Flap/Wing, 2.45

All of the above conversion factors include a 2 percent ice/slime allowance for fresh product and a 4 percent glaze allowance for frozen product.

17. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), and subject to subsection 17(2) below, the vessel master is authorized to engage in fishing activities, that may incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Pursuant to subsections 73(2) (c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and alive, is released in a manner that causes it the least harm.

COMMUNAL PART 2 [February 15, 2017]

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Part 1

This Part applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

GROUNDFISH TRAWL Licence 2018

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FT 3 2018

GROUNDFISH TRAWL Licence 2018 Date Issued: 09 May 2018

Licensed for: Commercial Fishing Expiry Date: 20 Feb 2019

Licence Holder:

FIN: 124113

NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:

VRN 30176
DOT 816571
Vessel MEGA BITE
Vessel OAL 11.66 Meters
Gross Tonnage 25.12 Cubic Meters
Net Tonnage 11.81 Cubic Meters

Reported Vessel Owner:

FIN: 104978
MCNEILL FISHING LTD
515 5TH AVENUE WEST
PRINCE RUPERT BC
V8J 1T8

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: GROUNDFISH

Gear: TRAWL

Option: GROUNDFISH OPTION B

EACH GROUNDFISH TRAWL VESSEL OWNER/MASTER MUST ENSURE THAT A COPY OF THE PERSONALIZED REQUIREMENT TO CARRY AN AT-SEA OBSERVER LETTER IS KEPT ON BOARD THE VESSEL AT ALL TIMES.

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON FEBRUARY 20, 2018. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON JUNE 30, 2017.

TRANSPORTING FISH PERMITTED. SEE PART 2 OF LICENCE CONDITIONS.

Date Printed: 09 May 2018

Licence Serial No.: 458435

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Version Date: 19-Feb-2018

CONDITIONS OF 2018/2019 GROUNDFISH TRAWL LICENCE Licence Period: February 21, 2018 to February 20, 2019 Option B
Authority

The Department of Fisheries and Oceans has authority to set licence conditions under subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the groundfish trawl fishery obtain a copy of the current Integrated Groundfish Fisheries Management Plan from the Department of Fisheries and Oceans. The management plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the Fisheries Act, the regulations or conditions, the Act, regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for groundfish by means of a bottom trawl net.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"container" means a bag, box, tray, tote, frozen block or anything that contains fish.

"date of landing" means the date of commencement of landing.

"Department (DFO)" means the Department of Fisheries and Oceans.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"designated service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Integrated Quota Management Inc. of Vancouver, B.C.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 8 of these conditions.

"electronic hail software" means an electronic-based hail program that meets the minimum specifications set out in subsection 6(1)of these conditions.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department for licensing and other fisheries management purposes.

"Fishery Operations System (FOS)" means the Department's database into which all fishing activity information shall be entered.

"functionality test certificate number(FTCN)" means the unique number assigned by an EM system technician certifying that an EM system has been installed and is fully functional.

"Hail-out Report" means the report made to the designated groundfish hail service provider prior to commencement of a fishing trip. (See section 6).

"Hail-in Report" means the report made to the designated groundfish hail service provider prior to landing fish. (See section 9).

"landed" means having offloaded catch onto land.

"landing" means the offloading of catch onto land.

"mesh size" means the total length of twine measured along two contiguous sides of a single mesh, including the distance across the knot joining those sides but not including any other knots.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species and quantities of fish that are permitted to be taken:

(1) Subject to the quantities of fish set out in subsections 1(2) and 1(3), this licence authorizes the licensed vessel to make a maximum of fifteen landings each calendar month during the period February 21, 2018 to February 20, 2019.

(2) This licence authorizes the licensed vessel to retain a maximum of: (a) 0 pounds (approximately 0 tonnes) round weight of all groundfish species set out in Appendix

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I, combined, with the exception of sablefish, Petrale Sole, Pacific Cod, and Spiny Dogfish. (b) 0 pounds (approximately 0 tonnes) round weight of sablefish; (c) 0 pounds (approximately 0 tonnes) round weight of Petrale Sole; (d) 0 pounds (approximately 0 tonnes) round weight of Pacific Cod and; (e) an unlimited amount of Spiny Dogfish.

(3) An additional 10 percent of the permitted quantity of groundfish set out in paragraph 1(2)(a) may be landed provided that none of the additional quantity are sablefish, Petrale Sole, or Pacific Cod.

3. Prohibited Species:

When fishing under the authority of Part 1 of this licence the following species shall not be retained and shall be returned to the water immediately upon capture, in the manner that causes the least harm.

Eulachon Thaleichthys pacificus Lingcod Ophiodon elongatus Pacific Halibut Hippoglossus stenolepis Salmon species Onchorhynchus spp. Pacific Herring Clupea harengus pallasi Green Sturgeon Acipenser medirostris White Sturgeon Acipenser transmontanus Wolf-eels Anarrhichthys ocellatus Basking Shark Cetorhinus maximus Tope (Soupfin) Shark Galeorhinus galeus Bluntnose Sixgill Shark Hexanchus griseus All Rockfish Sebastes spp. All thornyheads Sebastolobus spp.

3. Waters in which fishing is permitted:

Fishing by bottom trawl is permitted only within those waters of Areas 13 to 20 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48 in which the closed areas and times fixed by regulations have been varied to allow fishing by bottom trawl gear.

4. The type and size of fishing gear permitted to be used:

(1) Only bottom trawl nets are permitted to be used; midwater trawl nets are not permitted.

(2) Subject to subsection 4(3), the mesh size in any part of a bottom trawl net, including the cod-end, shall not be less than 76 mm.

(3) In Areas 13 to 20 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, the mesh size in a bottom trawl net shall not be less than 108 mm in the final 50 meshes, including the cod-end. In all other parts of a bottom trawl net, the mesh size shall not be less than 76 mm.

(4) Where a minimum mesh size is prescribed, no person shall use any device by means of which openings that are smaller in size than the original mesh are created.

5. Transport and transhipment requirements:

(1) All groundfish taken under authority of this licence shall be transported by this

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

licensed vessel to land.

(2) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

6. Information reports required prior to the commencement of a trip:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider by either means described in subsection 6(1)or subsection 6(2) set out below.

The person identified as the vessel master in section 6 shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) If the Hail-out Report is submitted electronically to the designated groundfish hail service provider:

The vessel master shall, not less than twenty-four (24) hours prior to the commencement of a fishing trip, provide the following information (hereinafter referred to as a Hail-out Report) and obtain a hail-out number by contacting the designated groundfish hail service provider using the electronic hail software supplied by the service provider. The Hail-out Report must include the following information: (a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

The vessel master must use the approved electronic hail software from the designated groundfish hail service provider that has been installed on an onboard computer that uses an Android operating system 4.0.3 or higher that has the ability to send and receive e-mail;

(2) If the Hail-out Report is submitted by telephone to the designated groundfish hail service provider:

The vessel master shall, not less than twenty-four (24) hours prior to the commencement of a fishing trip provide the following information (hereinafter referred to as a Hail-out Report) and obtain a hail-out number from the designated groundfish hail service provider by calling 1-866-658-0890: The Hail-out Report must include the following information (a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

(2) Hail-out Number: (a) Upon completing a Hail-out Report, the vessel master shall

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

receive a unique hail-out number from the designated groundfish hail service provider. (b) The vessel master shall record the hail-out number in the vessel's Groundfish Trawl Log Book or in the vessel's electronic logbook.

(3) Cancellation of fishing trip:

Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall notify DFO through the designated groundfish hail service provider either electronically or by calling 1-866-658-0890 and make a Hail-in Report to indicate the trip has been cancelled and that no fishing occurred. A Cancellation Hail-in Report shall be made no later than three days after making the Hail-out Report.

7. At-sea monitoring:

The vessel master shall ensure that at-sea monitoring is conducted for all vessel activities conducted under the authority of this licence by means of either: (1) a designated groundfish at-sea observer carried on board the vessel; or (2) the use of a functioning electronic monitoring (EM) system as described in section 8 on board the vessel.

8. Electronic Monitoring (EM) System:

(1) The vessel master, when using an EM system to meet the at-sea monitoring requirement set out in section 7, shall ensure that the EM system on board the vessel meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter insert time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor (where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure that all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the electronic monitoring (EM) system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing and hail-in in as soon as possible.

(5) The vessel master shall provide to the designated EM system service provider all sensor and video data from the EM system for each monthly fishing period in which fishing occurred within seven (7) days of the end of that month.

(6) The licence holder or vessel master shall arrange to have the EM service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System (FOS).

(7) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM system sensor and imagery data to the Department.

9. Requirement for the vessel master to report information from sea:

(1) The vessel master shall report the following information (hereinafter referred to as a Hail-in Report) to the designated groundfish hail service provider as soon as fishing ceases either electronically by using the electronic hail software supplied by the service provider or by calling 1-866-658-0890:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) date, time and location of landing of the fish; (e) name of the fish buying station where fish are to be landed or the location of public sales or the name of the processor in the United States where fish are to be landed; and (f) estimated total round weight of fish on board.

(2) Upon completing the Hail-in Report, the vessel master shall record the unique Hail-in number supplied by the designated groundfish hail service provider in the Groundfish Trawl Log Book or in the vessel's electronic logbook.

(3) Requirement to enter hail-in information into DFO's FOS system

The vessel master shall arrange to have the hail-in information submitted to the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

designated groundfish hail service provider entered into DFO's Fishery Operations System (FOS).

10. Records that the vessel master shall keep:

(1) Groundfish Trawl Log Book

(a) The vessel master shall keep a record of all fishing activity carried out under the authority of this licence in either a DFO approved paper Groundfish Trawl Log Book or a DFO approved electronic Groundfish Trawl Log Book. (b) The vessel master shall report all marine mammal interactions during fishing trips in the Integrated Groundfish Fishing Log. For the purpose of defining lethal and non-lethal marine mammal interactions, interactions include bycatch, collision, and all sightings of marine mammals entangled in fishing gear.

(c) The Groundfish Trawl Log Book shall be kept in the manner set out in the example in the paper Groundfish Trawl Log Book set out in Appendix 8 (Groundfish Trawl Commercial Harvest Plan) of the current Groundfish Integrated Fisheries Management Plan or a DFO approved electronic Groundfish Trawl Log Book.

(d) The information shall be recorded in either the paper Groundfish Trawl Log Book or a DFO approved electronic Groundfish Trawl Log Book, for each tow, immediately after completion of the tow.

(e) The paper Groundfish Trawl Log Book or a DFO approved electronic Groundfish Trawl Log Book shall be made available for inspection upon the request of an observer, a fishery officer or a fishery guardian.

(f) The completed original paper Groundfish Trawl Log Book pages and yellow copies shall be provided to the observer attending the landing of the fish.

(g) The vessel master shall ensure that the Groundfish Trawl Log Book is available for use prior to fishing, and that sufficient pages and or digital memory in the DFO approved electronic logbook is available to cover any fishing trip.

(h) All recording in the paper Groundfish Trawl Log Book shall be in ink. If an error is made while completing an entry, the entry shall be crossed out. Erasure of an entry in the Groundfish Trawl Log Book is not permitted.

(i) The vessel master shall arrange for all fishing information recorded in either the paper Groundfish Trawl Log Book or in the DFO approved electronic Groundfish Trawl logbook to be entered into the Departmental Fishery Operations System (FOS) within forty eight (48) hours of completion of the fishing trip.

(2) Groundfish Trawl Validation Record Book

(a) A Groundfish Trawl Validation Record Book shall be kept on board the vessel at all times and shall be made available for inspection and use upon the request of an observer, a fishery officer or a fishery guardian. A Groundfish Trawl Validation

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Record Book will be supplied by the designated service provider.

(b) At any time, including at the completion of a landing, an observer shall enter information regarding the weight and species of fish caught, the weight and species of fish released at sea and the weight and species of fish landed, in the Groundfish Trawl Validation Record Book. The vessel master shall sign and date each original Groundfish Trawl Validation Record Book page as directed by an observer. All signed original Record Book pages shall be removed and retained by the observer.

(c) The licence holder or vessel master shall arrange for all landing information to be entered into the Departmental Fishery Operations System (FOS) within two (2) days of completion of the fishing trip.

(3) Fish Slips

(a) The vessel master shall keep records, in the form commonly known as a fish slip, of all fish landed under the authority of this licence. Each record shall contain the following information:

(i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales or the name of the processor in the United States accepting delivery; (vi) date of landing; (vii) number of days fished in each Area; (viii) landed weight of each groundfish species reported separately in pounds; (viii) method of dressing catch, by species; and (ix) price paid per pound, by species.

(b) The vessel master shall ensure that the fish slip is sent not later than thirty (30) days after landing:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, B.C. V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604) 596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the Fisheries Management Data Unit message line at (604) 666-2716.

11. Location and times at which landing of fish from the vessel is permitted:

(1) All groundfish caught and retained under the authority of this licence shall be landed prior to February 21, 2019.

(2) Subject to subsection 11(3), all fish caught under the authority of this licence, shall be landed at one of the following locations:

Beaver Cove Campbell River Chemainus Coal Harbour Comox Courtenay Cowichan Bay Deep Bay French Creek Ladysmith Nanaimo Port Hardy Sooke

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Metro Vancouver Victoria Sidney

In the United States (Washington State):

Anacortes Bellingham Blaine

(3) All fish caught under the authority of this licence shall be landed at a fish buying station licenced under the Fisheries Act (Province of British Columbia) except: (a) fish sold directly to the public under authority of a fisherman's vending licence issued under the Fisheries Act (Province of British Columbia); or (b) fish landed in the United States at one of the locations listed in subsection 11(2).

12. Method permitted for landing of fish from the vessel and verification by an observer of the weight and species of any fish caught and retained:

(1) No fish shall be landed unless an observer is present and authorizes the commencement of weight verification.

(2) The weight and species of all fish landed from the vessel shall be verified by an observer.

(3) When any fresh fish, including live fish, taken under authority of this licence are landed, all fresh fish, including live fish on board the vessel, shall be landed at the same time.

(4) When any frozen fish taken under authority of this licence are landed, all frozen fish on board the vessel shall be landed at the same time.

(5) No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

(6) The vessel master shall provide to the observer verifying the landing access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

(7) The licence holder or vessel master shall arrange for all catch and landing information to be entered into the Departmental Fishery Operations System (FOS) within two (2) days of completion of the fishing trip.

13. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing the fish and in the presence of an observer:

(a) Where fish are not placed in containers prior to landing and are not frozen at sea: (i) all fish shall be sorted and weighed by individual species; (ii) all fish segregated by species shall be weighed prior to intermixing of those species; (iii) if fish are placed into totes or other containers, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use; (iv) totes or other containers that have been weighed and labelled before the landing are subject to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

weight verification at any time by an observer; and (v) if fish are transported directly from the vessel across an in-line scale (e.g., automated hopper) then the weight recorded shall be the net weight.

(b) Where fish are placed in containers prior to landing and are not frozen at sea: (i) each container shall contain only one species; (ii) each container shall be clearly marked as to the species contained therein; (iii) all containers shall be accurately weighed; and (iv) a sample of no less than 15 percent of each type of container shall be taken, as directed by an observer. The containers shall be emptied and the contents sorted where necessary and weighed by individual species.

(c) Where fish are placed in containers prior to landing and are frozen at sea: (i) in the case of all groundfish, each container shall contain only one species; (ii) each container shall be clearly marked as to the species contained therein; (iii) all containers shall be accurately weighed; and (iv) a sample of no less than 15 percent of each type of container shall be taken, as directed by an observer. The containers shall be emptied and the contents sorted where necessary and weighed by individual species.

(2) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by the Legal Metrology Branch, Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(3) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and the ice/slime or glaze allowance.

(4) There shall be a 2 percent allowance for ice/slime in the case of fresh fish and a 4% allowance for glaze in the case of frozen fish.

(5) In the case of dressed fish, the following conversion factors shall be used to calculate net round weights:

Sablefish

Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.37 Fresh: Western cut, 1.40 Frozen: Head-on, 1.09 Fresh: Head-on, 1.11

Lingcod

Frozen: Japanese Cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western Cut, 1.33 Fresh: Western cut, 1.36 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Pacific Cod

Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.26 Fresh: Western cut, 1.28 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Arrowtooth Flounder Frozen: Head-on, 1.16 Fresh: Head-on, 1.14 Frozen: Head-off, 1.43 Fresh: Head-off, 1.39 Frozen: Head-off-tailed 1.54 Fresh: Head-off-tailed 1.49

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Other flounders and soles Frozen: Head-on, 1.20 Fresh: Head-on, 1.22 Frozen: Head-off, 1.60 Fresh: Head-off, 1.64

Skates

Fresh: Flap/Wing, 2.45

All of the above conversion factors include a 2% ice/slime allowance for fresh product and a 4 percent glaze allowance for frozen product.

14. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), the vessel master is authorized to engage in fishing activities, subject to subsection 13(2) below that may incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

PART 2 [February 15, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; and (l) number of pieces landed for each species by grade and method of dressing of fish.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

HALIBUT Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FL 43 2017

HALIBUT Licence 2017 Date Issued: 12 Jan 2018

Licensed for: Commercial Fishing Expiry Date: 20 Feb 2018

Licence Holder:

FIN: 124113

NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:

VRN 30176
DOT 816571
Vessel MEGA BITE
Vessel OAL 11.66 Meters
Gross Tonnage 25.12 Cubic Meters
Net Tonnage 11.81 Cubic Meters

Reported Vessel Owner:

FIN: 104978
MCNEILL FISHING LTD
515 5TH AVENUE WEST
PRINCE RUPERT BC
V8J 1T8

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: HALIBUT

Gear: HOOK AND LINE

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON FEBRUARY 20, 2018. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON JUNE 30, 2017.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 12 Jan 2018

Licence Serial No.: 451765

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

This report may contain data rated up to Protected A.
Do not release this data to external parties.

Version Date: 15-Feb-2017

CONDITIONS OF 2017/2018 COMMUNAL HALIBUT LICENCE Licence Period: February 21, 2017 to February 20, 2018

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the halibut fishery obtain a copy of the current Groundfish Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the Fisheries Act, the regulations or conditions, the Act, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for those species of fish set out in section 1 of this Part.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"date of landing" means the date of commencement of landing.

"Department (DFO)" means the Department of Fisheries and Oceans.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C. "designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces, and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under a FSC Communal Fishing Licence.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11).

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15).

"Integrated Groundfish Fishing Log" means the electronic or paper log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part.

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per Groundfish Management Area.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A. Do not release this data to external parties.

Department at the time the vessel is registered as a fishing vessel.

1. Species and quantities of fish that are permitted to be taken (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) The licensed vessel is permitted to catch and retain those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item.

Column I Column II Column III Species GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(2) Rockfish: (a) Other rockfish (as set out in Appendix 1): the quantity of other rockfish landed from one fishing trip shall not exceed 5,000 pounds (2268 kg) (round weight).

(b)Bocaccio: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of halibut (fresh, dressed head-off weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of halibut (fresh, dressed head-off weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish (as set out in Appendix 1).

(3) Pacific Cod: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight).

(4) Sole, Flounder, and Skate (excluding Big Skate and Longnose Skate): There is no limit to the amount of sole, flounder, and skate (excluding Big Skate and Longnose Skate) that can be landed from any one fishing trip.

(5) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(6) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

(7) When a vessel is fishing under authority of both a halibut licence and sablefish licence and has obtained two hail-out numbers to fish both licences simultaneously, the quantities of other rockfish, Bocaccio, and Pacific Cod permitted to be landed as set out in subsections 1(2)(a) to 1(3) inclusive of this licence are 0 pounds. (Refer to sablefish licence conditions subsection 1(2)(a) to 1(3) inclusive for permitted quantities when fishing both licences).

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. The waters in which fishing is permitted to be carried out:

(1) Subject to subsections 6(2) and 6(3), fishing under authority of this licence is permitted during those times when persons fishing under authority of a Category L licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish, in that area and during that time.

(2) Subject to subsection 6(3), and subject to variation of the close times set out in the Pacific Fishery Regulations, 1993, fishing under the authority of this licence is permitted within Groundfish Management Areas 3C, 3D, 5A, 5B, 5C, 5D, and 5E.

(3) When this licensed vessel is hailed out on both a directed halibut fishery under the authority of this licence, and a directed sablefish fishery under the authority of a sablefish licence, and has obtained two hail-out numbers to fish both licences simultaneously, the waters in which fishing is permitted to be carried out are: Areas 1, 2, 101, 108 to 111, 121, 123 to 127, 130, 142, Subarea 102-3 and that portion of Subarea 102-2 that lies south of a line from 52 degrees 10.00 minutes north latitude and 130 degrees 57.395 minutes west longitude to 52 degrees 27.020 minutes north latitude and 130 degrees 16.621 minutes west longitude, subject to variation of the close times set out in the Pacific Fishery Regulations, 1993.

7. Fishing gear permitted to be used and the manner in which it may be used:

(1) Hook and line gear.

(2) No longline gear shall be left set and/or unattended during a vessel's return to port. The vessel master shall retrieve, and have on board, all longline gear prior to delivering their catch to port.

8. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A. Do not release this data to external parties

(3) Subject to subsection 8(4) all halibut shall either be landed: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where are frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

9. Release of rockfish:

No rockfish shall be released to sea.

10. Transport and transhipment requirements:

(1) All fish taken under authority of this licence shall be transported to land by the vessel named in this licence.

(2) The vessel fishing under authority of this licence shall not have on board any fish that have been landed and validated.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1)).

(1) Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 22, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3)(a) Subject to subsection 11(3)(b) the vessel master shall hail-out for one directed groundfish fishery only. (b) The vessel master may fish under authority of a halibut licence and sablefish licence simultaneously after obtaining two hail-out numbers to fish both licences from the designated groundfish hail service provider or the designated groundfish electronic hail service provider.

(4) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to his or her service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

12. At-sea monitoring:

When fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (1) a designated groundfish at-sea observer carried on board the vessel; or (2) the use of a functioning electronic monitoring (EM) system on board the vessel as described in section 14.

13. Fishing and Related Activity Records:

(1) Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence: (a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; and (iii) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch in pieces, by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to carrying a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all fishing gear being retrieved from the water and all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras. (6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or vessel master shall arrange to have the service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report:

Prior to cancelling or completing a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 15(1)).

(1) Subject to subsection 15(2) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 22, an estimate in pounds by species of fish that was caught under the authority of the FSC Communal Fishing Licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught.

16. Location and times at which landing of fish from the vessel is permitted:

(1) Subject to subsection 16(2) and 16(3), no fish shall be retained after 12:00 h local time, November 7, 2017. All fish caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(2) Subject to subsection 16(3), no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(3) When an Area, Subarea or GMA closes to fishing for a species and fish of that species taken in the closed area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(4) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Bellingham, WA Blaine, WA

(5) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Method permitted for landing of fish from the vessel and verification of weight and species of fish caught and retained:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer.

(3) Subject to subsection 22(7), when any fish taken under authority of this licence are landed, all fish on board the vessel shall be landed at the same time.

(4) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(5) The vessel master shall provide the groundfish dockside observer attending the landing access to the vessel's fish holds, freezers and other fish storage areas at any time during and at the completion of the landing.

(6) Once landing has commenced, the vessel shall not leave the landing site unless permission from a groundfish dockside observer has been received to do so.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Schedule II - Other Species, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Schedule II - Other Species, Groundfish Trawl or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

18. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; (c) all containers shall be accurately weighed; and (d) a sample of no less than fifteen percent (15%) of each type of container shall be taken, as directed by an observer. The containers shall be emptied and the contents sorted where necessary and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head-off weight.

(9) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh, dressed head-off halibut:

Fresh, dressed head-off with ice and slime 0.98 Fresh, dressed head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed head-off with glaze 0.97 Frozen, dressed head-on with glaze 0.87 Frozen, round with glaze 0.74

(10) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed,1.54 Fresh: dressed, head-off-tailed, 1.49

Other flounders and soles: Frozen: dressed, head-on 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off, 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

20. Records that the vessel master shall keep:

(1) Integrated Groundfish Validation Record (a) An Integrated Groundfish Validation Record shall be obtained from a designated Groundfish dockside observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(3) Fish Slips (a) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence. (b) The vessel master shall ensure that fish slips are submitted not later than seven days after landing. Slips shall be mailed to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, B.C. V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the Fisheries Management Data Unit message line at (604)666-2716.

21. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(1) Subject to subsections 21(2) and 21(3), vessel masters fishing: (a) vessels less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) vessels 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) vessels more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) vessels more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of fishing vessels that have no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 21(1) at all times when setting longline gear except:

(a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

22. Dual Fishing

The vessel master shall not engage in dual fishing unless the following conditions are met:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the aboriginal organization; (b) the full name of the vessel designated by the aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 22(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 22(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number the aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the aboriginal organization who was advised of the landing per 22(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

23. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

24. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of

This report may contain data rated up to Protected A.
Do not release this data to external parties
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Do not release this data to external parties.

Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upón validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49
